The outbreak of such epidemics, together with any resulting restrictions on travel or quarantines imposed, has had and will continue to have a negative impact on the economy and business activity globally (including in the countries in which the Company invests), and thereby is expected to adversely affect the performance of the Company's Investments. Furthermore, the rapid development of epidemics could preclude prediction as to their ultimate adverse impact on economic and market conditions, and, as a result, presents material uncertainty and risk with respect to the Company and the performance of its Investments.** All investments to be held by the Company involve a substantial degree of risk, including the risk of total loss. The value of shares and the income from them is not guaranteed and can fall as well as rise due to stock market and currency movements. When you sell your investment you may get back less than you originally invested. You should always seek expert legal, financial, tax and other professional advice before making any investment decision.
