Market and Company Commentary

- Global sub-investment grade credit continued to perform well in February. US and European loans returned 0.7% and 0.8%, bringing year-to-date returns to 2.0% and 1.7%, respectively⁽⁹⁾. In the US, retail demand drove loan prices higher following a spike in Treasury yields, whilst the wave of loan repricing continued to push primary spreads lower. In Europe, decreased primary issuance and higher CLO creation pushed loan prices back to pre-COVID-19 levels⁽¹⁰⁾. The economic recovery also continues to gather pace, reflected in corporate revenues, which have beaten analyst estimates at a record pace for the last few quarters⁽¹¹⁾.
- The Company continues to actively manage the underlying portfolio by deploying capital into the primary pipeline, carefully managing how we are positioned across COVID-19 recovery impacted names, and by reducing exposure in lower risk issuers and longer duration bonds that we view as effectively fully valued.
- Compared to previous periods of spread compression, we believe the portfolio is now better positioned to offset the effects of falling spreads due to greater diversification across CLO vintages (smaller concentration in any given vintage) and an ability to more frequently refinance CLO liabilities.
- In the CLO market, global equity arbitrage increased to the highest level since 2016 driven by falling CLO debt costs. This is supportive of elevated levels of CLO issuance and subsequent demand for loans, further increasing the share of the loan market held by CLOs⁽¹²⁾.
- In February, the Thayer Park, Dartry Park, and Clarinda Park CLOs were reset, extending the reinvestment period of the transactions by four years from the date of reset, whilst concurrently reducing their weighted average cost of capital. By extending the period in which the Company's CLO equity receive distributions whilst also reducing its funding costs, we believe this will increase the net interest and duration of cash flows, and be immediately accretive to the NAVs of those CLOs.
- As reported in CreditFlux, minority equity of Deer Park held by the Company was sold at a record price for European CLO equity at the time of sale with a cover price of 116, highlighting the strength of the Blackstone Credit CLO platform and demand for CLO equity⁽¹³⁾.
- 27 of the Company's 45 CLOs are callable, with 18 of these having a weighted average cost of debt higher than recently priced new issue Blackstone Credit CLOs⁽¹⁴⁾. As we look ahead, we expect to capitalise on these refinancing opportunities, aiming to reduce the weighted average cost of capital, extend liabilities where appropriate, and improve expected IRRs, in an effort to maintain and increase net interest margins.

BGLF Investment Objective

- BGLF's investment objective is to provide shareholders with stable and growing income returns, and to grow the capital value of its investment portfolio by exposure to European and US floating rate senior secured loans and bonds, both directly and indirectly. The Company achieves its investment objective solely through its investment in Blackstone Corporate Funding ("BCF")⁽¹⁵⁾, which is an investor in global floating rate senior secured loans.
- BCF funds its investment in European and US loans using a variety of funding sources, including equity capital, its 3-year syndicated financing facility, notes issued to the Company, and non-recourse leverage obtained from retaining Income Notes in collateralised loan obligations ("CLOs") that BCF has established.

Endnotes

BGLF does not pay any management or performance fees. The Adviser earns a management and performance fee on CLOs it manages in which BCF invests. CLO management fees are typically 0.5% per annum on the CLO assets. The Adviser rebates 20% of the CLO management fees it receives to BCF, pro-rata to CLO Income Notes in which BCF invests directly or indirectly. The Rollover Portfolio Manager shall not be entitled to any management fee or performance fee in relation to the performance of the services under the Rollover Portfolio Management Agreement. Capitalised terms used but not defined herein have the meanings assigned to them in the Company's Prospectus dated 23 November 2018.

- (1) Dividend Yield presented as €0.07 per annum, given the first three quarters of a dividend of €0.015 per share, a final quarter dividend of €0.025 per share and the share price as of 31 December 2020. Please see the BGLF announcement on 22 January 2021 for more information. **The target dividend is a target only and not a profit forecast.** It should not be taken as an indication of BGLF's expected future performance or results. There is no guarantee that the target dividend can or will be achieved or can be continued if achieved. There may be other additional risks, uncertainties and factors that could cause the returns generated by BGLF to be materially lower than the target dividend. Accordingly, investors should not place any reliance on such target.

