

Prospectus Supplement

Filed pursuant to Rule 424(b)(3)
Registration No. 333-261457

BLACKSTONE SENIOR FLOATING RATE TERM FUND

**Supplement No. 4, dated February 23, 2023, to the
Prospectus Supplement dated February 1, 2022 and
Prospectus and Statement of Additional Information, dated January 26, 2022,
for Common Shares of Beneficial Interest**

Fund Name Change

Effective March 6, 2023 (the “Effective Date”), Blackstone Senior Floating Rate Term Fund (the “Fund”) will change its name from Blackstone Senior Floating Rate Term Fund to Blackstone Senior Floating Rate 2027 Term Fund. **Accordingly, on the Effective Date, all references to “Blackstone Senior Floating Rate Term Fund” in the Prospectus Supplement, Prospectus and Statement of Additional Information are hereby replaced with “Blackstone Senior Floating Rate 2027 Term Fund.”**

Please retain this supplement for future reference.

BLACKSTONE SENIOR FLOATING RATE TERM FUND

**Supplement No. 3, dated September 9, 2022, to the Prospectus (the “Prospectus”) dated January 21, 2022, for
Common Shares of Beneficial Interest**

Change in Chief Compliance Officer

On September 8, 2022, the Board of Trustees elected William Renahan to serve as Chief Compliance Officer of the Fund, effective September 9, 2022. Prior to joining Blackstone on May 2, 2022 as a Managing Director, Mr. Renahan had been working in the Investment Management industry for over 25 years. He was previously an associate in the New York office of law firm Battle Fowler LLP (which subsequently merged into Paul Hastings LLP). He also served for approximately 13 years at Legg Mason and predecessor firms as a Managing Director and Senior Counsel. Mr. Renahan’s position immediately prior to joining Blackstone was Senior Managing Director and Chief Compliance Officer of Duff & Phelps Investment Management and its affiliated funds. Mr. Renahan has been an active member of the Investment Company Institute and served as Chairman of the ICI’s Closed-End Fund Committee from 2014–2018. He holds a B.A. from Hobart College, a J.D., cum laude, from Albany Law School (where he was also an editor of the *Albany Law Review*), and a Master of Laws in Taxation from New York University School of Law. Mr. Renahan was also elected to serve as Chief Compliance Officer of Blackstone Floating Rate Enhanced Income Fund, Blackstone Long-Short Credit Income Fund, and Blackstone Strategic Credit Fund. In August 2022, Mr. Renahan was also appointed to serve as Chief Compliance Officer of Blackstone Secured Lending Fund, Blackstone Private Credit Fund, and Blackstone Alternative Multi-Strategy Fund.

Additionally, the title of Marisa J. Beene is hereby corrected to “Chief Legal Officer and Secretary” of the Fund.

Mr. Renahan replaces Ms. Beene as the Chief Compliance Officer of the Fund. Ms. Beene will continue to serve as Chief Legal Officer and Secretary of the Fund.

Capitalized terms not defined herein have the meanings assigned to them in the Prospectus.

Please retain this supplement for future reference.

BLACKSTONE SENIOR FLOATING RATE TERM FUND

**Supplement No. 1, dated February 16, 2022, to the Prospectus (the “Prospectus”), dated January 21, 2022,
for Common Shares of Beneficial Interest**

Change in Chief Financial Officer and Treasurer

On February 3, 2022, the Board of Trustees appointed Gregory Roppa to serve as Chief Financial Officer and Treasurer of the Fund, effective as of close of business, on March 11, 2022. Mr. Roppa, 43, is a Managing Director in the Global Fund Finance group of Blackstone Inc. (“Blackstone”) where he focuses on the accounting and financial reporting for certain entities within Blackstone Credit, Real Estate, and Insurance businesses. Before joining Blackstone in 2019, Mr. Roppa was the Director of Operations and Fund Accounting for Clinton Group Inc., an alternative asset management firm. Prior to that Mr. Roppa began his career in the financial services audit practice at Arthur Andersen LLP. Mr. Roppa received a B.S. in Accounting from Binghamton University, where he graduated cum laude. He is a Certified Public Accountant. Mr. Roppa was also appointed to serve as Chief Financial Officer and Treasurer of Blackstone Floating Rate Enhanced Income Fund, Blackstone Long-Short Credit Income Fund, and Blackstone Strategic Credit Fund.

Mr. Roppa’s appointment coincides with the resignation of Robert W. Busch as the Fund’s Chief Financial Officer and Treasurer. Mr. Busch’s decision to resign was based on a desire to pursue other opportunities and not the result of any disagreement relating to Blackstone or the Fund’s operations, policies or practices.

Capitalized terms not defined herein have the meanings assigned to them in the Prospectus.

Please retain this supplement for future reference.

PROSPECTUS SUPPLEMENT

(to Prospectus dated January 26, 2022)

Blackstone Senior Floating Rate Term Fund

Up to \$50,000,000 Common Shares

The Fund. Blackstone Senior Floating Rate Term Fund (the “Fund”) is a diversified, closed-end management investment company.

Investment Objectives. The Fund is a diversified, closed-end management investment company. The Fund’s primary investment objective is to seek high current income, with a secondary objective to seek preservation of capital, consistent with its primary goal of high current income. There can be no assurance that the Fund will achieve its investment objectives. The Fund seeks to achieve these investment objectives by investing primarily in senior, secured floating rate loans (“Senior Loans”). Under normal market conditions Blackstone Liquid Credit Strategies LLC (the “Adviser”), the Fund’s investment adviser, expects the Fund to maintain an average duration of less than one year (including the effect of anticipated leverage).

Investment Strategies. Under normal market conditions, the Fund will invest at least 80% of its Managed Assets (as defined below) in Senior Loans. Senior Loans are made to U.S. and, to a limited extent, non-U.S. corporations, partnerships and other business entities (“Borrowers”) which operate in various industries and geographical regions. Senior Loans pay interest at rates which are determined periodically on the basis of a floating base lending rate, primarily the London-Interbank Offered Rate (“LIBOR”), or a replacement rate in the event that LIBOR is discontinued, plus a premium. Senior Loans typically are of below investment grade quality. Below investment grade quality instruments (including Senior Loans) are those that, at the time of investment, are rated Ba1 or lower by Moody’s Investors Service, Inc. (“Moody’s”) and BB+ or lower by Standard & Poor’s Corporation Ratings Group (“S&P”) or Fitch Ratings, Inc. (“Fitch”), or if unrated are determined by the Adviser (as defined below) to be of comparable quality. Below investment grade instruments, commonly referred to as “junk” or “high yield” securities, are high risk and have speculative characteristics.

The Fund may invest up to 20% of its Managed Assets in (i) loan interests that are not secured by any collateral of the Borrower, (ii) loan interests that have a lower than first lien priority on collateral of the Borrower, (iii) other income producing securities (including, without limitation, U.S. government debt securities and investment and non-investment grade, subordinated and unsubordinated corporate debt securities), (iv) warrants and equity securities issued by a Borrower or its affiliates as part of a package of investments in the Borrower or its affiliates and (v) structured products (including, without limitation, collateralized loan obligations, credit linked notes and derivatives, including credit derivatives).

Offering. The Fund has entered into a distribution agreement dated January 19, 2022 (the “Distribution Agreement”) with Blackstone Securities Partners L.P. (formerly known as Blackstone Advisory Partners L.P.) (the “Distributor”), relating to the Fund’s common shares of beneficial interest, \$0.001 par value per share (“Common Shares”), offered by this Prospectus Supplement and the accompanying Prospectus. The Distributor has entered into a sub-placement agent agreement dated February 1, 2022 (the “Sub-Placement Agent Agreement”) with UBS Securities LLC (the “Sub-Placement Agent”), relating to the Fund’s Common Shares offered by this Prospectus Supplement and the accompanying Prospectus. In accordance with the terms of the Sub-Placement Agent Agreement, we may offer and sell up to \$50,000,000 of our Common Shares from time to time through the Sub-Placement Agent, as the sub-placement agent for the offer and sale of the Common Shares.

Under the Investment Company Act of 1940, as amended (the “1940 Act”), the Fund may not sell any Common Shares at a price below the current net asset value (“NAV”) of such Common Shares, exclusive of any distributing commission or discount. In any event, the Fund will not sell any Common Shares within five days of a repurchase under any share repurchase program as disclosed under “Repurchase of Common Shares” in the Prospectus and SAI.

Sales of our Common Shares, if any, under this Prospectus Supplement and the accompanying Prospectus may be made in negotiated transactions or transactions that are deemed to be “at the market” as defined in Rule 415 under the Securities Act of 1933, as amended (the “Securities Act”), including sales made directly on the Exchange or sales made to or through a market maker other than on an exchange.

The Distributor will be entitled to compensation of 1.00% of the gross sales price per share for any Common Shares sold under the Distribution Agreement. Out of this commission rate, the Distributor will compensate the Sub-Placement Agent at a rate of 0.80% of the gross proceeds of the sale of the Fund’s Common Shares sold through the Sub-Placement Agent. In connection with the sale of the Common Shares on our behalf, the Distributor may be deemed to be an “underwriter” within the meaning of the Securities Act and the compensation of the Distributor may be deemed to be underwriting commissions or discounts.

This Prospectus Supplement, together with the accompanying Prospectus dated January 26, 2022 sets forth the information that you should know before investing.

The Fund’s common shares of beneficial interest (“Common Shares”) are listed on the New York Stock Exchange (the “Exchange”) and trade under the ticker symbol “BSL”. The net asset value (“NAV”) of the Common Shares at the close of business on January 21, 2022 was \$16.31 per share, and the last sale price per share of the Common Shares on the Exchange on that date was \$16.00. Shares of closed-end funds often trade at a discount from NAV.

You should read this Prospectus Supplement and the accompanying Prospectus (which includes a Statement of Additional Information, dated January 26, 2022, containing additional information about the Fund, which has been filed with the Securities and Exchange Commission (the “SEC”) and, as amended from time to time, is incorporated by reference in its entirety into this Prospectus. You may request a free copy of the Statement of Additional Information, annual and semi-annual reports to shareholders (when available), and additional information about the Fund and make shareholder inquiries by calling toll-free (800) 522-6645, by writing to the Fund or visiting the Fund’s website (<http://www.blackstone.com/bsl/>). You can access the same documents, including any materials incorporated by reference, free from the SEC’s website (<http://www.sec.gov>). You may also e-mail requests for these documents to publicinfo@sec.gov.

Investing in the Fund’s securities involves certain risks. See “Risks” in the accompanying Prospectus.

Neither the SEC nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus Supplement or the accompanying Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This Prospectus Supplement is dated February 1, 2022

The Fund’s securities do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

Capitalized terms used herein that are not otherwise defined shall have the meanings assigned to them in the accompanying Prospectus.

You should rely only on the information contained or incorporated by reference in this Prospectus Supplement and the accompanying Prospectus. This Prospectus Supplement and the accompanying Prospectus set forth certain information about us that a prospective investor should carefully consider before making an investment in our securities. This Prospectus Supplement, which describes the specific terms of this offering, also adds to and updates information contained in the accompanying Prospectus and the documents incorporated by reference in the Prospectus. The Prospectus gives more general information, some of which may not apply to this offering. If the description of this offering varies between this Prospectus Supplement and the accompanying Prospectus, you should rely on the information contained in this Prospectus Supplement; provided that if any statement in one of these documents is inconsistent with a statement in another document having a later date and incorporated by reference into

the Prospectus or Prospectus Supplement, the statement in the incorporated document having the later date modifies or supersedes the earlier statement. We have not authorized anyone to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted or where the person making the offer or sale is not qualified to do so or to any person to whom it is not permitted to make such offer or sale. The information contained in or incorporated by reference in this Prospectus Supplement and the accompanying Prospectus is accurate only as of the respective dates on their front covers, regardless of the time of delivery of this Prospectus Supplement, the accompanying Prospectus, or the sale of the securities. Our business, financial condition, results of operations and prospects may have changed since that date.

CAUTIONARY NOTICE REGARDING FORWARD-LOOKING STATEMENTS

This Prospectus Supplement, the accompanying Prospectus and the SAI contain forward-looking statements. All statements other than statements of historical facts included in this Prospectus Supplement and the accompanying Prospectus that address activities, events or developments that we expect, believe or anticipate will or may occur in the future are forward-looking statements including, in particular, the statements about our plans, objectives, strategies and prospects regarding, among other things, our financial condition, results of operations and business. We have identified some of these forward-looking statements with words like “believe,” “may,” “could,” “might,” “forecast,” “possible,” “potential,” “project,” “will,” “should,” “expect,” “intend,” “plan,” “predict,” “anticipate,” “estimate,” “approximate” or “continue” and other words and terms of similar meaning and the negative of such terms. Such forward-looking statements may be contained in this Prospectus Supplement as well as in the accompanying Prospectus and the SAI. These forward-looking statements are based on current expectations about future events affecting us and are subject to uncertainties and factors relating to our operations and business environment, all of which are difficult to predict and many of which are beyond our control. Many factors mentioned in our discussion in this Prospectus Supplement and the accompanying Prospectus, including the risks outlined under “Risks” in the accompanying Prospectus, will be important in determining future results.

Although we believe that the expectations reflected in our forward-looking statements are reasonable, we do not know whether our expectations will prove correct. They can be affected by inaccurate assumptions we might make or by known or unknown risks and uncertainties. The factors identified above are believed to be important factors, but not necessarily all of the important factors, that could cause our actual results to differ materially from those expressed in any forward-looking statement. Unpredictable or unknown factors could also have material adverse effects on us. Since our actual results, performance or achievements could differ materially from those expressed in, or implied by, these forward-looking statements, we cannot give any assurance that any of the events anticipated by the forward-looking statements will occur or, if any of them do, what impact they will have on our results of operations and financial condition. All forward-looking statements included in this Prospectus Supplement, the accompanying Prospectus or the SAI are expressly qualified in their entirety by the foregoing cautionary statements. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of such documents. We do not undertake any obligation to update, amend or clarify these forward-looking statements or the risk factors contained therein, whether as a result of new information, future events or otherwise, except as may be required under the federal securities laws. The forward-looking statements in this Prospectus Supplement, the accompanying Prospectus and the SAI are excluded from the safe harbor protection provided by Section 27A of the Securities Act.

PROSPECTUS SUPPLEMENT SUMMARY

This summary highlights selected information contained elsewhere in this prospectus supplement (the “Prospectus Supplement”) and the accompanying prospectus (the “Prospectus”) relating to Blackstone Senior Floating Rate Term Fund. This summary provides an overview of selected information and does not contain all of the information you should consider before investing in our common shares of beneficial interest, par value \$0.001 per share (“Common Shares”). You should read carefully the entire Prospectus Supplement, the accompanying Prospectus, including the section entitled “Risks,” the statement of additional information incorporated by reference into the Prospectus (the “SAI”) and the financial statements and related notes, before making an investment decision.

The Fund Blackstone Senior Floating Rate Term Fund is a diversified, closed-end management investment company. Throughout the Prospectus, we refer to Blackstone Senior Floating Rate Term Fund simply as the “Fund” or as “we,” “us” or “our.” See “The Fund” in the accompanying Prospectus.

Investment Adviser Blackstone Liquid Credit Strategies LLC (the “Adviser”) acts as the Fund’s investment adviser and also provides administrative and compliance oversight services to the Fund. The Adviser, a wholly-owned subsidiary of Blackstone Alternative Credit Advisors LP (collectively with its affiliates in the credit-focused business of Blackstone Inc., “Blackstone Credit”), is a registered investment adviser. Blackstone Credit is part of the credit platform of Blackstone Inc. (collectively with its affiliates as the context requires, “Blackstone” and together with Blackstone Credit, the “Firm”), which is one of the world’s leading investment firms with total assets under management of \$881 billion. Blackstone’s asset management businesses include investment vehicles focused on real estate, private equity, public debt and equity, growth equity, opportunistic, non-investment grade credit, real assets and secondary funds, all on a global basis. As of December 31, 2021, Blackstone Credit’s asset management operation had aggregate assets under management of \$243 billion across multiple strategies within the leveraged finance marketplace, including loans, high yield bonds, distressed and mezzanine debt and private equity, including hedge funds. In addition, as of December 31, 2020, the Adviser had total assets under management of approximately \$43 billion.

The Adviser receives a monthly fee at the annual rate of 0.90% of the average daily value of the Fund’s total assets (including any assets attributable to any leverage used) minus the sum of the Fund’s accrued liabilities (other than Fund liabilities incurred for any leverage) (“Managed Assets”). See “Management of the Fund—Investment Advisory Agreement” in the accompanying Prospectus.

The Offering The Fund has entered into the Distribution Agreement dated January 19, 2022 with the Distributor, relating to the Common Shares, offered by this Prospectus Supplement and the accompanying Prospectus. The Distributor has entered into the Sub-Placement Agent

Agreement dated February 1, 2022 with the Sub-Placement Agent, relating to the Fund’s Common Shares offered by this Prospectus Supplement and the accompanying Prospectus. In accordance with the terms of the Sub-Placement Agent Agreement, we may offer and sell up to \$50,000,000 of our Common Shares from time to time through the Sub-Placement Agent, as the sub-placement agent for the offer and sale of the Common Shares.

The Fund’s Common Shares are listed on the Exchange and trade under the ticker symbol “BSL”. The NAV of the Common Shares at the close of business on January 21, 2022 was \$16.31 per share, and the last sale price per share of the Common Shares on the Exchange on that date was \$16.00. Shares of closed-end funds often trade at a discount from NAV.

Sales of our Common Shares, if any, under this Prospectus Supplement and the accompanying Prospectus may be made in negotiated transactions or transactions that are deemed to be “at the market” as defined in Rule 415 under the Securities Act, including sales made directly on the Exchange or sales made to or through a market maker other than on an exchange. Our Common Shares may not be sold through agents, underwriters or dealers without delivery or deemed delivery of a prospectus and a prospectus supplement describing the method and terms of the offering of our securities. Under the 1940 Act, the Fund may not sell any Common Shares at a price below the current NAV of such Common Shares, exclusive of any distributing commission or discount (the “Minimum Price”). In any event, the Fund will not sell any Common Shares within five days of a repurchase under any share repurchase program as disclosed under “Repurchase of Common Shares” in the Prospectus and SAI.

Risks See “Risks” in the accompanying Prospectus for a discussion of factors you should consider carefully before deciding to invest in the Fund’s Common Shares.

SUMMARY OF FUND EXPENSES

The purpose of the following table and example is to help you understand all fees and expenses holders of Common Shares of the Fund (“common shareholders”) would bear directly or indirectly. The table below is based on the capital structure of the Fund as of December 31, 2021 (except as noted below).

	Percentage of Offering Price
SHAREHOLDER TRANSACTION EXPENSES	
Sales Load (percentage of offering price)	1.00% ⁽¹⁾
Offering Expenses Borne by the Fund (percentage of offering price)	0.75% ⁽²⁾
Dividend Reinvestment Plan Fees (per sales transaction fee) . .	<u>\$10.00⁽³⁾</u>
TOTAL TRANSACTION EXPENSES (as a percentage of offering price)⁽⁴⁾	<u>1.75%</u>
	Percentage of Net Assets Attributable to Common Shares (Assumes Leverage is Used)
ANNUAL EXPENSES	
Advisory Fees ⁽⁵⁾	1.33%
Other Expenses ⁽⁶⁾	0.45%
Interest Payments on Borrowed Funds ⁽⁷⁾	0.59%
TOTAL ANNUAL EXPENSES	<u>2.37%</u>

- (1) Represents the estimated commission with respect to the Fund’s Common Shares being sold in this offering. There is no guarantee that there will be any sales of the Fund’s Common Shares pursuant to this Prospectus Supplement and the accompanying Prospectus. Actual sales of the Fund’s Common Shares under this Prospectus Supplement and the accompanying Prospectus, if any, may be less than as set forth under “Capitalization” below. In addition, the price per share of any such sale may be greater or less than the price set forth under “Capitalization” below, depending on market price of the Fund’s Common Shares at the time of any such sale.
- (2) Offering expenses payable by the Fund will be deducted from the proceeds, before expenses, to the Fund. The offering expenses of this offering are estimated to be approximately \$374,432.
- (3) Common shareholders will be charged a brokerage commission if they direct the Fund’s dividend reinvestment plan (the “DRIP”) administrator to sell their Common Shares held in a dividend reinvestment account. There are no fees charged to common shareholders for participating in the DRIP. However, common shareholders participating in the DRIP that elect to sell their shares obtained pursuant to the DRIP would pay \$10.00 transaction fee plus \$0.10 per share to sell Common Shares. In addition, each participant bears a pro rata share of brokerage commissions incurred with respect to the DRIP administrator’s open market purchases in connection with the reinvestment of such distributions. See “Dividend Reinvestment Plan” in the accompanying Prospectus.
- (4) The related Prospectus Supplement will disclose the offering price and the total shareholder transaction expenses as a percentage of the offering price.
- (5) The Adviser receives a monthly management fee at the annual rate of 0.90% of the average daily value of the Fund’s Managed Assets. The term “Managed Assets” means the Fund’s total assets (including any assets attributable to any leverage used) minus the sum of the Fund’s accrued liabilities (other than Fund liabilities incurred for any leverage).

