Footnotes

- (1) Represents annualized distribution rate using current monthly dividend of \$0.100/share and market price/share as of 6/30/20. The Fund declares a set of monthly distributions each quarter in amounts closely tied to its recent average monthly net income. As a result, GSO expects that the monthly distribution amounts for the Fund will vary quarter-to-quarter.
- (2) Returns for periods greater than one year are annualized. BGX NAV returns assume distributions are reinvested pursuant to the Fund's dividend reinvestment plan. Performance data quoted represents past performance and does not guarantee future results.
- (3) Numbers may not sum to 100.00% due to rounding. The Fund's Cash and Other represents net cash and other assets and liabilities, which includes amounts payable for investments purchased but not yet settled and amounts receivable for investments sold but not yet settled. At period end, the amounts payable for investments purchased but not yet settled exceeded the amount of cash on hand. The Fund uses funds from its leverage program to settle amounts payable for investments purchased, but such amounts are not reflected in the Fund's net cash.
- (4) The Fund utilizes leverage as part of its investment strategy and currently has borrowings under a credit facility as well as mandatory redeemable preferred shares. The Fund's leverage under the credit facility without the use of mandatory redeemable preferred shares was 32.14% as of 6/30/20.
- (5) Figures exclude any equity investments in the Fund.
- (6) Loan durations are based on the actual remaining time until LIBOR is reset for each individual loan.
- (7) Since inception returns for the blended benchmark are based on the Fund's inception date of 1/26/11.

Certain countries have been susceptible to epidemics, most recently COVID-19, which may be designated as pandemics by world health authorities. The outbreak of such epidemics, together with any resulting restrictions on travel or quarantines imposed, has had and will continue to have a negative impact on the economy and business activity globally (including in the countries in which the Funds invest), and thereby is expected to adversely affect the performance of the Funds' Investments. Furthermore, the rapid development of epidemics could preclude prediction as to their ultimate adverse impact on economic and market conditions, and, as a result, presents material uncertainty and risk with respect to the Funds and the performance of their Investments.