- (15) Blackstone Corporate Funding DAC ("BCF") was incorporated in Ireland on 16 April 2014.
- (16) Portfolio data by Issuer, Industry, Country, Rating and Loan Price Bands are presented using the gross par amount of assets held directly and indirectly by BCF. Indirect asset holdings are held within CLOs BCF has invested in. The total par amount of all assets held within each CLO are included on a fully consolidated basis and added to those assets held directly by BCF. Portfolio holdings, Rating, Country, Industry and Loan Price Band distributions are subject to change and are not recommendations to buy or sell any security. CLO Note and CLO warehouse investments are excluded from all figures. Data calculated by Blackstone Credit (fka GSO).
- (17) Calculated on BCF's net assets as of 28 February 2021.
- (18) Data for EUR and US CLOs calculated based on data available on Intex as of 12 March 2021. Data for US CLO Warehouses and Directly Held Loans calculated by Blackstone Credit. Leverage is assumed to be 4:1 for US CLO Warehouses and 2:1 for Directly Held Loans. Stewart Park CLO and Dorchester Park CLO excluded from US CLO leverage calculation.
- (19) US CLO Warehouses may have an additional third party first loss provider invested alongside of BCF.
- (20) Position as a percent of tranche represents the percentage ownership of Blackstone CLO Management LLC ("BCM"), in which BCF is invested and owns 100% of Series 2 and Series 3 of BCM through its PPN investment in BCM. On 1 July 2020, Blackstone / GSO US Corporate Funding Ltd. ("BGUCF") was merged into the BCM, at which time 86.02% of the BCM's ownership of BGUCF, of each asset was transferred to BCM. As this resulted in BCM holding less than the majority of certain CLO positions, BGM has since purchased a small amount of these CLOs in order to maintain a majority economic position in each CLO investment.
- (21) Warehouse Investment is calculated as the cumulative trade date USD proceeds and equivalent EUR proceeds utilised to fund each warehouse.
- (22) The Current Loan Exposure for the CLO Warehouse Investments is reflected on a trade date basis while the Investment amount is reflected on a settlement date basis.

Key risk factors as determined by the entities distributing this communication

All investments are subject to risk, including the loss of the principal amount invested. Past performance is not necessarily indicative of future results, and there can be no assurance that BGLF will achieve comparable results, will meet its target returns, achieve its investment objectives or be able to implement its investment strategy. All investments to be held by BGLF involve a substantial degree of risk, including the risk of total loss. The value of shares and the income from them is not guaranteed and can fall as well as rise due to stock market and currency movements. When you sell your investment you may get back less than you originally invested. You should always seek expert legal, financial, tax and other professional advice before making any investment decision.

Material changes impacting the Company's business. Material changes affecting global debt and equity capital markets may have a negative effect on the Company's business, financial condition, results of operations, NAV and/or the market price of the Shares. Unexpected volatility, illiquidity, governmental action, currency devaluation or other events in the global markets could impair the value of the Company's investments and could cause some or all of the Company's investments to incur substantial losses.

Investment strategy risk. Market factors may result in the failure of the investment strategy. Strategy-specific losses may result from excessive concentration by multiple market participants in the same investment or general economic or other events that adversely affect particular strategies (for example the disruption of historical pricing relationships). The investment strategy employed by the Company is speculative and involves substantial risk of loss in the event of a failure or deterioration in the financial markets.

Risks associated with fully subordinated investments. The Company is exposed to the most subordinated tranche of a CLO and all payments of principal and interest on such CLO income notes are fully subordinated. In addition, investments in loan warehouses are expected to be the most subordinated tranche of debt issued in the loan warehouse. CLO income notes and certain investments in loan warehouses are volatile, and interest and principal payments in respect of such investments are based on residual amounts available, if any, to make such payments, and accordingly interest and principal payments payable on such instruments are not fixed.

Nature of the loans and bonds. The CLOs in which the Company is invested will commonly invest in a portfolio of loans and bonds consisting at the time of acquisition of senior secured obligations, unsecured senior loans, second lien loans, mezzanine obligations and high yield bonds, as well as certain other investments, all of which will have greater credit and liquidity risk than investment grade sovereign or corporate bonds or loans. The lower rating of below investment grade collateral reflects a greater possibility that adverse changes in the financial condition of an obligor or in general economic conditions or both may impair the ability of the relevant obligor, as the case may be, to make payments of principal or interest. Such investments may be speculative.