- (6) “Other Expenses” are estimated amounts for the current fiscal year based on the Fund’s fees and expenses for the year ended December 31, 2021. “Other Expenses” include professional fees and other expenses, including, without limitation, the Securities and Exchange Commission (the “SEC”) filing fees, printing fees, administration fees, transfer agency fees, custody fees, trustee fees and insurance costs.
- (7) Interest Payments on Borrowed Funds is based on estimated amounts for the current fiscal year and assumes the use of leverage in an amount equal to 33 1/3% of the Fund’s total assets, less all liabilities and indebtedness not represented by senior securities (after the leverage is incurred), and the annual interest rate on Borrowings of 1.12% as of September 30, 2021. The actual amount of interest expense borne by the Fund will vary over time in accordance with the level of the Fund’s borrowings and market interest rates. Interest Payments on Borrowed Funds are required to be treated as an expense of the Fund for accounting purposes.

Example

As required by the relevant SEC regulations, the following example illustrates the expenses that you would pay on a \$1,000 investment in the Fund’s Common Shares assuming (i) sales load of 1.00% and other estimated offering costs to be borne by common shareholders of 0.75%, (ii) total annual expenses of 2.37% of net assets attributable to the Fund’s Common Shares, (iii) a 5% annual return and (iv) reinvestment of all dividends and distributions at NAV:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$42	\$93	\$146	\$293

The example should not be considered a representation of future expenses. Actual expenses may be greater or less than those assumed. The example assumes that the estimated “Other expenses” set forth in the Annual Expenses table are accurate, and that all dividends and distributions are reinvested at NAV. Moreover, the Fund’s actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

USE OF PROCEEDS

Sales of our Common Shares, if any, under this Prospectus Supplement and the accompanying Prospectus may be made in negotiated transactions or transactions that are deemed to be “at the market” as defined in Rule 415 under the Securities Act, including sales made directly on the Exchange or sales made to or through a market maker other than on an exchange at prices related to the prevailing market prices or at negotiated prices. Assuming the sale of Common Shares having an aggregate offering price of up to \$50,000,000 offered hereby, at a price of \$16.47 per share (the NAV per Common Share as of January 21, 2022, plus the per Common Share amount of the commission to be paid to the Distributor), we estimate that the net proceeds from the sale of Common Shares that we are offering under this Prospectus Supplement and the accompanying Prospectus will be approximately \$49,125,568, after deducting the estimated commission and estimated offering expenses payable by us. There is no guarantee that there will be any sales of Common Shares pursuant to this Prospectus Supplement and the accompanying Prospectus. The number of Common Shares, if any, actually sold under this Prospectus Supplement and the accompanying Prospectus may be less than as set forth in this paragraph. In addition, the price per Common Share of any such sale may be greater or less than assumed in this paragraph, depending on the market price of shares of the Fund’s Common Shares at the time of any such sale. As a result, the actual net proceeds received by the Fund may be more or less than the amount of net proceeds estimated in this paragraph, but in no event will the aggregate gross proceeds the Fund receives in this offering exceed \$50,000,000.

Unless otherwise specified in this Prospectus Supplement, the Fund intends to invest the net proceeds from the sale of our Common Shares under this Prospectus Supplement and the accompanying Prospectus in accordance with its investment objectives and policies as stated herein. It is currently anticipated that the Fund will be able to invest substantially all of the net proceeds in accordance with its investment objectives and policies within thirty days after the completion of any offering. Pending such investment, it is anticipated that the proceeds will be primarily invested in high yield securities or high-grade, short-term securities.

CAPITALIZATION

The Fund may offer and sell up to \$50,000,000 of our Common Shares from time to time through the Sub-Placement Agent as sub-placement agent under this Prospectus Supplement and the accompanying Prospectus. There is no guarantee that there will be any sales of our Common Shares pursuant to this Prospectus Supplement and the accompanying Prospectus. The table below assumes that we will sell 3,035,823 Common Shares at a price of \$16.47 per share (the NAV Common Share on January 21, 2022, plus the per Common Share amount of the commission to be paid to the Distributor). Actual sales, if any, of the Fund's Common Shares under this Prospectus Supplement and accompanying Prospectus may be greater or less than \$16.47 per share, depending on the market price of the Fund's Common Shares at the time of any such sale and/or the Fund's NAV for purposes of calculating the Minimum Price. The Fund and the Distributor will determine whether any sales of the Fund's Common Shares will be authorized on a particular day; the Fund and the Distributor, however, will not authorize sales of the Fund's Common Shares if the per share price of the shares is less than the Minimum Price. The Fund and the Distributor may elect not to authorize sales of the Fund's Common Shares on a particular day even if the per share price is equal to or greater than the Minimum Price, or may only authorize a fixed number of shares to be sold on any particular day. The Fund and the Distributor will have full discretion regarding whether sales of Fund Common Shares will be authorized on a particular day and, if so, in what amounts.

The following table sets forth our capitalization (i) as of June 30, 2021 (unaudited), and (ii) on an adjusted basis, to reflect (1) the assumed sale of 3,035,823 Common Shares at \$16.47 per share (the NAV per Common Share on January 21, 2022, plus the per Common Share amount of the commission to be paid to the Distributor), in an offering under this Prospectus Supplement and the accompanying Prospectus, after deducting the assumed aggregate commission of \$500,000 (representing an estimated commission to the Distributor of 1.00% of the gross proceeds of the sale of the Fund's Common Shares, out of which the Distributor will compensate the Sub-Placement Agent at a rate of 0.80% of the gross sales proceeds of the sale of the Fund's Common Shares sold through the Sub-Placement Agent) and estimated offering expenses payable by the Fund of \$374,432. As indicated above in the "Summary of Fund Expenses" section and below, common shareholders will bear the offering costs associated with this offering.

	Actual	As Adjusted
	(Unaudited)	(Unaudited)
Cash	\$ 6,206,665	\$ 6,206,665
Total Debt:		
Leverage Facility Payable	\$108,000,000	\$108,000,000
Net Assets:		
Par Value (\$0.001 par value, unlimited shares authorized, 13,523,244 shares issued and outstanding as of June 30, 2021 (actual), 16,559,067 shares estimated issued and outstanding (as adjusted))	\$ 13,523	\$ 16,559
Paid-in capital in excess of par value	263,759,374	312,881,906
Total distributable earnings	(40,441,043)	(40,441,043)
Total Net Assets	\$223,331,854	\$272,457,422
	(Unaudited)	(Unaudited)

DISTRIBUTIONS

The Fund makes regular monthly cash distributions of all or a portion of its net investment income to common shareholders. The Fund pays common shareholders at least annually all or substantially all of its net investment income after the payment of interest, fees or dividends, if any, owed with respect to any forms of leverage utilized by the Fund. The Fund pays any capital gains distributions at least annually. The Fund utilizes a “dynamic” distribution strategy that is based on the net income earned by the Fund. The Fund declares a set of monthly distributions each quarter in amounts closely tied to the Fund’s recent average monthly net income. As a result, the monthly distribution amounts for the Fund typically vary quarter-to-quarter. The following table sets forth information about distributions we paid to our common shareholders since 2021, percentage participation by common shareholders in our DRIP, and reinvestments and related issuances of additional Common Shares as a result of such participation (the information in the table is unaudited):

<u>Distribution Payable Date to Common Shareholders</u>	<u>Amount of Distribution Per Share</u>	<u>Percentage of Common Shareholders Electing to Participate in DRIP %</u>	<u>Amount of Corresponding Reinvestment through DRIP</u>	<u>Additional Common Shares Issued through DRIP</u>
Issued through DRIP				
January 31, 2021	\$0.103	1.4%	\$20,040	—
February 28, 2021	\$0.074	2.1%	\$20,994	—
March 29, 2021	\$0.073	1.9%	\$19,200	—
April 30, 2021	\$0.073	2.1%	\$20,917	—
May 31, 2021	\$0.073	1.9%	\$18,756	1,165
June 29, 2021	\$0.075	1.9%	\$19,121	1,181
July 31, 2021	\$0.075	1.9%	\$19,333	1,200
August 31, 2021	\$0.075	2.0%	\$20,668	1,281
September 28, 2021	\$0.078	2.0%	\$20,977	1,294
October 31, 2021	\$0.078	1.8%	\$19,378	1,200
November 30, 2021	\$0.078	1.9%	\$20,456	1,280
December 31, 2021	\$0.075	2.3%	\$23,509	1,441

The U.S. federal income tax treatment and characterization of the Fund’s distributions may vary significantly from time to time because of the varied nature of the Fund’s investments. In light of the Fund’s investment policies, the 1940 Act requires the Fund to accompany each monthly distribution with a statement setting forth the estimated source (as between net income, capital gains and return of capital) of the distribution made. The Fund will indicate the proportion of its capital gains distributions that constitute long-term and short-term gains annually. The ultimate U.S. federal income tax characterization of the Fund’s distributions made in a calendar or fiscal year cannot finally be determined until after the end of that taxable year. As a result, there is a possibility that the Fund may make total distributions during a calendar or taxable year in an amount that exceeds the Fund’s net investment company taxable income and net capital gains for the relevant taxable year. In such situations, if a distribution exceeds the Fund’s current and accumulated earnings and profits (as determined for U.S. federal income tax purposes), such distribution would generally be treated as a tax-free return of capital reducing the amount of a shareholder’s tax basis in such shareholder’s shares. When you sell your Common Shares in the Fund, the amount, if any, by which your sales price exceeds your basis in the Fund’s Common Shares is gain subject to tax. Because a return of capital reduces your basis in the shares, it will increase the amount of your gain or decrease the amount of your loss when you sell the Common Shares, all other things being equal. To the extent that the amount of any return of capital distribution exceeds the shareholder’s basis in such shareholder’s shares, the excess will be treated as gain from a sale or exchange of the shares. See “Tax Matters” in the accompanying Prospectus.

Various factors affect the level of the Fund's income, including the asset mix, the average maturity of the Fund's portfolio, the amount of leverage utilized by the Fund and the Fund's use of hedging. To permit the Fund to maintain a more stable monthly distribution, the Fund may from time to time distribute less than the entire amount of income earned in a particular period. The undistributed income would be available to supplement future distributions. As a result, the distributions paid by the Fund for any particular monthly period may be more or less than the amount of income actually earned by the Fund during that period. Undistributed income will add to the Fund's NAV (and indirectly benefit the Adviser and ALPS by increasing their fees) and, correspondingly, distributions from undistributed income will reduce the Fund's NAV.

Section 19(b) of the 1940 Act and Rule 19b-1 thereunder generally limit the Fund to one long-term capital gain distribution per year, subject to certain exceptions.

MARKET AND NET ASSET VALUE INFORMATION

The Fund's Common Shares are listed on the Exchange and trade under the ticker symbol "BSL". Our Common Shares commenced trading on the Exchange on May 26, 2010.

Our Common Shares have traded both at a premium and at a discount in relation to the Fund's NAV per share. We cannot predict whether our Common Shares will trade at a premium or discount to NAV in the future. Our issuance of additional Common Shares may have an adverse effect on prices in the secondary market for our Common Shares by increasing the number of Common Shares available, which may create downward pressure on the market price for our Common Shares. Shares of closed-end investment companies frequently trade at a discount to NAV. See "Risks—Market Discount Risk" in the accompanying Prospectus.

The following table sets forth for each of the periods indicated the range of high and low closing sale price of our Common Shares and the quarter-end sale price, each as reported on the Exchange, the NAV per share of Common Shares and the premium or discount to NAV per share at which our Common Shares were trading. NAV is generally determined on each business day that the Exchange is open for business. See "Net Asset Value" in the accompanying Prospectus for information as to the determination of our NAV.

	Quarterly Closing Sale Price		Quarter-End Closing		
	High	Low	Sale Price	Net Asset Value Per Share of Common Shares ⁽¹⁾	Premium/ (Discount) of Quarter-End Sale Price to NAV ⁽²⁾
Fiscal Year 2020					
March 31, 2020	16.36	9.43	11.74	12.61	(6.9)%
June 30, 2020	13.29	10.64	12.86	14.47	(11.1)%
September 30, 2020	13.96	12.65	13.76	15.25	(9.8)%
December 31, 2020	14.43	13.15	14.22	15.87	(10.4)%
Fiscal Year 2021					
March 31, 2021	15.56	14.20	15.56	16.28	(4.4)%
June 30, 2021	16.93	15.54	16.35	16.52	(1.0)%
September 30, 2021	16.55	15.86	16.42	16.53	(0.7)%
December 31, 2021	17.17	16.24	17.17	16.22	5.9%

Source of market prices: Bloomberg.

- (1) NAV per share is determined as of close of business on the last day of the relevant quarter and therefore may not reflect the NAV per share on the date of the high and low closing sales prices, which may or may not fall on the last day of the quarter. NAV per share is calculated as described in "Net Asset Value."
- (2) Calculated as of the quarter-end by dividing quarter-end closing sales price by the quarter-end NAV, minus 1.

In recognition of the possibility that Common Shares might trade at a discount to NAV, the Board of Trustees of the Fund (the "Board") may consider one or more actions that might be taken to seek to reduce or eliminate any material discount from NAV in respect of Common Shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares or the conversion of the Fund to an open-end investment company. The Board may decide not to take any of these actions in the future. In addition, there can be no assurance any of these actions, or others, if undertaken, will reduce market discount. See "Closed-End Fund Structure" and "Repurchase of Common Shares" in the accompanying Prospectus.

On January 21, 2022, the last reported sale price of our Common Shares on the Exchange was \$16.00, which represented a discount of approximately 1.9% to the NAV per share reported by us on that date.

As of January 21, 2022, we had approximately 13,530,940 Common Shares outstanding and we had net assets attributable to common shareholders of approximately \$220,687,529.

PLAN OF DISTRIBUTION

The Fund has entered into the Distribution Agreement with Blackstone Securities Partners L.P., pursuant to which the Fund may offer and sell up to \$50,000,000 of Common Shares, from time to time, through the Distributor in transactions that are deemed to be “at-the-market” as defined in Rule 415 under the Securities Act. The minimum price on any day at which Common Shares may be sold will not be less than the Minimum Price, which will be equal to the then current NAV per Common Share plus the per Common Share amount of the commission to be paid to the Distributor. The Fund and the Distributor will determine whether any sales of Common Shares will be authorized on a particular day. The Fund and the Distributor, however, will not authorize sales of Common Shares if the price per Common Share is less than the Minimum Price. The Fund and the Distributor may elect not to authorize sales of Common Shares on a particular day even if the price per Common Share is equal to or greater than the Minimum Price, or may only authorize a fixed number of Common Shares to be sold on any particular day. The Fund and the Distributor will have full discretion regarding whether sales of Common Shares will be authorized on a particular day and, if so, in what amounts.

The Distributor may enter into sub-placement agent agreements with one or more selected dealers. The Distributor has entered into the Sub-Placement Agent Agreement with UBS Securities LLC pursuant to which the Fund may offer and sell the Common Shares offered by this Prospectus Supplement and the accompanying Prospectus, from time to time, through the Sub-Placement Agent, as sub-placement agent for the offer and sale of the Common Shares. In accordance with the terms of the Sub-Placement Agent Agreement, the Sub-Placement Agent will use its reasonable best efforts to sell the Common Shares.

The Sub-Placement Agent will provide written confirmation to the Distributor or the Adviser following the close of trading on the day on which Common Shares are sold under the Sub-Placement Agent Agreement. Each confirmation will include the number of shares sold on the preceding day, the time of sale, the gross sales price per Common Share sold and the compensation payable by the Distributor to the Sub-Placement Agent in connection with the sales.

The Fund will compensate the Distributor with respect to sales of the Common Shares at a commission rate of 1.00% of the gross proceeds of the sale of Common Shares (the “Related Commission”). Out of the Related Commissions, the Distributor will compensate the Sub-Placement Agent for its services in acting as sub-placement agent in the sale of Common Shares out of this commission at a rate of 0.80% of the gross proceeds of the sale of Common Shares sold under the Sub-Placement Agent Agreement (the “Agent Commissions”); provided, however, that the Distributor may rebate to the Fund an amount of commissions no greater than the Related Commissions minus the Agent Commissions. There is no guarantee that there will be any sales of the Common Shares pursuant to this Prospectus Supplement and the accompanying Prospectus.

Settlement for sales of Common Shares will occur on the second business day following the date on which such sales are made in return for payment of the net proceeds to the Fund. There is no arrangement for funds to be received in an escrow, trust or similar arrangement.

In connection with the sale of the Common Shares on the Fund’s behalf, the Distributor may be deemed to be an “underwriter” within the meaning of the Securities Act, and the compensation of the Distributor may be deemed to be underwriting commissions or discounts.

The Distributor has agreed to provide indemnification and contribution to the Sub-Placement Agent and the Fund against certain civil liabilities, including liabilities under the Securities Act, the 1940 Act, the Securities Exchange Act of 1934, as amended (the “Exchange Act”), the common law or otherwise, under the Sub-Placement Agent Agreement and Distribution Agreement, respectively. The Fund has agreed to provide indemnification and contribution to the Distributor against certain civil liabilities, including liabilities under the Securities Act, the 1940 Act, the Exchange Act, the common law or otherwise, under the Distribution Agreement.

The offering of the Common Shares pursuant to the Distribution Agreement and the Sub-Placement Agent Agreement will terminate upon the termination of the Distribution Agreement or the Sub-Placement Agent Agreement by any party thereto upon five days' written notice to the other party thereto.

The Sub-Placement Agent, its affiliates or their respective employees hold or may hold in the future, directly or indirectly, investment interests in the Fund. The interests held by the Sub-Placement Agent, its affiliates or their respective employees are not attributable to, and no investment discretion is held by, the Sub-Placement Agent, its affiliates or their respective affiliates.

The principal business address of the Distributor is 345 Park Avenue, New York, NY 10154. The principal business address of the Sub-Placement Agent is 1285 Avenue of the Americas, New York, NY 10019.

LEGAL MATTERS

Simpson Thacher & Bartlett LLP is counsel to the Fund. Richards, Layton & Finger, P.A. has opined on certain matters of Delaware law relating to the offering of the securities and the legality of the securities to be offered hereby.

WHERE YOU CAN FIND MORE INFORMATION

We are subject to the informational requirements of the Exchange Act and the 1940 Act, and are required to file reports (including our annual and semi-annual reports), proxy statements and other information with the SEC. Our most recent shareholder report filed with the SEC is for the period ended June 30, 2021. Such reports, proxy statements and other information, as well as the registration statement and the amendments, exhibits and schedules thereto, can be obtained free of charge from the SEC's website at www.sec.gov. You may also e-mail requests for these documents to publinfo@sec.gov.

This Prospectus Supplement and the accompanying Prospectus do not contain all of the information in our registration statement, including amendments, exhibits, and schedules. Statements in this Prospectus Supplement and the accompanying Prospectus about the contents of any contract or other document are not necessarily complete and in each instance reference is made to the copy of the contract or other document filed as an exhibit to the registration statement, each such statement being qualified in all respects by this reference. Additional information about us can be found in our Registration Statement (including amendments, exhibits, and schedules) on Form N-2 filed with the SEC. The SEC maintains a web site (www.sec.gov) that contains our Registration Statement, other documents incorporated by reference, and other information we have filed electronically with the SEC, including proxy statements and reports filed under the Exchange Act.

\$100,000,000

Blackstone Senior Floating Rate Term Fund

Common Shares

The Fund. Blackstone Senior Floating Rate Term Fund (the “Fund”) is a diversified, closed-end management investment company.

Investment Objectives. The Fund is a diversified, closed-end management investment company. The Fund’s primary investment objective is to seek high current income, with a secondary objective to seek preservation of capital, consistent with its primary goal of high current income. There can be no assurance that the Fund will achieve its investment objectives. The Fund seeks to achieve these investment objectives by investing primarily in senior, secured floating rate loans (“Senior Loans”). Under normal market conditions, Blackstone Liquid Credit Strategies LLC (the “Adviser”), the Fund’s investment adviser, expects the Fund to maintain an average duration of less than one year (including the effect of anticipated leverage).

Investment Strategies. Under normal market conditions, the Fund will invest at least 80% of its Managed Assets (as defined below) in Senior Loans. Senior Loans are made to U.S. and, to a limited extent, non-U.S. corporations, partnerships and other business entities (“Borrowers”) which operate in various industries and geographical regions. Senior Loans pay interest at rates which are determined periodically on the basis of a floating base lending rate, primarily the London-Interbank Offered Rate (“LIBOR”), or a replacement rate in the event that LIBOR is discontinued, plus a premium. Senior Loans typically are of below investment grade quality. Below investment grade quality instruments (including Senior Loans) are those that, at the time of investment, are rated Ba1 or lower by Moody’s Investors Service, Inc. (“Moody’s”) and BB+ or lower by Standard & Poor’s Corporation Ratings Group (“S&P”) or Fitch Ratings, Inc. (“Fitch”), or if unrated are determined by the Adviser to be of comparable quality. Below investment grade instruments, commonly referred to as “junk” or “high yield” securities, are high risk and have speculative characteristics.

