## Market and Company Commentary

- Global credit markets saw a continued recovery in November, propelled by promising macroeconomic data. Despite headwinds from tighter monetary policy, following the Fed's fourth consecutive 75bp hike, market sentiment improved significantly after the release of better-than-expected US inflation figures for October<sup>(8)</sup>. Similarly, Eurozone inflation edged down to 10%, easing from the previous month's all-time high and supporting hopes that Europe has already passed peak inflation. As investors returned to the market, leveraged loans were able to erase some of the losses from earlier in the year, returning 1.92% in Europe and 1.11% in the US for the month. Average prices also gained from €90.20 to €91.58 in Europe and \$91.78 to \$92.15 in the US<sup>(4)</sup>, while the LTM default rate remained flat at 1.7% in Europe and 1.59% in the US<sup>(9)</sup>.
- In line with the wider market recovery, primary CLO issuance slightly improved in November as managers priced \$8.6 billion across 21 deals in the US and €3.0 billion across eight deals in Europe. Despite a challenging environment for CLO technicals, 2022 is on course to be the second most productive year for new CLO issuances since 2018<sup>(10)</sup>. Primary spreads remained wide to secondary, with AAA notes widening by 25bp to 241bp in the US, while tightening by 4bp to 216bp in Europe<sup>(11)</sup>.
- Following a volatile two months, primary leveraged loan issuance improved as issuers returned to the market, skewed toward higher quality credits. BCF's CLO portfolios across both regions continued to reduce exposure to lower quality assets and rotate into higher conviction names. Asset prices across rating bands compressed further, allowing US CLOs to trade into higher rated loans, while European CLOs increased high yield exposure in issuers with upside potential that were trading at similar pricing levels.
- As loan prices picked up over the month, valuations for BCF's CLOs that are out of their reinvestment periods benefited from higher assumed sale prices. In Europe, CLO valuations also benefited from a combination of strong distributions and natural accretion in a non-interest paying month, while US valuations were generally lower on balance, unable to offset an increase in defaulted assets.
- BCF made an investment in the new €379 million Edmondstown Park CLO, marking BCF's 28<sup>th</sup> European CLO equity position, 49<sup>th</sup> position overall<sup>(12)</sup>, and fifth 2022 vintage CLO. As a testament to Blackstone's position as a premier CLO manager, Edmondstown Park's cost of debt was priced tighter compared to the previous European new issue CLO that priced on the same day<sup>(13)</sup>.

## BGLF Investment Objective

- BGLF's investment objective is to provide shareholders with stable and growing income returns, and to grow the capital value of its investment portfolio by exposure to European and US floating rate senior secured loans and bonds, both directly and indirectly. The Company seeks to achieve its investment objective solely through its investment in Blackstone Corporate Funding ("BCF")<sup>(14)</sup>, which is an investor in global floating rate senior secured loans.
- BCF funds its investment in European and US loans using a variety of funding sources, including equity capital, its 3-year syndicated financing facility, notes issued to the Company, and non-recourse leverage obtained from retaining Income Notes in collateralised loan obligations ("CLOs") that BCF has established.

## Key risk factors as determined by the entities distributing this communication

All investments are subject to risk, including the loss of the principal amount invested. Past performance is not necessarily indicative of future results, and there can be no assurance that BGLF will achieve comparable results, meet target returns, achieve its investment objectives or be able to implement its investment strategy. All investments to be held by BGLF involve a substantial degree of risk, including the risk of total loss. The value of shares and their income is not guaranteed and can fall as well as rise due to stock market and currency movements. When you sell your investment, you may get back less than you originally invested. You should always seek expert legal, financial, tax and other professional advice before making any investment decision.

**Material changes impacting the Company's business.** Material changes affecting global debt and equity capital markets may have a negative effect on the Company's business, financial condition, results of operations, NAV and/or the market price of the Shares. Unexpected volatility, illiquidity, governmental action, currency devaluation or other events in the global markets could impair the value of the Company's investments and could cause some or all of the Company's investments to incur substantial losses.

**Investment strategy risk.** Market factors may result in the failure of the investment strategy. Strategy-specific losses may result from excessive concentration by multiple market participants in the same investment or general economic or other events that adversely affect particular strategies (for example the disruption of historical pricing relationships). The investment strategy employed by the Company is speculative and involves substantial risk of loss in the event of a failure or deterioration in the financial markets.

**Risks associated with fully subordinated investments.** The Company is exposed to the most subordinated tranche of a CLO and all payments of principal and interest on such CLO income notes are fully subordinated. In addition, investments in loan warehouses are expected to be the most subordinated tranche of debt issued in the loan warehouse. CLO income notes and certain investments in loan warehouses are volatile, and Interest and principal payments in respect of such investments are based on residual amounts available, if any, to make such payments, and accordingly interest and principal payments payable on such instruments are not fixed.