Discount to NAV. The Shares may trade at a discount to the Net Asset Value per Share (of the relevant class) and shareholders may be unable to realise their Shares on the market at the Net Asset Value per Share (of the relevant class) or at any other price. The discount may arise for a variety of reasons, including due to market or economic conditions or to the extent investors undervalue the Underlying Companies.

Valuation Risk. The Company's investments may be difficult to value accurately and, as a result, the Company may be subject to valuation risk. The Company is entitled to rely, without independent investigation, upon pricing information and valuations furnished by third parties, including pricing services and valuation sources.

Conflicts of Interest. There may be occasions when the Company and their affiliates will encounter potential conflicts of interest in connection with Blackstone's activities including, without limitation, the allocation of investment opportunities, relationships with Blackstone and its affiliates' investment banking and advisory clients, and the diverse interests of investors.

Epidemics/Pandemics. Certain countries have been susceptible to epidemics which may be designated as pandemics by world health authorities, most recently COVID-19. The outbreak of such epidemics, together with any resulting restrictions on travel or quarantines imposed, has had and will continue to have a negative impact on the economy and business activity globally (including in the countries in which the Company invest), and thereby is expected to adversely affect the performance of the Company's Investments. Furthermore, the rapid development of epidemics could preclude prediction as to their ultimate adverse impact on economic and market conditions, and, as a result, presents material uncertainty and risk with respect to the Company's and the performance of their Investments.

Blackstone undertakes no obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise.

Highly Competitive Market for Investment Opportunities. The activity of identifying, completing and realising attractive investments is highly competitive, and involves a high degree of uncertainty. There can be no assurance that the Company, through its investment in BCF, will be able to locate, consummate and exit investments that satisfy its objectives or realise upon their values or that the Company will be able to fully invest its capital. There is no guarantee that investment opportunities will be allocated to BCF, and in turn the Company, and/or that the activities of Blackstone's other funds will not adversely affect the interests of such Company.

Material, Non-Public Information. In connection with other activities of Blackstone, certain Blackstone personnel may acquire confidential or material non-public information or be restricted from initiating transactions in certain securities, including on a Company's behalf. As such, the Company may not be able to initiate a transaction or sell an investment. In addition, policies and procedures maintained by Blackstone to deter the inappropriate sharing of material non-public information may limit the ability of Blackstone personnel to share information with personnel in Blackstone's other business groups, which may ultimately reduce the positive synergies expected to be realised by the Company as part of the broader Blackstone investment platform.

No Assurance of Investment Return. Prospective investors should be aware that an investment in the Company is speculative and involves a high degree of risk. There can be no assurance that the Company will achieve comparable results, implement its investment strategy, achieve its objectives or avoid substantial losses or that any expected returns will be met. The Company's performance may be volatile. An investment should only be considered by qualified investors who can afford to lose all or a substantial amount of their investment. The Company's fees and expenses may offset or exceed its profits.

Reliance on Key Management Personnel. The success of the Company will depend, in large part, upon the skill and expertise of certain Blackstone professionals. In the event of the death, disability or departure of any key Blackstone professionals, the business and the performance of the Company may be adversely affected.

Please refer to the BGLF prospectus and most recent annual or interim reports for additional information on risk factors.

Important Disclosure Information

Important notice in relation to Blackstone Loan Financing Limited ("The Company" or "BGLF"):

This document has been issued by Blackstone Loan Financing Limited (the "Company"), and should not be taken as an inducement to engage in any investment activity and is for the purpose of providing information about the Company. This document does not constitute or form part of, and should not be construed as, any offer for sale or subscription of, or solicitation of any offer to buy or subscribe for, any share in the Company or securities in any other entity, in any jurisdiction, including the United States, Canada, Japan or South Africa nor shall it, or any part of it, or the fact of its distribution, form the basis of, or be relied on in connection with, any contract or investment decision whatsoever, in any jurisdiction.

This document, and the information contained therein, is not for viewing, release, distribution or publication in or into the United States, Canada, Japan, South Africa or any other jurisdiction where applicable laws prohibit its release, distribution or publication, and will not be made available to any national, resident or citizen of the United States, Canada, Japan or South Africa. The distribution of this document in other jurisdictions may be restricted by law and persons into whose possession this document comes must inform themselves about, and observe, any such restrictions. Any failure to comply with the restrictions may constitute a violation of the federal securities law of the United States and the laws of other jurisdictions.