The Fund may invest up to 20% of its Managed Assets in (i) loan interests that are not secured by any collateral of the Borrower, (ii) loan interests that have a lower than first lien priority on collateral of the Borrower, (iii) other income producing securities (including, without limitation, U.S. government debt securities and investment and non-investment grade, subordinated and unsubordinated corporate debt securities), (iv) warrants and equity securities issued by a Borrower or its affiliates as part of a package of investments in the Borrower or its affiliates and (v) structured products (including, without limitation, collateralized loan obligations, credit linked notes and derivatives, including credit derivatives).

Investing in the Fund’s securities involves certain risks. See “Risks” beginning on page 59 of this prospectus (“Prospectus”).

Neither the SEC nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Prospectus dated January 26, 2022

Electronic Delivery of Shareholder Reports. As permitted by regulations adopted by the Securities and Exchange Commission (the “SEC”), paper copies of the Fund’s shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund or from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on the Fund’s website and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. Shareholders who invest directly with the Fund may elect to receive shareholder reports and other communications from the Fund electronically by calling toll-free (800) 522-6645 to make such arrangements. For shareholders who invest through a financial intermediary, please contact that financial intermediary directly for information on how to receive shareholder reports and other communications electronically.

You may elect to receive all future reports in paper free of charge. If you invest directly with the Fund, you can inform the Fund that you wish to continue receiving paper copies of your shareholder reports by calling toll-free (800) 522-6645 to make such arrangements. For shareholders who invest through a financial intermediary, please contact that financial intermediary directly to inform them that you wish to continue receiving paper copies of your shareholder reports. If your common shares of beneficial interest (“Common Shares”) are held through a financial intermediary, your election to receive reports in paper will apply to all funds held with that financial intermediary.

(continued on next page)

The Fund's Common Shares are listed on the New York Stock Exchange (the "Exchange") and trade under the ticker symbol "BSL". The net asset value ("NAV") of the Common Shares at the close of business on January 14, 2022 was \$16.30 per share, and the last sale price per share of the Common Shares on the Exchange on that date was \$16.44. Shares of closed-end funds often trade at a discount from NAV.

Offering. The Fund may offer, from time to time, in one or more offerings, the Common Shares, which we also refer to as the "securities," at prices and on terms to be set forth in one or more supplements (each, a "Prospectus Supplement") to this Prospectus.

We may offer and sell our securities to or through underwriters, through dealers or agents that we designate from time to time, directly to purchasers, through at-the-market offerings or through a combination of these methods. If an offering of securities involves any underwriters, dealers or agents, then the applicable Prospectus Supplement will name the underwriters, dealers or agents and will provide information regarding any applicable purchase price, fee, commission or discount arrangements made with those underwriters, dealers or agents or the basis upon which such amount may be calculated. See "Plan of Distribution." We may not sell any of our securities through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the offering of our securities.

Leverage. In pursuing the Fund's investment objectives, the Adviser seeks to enhance the Fund's return by the use of leverage. The Fund uses borrowings, including loans from certain financial institutions and the issuance of debt securities (collectively, "Borrowings"), in an aggregate amount of up to 33 1/3% of the Fund's total assets, less all liabilities and indebtedness not represented by senior securities, immediately after such Borrowings. Furthermore, the Fund may add leverage to its portfolio through the issuance of preferred shares ("Preferred Shares," collectively with the Common Shares, "Shares") and may in the future continue to use leverage through such issuances in an aggregate amount of up to 33 1/3% of the Fund's total assets immediately after such issuance. The use of leverage is a speculative technique that involves special risks and costs associated with the leveraging of the Shares. There can be no assurance that any leveraging strategy the Fund employs will be successful during any period in which it is employed. See "Leverage" and "Risks—Leverage Risk."

Investment Adviser. The Adviser acts as the Fund's investment adviser and also provides administrative and compliance oversight services to the Fund. The Adviser, a wholly-owned subsidiary of Blackstone Alternative Credit Advisors LP (collectively with its affiliates in the credit-focused business of Blackstone, Inc., "Blackstone Credit"), is a registered investment adviser. As of September 30, 2021, Blackstone Credit's asset management operation had aggregate assets under management of \$178 billion across multiple strategies within the leveraged finance marketplace, including loans, high yield bonds, distressed and mezzanine debt and private equity, including hedge funds. In addition, as of December 31, 2020, the Adviser had total assets under management of approximately \$43 billion.

Investors should consider their investment goals, time horizons and risk tolerance before investing in the Fund. An investment in the Fund is not appropriate for all investors, and the Fund is not intended to be a complete investment program. The Fund is designed as a long-term investment and not as a trading vehicle. You should read this Prospectus, which concisely sets forth information about the Fund, before deciding whether to invest in the Common Shares, and retain it for future reference. This Prospectus is part of a registration statement that we have filed with the SEC, using the "shelf" registration process. Under the shelf registration process, we may offer, from time to time, separately or together in one or more offerings, the securities described in this Prospectus. The securities may be offered at prices and on terms described in one or more supplements to this Prospectus. This Prospectus provides you with a general description of the securities that we may offer. Each time we use this Prospectus to offer securities, we will provide a Prospectus Supplement that will contain specific information about the terms of that offering. The Prospectus Supplement may also add, update or change information contained in this Prospectus. This Prospectus, together with any Prospectus Supplement, sets forth concisely the information about us that a prospective investor ought to know before investing. You should read this Prospectus and the related Prospectus Supplement before deciding whether to invest and retain them for future reference. A Statement of Additional Information, dated January 26, 2022, containing additional information about the Fund, has been filed with the SEC and, as amended from time to time, is incorporated by

reference in its entirety into this Prospectus. You may request a free copy of the Statement of Additional Information, annual and semi-annual reports to shareholders (when available), and additional information about the Fund and make shareholder inquiries by calling toll-free (800) 522-6645, by writing to the Fund or visiting the Fund's website (<http://www.blackstone.com/bsl/>). You can access the same documents, including any materials incorporated by reference, free from the SEC's website (<http://www.sec.gov>). You may also e-mail requests for these documents to publicinfo@sec.gov.

The Fund's securities do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

You should rely only on the information contained or incorporated by reference in this Prospectus and any related Prospectus Supplement. We have not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted or where the person making the offer or sale is not qualified to do so or to any person to whom it is not permitted to make such offer or sale. You should assume that the information appearing in this Prospectus and any Prospectus Supplement is accurate only as of the respective dates on their front covers, regardless of the time of delivery of this Prospectus, any Prospectus Supplement, or any sale of our securities. Our business, financial condition, results of operations and prospects may have changed since that date.

PROSPECTUS SUMMARY

This is only a summary of certain information contained in this prospectus (“Prospectus”) relating to Blackstone Senior Floating Rate Term Fund. This summary may not contain all of the information that you should consider before investing in our common shares of beneficial interest, par value \$0.001 per share (“Common Shares”). You should review the more detailed information contained in this Prospectus, any related prospectus supplements (each, a “Prospectus Supplement”) and in the Statement of Additional Information (the “SAI”).

The Fund Blackstone Senior Floating Rate Term Fund is a diversified, closed-end management investment company. Throughout the Prospectus, we refer to Blackstone Senior Floating Rate Term Fund simply as the “Fund” or as “we,” “us” or “our.” See “The Fund.”

The Offering The Fund may offer, from time to time, in one or more offerings, up to \$100,000,000 of the Common Shares, which we also refer to as our securities, at prices and on terms to be set forth in one or more Prospectus Supplements to this Prospectus.

We may offer and sell our securities to or through underwriters, through dealers or agents that we designate from time to time, directly to purchasers, through at-the-market offerings or through a combination of these methods. If an offering of securities involves any underwriters, dealers or agents, then the applicable Prospectus Supplement will name the underwriters, dealers or agents and will provide information regarding any applicable purchase price, fee, commission or discount arrangements made with those underwriters, dealers or agents or the basis upon which such amount may be calculated. See “Plan of Distribution.” We may not sell any of our securities through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the offering of our securities.

Who May Want to Invest Investors should consider their investment goals, time horizons and risk tolerance before investing in the Fund. An investment in the Fund is not appropriate for all investors, and the Fund is not intended to be a complete investment program. The Fund is designed as a long-term investment and not as a trading vehicle. The Fund may be an appropriate investment for investors who are seeking:

- a closed-end fund with a limited term structure that will invest primarily in senior secured, floating rate loans (“Senior Loans”);
- exposure to Senior Loans, which may provide some diversification for an overall portfolio that lacks such exposure; and
- professional selection and active management by the Adviser.

The Adviser believes that current market conditions provide opportunities to invest in Senior Loans and other debt securities that may provide attractive risk adjusted returns. The closed-end structure allows the Fund to maintain a stable pool of assets, without the need

to keep assets in low-yielding instruments like cash or cash equivalents or to liquidate assets, sometimes at inopportune times, to meet redemption requests. The Fund's limited remaining term structure may also mitigate trading discount concerns for long-term investors because the Fund intends to dissolve and distribute substantially all its net assets to shareholders on or about May 31, 2027.

Investment Objectives and Strategies

The Fund's primary investment objective is to seek high current income, with a secondary objective to seek preservation of capital, consistent with its primary goal of high current income. There can be no assurance that the Fund will achieve its investment objectives. The Fund's investment objectives may be changed on 60 days' notice to shareholders. Under normal market conditions, the Adviser expects the Fund to maintain an average duration of less than one year (including the effect of anticipated leverage). Duration is a measure of the price volatility of a debt instrument as a result of changes in market rates of interest, based on the weighted average timing of the instrument's expected principal and interest payments. See "The Fund's Investments."

The Fund will pursue its objectives by investing primarily in Senior Loans. Senior Loans are made to U.S. and, to a limited extent, non-U.S. corporations, partnerships and other business entities ("Borrowers") which operate in various industries and geographical regions. Senior Loans pay interest at rates which are determined periodically by reference to a base lending rate, primarily LIBOR, or a replacement rate in the event that LIBOR is discontinued plus a premium.

Under normal market conditions, at least 80% of the Fund's Managed Assets will be invested in Senior Loans. This policy is not fundamental and may be changed by the board of trustees of the Fund with at least 60 days' written notice provided to shareholders. Borrowers take out Senior Loans to refinance existing debt and for acquisitions, dividends, leveraged buyouts, and general corporate purposes. "Managed Assets" means the total assets of the Fund (including any assets attributable to any preferred shares that may be outstanding or to money borrowed from banks or financial institutions or issued notes for investment purposes) minus the sum of the Fund's accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage).

Senior Loans typically are of below investment grade quality. Below investment grade quality instruments (including Senior Loans) are those that, at the time of investment, are rated Ba1 or lower by Moody's Investors Service, Inc. ("Moody's") and BB+ or lower by Standard & Poor's Corporation Ratings Group ("S&P") or Fitch Ratings, Inc. ("Fitch"), or if unrated are determined by the Adviser to be of comparable quality. Instruments of below investment grade

quality, commonly referred to as “junk” or “high yield” securities, are regarded as having predominantly speculative characteristics with respect to an issuer’s capacity to pay interest and repay principal.

The Fund may invest up to 20% of its Managed Assets in (i) loan interests that are not secured by any collateral of the Borrower, (ii) loan interests that have a lower than first lien priority on collateral of the Borrower, (iii) other income producing securities (including, without limitation, U.S. government debt securities and investment and non-investment grade, subordinated and unsubordinated corporate debt securities), (iv) warrants and equity securities issued by a Borrower or its affiliates as part of a package of investments in the Borrower or its affiliates and (v) structured products (including, without limitation, collateralized loan obligations, credit linked notes and derivatives, including credit derivatives).

The Fund may invest in debt securities, including Senior Loans, of any credit quality, maturity and duration. The Fund may invest in U.S. dollar and non-U.S. dollar denominated securities of issuers located anywhere in the world, and of issuers that operate in any industry. The Fund may also invest in swaps, including single name credit default swaps, single name loan credit default swaps, total return swaps, interest rate swaps and foreign currency swaps.

The Fund may invest up to 50% of its Managed Assets in securities that are considered illiquid. “Illiquid securities” are securities which cannot be sold within seven days in the ordinary course of business at approximately the value used by the Fund in determining its net asset value.

During temporary defensive periods or in order to keep the Fund’s cash fully invested, including during the period when the net proceeds of the offering of Common Shares are being invested, the Fund may deviate from its investment policies and objectives. During such periods, the Fund may invest all or a portion of Managed Assets in U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest that are either issued or guaranteed by the Treasury or by U.S. government agencies or instrumentalities; non-U.S. government securities which have received the highest investment grade credit rating, certificates of deposit issued against funds deposited in a bank or a savings and loan association; commercial paper; bankers’ acceptances; bank time deposits; shares of money market funds; credit linked notes; repurchase agreements with respect to any of the foregoing; asset-backed securities or any other fixed income securities that the Adviser considers consistent with this strategy. It is impossible to predict when, or for how long, the Fund will use these alternative strategies. There can be no assurance that such strategies will be successful. See “The Fund’s Investments—Portfolio Composition—Temporary Strategies; Invest-Up Period; Dissolution” in this prospectus and “The Fund’s

Investments—Investment Policies and Techniques” in the Fund’s SAI.

Percentage limitations described in this prospectus are as of the time of investment by the Fund and may be exceeded because of changes in the market value or investment rating of the Fund’s assets or if a Borrower distributes equity securities as incident to the purchase or ownership of a Senior Loan, Subordinated Loan (as defined below) or in connection with a reorganization of a Borrower.

For a more complete discussion of the Fund’s portfolio composition, see “The Fund’s Investments.”

Leverage The Fund incurs leverage as part of its investment strategy. All costs and expenses related to any form of leverage used by the Fund are borne entirely by holders of Common Shares of the Fund (“common shareholders”). The Fund uses Borrowings in an aggregate amount of up to 33 1/3% of the Fund’s total assets, less all liabilities and indebtedness not represented by senior securities, immediately after such Borrowings. As of September 30, 2021 the Fund had a credit facility with a financial institution in place under which it had Borrowings representing approximately 32.68% of its total assets, less all liabilities and indebtedness not represented by senior securities. Furthermore, the Fund may add leverage to its portfolio through the issuance of preferred shares (“Preferred Shares”) of the Fund and may in the future continue to use leverage through such issuances in an aggregate amount of up to 33 1/3% of the Fund’s total assets immediately after such issuance. As of September 30, 2021, our total leverage (including Borrowings) represented 32.68% of our total assets, less all liabilities and indebtedness not represented by senior securities. See “Leverage,” “Risks—Leverage Risk” and “Description of Shares—Preferred Shares.”

Leverage creates risk for common shareholders, including the likelihood of greater volatility of NAV and market price of the Common Shares, and the risk that fluctuations in interest rates on Borrowings and debt or in the dividend rates on any Preferred Shares may affect the return to the common shareholders or may result in fluctuations in the dividends paid on the Common Shares. There can be no assurance that any leveraging strategy the Fund employs will be successful during any period in which it is employed. See “Risks—Leverage Risk.”

Investment Adviser Blackstone Liquid Credit Strategies LLC acts as the Fund’s investment adviser and also provides administrative and compliance oversight services to the Fund. The Adviser, a wholly-owned subsidiary of Blackstone Alternative Credit Advisors LP (collectively with its affiliates in the credit-focused business of Blackstone Inc., “Blackstone Credit”), is a registered investment adviser. Blackstone Credit is part of the credit platform of Blackstone Inc. (collectively

with its affiliates as the context requires, “Blackstone” and together with Blackstone Credit, the “Firm”), which is one of the world’s leading investment firms with total assets under management of \$731 billion. Blackstone’s asset management businesses include investment vehicles focused on real estate, private equity, public debt and equity, growth equity, opportunistic, non-investment grade credit, real assets and secondary funds, all on a global basis. As of September 30, 2021, Blackstone Credit’s asset management operation had aggregate assets under management of \$178 billion across multiple strategies within the leveraged finance marketplace, including loans, high yield bonds, distressed and mezzanine debt and private equity, including hedge funds. In addition, as of December 31, 2020, the Adviser had total assets under management of approximately \$43 billion.

The Adviser receives a monthly fee at the annual rate of 0.90% of the average daily value of the Fund’s total assets (including any assets attributable to any leverage used) minus the sum of the Fund’s accrued liabilities (other than Fund liabilities incurred for any leverage) (“Managed Assets”). See “Management of the Fund—Investment Advisory Agreement.”

Administrator ALPS Fund Services, Inc. (“ALPS”), located at 1290 Broadway, Suite 1000, Denver, Colorado 80203, serves as administrator to the Fund. Under the Administration, Bookkeeping and Pricing Services Agreement (the “Administration Agreement”), ALPS is responsible for calculating the NAV of the Common Shares and generally managing the administrative affairs of the Fund.

ALPS is entitled to receive a monthly fee based on the Fund’s average daily net assets plus out-of-pocket expenses. See “Management of the Fund—Administrator.”

Distributions The Fund makes regular monthly cash distributions of all or a portion of its net investment income to common shareholders. As of the date of this Prospectus, we have paid distributions to common shareholders every fiscal quarter since inception. Cumulative distributions paid since inception total \$14.016 per share. We intend to continue to pay monthly distributions to our common shareholders. Payment of future distributions is subject to approval by the Board, as well as meeting the covenants under our outstanding notes and credit facility and the asset coverage requirements of the 1940 Act. The Fund distributes to common shareholders at least annually all or substantially all of its net investment income after the payment of interest, fees and dividends, if any, owed with respect to any outstanding forms of leverage utilized by the Fund. The Fund pays any capital gains distributions at least annually. If the Fund realizes a long-term capital gain, it will be required to allocate such gain between the Common Shares and any Preferred Shares issued by the Fund in proportion to the total dividends paid to each class for the year in which the income is realized. The Fund utilizes a “dynamic”

distribution strategy that is based on the net income earned by the Fund. The Fund declares a set of monthly distributions each quarter in amounts closely tied to the Fund's recent average monthly net income. As a result, the monthly distribution amounts for the Fund typically vary quarter-to-quarter. See "Distributions" and "Leverage."

Various factors affect the level of the Fund's income, including the asset mix, the average maturity of the Fund's portfolio, the amount of leverage utilized by the Fund and the Fund's use of hedging. To permit the Fund to maintain a more stable monthly distribution, the Fund may from time to time distribute less than the entire amount of income earned in a particular period. The undistributed income would be available to supplement future distributions. As a result, the distributions paid by the Fund for any particular monthly period may be more or less than the amount of income actually earned by the Fund during that period. Undistributed income will add to the Fund's NAV (and indirectly benefit the Adviser and ALPS by increasing their fees) and, correspondingly, distributions from the Fund's income will reduce the Fund's NAV. See "Distributions."

Cash distributions to common shareholders may be reinvested under our Dividend Reinvestment Plan ("DRIP") in additional whole and fractional shares if you or your representative elect ("opt-in") to enroll in the DRIP. See "Distributions" and "Dividend Reinvestment Plan."

Listing The Fund's Common Shares are listed on the New York Stock Exchange (the "Exchange") and trade under the ticker symbol "BSL". See "Description of Shares—Common Shares."

Custodian and Transfer Agent The Bank of New York Mellon serves as the Fund's custodian. Computershare Inc. ("Computershare"), serves as the Fund's transfer agent. See "Custodian and Transfer Agent."

Market Price of Shares Shares of closed-end management investment companies frequently trade at a discount from their NAV. Common Shares of the Fund and of closed-end management investment companies like the Fund have traded at prices higher than their NAV during some periods, and have traded at prices lower than their NAV during other periods. The Fund cannot assure you that its Common Shares will trade at a price higher than or equal to NAV. In addition to NAV, the market price of the Fund's Common Shares may be affected by such factors as distribution levels, which are in turn affected by expenses, distribution stability, liquidity, and market supply and demand. See "Risks," "Description of Shares—Common Shares" and "Repurchase of Common Shares." The Common Shares are designed primarily for long-term investors; you should not purchase Common Shares of the Fund if you intend to sell them shortly after purchase.

Risks *Investment and Market Risk.* An investment in the Fund's Common Shares is subject to investment risk, including the possible loss of the

entire principal amount invested. An investment in the Fund's Common Shares represents an indirect investment in the portfolio of floating rate instruments, other securities and derivative investments owned by the Fund, and the value of these investments may fluctuate, sometimes rapidly and unpredictably. At any point in time an investment in the Fund's Common Shares may be worth less than the original amount invested, even after taking into account distributions paid by the Fund and the ability of common shareholders to reinvest dividends. The Fund may also use leverage, which would magnify the Fund's investment, market and certain other risks. See "Risks—Leverage Risks."