**Nature of the loans and bonds.** The CLOs in which the Company is invested will commonly invest in a portfolio of loans and bonds consisting at the time of acquisition of senior secured obligations, unsecured senior loans, second lien loans, mezzanine obligations and high yield bonds, as well as certain other investments, all of which will have greater credit and liquidity risk than investment grade sovereign or corporate bonds or loans. The lower rating of below investment grade collateral reflects a greater possibility that adverse changes in the financial condition of an obligor or in general economic conditions or both may impair the ability of the relevant obligor, as the case may be, to make payments of principal or interest. Such investments may be speculative.

**Discount to NAV.** The Shares may trade at a discount to the Net Asset Value per Share (of the relevant class) and shareholders may be unable to realise their Shares on the market at the Net Asset Value per Share (of the relevant class) or at any other price. The discount may arise for a variety of reasons, including due to market or economic conditions or to the extent investors undervalue the Underlying Companies.

**Valuation Risk.** The Company's investments may be difficult to value accurately and, as a result, the Company may be subject to valuation risk. The Company is entitled to rely, without independent investigation, upon pricing information and valuations furnished by third parties, including pricing services and valuation sources.

**Conflicts of Interest.** There may be occasions when the Company and their affiliates will encounter potential conflicts of interest in connection with Blackstone's activities including, without limitation, the allocation of investment opportunities, relationships with Blackstone and its affiliates' investment banking and advisory clients, and the diverse interests of investors.

**Epidemics/Pandemics.** Certain countries have been susceptible to epidemics which may be designated as pandemics by world health authorities, most recently COVID-19. The outbreak of such epidemics, together with any resulting restrictions on travel or quarantines imposed, has had and will continue to have a negative impact on the economy and business activity globally (including in the countries in which the Company invest), and thereby is expected to adversely affect the performance of the Company's Investments. Furthermore, the rapid development of epidemics could preclude prediction as to their ultimate adverse impact on economic and market conditions, and, as a result, presents material uncertainty and risk with respect to the Company and the performance of its Investments.

Blackstone undertakes no obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise.

**Highly Competitive Market for Investment Opportunities.** The activity of identifying, completing and realising attractive investments is highly competitive, and involves a high degree of uncertainty. There can be no assurance that the Company, through its investment in BCF, will be able to locate, consummate and exit investments that satisfy its objectives or realise upon their values or that the Company will be able to fully invest its capital. There is no guarantee that investment opportunities will be allocated to BCF, and in turn the Company, and/or that the activities of Blackstone's other funds will not adversely affect the interests of such Company.

**Material, Non-Public Information.** In connection with other activities of Blackstone, certain Blackstone personnel may acquire confidential or material non-public information or be restricted from initiating transactions in certain securities, including on a Company's behalf. As such, the Company may not be able to initiate a transaction or sell an investment. In addition, policies and procedures maintained by Blackstone to deter the inappropriate sharing of material non-public information may limit the ability of Blackstone personnel to share information with personnel in Blackstone's other business groups, which may ultimately reduce the positive synergies expected to be realised by the Company as part of the broader Blackstone investment platform.

**No Assurance of Investment Return.** Prospective investors should be aware that an investment in the Company is speculative and involves a high degree of risk. There can be no assurance that the Company will achieve comparable results, implement its investment strategy, achieve its objectives or avoid substantial losses or that any expected returns will be met. The Company's performance may be volatile. An investment should only be considered by qualified investors who can afford to lose all or a substantial amount of their investment. The Company's fees and expenses may offset or exceed its profits.

**Reliance on Key Management Personnel.** The success of the Company will depend, in large part, upon the skill and expertise of certain Blackstone professionals. In the event of the death, disability or departure of any key Blackstone professionals, the business and the performance of the Company may be adversely affected.

Please refer to the BGLF prospectus and most recent annual or interim reports for additional information on risk factors.

**Russian Invasion of Ukraine.** On February 24, 2022, Russian troops began a full-scale invasion of Ukraine and, as of the date of this Material, the countries remain in active armed conflict. Around the same time, the United States, the United Kingdom, the European Union, and several other nations announced a broad array of new or expanded sanctions, export controls, and other measures against Russia, Russia-backed separatist regions in Ukraine, and certain banks, companies, government officials, and other individuals in Russia and Belarus. The ongoing conflict and the rapidly evolving measures in response could be expected to have a negative impact on the economy and business activity globally (including in the countries in which BCF invests), and therefore could adversely affect the performance of the Fund's investments. The severity and duration of the conflict and its impact on global economic and market conditions are impossible to predict, and as a result, could present material uncertainty and risk with respect to BCF and the performance of its investments and operations, and the ability of BCF and the Company to achieve its investment objectives. Similar risks will exist to the extent that any portfolio entities, service providers, vendors or certain other parties have material operations or assets in Russia, Ukraine, Belarus, or the immediate surrounding areas.