Below Investment Grade, or High Yield, Instruments Risk. The Fund anticipates that it may invest substantially all of its assets in instruments that are rated below investment grade. Below investment grade instruments are commonly referred to as "junk" or "high yield" instruments and are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal. Lower grade instruments may be particularly susceptible to economic downturns, which could adversely affect the ability of the issuers of such instruments to repay principal and pay interest thereon, increase the incidence of default for such instruments and severely disrupt the market value of such instruments.

Lower grade instruments, though higher yielding, are characterized by higher risk. They may be subject to certain risks with respect to the issuing entity and to greater market fluctuations than certain lower yielding, higher rated instruments. The retail secondary market for lower grade instruments may be less liquid than that for higher rated instruments. Adverse conditions could make it difficult at times for the Fund to sell certain instruments or could result in lower prices than those used in calculating the Fund's NAV. Because of the substantial risks associated with investments in lower grade instruments, investors could lose money on their investment in Common Shares of the Fund, both in the short-term and the long-term."

"Covenant-lite" Obligations Risk. The Fund may invest in, or obtain exposure to, obligations that may be "covenant-lite," which means such obligations lack certain financial maintenance covenants. While these loans may still contain other collateral protections, a covenant-lite loan may carry more risk than a covenant-heavy loan made by the same borrower as it does not require the borrower to provide affirmation that certain specific financial tests have been satisfied on a routine basis as is required under a covenant-heavy loan agreement. Should a loan held by the Fund begin to deteriorate in quality, the Fund's ability to negotiate with the borrower may be delayed under a covenant-lite loan compared to a loan with full maintenance covenants. This may in turn delay the Fund's ability to seek to recover its investment.

Valuation Risk. Unlike publicly traded common stock which trades on national exchanges, there is no central place or exchange for most of the Fund's investments to trade. The Fund's investments generally trade on an "over-the-counter" market which may be anywhere in the world where the buyer and seller can settle on a price. Due to the lack of centralized information and trading, the valuation of loans or fixed-income instruments may carry more risk than that of common stock. Uncertainties in the conditions of the financial market, unreliable reference data, lack of transparency and inconsistency of valuation models and processes may lead to inaccurate asset pricing. In addition, other market participants may value securities differently than the Fund. As a result, the Fund may be subject to the risk that when an instrument is sold in the market, the amount received by the Fund is less than the value of such instrument carried on the Fund's books.

Swap Risk. The Fund may also invest in credit default swaps, total return swaps and interest rate swaps. Such transactions are subject to market risk, liquidity risk, risk of default by the other party to the transaction, known as "counterparty risk," and risk of imperfect correlation between the value of such instruments and the underlying assets and may involve commissions or other costs. When buying protection under a swap, the risk of loss with respect to swaps generally is limited to the net amount of payments that the Fund is contractually obligated to make. However, when selling protection under a swap, the risk of loss is often the notional value of the underlying asset, which can result in a loss substantially greater than the amount invested in the swap itself. The swap market has grown substantially in recent years with a large number of banks and investment banking firms acting both as principals and as agents utilizing standardized swap documentation. As a result, the swap market has become relatively liquid; however, there is no guarantee that the swap market will continue to provide liquidity. If the Adviser is incorrect in its forecasts of market values, interest rates or currency exchange rates, the investment performance of the Fund would be less favorable than it would have been if these investment techniques were not used. In a total return swap, the Fund pays the counterparty a floating short-term interest rate and receives in exchange the total return of underlying loans or debt securities (or pays an equivalent amount, if the total return is negative). The Fund bears the risk of default on the underlying loans or debt securities, based on the notional amount of the swap. The Fund would typically have to post collateral to cover potential obligations under the swap.

Interest Rate Risk. The fixed-income instruments that the Fund may invest in are subject to the risk that market values of such securities will decline as interest rates increase. These changes in interest rates have a more pronounced effect on securities with longer durations. Typically, the impact of changes in interest rates on the market value of an instrument will be more pronounced for fixed-rate instruments, such as most corporate bonds, than it will for Loans or other floating

rate instruments. Fluctuations in the value of portfolio securities will not affect interest income on existing portfolio securities but will be reflected in the Fund's NAV.

LIBOR Risk. On July 27, 2017, the Financial Conduct Authority ("FCA") announced that it would phase out the London Interbank Offered Rate ("LIBOR") as a benchmark by the end of 2021. It is unclear whether new methods of calculating LIBOR will be established such that it continues to exist after 2021. The administrator of LIBOR has announced it will consult on its intention to cease the publication of the one week and two month LIBOR settings immediately following the LIBOR publication on December 31, 2021, and the remaining USD LIBOR settings immediately following the LIBOR publication on June 30, 2023. The U.S. Federal Reserve System ("FRS"), Office of the Comptroller of the Currency, and Federal Deposit Insurance Corporation have issued guidance encouraging market participants to adopt alternatives to LIBOR in new contracts as soon as practicable and no later than December 31, 2021, and the FCA has indicated that market participants should not rely on LIBOR being available after 2021. As an alternative to LIBOR, for example, the FRS, in conjunction with the Alternative Reference Rates Committee, a steering committee comprised of large U.S. financial institutions, is considering replacing U.S.-dollar LIBOR with the Secured Overnight Financing Rate ("SOFR"), a new index calculated by short-term repurchase agreements, backed by Treasury securities. Abandonment of, or modifications to, LIBOR could have adverse impacts on newly issued financial instruments and the Fund's existing financial instruments which reference LIBOR. While some instruments may contemplate a scenario where LIBOR is no longer available by providing for an alternative rate setting methodology, not all instruments may have such provisions and there is significant uncertainty regarding the effectiveness of any such alternative methodologies. Abandonment of, or modifications to, LIBOR could lead to significant short-term and long-term uncertainty and market instability. If LIBOR ceases to exist, the Fund and its portfolio companies may need to amend or restructure our existing LIBOR-based debt instruments and any related hedging arrangements that extend beyond December 31, 2021, or June 30, 2023, depending on the applicable LIBOR tenor and pending the outcome of the LIBOR administrator's consultation. Such amendments and restructurings may be difficult, costly and time consuming. In addition, from time to time the Fund invests in floating rate loans and investment securities whose interest rates are indexed to LIBOR. Uncertainty as to the nature of alternative reference rates and as to potential changes or other reforms to LIBOR, or any changes announced with respect to such reforms, may result in a sudden or prolonged increase or decrease in the reported LIBOR rates and the value of LIBOR-based loans and securities, including those of other issuers the Fund currently owns or may in the future own. It remains uncertain how such changes would be implemented and the

effects such changes would have on us, issuers of instruments in which the Fund invests and financial markets generally.

The expected discontinuation of LIBOR could have a significant impact on the Fund's business. There could be significant operational challenges for the transition away from LIBOR including, but not limited to, amending loan agreements with borrowers on investments that may have not been modified with fallback language and adding effective fallback language to new agreements in the event that LIBOR is discontinued before maturity. Beyond these challenges, the Fund anticipates there may be additional risks to the Fund's current processes and information systems that will need to be identified and evaluated by us. Due to the uncertainty of the replacement for LIBOR, the potential effect of any such event on the Fund's cost of capital and net investment income cannot yet be determined. In addition, the cessation of LIBOR could:

- Adversely impact the pricing, liquidity, value of, return on and trading for a broad array of financial products, including any LIBOR-linked securities, loans and derivatives that may be included in the Fund's assets and liabilities;
- Require extensive changes to documentation that governs or references LIBOR or LIBOR-based products, including, for example, pursuant to time-consuming renegotiations of documentation to modify the terms of investments;
- Result in inquiries or other actions from regulators in respect of the Fund's preparation and readiness for the replacement of LIBOR with one or more alternative reference rates;
- Result in disputes, litigation or other actions with portfolio companies, or other counterparties, regarding the interpretation and enforceability of provisions in the Fund's LIBOR-based investments, such as fallback language or other related provisions, including, in the case of fallbacks to the alternative reference rates, any economic, legal, operational or other impact resulting from the fundamental differences between LIBOR and the various alternative reference rates;
- Require the transition and/or development of appropriate systems and analytics to effectively transition the Fund's risk management processes from LIBOR-based products to those based on one or more alternative reference rates, which may prove challenging given the limited history of the proposed alternative reference rates; and
- Cause us to incur additional costs in relation to any of the above factors.

There is no guarantee that a transition from LIBOR to an alternative will not result in financial market disruptions, significant increases in benchmark rates, or borrowing costs to borrowers, any of which could

have a material adverse effect on the Fund's business, result of operations, financial condition, and unit price. In addition, the transition to a successor rate could potentially cause (i) increased volatility or illiquidity in markets for instruments that currently rely on LIBOR, (ii) a reduction in the value of certain instruments held by the Fund, or (iii) reduced effectiveness of related Fund transactions, such as hedging. It remains uncertain how such changes would be implemented and the effects such changes would have on the Fund, issuers of instruments in which the Fund invests and financial markets generally.

Force Majeure Risk. The Fund may be affected by force majeure events (e.g., acts of God, fire, flood, earthquakes, outbreaks of an infectious disease, pandemic or any other serious public health concern, war, terrorism, nationalization of industry and labor strikes). Force majeure events could adversely affect the ability of the Fund or a counterparty to perform its obligations. The liability and cost arising out of a failure to perform obligations as a result of a force majeure event could be considerable and could be borne by the Fund. Certain force majeure events, such as war or an outbreak of an infectious disease, could have a broader negative impact on the global or local economy, thereby affecting the Fund. Additionally, a major governmental intervention into industry, including the nationalization of an industry or the assertion of control, could result in a loss to the Fund if an investment is affected, and any compensation provided by the relevant government may not be adequate.

Epidemic and Pandemic Risk. The world has been susceptible to epidemics/pandemics, most recently COVID-19, which has been designated as a pandemic by the World Health Organization. Any outbreak of COVID-19, SARS, H1N1/09 flu, avian flu, other coronavirus, Ebola or other existing or new epidemics/pandemics, or the threat thereof, together with any resulting restrictions on travel or quarantines imposed, has had, and will continue to have, an adverse impact on the economy and business activity globally (including in the countries in which the Fund invests), and thereby is expected to adversely affect the performance of the Fund's investments and the Fund's ability to fulfill its investment objectives. Furthermore, the rapid development of epidemics/pandemics could preclude prediction as to their ultimate adverse impact on economic and market conditions, and, as a result, presents material uncertainty and risk with respect to the Fund and the performance of its investments.

COVID-19 Risk. During the first quarter of 2020, there was a global outbreak of COVID-19, which has spread to over 200 countries and territories, including the United States, and has spread to every state in the United States. On March 11, 2020, the World Health Organization designated COVID-19 as a pandemic, and on March 13, 2020, the United States declared a national emergency with respect to COVID-19. The global impact of the outbreak has been rapidly

evolving, and as cases of COVID-19 have continued to be identified in additional countries, many countries have reacted by instituting quarantines, restrictions on travel, closing financial markets and/or restricting trading, and limiting hours of operations of non-essential businesses. Such actions are creating disruption in global supply chains, and adversely impacting a number of industries, including industries in which our portfolio companies operate. The outbreak of COVID-19 could have a continued adverse impact on economic and market conditions and has triggered a period of global economic slowdown.

The outbreak of COVID-19 and related effects, which continue to be unpredictable, could have a material adverse impact on the Fund's NAV, financial condition, liquidity, results of operations, and the businesses of our portfolio companies, among other factors. Negative impacts to the Fund's business as a result of the pandemic could exacerbate other risks described herein, including:

- weakening financial conditions of or the bankruptcy or insolvency of portfolio companies, which may result in the inability of such portfolio companies to meet debt obligations, delays in collecting accounts receivable, defaults, or forgiveness or deferral of interest payments from such portfolio companies;
- significant volatility in the markets for syndicated loans, which could cause rapid and large fluctuations in the values of such investments and adverse effects on the liquidity of any such investments;
- deterioration in credit and financing market conditions, which may adversely impact the Fund's ability to access financing for its investments on favorable terms or at all;
- operational impacts on the Fund's Adviser, Administrator and its other third-party advisors, service providers, vendors and counterparties, including independent valuation firms, our sub-administrator, our lenders and other providers of financing, brokers and other counterparties that we purchase and sell assets to and from, derivative counterparties, and legal and diligence professionals that we rely on for acquiring the Fund's investments;
- limitations on the Fund's ability to ensure business continuity in the event the Adviser, or our third-party advisors' and service providers' continuity of operations plan is not effective or improperly implemented or deployed during a disruption;
- the availability of key personnel of the Adviser, Administrator and our other service providers as they face changed circumstances and potential illness during the pandemic;
- difficulty in valuing the Fund's assets in light of significant changes in the financial markets, including difficulty in forecasting discount rates and making market comparisons, and

circumstances affecting the Adviser's, Administrator's and our service providers' personnel during the pandemic;

- limitations on the Fund's ability to raise new capital;
- significant changes to the valuations of pending investments; and
- limitations on the Fund's ability to make distributions to our shareholders due to material adverse impacts on its cash flows from operations or liquidity.

The rapid development and fluidity of this situation precludes any prediction as to the ultimate adverse impact of COVID-19 on economic and market conditions, and, as a result, present material uncertainty and risk with respect to us and the performance of the Fund's investments. The full extent of the impact and effects of COVID-19 will depend on future developments, including, among other factors, the duration and spread of the outbreak, along with related travel advisories, quarantines and restrictions, the recovery time of the disrupted supply chains and industries, the impact of labor market interruptions, the impact of government interventions, the availability and use of effective vaccines, and uncertainty with respect to the duration of the global economic slowdown. COVID-19 and the current financial, economic and capital markets environment, and future developments in these and other areas present uncertainty and risk with respect to the Fund's performance, financial condition, results of operations and ability to pay distributions.

Market Disruption and Geopolitical Risk. The Fund may be adversely affected by uncertainties such as terrorism, international political developments, and changes in government policies, taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of the countries in which it is invested. Likewise, natural and environmental disasters, epidemics or pandemics, and systemic market dislocations may be highly disruptive to economies and markets. Uncertainties and events around the world may (i) result in market volatility, (ii) have long-term effects on the U.S. and worldwide financial markets and (iii) cause further economic uncertainties in the United States and worldwide. The Fund cannot predict the effects of geopolitical events in the future on the U.S. economy and securities markets.

Lender Liability Risk. A number of U.S. judicial decisions have upheld judgments obtained by Borrowers against lending institutions on the basis of various evolving legal theories, collectively termed "lender liability." Generally, lender liability is founded on the premise that a lender has violated a duty (whether implied or contractual) of good faith, commercial reasonableness and fair dealing, or a similar duty owed to the Borrower or has assumed an excessive degree of control over the Borrower resulting in the creation of a fiduciary duty owed to the Borrower or its other creditors or shareholders. Because

of the nature of its investments, the Fund may be subject to allegations of lender liability.

In addition, under common law principles that in some cases form the basis for lender liability claims, if a lender or bondholder (a) intentionally takes an action that results in the undercapitalization of a Borrower to the detriment of other creditors of such Borrower, (b) engages in other inequitable conduct to the detriment of such other creditors, (c) engages in fraud with respect to, or makes misrepresentations to, such other creditors or (d) uses its influence as a stockholder to dominate or control a Borrower to the detriment of other creditors of such Borrower, a court may elect to subordinate the claim of the offending lender or bondholder to the claims of the disadvantaged creditor or creditors, a remedy called “equitable subordination.”

Because affiliates of, or persons related to, the Adviser may hold equity or other interests in obligors of the Fund, the Fund could be exposed to claims for equitable subordination or lender liability or both based on such equity or other holdings.

Counterparty Risk. The Fund is subject to credit risk with respect to the counterparties to its derivatives contracts (whether a clearing corporation in the case of exchange-traded instruments or our hedge counterparty in the case of OTC instruments) purchased by the Fund. Counterparty risk is the risk that the other party in a derivative transaction will not fulfill its contractual obligation. Changes in the credit quality of the companies that serve as the Fund’s counterparties with respect to their derivative transactions will affect the value of those instruments. By entering into derivatives, the Fund assumes the risks that these counterparties could experience financial or other hardships that could call into question their continued ability to perform their obligations. In the case of a default by the counterparty, the Fund could become subject to adverse market movements while replacement transactions are executed. The ability of the Fund to transact business with any one or number of counterparties, the possible lack of a meaningful and independent evaluation of such counterparties’ financial capabilities, and the absence of a regulated market to facilitate settlement may increase the potential for losses by the Fund. Furthermore, concentration of derivatives in any particular counterparty would subject the Fund to an additional degree of risk with respect to defaults by such counterparty.

The Adviser evaluates and monitors the creditworthiness of counterparties in order to ensure that such counterparties can perform their obligations under the relevant agreements. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial or other difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a dissolution, assignment for the benefit of

creditors, liquidation, winding-up, bankruptcy or other analogous proceedings. In addition, in the event of the insolvency of a counterparty to a derivative transaction, the derivative contract would typically be terminated at its fair market value. If the Fund is owed this fair market value upon the termination of the derivative contract and its claim is unsecured, the Fund will be treated as a general creditor of such counterparty, and will not have any claim with respect to the underlying assets. The Fund may obtain only a limited recovery or may obtain no recovery at all in such circumstances. In addition, regulations that were adopted by prudential regulators in 2019 require certain bank-regulated counterparties and certain of their affiliates to include in certain financial contracts, including many derivatives contracts, terms that delay or restrict the rights of counterparties, such as the Fund, to terminate such contracts, foreclose upon collateral, exercise other default rights or restrict transfers of credit support in the event that such counterparty and/or its affiliates are subject to certain types of resolution or insolvency proceedings.

Certain categories of interest rate and credit default swaps are subject to mandatory clearing, and more categories may be subject to mandatory clearing in the future. The counterparty risk for cleared derivatives is generally lower than for uncleared OTC derivative transactions because generally a clearing organization becomes substituted for each counterparty to a cleared derivative contract and, in effect, guarantees the parties' performance under the contract as each party to a trade looks only to the clearing house for performance of financial obligations. However, there can be no assurance that a clearing house, or its members, will satisfy the clearing house's obligations (including, but not limited to, financial obligations and legal obligations to segregate margins collected by the clearing house) to the Fund. Counterparty risk with respect to certain exchange-traded and over-the-counter derivatives may be further complicated by recently enacted U.S. financial reform legislation.

Potential Conflicts of Interest Risk. The Adviser will be subject to certain conflicts of interest in its management of the Fund. These conflicts will arise primarily from the involvement of the Adviser, Blackstone Credit, Blackstone and their affiliates in other activities that may conflict with those of the Fund. The Adviser, Blackstone Credit, Blackstone and their affiliates engage in a broad spectrum of activities. In the ordinary course of their business activities, the Adviser, Blackstone Credit, Blackstone and their affiliates may engage in activities where the interests of certain divisions of the Adviser, Blackstone Credit, Blackstone and their affiliates or the interests of their clients may conflict with the interests of the Fund or the common shareholders. Other present and future activities of the Adviser, Blackstone Credit, Blackstone and their affiliates may give rise to additional conflicts of interest, which may have a negative impact on the Fund.

In addressing these conflicts and regulatory, legal and contractual requirements across its various businesses, Blackstone has implemented certain policies and procedures (e.g., information walls) that may reduce the positive firm-wide synergies that the Adviser may have potentially utilized for purposes of finding attractive investments. Additionally, Blackstone may limit a client and/or its portfolio companies from engaging in agreements with or related to companies in which any fund of Blackstone has or has considered making an investment or which is otherwise an advisory client of Blackstone and/or from time to time restrict or otherwise limit the ability of the Fund to make investments in or otherwise engage in businesses or activities competitive with companies or other clients of Blackstone, either as result of contractual restrictions or otherwise. Finally, Blackstone has in the past entered, and is likely in the future to enter, into one or more strategic relationships in certain regions or with respect to certain types of investments that, although possibly intended to provide greater opportunities for the Fund, may require the Fund to share such opportunities or otherwise limit the amount of an opportunity the Fund can otherwise take.

As part of its regular business, Blackstone provides a broad range of services other than those provided by the Adviser, including investment banking, underwriting, capital markets syndication and advisory (including underwriting), placement, financial advisory, restructuring and advisory, consulting, asset/property management, mortgage servicing, insurance (including title insurance), monitoring, commitment, syndication, origination, servicing, management consulting and other similar operational and finance matters, healthcare consulting/brokerage, group purchasing, organizational, operational, loan servicing, financing, divestment and other services. In addition, Blackstone may provide services in the future beyond those currently provided. The Fund will not receive a benefit from the fees or profits derived from such services. In such a case, a client of Blackstone would typically require Blackstone to act exclusively on its behalf. This request may preclude all of Blackstone clients (including the Fund) from participating in related transactions that would otherwise be suitable. Blackstone will be under no obligation to decline any such engagements in order to make an investment opportunity available to the Fund. In connection with its other businesses, Blackstone will likely come into possession of information that limits its ability to engage in potential transactions. The Fund's activities are expected to be constrained as a result of the inability of the personnel of Blackstone to use such information. For example, employees of Blackstone from time to time are prohibited by law or contract from sharing information with members of the Adviser's investment team that would be relevant to monitoring the Fund's portfolio and other investment decisions. Additionally, there are expected to be circumstances in which one or more of certain individuals associated with Blackstone will be precluded from providing services related to the Fund's activities because of certain

confidential information available to those individuals or to other parts of Blackstone (e.g., trading may be restricted). Blackstone has long term relationships with a significant number of corporations and their senior management. In determining whether to invest in a particular transaction on behalf of the Fund, the Adviser will consider those relationships, and may decline to participate in a transaction as a result of such relationships. To the extent permitted by the 1940 Act, the Fund may also co-invest with clients of Blackstone in particular investment opportunities, and the relationship with such clients could influence the decisions made by the Adviser with respect to such investments. The Fund may be forced to sell or hold existing investments (possibly at disadvantageous times or under disadvantageous conditions) as a result of various relationships that Blackstone may have or transactions or investments Blackstone and its affiliates may make or have made. The inability to transact in any security, derivative or loan held by the Fund could result in significant losses or lost opportunity costs to the Fund.

Limitations on Transactions with Affiliates Risk. The 1940 Act limits our ability to enter into certain transactions with certain of our affiliates. As a result of these restrictions, we may be prohibited from buying or selling any security directly from or to any portfolio company of or private equity fund managed by Blackstone, Blackstone Credit or any of their respective affiliates. However, the Fund may under certain circumstances purchase any such portfolio company's loans or securities in the secondary market, which could create a conflict for the Adviser between the interests of the Fund and the portfolio company, in that the ability of the Adviser to recommend actions in the best interest of the Fund might be impaired. The 1940 Act also prohibits certain "joint" transactions with certain of our affiliates, which could include investments in the same portfolio company (whether at the same or different times). These limitations may limit the scope of investment opportunities that would otherwise be available to us. Although the Fund has received an exemptive order from the SEC that permits it, among other things, to co-invest with certain affiliates of the Adviser and certain funds managed and controlled by the Adviser and its affiliates, it may only do so in accordance with certain terms and conditions that limit the types of transactions the Fund may engage in.

Dependence on Key Personnel Risk. The Adviser is dependent upon the experience and expertise of certain key personnel in providing services with respect to the Fund's investments. If the Adviser were to lose the services of these individuals, its ability to service the Fund could be adversely affected. As with any managed fund, the Adviser may not be successful in selecting the best-performing securities or investment techniques for the Fund's portfolio and the Fund's performance may lag behind that of similar funds. The Adviser has informed the Fund that the investment professionals associated with the Adviser are actively involved in other investment activities not

concerning the Fund and will not be able to devote all of their time to the Fund's business and affairs. In addition, individuals not currently associated with the Adviser may become associated with the Fund and the performance of the Fund may also depend on the experience and expertise of such individuals.

Prepayment Risk. During periods of declining interest rates, Borrowers or issuers may exercise their option to prepay principal earlier than scheduled. For fixed rate securities, such payments often occur during periods of declining interest rates, forcing the Fund to reinvest in lower yielding securities, resulting in a possible decline in the Fund's income and distributions to common shareholders. This is known as prepayment or "call" risk. Below investment grade instruments frequently have call features that allow the issuer to redeem the security at dates prior to its stated maturity at a specified price (typically greater than par) only if certain prescribed conditions are met ("call protection"). An issuer may redeem a below investment grade instrument if, for example, the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer. Loans and the loans underlying CLOs in which the Fund invests typically do not have call protection after a certain period from initial issuance. For premium bonds (bonds acquired at prices that exceed their par or principal value) purchased by the Fund, prepayment risk may be enhanced.

UK Exit from the EU. The United Kingdom (the "UK") formally left the European Union (the "EU") on January 31, 2020 (commonly known as "Brexit"), followed by an implementation period, during which EU law continued to apply in the UK and the UK maintained its EU single market access rights and EU customs union membership. The implementation period expired on December 31, 2020. Consequently, the UK has become a third country vis-à-vis the EU, without access to the single market or membership of the EU customs union.

During the implementation period, on December 30, 2020, the UK and the EU signed a trade and cooperation agreement (the "TCA") to govern their ongoing relationship. The TCA was officially ratified by the UK Parliament on December 30, 2020, and was ratified by the EU Parliament and Council on April 27, 2021. It is anticipated that further details of the relationship between the UK and the EU will continue to be negotiated even after formal ratification of the TCA.

Over time, UK regulated firms and other UK businesses may be adversely affected by the terms of the TCA (assuming it is formally ratified by the EU), as compared with the position prior to the expiration of the implementation period on December 31, 2020. For example, the TCA introduces new customs checks, as well as new restrictions on the provision of cross-border services and on the free movement of employees. These changes have the potential to

materially impair the profitability of a business, and to require it to adapt or even relocate.

Although it is probable that any adverse effects flowing from the UK's withdrawal from the EU will principally affect the UK (and those having an economic interest in, or connected to, the UK), given the size and global significance of the UK's economy, the impact of the withdrawal is unpredictable and likely to be an ongoing source of instability, produce significant currency fluctuations, and/or have other adverse effects on international markets, international trade agreements and/or other existing cross-border cooperation arrangements (whether economic, tax, fiscal, legal, regulatory or otherwise). The withdrawal of the UK from the EU could therefore adversely affect us. In addition, although it seems less likely following the expiration of the transition period than at the time of the UK's referendum, the withdrawal of the UK from the EU could have a further destabilizing effect if any other member states were to consider withdrawing from the EU, presenting similar and/or additional potential risks and consequences to our business and financial results.

Repurchase Agreements Risk. Subject to its investment objectives and policies, the Fund may invest in repurchase agreements as a buyer for investment purposes. Repurchase agreements typically involve the acquisition by the Fund of debt securities from a selling financial institution such as a bank, savings and loan association or broker-dealer. The agreement provides that the Fund will sell the securities back to the institution at a fixed time in the future. The Fund does not bear the risk of a decline in the value of the underlying security unless the seller defaults under its repurchase obligation. In the event of the bankruptcy or other default of a seller of a repurchase agreement, the Fund could experience both delays in liquidating the underlying securities and losses, including (1) possible decline in the value of the underlying security during the period in which the Fund seeks to enforce its rights thereto; (2) possible lack of access to income on the underlying security during this period; and (3) expenses of enforcing its rights. In addition, as described above, the value of the collateral underlying the repurchase agreement will be at least equal to the repurchase price, including any accrued interest earned on the repurchase agreement. In the event of a default or bankruptcy by a selling financial institution, the Fund generally will seek to liquidate such collateral. However, the exercise of the Fund's right to liquidate such collateral could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss.

Reverse Repurchase Agreements Risk. The Fund's use of reverse repurchase agreements involves many of the same risks involved in the Fund's use of leverage, as the proceeds from reverse repurchase agreements generally will be invested in additional securities. There

is a risk that the market value of the securities acquired in the reverse repurchase agreement may decline below the price of the securities that the Fund has sold but remains obligated to repurchase. In addition, there is a risk that the market value of the securities retained by the Fund may decline. If the buyer of securities under a reverse repurchase agreement were to file for bankruptcy or experiences insolvency, the Fund may be adversely affected. Also, in entering into reverse repurchase agreements, the Fund would bear the risk of loss to the extent that the proceeds of the reverse repurchase agreement are less than the value of the underlying securities. In addition, due to the interest costs associated with reverse repurchase agreements transactions, the Fund's NAV will decline, and, in some cases, the Fund may be worse off than if it had not used such instruments.

Investments in Equity Securities or Warrants Incidental to Investments in Fixed Income Instruments. From time to time the Fund also may invest in or hold common stock and other equity securities or warrants incidental to the purchase or ownership of a fixed income instrument or in connection with a reorganization of an issuer. Investments in equity securities incidental to investments in fixed income instruments entail certain risks in addition to those associated with investments in fixed income instruments. Because equity is merely the residual value of an issuer after all claims and other interests, it is inherently more risky than the bonds or loans of the same issuer. The value of the equity securities may be affected more rapidly, and to a greater extent, by company-specific developments and general market conditions. These risks may increase fluctuations in the Fund's NAV. The Fund frequently may possess material non-public information about a Borrower or issuer as a result of its ownership of a fixed income instrument. Because of prohibitions on trading in securities while in possession of material non-public information, the Fund might be unable to enter into a transaction in a security of an issuer when it would otherwise be advantageous to do so.

Inflation/Deflation Risk. Inflation risk is the risk that the value of certain assets or income from the Fund's investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and Preferred Shares, and distributions thereon, can decline.

In addition, during any periods of rising inflation, the dividend rates or borrowing costs associated with the Fund's use of leverage would likely increase, which would tend to further reduce returns to common shareholders. Deflation risk is the risk that prices throughout the economy decline over time—the opposite of inflation. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer defaults more likely, which may result in a decline in the value of the Fund's portfolio.

U.S. Government Debt Securities Risk. U.S. government debt securities generally do not involve the credit risks associated with investments in other types of debt securities, although, as a result, the yields available from U.S. government debt securities are generally lower than the yields available from other securities. Like other debt securities, however, the values of U.S. government securities change as interest rates fluctuate. Fluctuations in the value of portfolio securities will not affect interest income on existing portfolio securities but will be reflected in the Fund's NAV. Since the magnitude of these fluctuations will generally be greater at times when the Fund's average maturity is longer, under certain market conditions the Fund may, for temporary defensive purposes, accept lower current income from short-term investments rather than investing in higher yielding long-term securities. In addition, the recent economic crisis in the United States has negatively impacted government-sponsored entities, which include Federal Home Loan Banks, Fannie Mae and Freddie Mac. As the real estate market has deteriorated through declining home prices and increasing foreclosure, government-sponsored entities, which back the majority of U.S. mortgages, have experienced extreme volatility and in some cases a lack of liquidity. In September 2008, Fannie Mae and Freddie Mac were placed under a conservatorship of the U.S. federal government. Any Fund investments issued by Federal Home Loan Banks and Fannie Mae may ultimately lose value.

Cyber-Security and Identity Theft Risk. The Fund's operations are highly dependent on the Adviser's information systems and technology and the Fund relies heavily on the Adviser's financial, accounting, communications and other data processing systems. The Adviser's systems may fail to operate properly or become disabled as a result of tampering or a breach of its network security systems or otherwise. In addition, the Adviser's systems face ongoing cybersecurity threats and attacks. Attacks on the Adviser's systems could involve, and in some instances have in the past involved, attempts intended to obtain unauthorized access to its proprietary information, destroy data or disable, degrade or sabotage its systems, or divert or otherwise steal funds, including through the introduction of computer viruses, "phishing" attempts and other forms of social engineering. Cyberattacks and other security threats could originate from a wide variety of external sources, including cyber criminals, nation state hackers, hacktivists and other outside parties. Cyberattacks and other security threats could also originate from the malicious or accidental acts of insiders, such as employees of the Adviser.

There has been an increase in the frequency and sophistication of the cyber and security threats the Adviser faces, with attacks ranging from those common to businesses to those that are more advanced and persistent, which may target the Adviser because, as an alternative asset management firm, the Adviser holds a significant amount of confidential and sensitive information about its investors,

its portfolio companies or obligors (as applicable) and potential investments. As a result, the Adviser may face a heightened risk of a security breach or disruption with respect to this information. There can be no assurance that measures the Adviser takes to ensure the integrity of its systems will provide protection, especially because cyberattack techniques used change frequently or are not recognized until successful. If the Adviser's systems are compromised, do not operate properly or are disabled, or it fails to provide the appropriate regulatory or other notifications in a timely manner, the Adviser could suffer financial loss, a disruption of its businesses, liability to its investment funds and fund investors, including the Fund and common shareholders, regulatory intervention or reputational damage. The costs related to cyber or other security threats or disruptions may not be fully insured or indemnified by other means.

In addition, the Fund could also suffer losses in connection with updates to, or the failure to timely update, the Adviser's information systems and technology. In addition, the Adviser has become increasingly reliant on third party service providers for certain aspects of its business, including for the administration of certain funds, as well as for certain information systems and technology, including cloud-based services. These third party service providers could also face ongoing cyber security threats and compromises of their systems and as a result, unauthorized individuals could gain, and in some past instances have gained, access to certain confidential data.

Cybersecurity has become a top priority for regulators around the world. Many jurisdictions in which the Adviser operates have laws and regulations relating to data privacy, cybersecurity and protection of personal information, including, as examples, the General Data Protection Regulation in the EU and that went into effect in May 2018 and the California Consumer Privacy Act that went into effect in January 2020. Some jurisdictions have also enacted laws requiring companies to notify individuals and government agencies of data security breaches involving certain types of personal data.

Breaches in security, whether malicious in nature or through inadvertent transmittal or other loss of data, could potentially jeopardize the Adviser, its employees' or the Fund's investors' or counterparties' confidential, proprietary and other information processed and stored in, and transmitted through, the Adviser's computer systems and networks, or otherwise cause interruptions or malfunctions in its, its employees', the Fund's investors', the Fund's counterparties' or third parties' business and operations, which could result in significant financial losses, increased costs, liability to the Fund's investors and other counterparties, regulatory intervention and reputational damage. Furthermore, if the Adviser fails to comply with the relevant laws and regulations or fail to provide the appropriate regulatory or other notifications of breach in a timely matter, it could result in regulatory investigations and penalties, which could lead to

negative publicity and reputational harm, and may cause the Fund's investors and clients to lose confidence in the effectiveness of its security measures.

Obligors of the Fund also rely on data processing systems and the secure processing, storage and transmission of information, including payment and health information. A disruption or compromise of these systems could have a material adverse effect on the value of these businesses. The Fund may invest in strategic assets having a national or regional profile or in infrastructure, the nature of which could expose it to a greater risk of being subject to a terrorist attack or security breach than other assets or businesses. Such an event may have material adverse consequences on the Fund's investment or assets of the same type or may require obligors of the Fund to increase preventative security measures or expand insurance coverage.

Finally, the Adviser's and the Fund's technology, data and intellectual property and the technology, data and intellectual property of their portfolio companies or obligors (as applicable) are also subject to a heightened risk of theft or compromise to the extent the Adviser and the Fund's portfolio companies or obligors (as applicable) engage in operations outside the United States, in particular in those jurisdictions that do not have comparable levels of protection of proprietary information and assets such as intellectual property, trademarks, trade secrets, know-how and customer information and records. In addition, the Adviser and the Fund and their portfolio companies or obligors (as applicable) may be required to compromise protections or forego rights to technology, data and intellectual property in order to operate in or access markets in a foreign jurisdiction. Any such direct or indirect compromise of these assets could have a material adverse impact on the Adviser and the Fund and their portfolio companies or obligors (as applicable).

Portfolio Turnover Risk. The Fund's annual portfolio turnover rate may vary greatly from year to year, as well as within a given year. However, portfolio turnover rate is not considered a limiting factor in the execution of investment decisions for the Fund. High portfolio turnover may result in the realization of net short-term capital gains by the Fund which, when distributed to common shareholders, will be taxable as ordinary income. A high portfolio turnover may increase the Fund's current and accumulated earnings and profits, resulting in a greater portion of the Fund's distributions being treated as a dividend to the Fund's common shareholders. In addition, a higher portfolio turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund.

Government Intervention in the Financial Markets. The recent instability in the financial markets has led the U.S. government to

take a number of unprecedented actions designed to support certain financial institutions and segments of the financial markets that have experienced extreme volatility, and in some cases a lack of liquidity. Federal, state, and other governments, their regulatory agencies or self-regulatory organizations may take additional actions that affect the regulation of the securities or structured products in which the Fund invests, or the issuers of such securities or structured products, in ways that are unforeseeable. Borrowers under Secured Loans held by the Fund may seek protection under the bankruptcy laws. Legislation or regulation may also change the way in which the Fund itself is regulated. Such legislation or regulation could limit or preclude the Fund's ability to achieve its investment objectives. The Adviser will monitor developments and seek to manage the Fund's portfolio in a manner consistent with achieving the Fund's investment objectives, but there can be no assurance that it will be successful in doing so.

Derivatives Risk. Under normal market conditions, the use of derivatives by the Fund, other than for hedging purposes, will not exceed 20% of the Fund's Managed Assets on a mark-to-market basis. The Fund's use of derivative instruments may be speculative and involves investment risks and transaction costs to which the Fund would not be subject absent the use of these instruments, and the use of derivatives generally involves leverage in the sense that the investment exposure created by the derivatives may be significantly greater than the Fund's initial investment in the derivatives. In some cases, the use of derivatives may result in losses in excess of principal or greater than if they had not been used. The ability to successfully use derivative instruments depends on the ability of the Adviser. The skills needed to employ derivatives strategies are different from those needed to select a portfolio security and, in connection with such strategies, the Adviser must make predictions with respect to market conditions, liquidity, currency movements, market values, interest rates and other applicable factors, which may be inaccurate. The use of derivative instruments may require the Fund to sell or purchase portfolio securities at inopportune times or for prices below or above the current market values, may limit the amount of appreciation the Fund can realize on an investment or may cause the Fund to hold a security that it might otherwise want to sell. The Fund may also have to defer closing out certain derivative positions to avoid adverse tax consequences and there may be situations in which derivative instruments are not elected that result in losses greater than if such instruments had been used. Amounts paid by the Fund as premiums and cash or other assets held in margin accounts with respect to the Fund's derivative instruments would not be available to the Fund for other investment purposes, which may result in lost opportunities for gain. Changes to the derivatives markets as a result of the continuous promulgation of rules under the Dodd- Frank Act and other government or international and other government regulation may also have an adverse effect on the Fund's ability to make use of

derivative transactions. In addition, the use of derivatives is subject to other risks, each of which may create additional risk of loss, including liquidity risk, interest rate risk, credit risk and management risk as well as the following risks:

- **Correlation Risk.** Imperfect correlation between the value of derivative instruments and the underlying assets of the Fund creates the possibility that the loss on such instruments may be greater than the gain in the value of the underlying assets in the Fund's portfolio.
- **Duration Mismatch Risk.** The duration of a derivative instrument may be significantly different than the duration of the related liability or asset.
- **Valuation Risk.** The prices of derivative instruments, including swaps, futures, forwards and options, could be highly volatile and such instruments may subject us to significant losses. The value of such derivatives also depends upon the price of the underlying asset, reference rate or index, which may also be subject to volatility. In addition, actual or implied daily limits on price fluctuations and speculative position limits on the exchanges or over-the-counter markets in which we may conduct our transactions in derivative instruments may prevent prompt liquidation of positions, subjecting us to the potential of greater losses. In addition, significant disparities may exist between "bid" and "asked" prices for derivative instruments that are traded over-the-counter and not on an exchange.
- **Liquidity Risk.** Derivative instruments, especially when purchased in large amounts, may not be liquid in all circumstances, so that in volatile markets we may not be able to close out a position without incurring a loss.
- **Counterparty Risk.** Derivative instruments also involve exposure to counterparty risk, since contract performance depends in part on the financial condition of the counterparty.

In addition, the Adviser may cause the Fund to invest in derivative instruments that are neither presently contemplated nor currently available, but which may be developed in the future, to the extent such opportunities are both consistent with the Fund's investment objectives and legally permissible. Any such investments may expose the Fund to unique and presently indeterminate risks, the impact of which may not be capable of determination until such instruments are developed and/or the Adviser determines to make such an investment on behalf of the Fund.

In October 2020, the SEC adopted a new rule that changes the regulatory framework around the use of derivatives by registered investment companies, such as the Fund. The new rule, which will go into effect on February 21, 2021 with a compliance date 18 months thereafter, will require registered investment companies to adopt a

written policies and procedures reasonably designed to manage the Fund's derivatives risks. In the event that the Fund's derivatives exposure exceeds 10% of its net assets, the Fund will be required to adopt a written derivatives risk management program and comply with a value-at-risk based limit on leverage risk. The Board of Trustees will have an oversight role in ensuring these new requirements are being taken into account and, if required, will appoint a derivatives risk manager to handle the day-to-day responsibilities of the derivatives risk program.

Senior Loans Risk. Under normal market conditions, the Fund will invest at least 80% of its Managed Assets in Senior Loans. This policy is not fundamental and may be changed by the board of trustees of the Fund with at least 60 days' written notice provided to shareholders. Senior Loans hold the most senior position in the capital structure of a business entity, are secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by unsecured creditors, subordinated debt holders and stockholders of the Borrower. Senior Loans are usually rated below investment grade or may also be unrated. As a result, the risks associated with Senior Loans are similar to the risks of below investment grade instruments, although Senior Loans are senior and secured in contrast to other below investment grade instruments, which are often subordinated or unsecured. Nevertheless, if a Borrower under a Senior Loan defaults or goes into bankruptcy, the Fund may recover only a fraction of what is owed on the Senior Loan or nothing at all. Senior Loans are subject to a number of risks described elsewhere in this Prospectus, including credit risk, liquidity risk and management risk.

There is less readily available and reliable information about most Senior Loans than is the case for many other types of securities, including securities issued in transactions registered under the Securities Act, or registered under the Exchange Act. As a result, the Adviser will rely primarily on its own evaluation of a Borrower's credit quality rather than on any available independent sources. Therefore, the Fund will be particularly dependent on the analytical abilities of the Adviser.

The Fund will typically invest in Senior Loans rated below investment grade, which are considered speculative because of the credit risk of their issuers. Such companies are more likely than investment grade issuers to default on their payments of interest and principal owed to the Fund, and such defaults could reduce the Fund's net asset value and income distributions. An economic downturn would generally lead to a higher non-payment rate, and a Senior Loan may lose significant market value before a default occurs. Moreover, any specific collateral used to secure a Senior Loan may decline in value or become illiquid, which would adversely affect the Senior Loan's value.

In general, the secondary trading market for Senior Loans is not well developed. No active trading market may exist for certain Senior Loans, which may make it difficult to value them. Illiquidity and adverse market conditions may mean that the Fund may not be able to sell Senior Loans quickly or at a fair price. To the extent that a secondary market does exist for certain Senior Loans, the market for them may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods.

Senior Loans and other variable rate debt instruments are subject to the risk of payment defaults of scheduled interest or principal. Such payment defaults would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the net asset value of the Fund. Similarly, a sudden and significant increase in market interest rates may increase the risk for payment defaults and cause a decline in the value of these investments and in the Fund's net asset value. Other factors (including, but not limited to, rating downgrades, credit deterioration, a large downward movement in stock prices, a disparity in supply and demand of certain securities or market conditions that reduce liquidity) can reduce the value of Senior Loans and other debt obligations, impairing the Fund's net asset value.

Although the Senior Loans in which the Fund will invest will be secured by collateral, there can be no assurance that such collateral could be readily liquidated or that the liquidation of such collateral would satisfy the Borrower's obligation in the event of non-payment of scheduled interest or principal. In the event of the bankruptcy or insolvency of a Borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a Senior Loan. In the event of a decline in the value of the already pledged collateral, if the terms of a Senior Loan do not require the Borrower to pledge additional collateral, the Fund will be exposed to the risk that the value of the collateral will not at all times equal or exceed the amount of the Borrower's obligations under the Senior Loans. To the extent that a Senior Loan is collateralized by stock in the Borrower or its subsidiaries, such stock may lose some or all of its value in the event of the bankruptcy or insolvency of the Borrower. Those Senior Loans that are under-collateralized involve a greater risk of loss.

Some Senior Loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the Senior Loans to presently existing or future indebtedness of the Borrower or take other action detrimental to lenders, including the Fund. Such court action could under certain circumstances include invalidation of Senior Loans.

If legislation or state or federal regulations impose additional requirements or restrictions on the ability of financial institutions to make loans, the availability of Senior Loans for investment by the

Fund may be adversely affected. In addition, such requirements or restrictions could reduce or eliminate sources of financing for certain Borrowers. This would increase the risk of default. If legislation or federal or state regulations require financial institutions to increase their capital requirements this may cause financial institutions to dispose of Senior Loans that are considered highly levered transactions. Such sales could result in prices that, in the opinion of the Adviser, do not represent fair value. If the Fund attempts to sell a Senior Loan at a time when a financial institution is engaging in such a sale, the price the Fund could get for the Senior Loan may be adversely affected.

The Fund may acquire Senior Loans through assignments or participations. The Fund will typically acquire Senior Loans through assignment and may elevate a participation interest into an assignment as soon as practicably possible. The purchaser of an assignment typically succeeds to all the rights and obligations of the assigning institution and becomes a lender under the credit agreement with respect to the debt obligation; however, the purchaser's rights can be more restricted than those of the assigning institution, and the Fund may not be able to unilaterally enforce all rights and remedies under the loan and with regard to any associated collateral. A participation typically results in a contractual relationship only with the institution participating out the interest, not with the Borrower. Sellers of participations typically include banks, broker-dealers, other financial institutions and lending institutions. The Adviser has adopted best execution procedures and guidelines to mitigate credit and counterparty risk in the atypical situation when the Fund must acquire a Senior Loan through a participation. The Adviser has established a risk and valuation committee that regularly reviews each broker-dealer counterparty for, among other things, its quality and the quality of its execution. The established procedures and guidelines require trades to be placed for execution only with broker-dealer counterparties approved by the risk and valuation committee of the Adviser. The factors considered by the committee when selecting and approving brokers and dealers include, but are not limited to: (i) quality, accuracy, and timeliness of execution, (ii) review of the reputation, financial strength and stability of the financial institution, (iii) willingness and ability of the counterparty to commit capital, (iv) ongoing reliability and (v) access to underwritten offerings and secondary markets. In purchasing participations, the Fund generally will have no right to enforce compliance by the Borrower with the terms of the loan agreement against the Borrower, and the Fund may not directly benefit from the collateral supporting the debt obligation in which it has purchased the participation. As a result, the Fund will be exposed to the credit risk of both the Borrower and the institution selling the participation. Further, in purchasing participations in lending syndicates, the Fund will not be able to conduct the due diligence on the Borrower or the quality of the Senior Loan with respect to which it is buying a participation that the Fund would

otherwise conduct if it were investing directly in the Senior Loan, which may result in the Fund being exposed to greater credit or fraud risk with respect to the Borrower or the Senior Loan than the Fund expected when initially purchasing the participation.

The Fund may obtain exposure to Senior Loans through the use of derivative instruments, which have become increasingly available. Although the Fund does not have an intention to do so, the Fund may utilize these instruments and similar instruments that may be available in the future. Derivative transactions involve the risk of loss due to unanticipated adverse changes in securities prices, interest rates, the inability to close out a position, imperfect correlation between a position and the desired hedge, tax constraints on closing out positions and portfolio management constraints on securities subject to such transactions. The potential loss on derivative instruments may be substantial relative to the initial investment therein. The Fund may also be subject to the risk that the counterparty in a derivative transaction will default on its obligations.

Subordinated Loans Risk. The Fund may invest up to 20% of its Managed Assets in Subordinated Loans. Subordinated Loans generally are subject to similar risks as those associated with investments in Senior Loans except that such loans are subordinated in payment and/or lower in lien priority to first lien holders. In the event of default on a Subordinated Loan, the first priority lien holder has first claim to the underlying collateral of the loan. Subordinated Loans are subject to the additional risk that the cash flow of the Borrower and property securing the loan or debt, if any, may be insufficient to meet scheduled payments after giving effect to the senior unsecured or senior secured obligations of the Borrower. This risk is generally higher for subordinated unsecured loans or debt, which are not backed by a security interest in any specific collateral. Subordinated Loans generally have greater price volatility than Senior Loans and may be less liquid.

Structured Products Risk. The Fund may invest up to 20% of its Managed Assets in structured products, including, without limitation, CLOs, structured notes, credit linked notes and derivatives, including credit derivatives. Holders of structured products bear risks of the underlying investments, index or reference obligation and are subject to counterparty risk. The Fund may have the right to receive payments only from the structured product, and generally does not have direct rights against the issuer or the entity that sold the assets to be securitized. While certain structured products enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding the same securities, investors in structured products generally pay their share of the structured product's administrative and other expenses. Although it is difficult to predict whether the prices of indices and securities underlying structured products will rise or fall, these prices (and,

therefore, the prices of structured products) will be influenced by the same types of political and economic events that affect issuers of securities and capital markets generally. If the issuer of a structured product uses shorter term financing to purchase longer term securities, the issuer may be forced to sell its securities at below market prices if it experiences difficulty in obtaining short-term financing, which may adversely affect the value of the structured products owned by the Fund.

Certain structured products may be thinly traded or have a limited trading market. CLOs are typically privately offered and sold. As a result, investments in CLOs may be characterized by the Fund as illiquid securities. In addition to the general risks associated with debt securities discussed herein, CLOs carry additional risks, including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the possibility that the investments in CLOs are subordinate to other classes or tranches thereof; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Investments in structured notes involve risks, including credit risk and market risk. Where the Fund's investments in structured notes are based upon the movement of one or more factors, including currency exchange rates, interest rates, referenced bonds and stock indices, depending on the factor used and the use of multipliers or deflators, changes in interest rates and movement of the factor may cause significant price fluctuations. Additionally, changes in the reference instrument or security may cause the interest rate on the structured note to be reduced to zero, and any further changes in the reference instrument may then reduce the principal amount payable on maturity. Structured notes may be less liquid than other types of securities and more volatile than the reference instrument or security underlying the note.

CLO Risk. In addition to the general risks associated with debt securities and structured products discussed herein, CLOs carry additional risks, including, but not limited to (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the possibility that the investments in CLOs are subordinate to other classes or tranches thereof, (iv) the potential of spread compression in the underlying loans of the CLO, which could reduce credit enhancement in the CLOs and (v) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

CLO junior debt securities that the Fund may acquire are subordinated to more senior tranches of CLO debt. CLO junior debt

securities are subject to increased risks of default relative to the holders of superior priority interests in the same securities. In addition, at the time of issuance, CLO equity securities are under-collateralized in that the liabilities of a CLO at inception exceed its total assets. Though not exclusively, the Fund will typically be in a first loss or subordinated position with respect to realized losses on the assets of the CLOs in which it is invested. The Fund may recognize phantom taxable income from its investments in the subordinated tranches of CLOs.

Between the closing date and the effective date of a CLO, the CLO collateral manager will generally expect to purchase additional collateral obligations for the CLO. During this period, the price and availability of these collateral obligations may be adversely affected by a number of market factors, including price volatility and availability of investments suitable for the CLO, which could hamper the ability of the collateral manager to acquire a portfolio of collateral obligations that will satisfy specified concentration limitations and allow the CLO to reach the initial par amount of collateral prior to the effective date. An inability or delay in reaching the target initial par amount of collateral may adversely affect the timing and amount of interest or principal payments received by the holders of the CLO debt securities and distributions of the CLO on equity securities and could result in early redemptions which may cause CLO debt and equity investors to receive less than the face value of their investment.

The failure by a CLO in which the Fund invests to satisfy financial covenants, including with respect to adequate collateralization and/or interest coverage tests, could lead to a reduction in the CLO's payments to the Fund. In the event that a CLO fails certain tests, holders of CLO senior debt may be entitled to additional payments that would, in turn, reduce the payments the Fund would otherwise be entitled to receive. Separately, the Fund may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting CLO or any other investment the Fund may make. If any of these occur, it could adversely affect the Fund's operating results and cash flows.

The Fund's CLO investments are exposed to leveraged credit risk. If certain minimum collateral value ratios and/or interest coverage ratios are not met by a CLO, primarily due to senior secured loan defaults, then cash flow that otherwise would have been available to pay distributions to the Fund on its CLO investments may instead be used to redeem any senior notes or to purchase additional senior secured loans, until the ratios again exceed the minimum required levels or any senior notes are repaid in full.

Systematic Strategies Related to Bond Investments Risk. With respect to the bond portion of the Fund's portfolio, to the extent to which the proprietary model used by the Adviser (the "Model") or comparable methods or strategies are employed, certain of the Adviser's securities analysis methods will rely on the assumption that the companies

whose securities are purchased or sold, the rating agencies that review these securities, and other publicly available sources of information about these securities, are providing accurate and unbiased data. While the Adviser is alert to indications that data may be incorrect, there is always a risk that the Adviser's analysis may be compromised by inaccurate or misleading information.

The Model the Adviser intends to utilize to manage the Fund's bond investments could lead to unsatisfactory investments. The Adviser might not be able to effectively implement the Model, and there can be no guarantee that the Fund will achieve the desired results.

Certain aspects of the Adviser's investment process with respect to the Model are dependent on complex proprietary software, which requires constant development and refinement. The Adviser has implemented procedures designed to appropriately control the development and implementation of the Model. However, analytical, coding and implementation errors present substantial risks to complex models and quantitative investment management strategies. The Adviser cannot guarantee that its internal controls will be effective in all circumstances.

The Fund could be negatively affected by undetected software defects or fundamental issues with the Adviser's method of interpreting and acting upon the Model's output. The Adviser's implementation of its investment strategy with respect to the Fund's bond portfolio utilizing the Model will rely on the analytical and mathematical foundation of the Model and the incorporation of the Model's outputs into a complex computational environment. Any such strategy is also dependent on the quality of the market data utilized by the Model, changes in credit market conditions, creation and maintenance of the Model's software and the successful incorporation of the Model's output into the construction of the Fund's bond portfolio. There is always a possibility of human error in the creation, maintenance and use of the Model.

Moreover, the Adviser's portfolio managers exercise discretion in the utilization of the Model, and the investment results of the relevant portion(s) of the Fund's investments are dependent on the ability of portfolio managers to correctly understand and implement or disregard the Model's signals. There can be no assurance that utilizing the Model will yield better results than any other investment method.

Liquidity Risk. The Fund may invest up to 50% of its Managed Assets in securities that are considered illiquid. "Illiquid securities" are securities which cannot be sold within seven days in the ordinary course of business at approximately the value used by the Fund in determining its net asset value. The Fund may not be able to readily dispose of such securities at prices that approximate those at which the Fund could sell such securities if they were more widely-traded and, as a result of such illiquidity, the Fund may have to sell other investments or engage in borrowing transactions if necessary to raise cash to meet its obligations. Limited liquidity can also affect the market price of securities, thereby adversely affecting the Fund's net asset value and ability to make dividend distributions.

Some Senior Loans are not readily marketable and may be subject to restrictions on resale. Senior Loans are not listed on any national securities exchange and no active trading market may exist for the Senior Loans in which the Fund will invest. Where a secondary market exists, the market for some Senior Loans may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. The Fund has no limitation on the amount of its assets which may be invested in securities that are not readily marketable or are subject to restrictions on resale.

Leverage Risk. The Fund currently anticipates utilizing leverage in an aggregate amount of up to 33 1/3% of its Managed Assets at the time the leverage is incurred in order to buy additional securities. The Fund currently anticipates that it will issue preferred shares and/or notes and it may also borrow funds from banks and other financial institutions. The use of leverage to purchase additional securities creates an opportunity for increased common share dividends, but also creates risks for the holders of Common Shares. Leverage is a speculative technique that exposes the Fund to greater risk and increased costs than if it were not implemented. Increases and decreases in the value of the Fund's portfolio will be magnified when the Fund uses leverage. As a result, leverage may cause greater changes in the Fund's net asset value which will be borne entirely by the Fund's common shareholders. The Fund will also have to pay dividends on its preferred shares or interest on its notes or borrowings, if any, which will increase expenses and may reduce the Fund's return. These dividend payments or interest expenses may be greater than the Fund's return on the underlying investments. The Fund's leveraging strategy may not be successful.

The Fund intends to issue preferred shares and/or notes as a form of leverage. Any such leverage of the Fund would be senior to the Fund's Common Shares, such that holders of preferred shares and/or notes would have priority over the common shareholders in the distribution of the Fund's assets, including dividends, distributions of principal proceeds after the reinvestment period and liquidating distributions. If preferred shares are issued and outstanding, holders of the preferred shares would elect two trustees of the Fund, and would vote separately as a class on certain matters which may at times give holders of preferred shares disproportionate influence over the Fund's affairs. If the preferred shares were limited in their term, redemptions of such preferred shares would require the Fund to liquidate its investments and would reduce the Fund's use of leverage, which could negatively impact common shareholders.

In addition, the Fund will pay (and the holders of Common Shares will bear) all costs and expenses relating to the issuance and ongoing maintenance of any preferred shares and/or notes issued by the Fund, including higher advisory fees. Accordingly, the Fund cannot assure you that the issuance of preferred shares and/or notes will result in a higher yield or return to the holders of the Common Shares.

The Fund anticipates that any money borrowed from a bank or other financial institution for investment purposes will accrue interest based on shorter-term interest rates that would be periodically reset. So long as the Fund's portfolio provides a higher rate of return, net of expenses, than the interest rate on borrowed money, as reset periodically, the leverage may cause the holders of Common Shares to receive a higher current rate of return than if the Fund were not leveraged. If, however, long-term and/or short-term rates rise, the interest rate on borrowed money could exceed the rate of return on securities held by the Fund, reducing return to the holders of Common Shares. Recent developments in the credit markets may adversely affect the ability of the Fund to borrow for investment purposes and may increase the costs of such borrowings, which would reduce returns to the holders of Common Shares.

There is no assurance that a leveraging strategy will be successful. Leverage involves risks and special considerations for common shareholders, including:

- the likelihood of greater volatility of net asset value, market price and dividend rate of the Common Shares than a comparable portfolio without leverage;
- the risk that fluctuations in interest rates on borrowings and short-term debt or in dividend payments on, principal proceeds distributed to, or redemption of any preferred shares and/or notes that the Fund has issued will reduce the return to the common shareholders;
- the effect of leverage in a declining market, which is likely to cause a greater decline in the net asset value of the Common Shares than if the Fund were not leveraged, which may result in a greater decline in the market price of the Common Shares;
- when the Fund uses financial leverage, the investment advisory and administrative fees payable to the Adviser and ALPS will be higher than if the Fund did not use leverage, and may provide a financial incentive to the Adviser to increase the Fund's use of leverage and create an inherent conflict of interest; and
- leverage may increase expenses, which may reduce total return.

If the Fund issues preferred shares and/or notes or borrows money the Fund will be required to maintain asset coverage in conformity with the requirements of the 1940 Act.

The Fund may be subject to certain restrictions on investments imposed by guidelines of one or more rating agencies, which may issue ratings for the preferred shares and/or notes or short-term debt securities issued by the Fund. These guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed by the 1940 Act. Certain types of borrowings by the Fund may result in the Fund being subject to covenants in credit agreements relating to asset coverage and portfolio composition requirements. These covenants and restrictions

may negatively affect the Fund's ability to achieve its investment objectives.

Foreign Currency Risk. Because the Fund may invest in securities denominated or quoted in currencies other than the U.S. dollar, changes in foreign currency exchange rates may affect the value of securities in the Fund and the unrealized appreciation or depreciation of investments. Currencies of certain countries may be volatile and therefore may affect the value of securities denominated in such currencies, which means that the Fund's net asset value could decline as a result of changes in the exchange rates between foreign currencies and the U.S. dollar. The Adviser may, but is not required to, elect for the Fund to seek to protect itself from changes in currency exchange rates through hedging transactions depending on market conditions. The Fund may incur costs in connection with the conversions between various currencies. In addition, certain countries may impose foreign currency exchange controls or other restrictions on the repatriation, transferability or convertibility of currency.

Anti-Takeover Provisions. The Fund's Amended and Restated Agreement and Declaration of Trust (the "Declaration of Trust") includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could deprive common shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares or at NAV. See "Certain Provisions in the Agreement and Declaration of Trust."

Inflation and Supply Chain Risk. Economic activity has continued to accelerate across sectors and regions. Nevertheless, due to global supply chain issues, a rise in energy prices and strong consumer demand as economies continue to reopen, inflation is showing signs of acceleration in the U.S. and globally. Inflation is likely to continue in the near to medium-term, particularly in the U.S., with the possibility that monetary policy may tighten in response. Persistent inflationary pressures could affect our obligors' profit margins.

Climate Change Risk. Climate change creates physical and financial risk and some of our obligors may be adversely affected by climate change potentially reducing profitability and ability to satisfy loan obligations. For example, the needs of customers of energy companies vary with weather conditions, primarily temperature and humidity. To the extent weather conditions are affected by climate change, energy use could increase or decrease depending on the duration and magnitude of any changes. Increases in the cost of energy could adversely affect the cost of operations of our obligors if the use of energy products or services is material to their business. A decrease in energy use due to weather changes may affect some of our obligors' financial condition, through decreased revenues. Extreme weather conditions in general require more system backup, adding to costs, and can contribute to increased system stresses, including service interruptions.

SUMMARY OF FUND EXPENSES

The purpose of the following table and example is to help you understand all fees and expenses common shareholders would bear directly or indirectly. The table below is based on the capital structure of the Fund as of June 30, 2021 (except as noted below).

	<u>Percentage of Offering Price</u>
SHAREHOLDER TRANSACTION EXPENSES	
Sales Load	—%(1)
Offering Expenses Borne by the Fund	—%(1)
Dividend Reinvestment Plan Fees	<u>None(2)</u>
TOTAL TRANSACTION EXPENSES (as a percentage of offering price)(3)	<u> </u>
	<u>Percentage of Net Assets Attributable to Common Shares (Assumes Leverage is Used)</u>
ANNUAL EXPENSES	
Advisory Fees(4)	1.33%
Other Expenses(5)	0.45%
Interest Payments on Borrowed Funds(6)	0.59%
TOTAL ANNUAL EXPENSES	2.37%

- (1) In the event that the securities to which this Prospectus relates are sold to or through agents, underwriters or dealers, the related Prospectus Supplement will disclose the applicable sales load, the estimated amount of total offering expenses (which may include offering expenses borne by third parties on behalf of the Fund), the offering price and the offering expenses borne by the Fund as a percentage of the offering price.
- (2) You will be charged a brokerage commission if you direct the DRIP administrator to sell your Common Shares held in a dividend reinvestment account. See “Dividend Reinvestment Plan.”
- (3) The related Prospectus Supplement will disclose the offering price and the total shareholder transaction expenses as a percentage of the offering price.
- (4) The Adviser receives a monthly management fee at the annual rate of 0.90% of the average daily value of the Fund’s Managed Assets. The term “Managed Assets” means the Fund’s total assets (including any assets attributable to any leverage used) minus the sum of the Fund’s accrued liabilities (other than Fund liabilities incurred for any leverage).
- (5) “Other Expenses” are estimated amounts for the current fiscal year based on the Fund’s fees and expenses for the year ended December 31, 2021. “Other Expenses” include professional fees and other expenses, including, without limitation, SEC filing fees, printing fees, administration fees, transfer agency fees, custody fees, trustee fees and insurance costs.
- (6) Interest Payments on Borrowed Funds is based on estimated amounts for the current fiscal year and assumes the use of leverage in an amount equal to 33 1/3% of the Fund’s total assets, less all liabilities and indebtedness not represented by senior securities (after the leverage is incurred), and the annual interest rate on Borrowings of 1.12% as of September 30, 2021. The actual amount of interest expense borne by the Fund will vary over time in accordance with the level of the Fund’s borrowings and market interest rates. Interest Payments on Borrowed Funds are required to be treated as an expense of the Fund for accounting purposes.

Example

As required by the relevant SEC regulations, the following example illustrates the expenses that you would pay on a \$1,000 investment in the Fund's Common Shares assuming (i) total annual expenses of 2.37% of net assets attributable to the Fund's Common Shares, (ii) a 5% annual return and (iii) reinvestment of all dividends and distributions at NAV:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$24	\$74	\$127	\$271

The example should not be considered a representation of future expenses. Actual expenses may be greater or less than those assumed. The example assumes that the estimated "Other expenses" set forth in the Annual Expenses table are accurate, and that all dividends and distributions are reinvested at NAV. Moreover, the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's financial performance. Unless otherwise noted, the information in this table has been derived from and should be read in conjunction with the Fund's financial statements and the notes thereto. The financial information for the fiscal years or period ended December 31 have been audited by Deloitte & Touche LLP ("Deloitte"), the independent registered public accounting firm of the Fund. Deloitte's report on such financial statements, together with the financial statements of the Fund is incorporated by reference into this Prospectus and the SAI.

- (a) Prior to December 10, 2020, the Blackstone Senior Floating Rate Term Fund was known as the Blackstone / GSO Senior Floating Rate Term Fund.
- (b) Calculated using average common shares outstanding.
- (c) Total investment return is calculated assuming a purchase of common share at the opening on the first day and a sale at closing on the last day of each period reported. Dividends and distributions are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Total investment returns does not reflect sales load or brokerage commissions, if any, and are not annualized.
- (d) Annualized.
- (e) Average managed assets represent net assets applicable to common shares plus principal value of leverage.
- (f) Percentage represents the results for the period and is not annualized.
- (g) Calculated by subtracting the Fund's total liabilities (excluding the principal amount of the Leverage Facility) from the Fund's total assets and dividing by the principal amount of the Leverage Facility and then multiplying by \$1,000.

- (a) Calculated using average common shares outstanding.
- (b) Total investment return is calculated assuming a purchase of common share at the opening on the first day and a sale at closing on the last day of each period reported. Dividends and distributions are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Total investment returns do not reflect brokerage commissions, if any, and are not annualized.
- (c) Ratios do not reflect dividend payments to preferred shareholders.
- (d) Average managed assets represent net assets applicable to common shares plus principal value of leverage.
- (e) On October 8, 2014, BSL redeemed 100% of the term preferred shares at 100% of their liquidation preference.
- (f) Calculated by subtracting the Fund's total liabilities (excluding Term Preferred Shares and Senior Secured Notes) from the Fund's total assets and dividing by the sum of the Term Preferred Shares and the Senior Secured Notes and then multiplying by \$1,000.
- (g) Calculated by subtracting the Fund's total liabilities (excluding Term Preferred Shares) from the Fund's total assets and dividing by the number of Term Preferred Shares outstanding.
- (h) On October 8, 2014, BSL redeemed 100% of the senior secured notes at 100% of their principal amount and entered into a new 364-day revolving credit facility. Average borrowings are shown for the period January 1, 2014 through the redemption date.
- (i) Calculated by subtracting the Fund's total liabilities (excluding Term Preferred Shares and Senior Secured Notes) from the Fund's total assets and dividing by the principal amount of Senior Secured Notes and then multiplying by \$1,000.
- (j) Calculated by subtracting the Fund's total liabilities (including Term Preferred Shares but excluding Senior Secured Notes) from the Fund's total assets and dividing by the principal amount of Senior Secured Notes and then multiplying by \$1,000.
- (k) Since first borrowing was made on October 8, 2014.

SENIOR SECURITIES

As of the end of the Fund's last fiscal year, the Fund had a revolving credit facility with a financial institution as described below. The table below sets forth the senior securities outstanding as of the end of the Fund's fiscal years or period ended 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020 and 2021.

YEAR	NAME OF LOAN	TOTAL AMOUNT OUTSTANDING (in thousands)	ASSET COVERAGE PER \$1,000 OF INDEBTEDNESS	INVOLUNTARY LIQUIDATING PREFERENCE PER UNIT ⁽¹⁾	AVERAGE MARKET VALUE PER UNIT ⁽²⁾
2012	Preferred Shares	\$ 48,000	\$ 3,036	\$ 1,000	—
2012	Senior Securities	\$ 96,000	\$ 4,057	—	—

- (1) The amount to which a holder of each class of senior security would be entitled upon the involuntary liquidation of the Fund in preference to the holder of any class of security with a junior ranking.
- (2) Not applicable, as senior securities are not registered for public trading.

THE FUND

The Fund is a diversified, closed-end management investment company registered under the 1940 Act. The Fund is a statutory trust organized under the laws of Delaware pursuant to the Declaration of Trust dated March 4, 2010, as amended and restated on May 25, 2010 and September 9, 2021. The Fund's principal office is located at 345 Park Avenue, 31st Floor, New York, NY 10154, and its telephone number is (877) 876-1121.

USE OF PROCEEDS

Unless otherwise specified in a Prospectus Supplement, the Fund intends to invest the net proceeds of any offering of its securities in accordance with its investment objectives and policies as stated herein. It is currently anticipated that the Fund will be able to invest substantially all of the net proceeds in accordance with its investment objectives and policies within thirty days after the completion of any offering. Pending such investment, it is anticipated that the proceeds will be primarily invested in high yield securities or high-grade, short-term securities.

MARKET AND NET ASSET VALUE INFORMATION

The Fund's Common Shares are listed on the Exchange and trade under the ticker symbol "BSL". Our Common Shares commenced trading on the Exchange on May 26, 2010.

Our Common Shares have traded both at a premium and at a discount in relation to the Fund's NAV per share. We cannot predict whether our Common Shares will trade at a premium or discount to NAV in the future. Our issuance of additional Common Shares may have an adverse effect on prices in the secondary market for our Common Shares by increasing the number of Common Shares available, which may create downward pressure on the market price for our Common Shares. Shares of closed-end investment companies frequently trade at a discount to NAV. See "Risks—Market Discount Risk."

The following table sets forth for each of the periods indicated the range of high and low closing sale price of our Common Shares and the quarter-end sale price, each as reported on the Exchange, the NAV per share of Common Shares and the premium or discount to NAV per share at which our Common Shares were trading.

NAV is generally determined on each business day that the Exchange is open for business. See “Net Asset Value” for information as to the determination of our NAV.

Source of market prices: Bloomberg.

- (1) NAV per share is determined as of close of business on the last day of the relevant quarter and therefore may not reflect the NAV per share on the date of the high and low closing sales prices, which may or may not fall on the last day of the quarter. NAV per share is calculated as described in “Net Asset Value.”
- (2) Calculated as of the quarter-end by dividing quarter-end closing sales price by the quarter-end NAV, minus 1.

In recognition of the possibility that Common Shares might trade at a discount to NAV, the Board may consider one or more actions that might be taken to seek to reduce or eliminate any material discount from NAV in respect of Common Shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares or the conversion of the Fund to an open-end investment company. The Board may decide not to take any of these actions in the future. In addition, there can be no assurance any of these actions, or others, if undertaken, will reduce market discount. See “Closed-End Fund Structure” and “Repurchase of Common Shares.”

On January 14, 2022, the last reported sale price of our Common Shares on the Exchange was \$16.44, which represented a premium of approximately 0.86% to the NAV per share reported by us on that date.

As of January 14, 2022, we had approximately 13,530,939.600 Common Shares outstanding and we had net assets attributable to common shareholders of approximately \$220,498,387.14.

THE FUND'S INVESTMENTS

Investment Objectives

The Fund's primary investment objective is to seek high current income, with a secondary objective to seek preservation of capital, consistent with its primary goal of high current income. There can be no assurance that the Fund will achieve its investment objectives. The Fund's investment objectives may be changed on 60 days' notice to shareholders. Under normal market conditions, the Adviser expects the Fund to maintain an average duration of less than one year (including the effect of anticipated leverage). Duration is a measure of the price volatility of a debt instrument as a result of changes in market rates of interest, based on the weighted average timing of the instrument's expected principal and interest payments. See "The Fund's Investments."

This section provides additional information about the Fund's investments and certain portfolio management techniques the Fund may use. More information about the Fund's investments and portfolio management techniques and the associated risks is included in the SAI.

Core Investment Strategies

Under normal market conditions, at least 80% of the Fund's Managed Assets will be invested in Senior Loans. This policy is not fundamental and may be changed by the board of trustees of the Fund with at least 60 days' written notice to shareholders. Borrowers take out Senior Loans to refinance existing debt and for acquisitions, dividends, leveraged buyouts, and general corporate purposes.

Senior Loans typically are of below investment grade quality. Below investment grade quality instruments (including Senior Loans) are those that, at the time of investment, are rated Ba1 or lower by Moody's and BB+ or lower by S&P or Fitch, or if unrated are determined by the Adviser to be of comparable quality. Instruments of below investment grade quality are regarded as having predominately speculative characteristics with respect to an issuer's capacity to pay interest and repay principal.

The Fund's policy of investing, under normal market conditions, at least 80% of its Managed Assets in Senior Loans is not considered to be fundamental by the Fund and can be changed without a vote of the shareholders. However, this policy may only be changed by the Fund's board of trustees following the provision of 60 days prior written notice to shareholders.

The Fund may invest up to 20% of its Managed Assets in (i) loan interests that are not secured by any collateral of the Borrower, (ii) loan interests that have a lower than first lien priority on collateral of the Borrower, (iii) other income producing securities (including, without limitation, U.S. government debt securities and investment and non-investment grade, subordinated and unsubordinated corporate debt securities), (iv) warrants and equity securities issued by a Borrower or its affiliates as part of a package of investments in the Borrower or its affiliates and (v) structured products (including, without limitation, collateralized loan obligations, credit linked notes and derivatives, including credit derivatives).

The Fund may invest in debt securities, including Senior Loans, of any credit quality, maturity and duration. The Fund may invest in U.S. dollar and non-U.S. dollar denominated securities of issuers located anywhere in the world, and of issuers that operate in any industry. The Fund may also invest in swaps, including single name credit default swaps, single name loan credit default swaps, total return swaps, interest rate swaps and foreign currency swaps.

During temporary defensive periods or in order to keep the Fund's cash fully invested, including during the period when the net proceeds of the offering of Common Shares are being invested, the Fund may deviate from its investment policies and objectives. During such periods, the Fund may invest all or a portion of assets in U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest that are

either issued or guaranteed by the Treasury or by U.S. government agencies or instrumentalities; non-U.S. government securities which have received the highest investment grade credit rating, certificates of deposit issued against funds deposited in a bank or a savings and loan association; commercial paper; bankers' acceptances; bank time deposits; shares of money market funds; credit linked notes; repurchase agreements with respect to any of the foregoing; or any other fixed income securities that the Adviser considers consistent with this strategy. It is impossible to predict when, or for how long, the Fund will use these alternative strategies. There can be no assurance that such strategies will be successful. See "The Fund's Investments—Portfolio Composition—Temporary Strategies; Invest-Up Period; Dissolution" in this prospectus and "Investment Policies and Techniques" in the Fund's SAI.

Under normal market conditions, the Adviser expects to maintain an average duration of less than one year (including the effect of anticipated leverage). In comparison to maturity (which is the date on which a debt instrument ceases and the issuer is obligated to repay the principal amount), duration is a measure of the price volatility of a debt instrument as a result of changes in market rates of interest, based on the weighted average timing of the instrument's expected principal and interest payments. Duration differs from maturity in that it considers a security's yield, coupon payments, principal payments and call features in addition to the amount of time until the security finally matures. As the value of a security changes over time, so will its duration. Prices of securities with longer durations tend to be more sensitive to interest rate changes than securities with shorter durations. In general, a portfolio of securities with a longer duration can be expected to be more sensitive to interest rate changes than a portfolio with a shorter duration.

The Fund currently anticipates utilizing leverage in an aggregate amount of up to 331/3% of its Managed Assets at the time the leverage is incurred in order to buy additional securities. The Fund currently anticipates that it will issue preferred shares and/or notes and it may also borrow from banks and other financial institutions. The Fund may also borrow for temporary, emergency or other purposes as permitted under the Investment Company Act.

If the rate of return, after the payment of applicable expenses of the Fund, on the securities purchased by the Fund is greater than the dividends or interest paid by the Fund on its preferred shares and/or notes or interest paid on its borrowed money, the excess income may be used to pay higher dividends to holders of Common Shares. However, the Fund cannot assure you that the use of leverage will result in a higher yield on the Common Shares.

When leverage is employed, the net asset value and market price of the Common Shares and the yield to holders of Common Shares will be more volatile. During periods when the Fund is using leverage the fees paid to the Adviser for advisory services and to ALPS for administrative service will be higher than if the Fund did not use leverage because the fees paid will be calculated on the basis of the Fund's Managed Assets, which includes the assets attributable to money borrowed for investment purposes. As such, the Adviser may have a financial incentive to increase the Fund's use of leverage, which constitutes an inherent conflict of interest. See "Leverage," "Risks—Leverage Risk" and "Description of Shares—Preferred Shares."

Systematic Strategies Related to Bond Investments

In pursuing the Fund's investment objective with respect to the bond portion of the Fund's portfolio, the Adviser intends to utilize a proprietary model (the "Model") as it deems appropriate. The Model incorporates fundamental balance-sheet information, real-time information embedded in equity and options markets, and a database of historical defaults. The Adviser uses a variety of risk-management tools to produce risk measures for investments that are monitored in "real-time," providing potential early-warning capabilities and a large investment universe from which the Adviser can shape the Fund's bond portfolio.

The Model seeks to identify the most liquid, positively mispriced credit issues while minimizing exposure to systematic credit risks. The Adviser seeks to actively diversify exposure in an attempt to mitigate

idiosyncratic risk in the Fund's bond portfolio. If using long and short exposures, the Model selects potentially undervalued and overvalued credits to go long and short, respectively.]

Portfolio Composition

The Fund's portfolio will be composed principally of the following investments. A more detailed description of the Fund's investment policies and restrictions and more detailed information about the Fund's portfolio investments are contained in the SAI.

Senior Loans

Senior Loans hold the most senior position in the capital structure of the Borrower, are secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by unsecured creditors, subordinated debt holders and stockholders of the Borrower. The proceeds of Senior Loans primarily are used to refinance existing debt and for acquisitions, dividends, leveraged buyouts, and general corporate purposes.

Senior Loans typically have rates of interest which are determined daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium or credit spread. As a result, as short-term interest rates increase, interest payable to the Fund from its investments in Senior Loans should increase, and as short-term interest rates decrease, interest payable to the Fund from its investments in Senior Loans should decrease. Longer interest rate reset periods generally increase fluctuations in the Fund's net asset value as a result of changes in market interest rates. These base lending rates are primarily LIBOR and secondarily the prime rate offered by one or more major U.S. banks and the certificate of deposit rate or other base lending rates used by commercial lenders.

Senior Loans are subject to the risk of non-payment of scheduled interest or principal. Such non-payment would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the net asset value of the Fund. There can be no assurance that the liquidation of any collateral securing a Senior Loan would satisfy the Borrower's obligation in the event of non-payment of scheduled interest or principal payments, or that such collateral could be readily liquidated. In the event of bankruptcy or insolvency of a Borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a Senior Loan. The collateral securing a Senior Loan may lose all or substantially all of its value in the event of the bankruptcy or insolvency of a Borrower. Some Senior Loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate such Senior Loans to presently existing or future indebtedness of the Borrower or take other action detrimental to the holders of Senior Loans including, in certain circumstances, invalidating such Senior Loans or causing interest previously paid to be refunded to the Borrower. If interest were required to be refunded, it could negatively affect the Fund's performance.

Senior Loans may not be rated by a rating agency. The amount of public information available with respect to Senior Loans will generally be less extensive than that available for registered or exchange-listed securities. In evaluating the creditworthiness of Borrowers, the Adviser will consider, and may rely in part, on analyses performed by others. To the extent that they are rated by a rating agency, many of the Senior Loans in which the Fund will invest will have been assigned below investment grade ratings by independent rating agencies. In the event Senior Loans are not rated, they are likely to be the equivalent of below investment grade quality. The Adviser does not view ratings as the determinative factor in their investment decisions and rely more upon their credit analysis abilities than upon ratings.

Senior Loans are not registered with the SEC, or any state securities commission, and are not listed on any national securities exchange. There is less readily available or reliable information about most Senior Loans than is the case for many other types of securities, including securities issued in transactions registered under the

Securities Act or registered under the Exchange Act. No active trading market may exist for some Senior Loans, and some loans may be subject to restrictions on resale. A secondary market may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods, which may impair the ability to realize full value and thus cause a material decline in the Fund's net asset value. In addition, the Fund may not be able to readily dispose of its Senior Loans at prices that approximate those at which the Fund could sell such loans if they were more widely-traded and, as a result of such illiquidity, the Fund may have to sell other investments or engage in borrowing transactions if necessary to raise cash to meet its obligations. During periods of limited supply and liquidity of Senior Loans, the Fund's yield may be lower. See "Risks—Liquidity Risk" and "Risks—Senior Loans Risk."

The floating or variable rate feature of Senior Loans is a significant difference from typical fixed-income investments that carry significant interest rate risk. The Fund can normally be expected to have less significant interest rate-related fluctuations in its net asset value per share than investment companies investing primarily in fixed income securities (other than money market funds and some short term bond funds). When interest rates decline, the value of a fixed income portfolio can normally be expected to rise. Conversely, when interest rates rise, the value of a fixed income portfolio can normally be expected to decline. Although the income available to the Fund will vary, the Adviser expects the Fund's policy of acquiring interests in floating rate Senior Loans may minimize fluctuations in net asset value of the Fund resulting from changes in market interest rates. However, because floating or variable rates on Senior Loans only reset periodically, changes in prevailing interest rates can be expected to cause some fluctuations in the Fund's net asset value. Similarly, a sudden and significant increase in market interest rates may cause a decline in the Fund's net asset value. A material decline in the Fund's net asset value may impair the Fund's ability to maintain required levels of asset coverage. Other factors (including, but not limited to, rating downgrades, credit deterioration, a large downward movement in stock prices, a disparity in supply and demand of certain securities or market conditions that reduce liquidity) can reduce the value of Senior Loans and other debt obligations, impairing the Fund's net asset value.

The Fund may purchase and retain in its portfolio Senior Loans where the Borrower has experienced, or may be perceived to be likely to experience, credit problems, including involvement in or recent emergence from bankruptcy court proceedings or other forms of debt restructuring. Such investments may provide opportunities for enhanced income as well as capital appreciation, although they also will be subject to greater risk of loss. At times, in connection with the restructuring of a Senior Loan either outside of bankruptcy court or in the context of bankruptcy court proceedings, the Fund may determine or be required to accept equity securities or junior credit securities in exchange for all or a portion of a Senior Loan.

Direct Assignments. The Fund may purchase Senior Loans on a direct assignment basis. If the Fund purchases a Senior Loan on direct assignment, it typically succeeds to all the rights and obligations under the loan agreement of the assigning lender and becomes a lender under the loan agreement with the same rights and obligations as the assigning lender. Investments in Senior Loans on a direct assignment basis may involve additional risks to the Fund. For example, if such loan is foreclosed, the Fund could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral.

Loan Participations. The Fund may also purchase, without limitation, participations in Senior Loans. The participation by the Fund in a lender's portion of a Senior Loan typically will result in the Fund having a contractual relationship only with such lender, not with the Borrower. As a result, the Fund may have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by such lender of payments from the Borrower. Such indebtedness may be secured or unsecured. Loan participations typically represent direct participations in a loan to a Borrower, and generally are offered by banks, other financial institutions or lending syndicates. The Fund may participate in such syndications, or can buy part of a loan, becoming a part lender. When purchasing loan participations, the Fund assumes the credit risk of both the Borrower and the institution that sells the participation. The participation interests in which the Fund intends to invest may not be rated by any rating agency.

The Adviser may use an independent pricing service or prices provided by dealers to value loans and other credit securities at their market value. The Adviser will use the fair value method to value Senior Loans or other

securities if market quotations for them are not readily available or are deemed unreliable. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures.

Pre-Funded Letter of Credit Loans. The Fund may purchase participations in prefunded letter of credit loans (a “prefunded L/C loan”). A prefunded L/C loan is a facility created by the Borrower in conjunction with the agent bank as issuer of a loan, and the prefunded L/C loan is backed by letters of credit (each letter, an “L/C”). Each participant in a prefunded L/C loan (sometimes referred to as a funded letter of credit facility) fully funds its commitment amount to the agent bank for the facility. The funds are invested by the agent bank and held solely to satisfy a prefunded L/C loan lender’s obligation to the agent bank under the facility. The funds paid by the lenders are invested by the agent bank in deposits that pay interest, usually approximating a benchmark rate, such as LIBOR, or a replacement rate in the event that LIBOR is discontinued, which goes to the Borrower. Generally, the Borrower, via the agent bank, pays the lenders an interest rate, equivalent to the fully drawn spread plus the benchmark rate, usually LIBOR. The funds are returned to the lender upon termination of the prefunded L/C loan (and upon satisfaction of all obligations). Under the terms of the prefunded L/C loan agreement, a lender may sell and assign all or a portion of its interest in the loan to another lender so long as the other lender is eligible and agrees to the terms and conditions of the prefunded L/C loan agreement.

When the Borrower needs funds, it may draw against the prefunded L/C loan and the agent bank makes payment to the Borrower by withdrawing some of the amount invested as deposits. Consequently, the lenders do not have to advance any additional funds at the time the Borrower draws against the prefunded L/C loan facility. The prefunded L/C loan can be structured from the standpoint of the Borrower as either (i) a revolving credit facility, where the Borrower can reborrow, during the term of the loan, moneys it has paid back to the facility during the term of the loan, or (ii) a delayed draw term loan where the Borrower may not reborrow moneys it has repaid to the facility during the term of the loan.

When the Fund purchases a participation in a prefunded L/C loan, the proceeds of the purchase are deposited in a collateral account, which backs an L/C loan by the agent bank to the Borrower to support trade or other financing. The Fund typically receives interest on the cash collateral account equal to LIBOR, or a replacement rate in the event that LIBOR is discontinued. In addition, the Fund may also receive a fee, typically similar to the spread paid on the Borrower’s institutional loan. Participations by the Fund in a prefunded L/C loan typically will result in the Fund having a contractual relationship only with the agent bank, not with the Borrower. As a result, the Fund may have the right to receive interest, fees and any repayments, if any, to which it is entitled only from the agent bank selling the participation and only upon receipt by the agent bank of such payments from the Borrower. In connection with purchasing the participation in a prefunded L/C loan, the Fund generally will have no right to enforce compliance by the Borrower with the terms of the prefunded L/C loan. As a result, the Fund may assume the credit risk of both the Borrower and the agent bank selling the participation in a prefunded L/C loan. In the event of the insolvency of the agent bank selling a participation in a prefunded L/C loan, the Fund may be treated as a general creditor of such agent bank. The agent bank will likely conduct its principal business activities in the banking, finance and financial services industries. Persons engaged in such industries may be more susceptible to, among other things, fluctuations in interest rates, changes in the Federal Reserve Open Market Committee’s monetary policy, governmental regulations concerning such industries and concerning capital raising activities generally and fluctuations in the financial markets generally.

Subordinated Loans

The Fund may invest in Subordinated Loans, which have the same characteristics as Senior Loans except that such loans are subordinated in payment and/or lower in lien priority to first lien holders. In the event of default on a Subordinated Loan, the first priority lien holder has first claim to the underlying collateral of the loan. It is possible that no collateral value would remain for the second priority lien holder and therefore result in a loss of investment to the Fund. Because Subordinated Loans are subordinated and thus lower in priority of payment and/or in priority of lien to Senior Loans, they are subject to the additional risk that the cash flow of the

Borrower and property securing the loan or debt, if any, may be insufficient to meet scheduled payments after giving effect to the senior secured obligations of the Borrower. This risk is generally higher for subordinated unsecured loans or debt, which are not backed by a security interest in any specific collateral. Subordinated Loans generally have greater price volatility than Senior Loans and may be less liquid.

Below Investment Grade Instruments

The Fund anticipates that, under normal market conditions, a majority of the Fund's assets, including its investments in Senior Loans, Subordinated Loans and other debt securities, will be invested in instruments rated below investment grade, such as those rated Ba1 or lower by Moody's and BB+ or lower by S&P or Fitch or instruments comparably rated by other rating agencies, or in unrated instruments determined by the Adviser to be of comparable quality. Instruments rated Ba1 or lower by Moody's are judged to have speculative elements, their future cannot be considered as well assured and often the protection of interest and principal payments may be very moderate. Instruments rated BB+ or lower by S&P or Fitch are regarded as having predominantly speculative characteristics and, while such obligations have less near-term vulnerability to default than other speculative grade debt, they face major ongoing uncertainties or exposure to adverse business, financial or economic conditions which could lead to inadequate capacity to meet timely interest and principal payments.

Lower grade instruments, though higher yielding, are characterized by higher risk. They may be subject to certain risks with respect to the issuing entity and to greater market fluctuations than certain lower yielding, higher rated instruments. The retail secondary market for lower grade instruments may be less liquid than that of higher rated instruments. Adverse conditions could make it difficult at times for the Fund to sell certain instruments or could result in lower prices than those used in calculating the Fund's net asset value.

The prices of credit instruments generally are inversely related to interest rate changes; however, the price volatility caused by fluctuating interest rates of instruments also is inversely related to the coupon of such instruments. Accordingly, lower grade instruments may be relatively less sensitive to interest rate changes than higher quality instruments of comparable maturity, because of their higher coupon. This higher coupon is what the investor receives in return for bearing greater credit risk. The higher credit risk associated with lower grade instruments potentially can have a greater effect on the value of such instruments than may be the case with higher quality issues of comparable maturity, and will be a substantial factor in the Fund's relative share price volatility.

Distressed and Defaulted Securities

The Fund may invest in the securities of financially distressed and bankrupt issuers, including debt obligations that are in covenant or payment default. Such investments generally trade significantly below par and are considered speculative. The repayment of defaulted obligations is subject to significant uncertainties. Defaulted obligations might be repaid only after lengthy workout or bankruptcy proceedings, during which the issuer might not make any interest or other payments. Typically such workout or bankruptcy proceedings result in only partial recovery of cash payments or an exchange of the defaulted obligation for other debt or equity securities of the issuer or its affiliates, which may in turn be illiquid or speculative. In addition to pre-existing outstanding debt obligations of issuers undergoing financial distress, the Fund may also invest in "debtor-in-possession" loans ("DIP Loans") newly issued in connection with "special situation" restructuring and refinancing transactions. DIP Loans are loans to a debtor-in-possession in a proceeding under the U.S. bankruptcy code that have been approved by the bankruptcy court. DIP Loans are typically fully secured by a lien on the debtor's otherwise unencumbered assets or secured by a junior lien on the debtor's encumbered assets (so long as the loan is fully secured based on the most recent current valuation or appraisal report of the debtor). DIP Loans are often required to close with certainty and in a rapid manner in order to satisfy existing creditors and to enable the issuer to emerge from bankruptcy or to avoid a bankruptcy proceeding. The Adviser believes that DIP Loans can offer holders thereof the opportunity to achieve attractive rates of return relative to the risk assumed.

Distressed and defaulted securities generally present the same risks as investment in below investment grade instruments. However, in most cases, these risks are of a greater magnitude because of the uncertainties of

investing in an issuer undergoing financial distress. As discussed above, an issuer of distressed securities may be in bankruptcy or undergoing some other form of financial restructuring. Interest and/or principle payments on distressed securities may be in default. Distressed securities present a risk of loss of principal value, including potentially a total loss of value. Distressed securities may be highly illiquid and the prices at which distressed securities may be sold may represent a substantial discount to what the Adviser believes to be the ultimate value of such obligations.

Corporate Bonds

The Fund may invest in corporate bonds. The issuer pays the investor a fixed or variable rate of interest and normally must repay the amount borrowed on or before maturity. Certain bonds are “perpetual” in that they have no maturity date. The investment return of corporate bonds reflects interest on the security and changes in the market value of the security. The market value of a corporate bond generally may be expected to rise and fall inversely with interest rates. The value of the intermediate- and longer-term corporate bonds normally fluctuates more in response to changes in interest rates than does the value of shorter-term corporate bonds. The market value of a corporate bond also may be affected by the credit rating of the corporation, the corporation’s performance and perceptions of the corporation in the market place. There is a risk that the issuers of the securities may not be able to meet their obligations on interest or principal payments at the time called for by an instrument.

Non-U.S. Securities

The Fund may invest in Non-U.S. Securities. Some Non-U.S. Securities may be less liquid and more volatile than securities of comparable U.S. issuers. Similarly, there is less volume and liquidity in most foreign securities markets than in the United States and, at times, greater price volatility than in the United States.

Because evidences of ownership of such securities usually are held outside the United States, the Fund will be subject to additional risks if it invests in Non-U.S. Securities, which include possible adverse political and economic developments, seizure or nationalization of foreign deposits and adoption of governmental restrictions which might adversely affect or restrict the payment of principal and interest on the foreign securities to investors located outside the country of the issuer, whether from currency blockage or otherwise. Because Non-U.S. Securities may trade on days when the Fund’s Common Shares are not priced, net asset value can change at times when Common Shares cannot be sold.

Certain of the Fund’s investment in foreign fixed income securities may be denominated in currencies other than the U.S. dollar. To the extent the Fund invests in such instruments, the value of the assets of the Fund as measured in U.S. dollars will be affected by changes in exchange rates. Generally, the Fund’s currency exchange transactions will be conducted on a spot (i.e., cash) basis at the spot rate prevailing in the currency exchange market. The cost of the Fund’s currency exchange transactions will generally be the difference between the bid and offer spot rate of the currency being purchased or sold. In order to protect against uncertainty in the level of future currency exchange rates, the Fund is authorized to enter into various currency exchange transactions. See “Risks—Foreign Currency Risk.”

Collateralized Loan Obligations

A CLO is a financing company (generally called a Special Purpose Vehicle or “SPV”), created to reappportion the risk and return characteristics of a pool of assets. While the assets underlying CLOs are typically Senior Loans, the assets may also include (i) Subordinated Loans, (ii) debt securities that are rated below investment grade, (iii) debt tranches of other CLOs and (iv) equity securities incidental to investments in Senior Loans. When investing in CLOs, the Fund will not invest in equity tranches, which are the lowest tranche. However, the Fund may invest in lower tranches of CLOs, which typically experience a lower recovery, greater risk of loss or deferral or non-payment of interest than more senior tranches of the CLO. In addition, the Fund

intends to invest in CLOs consisting primarily of individual Senior Loans of Borrowers and not repackaged CLO obligations from other high risk pools. The key feature of the CLO structure is the prioritization of the cash flows from a pool of debt securities among the several classes of the CLO. The SPV is a company founded solely for the purpose of securitizing payment claims arising out of this diversified asset pool. On this basis, marketable securities are issued by the SPV which, due to the diversification of the underlying risk, generally represent a lower level of risk than the original assets. The redemption of the securities issued by the SPV typically takes place at maturity out of the cash flow generated by the collected claims.

Equity Securities

From time to time the Fund also may invest in or hold common stock and other equity securities incident to the purchase or ownership of a Senior Loan or in connection with a reorganization of a Borrower. Investments in equity securities incidental to investment in Senior Loans entail certain risks in addition to those associated with investments in Senior Loans. Common stock represents an equity ownership interest in a company. Historical trends would indicate that common stock is subject to higher levels of volatility and market and issuer-specific risk than debt securities. The value of the equity securities may be affected more rapidly, and to a greater extent, by company-specific developments and general market conditions. These risks may increase fluctuations in the Fund's net asset value. In addition, the Fund frequently may possess material non-public information about a Borrower as a result of its ownership of a Senior Loan of a Borrower. Because of prohibitions on trading in securities while in possession of material non-public information, the Fund might be unable to enter into a transaction in a security of the Borrower when it would otherwise be advantageous to do so.

Temporary Strategies; Invest-Up Period; Dissolution

During the period in which the net proceeds of this offering of Common Shares are being invested or during periods in which the Adviser determines that it is temporarily unable to follow the Fund's investment strategy or that it is impractical to do so, the Fund may deviate from its investment strategy and invest all or any portion of its assets in U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest that are either issued or guaranteed by the Treasury or by U.S. government agencies or instrumentalities; non-U.S. government securities which have received the highest investment grade credit rating, certificates of deposit issued against funds deposited in a bank or a savings and loan association; commercial paper; bankers' acceptances; bank time deposits; shares of money market funds; credit linked notes; repurchase agreements with respect to any of the foregoing; or any other fixed income securities that the Adviser considers consistent with this strategy. It is impossible to predict when, or for how long, the Fund will use these alternative strategies. There can be no assurance that such strategies will be successful.

Commercial Paper. Commercial paper represents short-term unsecured promissory notes issued in bearer form by corporations such as banks or bank holding companies and finance companies. The rate of return on commercial paper may be linked or indexed to the level of exchange rates between the U.S. dollar and a foreign currency or currencies.

Certificates of Deposit. Certificates of deposit are certificates that are issued against funds deposited in a commercial bank for a definite period of time and that earn a specified return and are normally negotiable. The issuer of a certificate of deposit agrees to pay the amount deposited plus interest to the bearer of the certificate on the date specified thereon. Certificates of deposit purchased by the Fund may not be fully insured by the Federal Deposit Insurance Corporation.

Fixed Time Deposits. Fixed time deposits are bank obligations payable at a stated maturity date and bearing interest at a fixed rate. Fixed time deposits may be withdrawn on demand by the investor, but may be subject to early withdrawal penalties which vary depending upon market conditions and the remaining maturity of the obligation. There are generally no contractual restrictions on the right to transfer a beneficial interest in a fixed time deposit to a third party, although there is no market for such deposits. The Fund may also hold funds on deposit with its custodian bank in an interest-bearing account for temporary purposes.

Bankers' Acceptances. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning, in effect, that the bank unconditionally agrees to pay the face value of the instrument on maturity.

Other Investment Techniques

Credit Derivatives

The Fund may engage in credit derivative transactions. There are two broad categories of credit derivatives: default price risk derivatives and market spread derivatives. Default price risk derivatives are linked to the price of reference securities or loans after a default by the issuer or Borrower, respectively. Market spread derivatives are based on the risk that changes in market factors, such as credit spreads, can cause a decline in the value of a security, loan or index. There are three basic transactional forms for credit derivatives: swaps, options and structured instruments. The Fund currently intends to invest primarily in credit default swaps as a seller (as defined below). A credit default swap is an agreement between two counterparties that allows one counterparty (the "seller") to sell the swap and or be "long" on a third party's credit risk and the other party (the "buyer") to purchase the swap and be "short" on the credit risk. Typically, the seller agrees to make regular fixed payments to the buyer with the same frequency as the underlying reference bond. In exchange, the seller typically has the right upon default of the underlying bond to put the bond to the buyer in exchange for the bond's par value plus interest. Credit default swaps can be used as a substitute for purchasing or selling a credit security and sometimes is preferable to actually purchasing the security. The Fund does not intend to leverage its investments through the use of credit default swaps. A purchaser of a credit default swap is subject to counterparty risk. The Fund will monitor any such swaps or derivatives with a view towards ensuring that the Fund remains in compliance with all applicable regulatory investment policy and tax requirements.

Credit Linked Notes

The Fund may purchase credit-linked notes for risk management purposes. A credit-linked note is a form of funded credit derivative instrument. It is a synthetic obligation between two or more parties where the payment of principal and/or interest is based on the performance of some obligation (a reference obligation). Credit-linked notes are created by embedding a credit default swap in a funded asset to form an investment whose credit risk and cash flow characteristics resemble those of a bond or loan. These credit-linked notes pay an enhanced coupon to the investor for taking on the added credit risk of the reference issuer. In addition to the credit risk of the reference obligations and interest rate risk, the buyer/seller of credit-linked notes is subject to counterparty risk.

Interest Rate Transactions

The Fund can normally be expected to have less significant interest rate-related fluctuations in its net asset value per share than investment companies investing primarily in fixed income securities (other than money market funds and some short term bond funds). However, because floating or variable rates on Senior Loans only reset periodically, changes in prevailing interest rates can be expected to cause some fluctuations in the Fund's net asset value. Similarly, a sudden and significant increase in market interest rates may cause a decline in the Fund's net asset value. In addition, Senior Loans may allow the Borrower to opt between LIBOR-based interest rates, or interest rates based on a replacement rate in the event that LIBOR is discontinued, and interest rates based on bank prime rates, which may have an impact on the Fund's net asset value.

The Fund may use interest rate swaps for risk management purposes only and not as a speculative investment and would typically use interest rate swaps to shorten the average interest rate reset time of the Fund's holdings. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of fixed rate payments for floating rate payments). The Fund will only enter into interest rate swaps on a net basis. If the other party to an interest rate swap defaults, the Fund's risk of loss consists of the net amount of payments that the Fund is contractually entitled to receive. The net amount of the excess, if any, of the Fund's obligations over its entitlements will be maintained in a segregated account by the Fund's custodian. The Fund will not enter into any interest rate swap unless the claims-paying ability of the other party thereto is considered to be investment grade by the Adviser. If there is a

default by the other party to such a transaction, the Fund will have contractual remedies pursuant to the agreements related to the transaction. These instruments are traded in the over-the-counter market.

The use of interest rate swaps is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. If the Adviser is incorrect in its forecasts of market values, interest rates and other applicable factors, the investment performance of the Fund would be unfavorably affected.

Total Return Swaps

The Fund may enter into total return swaps. In a total return swap, the Fund pays another party the total return of an underlying debt or equity security and in exchange receives a floating local short-term interest rate, or vice versa. The payment obligation would be based on the notional amount of the swap. The Fund may use total return swaps for hedging or investment purposes.

Foreign Currency Transactions

The Fund may engage in foreign currency exchange transactions in connection with its investments in foreign securities. The Fund will conduct its foreign currency exchange transactions either on a spot (i.e., cash) basis at the spot rate prevailing in the foreign currency exchange market or through forward contracts to purchase or sell foreign currencies, including the payment of dividends and the settlement of securities transactions which otherwise might require untimely dispositions of Fund securities.

Forward Foreign Currency Exchange Contracts

The Fund may enter into forward foreign currency exchange contracts in order to protect against possible losses on foreign investments resulting from adverse changes in the relationship between the U.S. dollar and foreign currencies. A forward foreign currency exchange contract involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days (usually less than one year) from the date of the contract agreed upon by the parties, at a price and for an amount set at the time of the contract. These contracts are traded in the interbank market conducted directly between currency traders (usually large commercial banks) and their customers. A forward contract generally has a deposit requirement, and no commissions are charged at any stage for trades. Although foreign exchange dealers do not charge a fee for conversion, they do realize a profit based on the difference (the spread) between the price at which they are buying and selling various currencies. However, forward foreign currency exchange contracts may limit potential gains which could result from a positive change in such currency relationships. The Fund does not speculate in foreign currency.

Except for cross-hedges, the Fund will not enter into forward foreign currency exchange contracts or maintain a net exposure in such contracts when it would be obligated to deliver an amount of foreign currency in excess of the value of its portfolio securities or other assets denominated in that currency or, in the case of a "cross-hedge," denominated in a currency or currencies that the Adviser believes will tend to be closely correlated with that currency with regard to price movements. At the consummation of a forward contract, the Fund may either make delivery of the foreign currency or terminate its contractual obligation to deliver the foreign currency by purchasing an offsetting contract obligating it to purchase, at the same maturity date, the same amount of such foreign currency. If the Fund chooses to make delivery of the foreign currency, it may be required to obtain such currency through the sale of portfolio securities denominated in such currency or through conversion of other assets of the Fund into such currency. If the Fund engages in an offsetting transaction, the Fund will incur a gain or loss to the extent that there is a difference between the forward contract price and the offsetting forward contract price.

It should be realized that this method of protecting the value of the Fund's portfolio securities against a decline in the value of a currency does not eliminate fluctuations in the underlying prices of the securities. It simply establishes a rate of exchange which can be achieved at some future point in time. Additionally, although such contracts tend to minimize the risk of loss due to a decline in the value of the hedged currency, at the same

time they tend to limit any potential gain should the value of such currency increase. Generally, the Fund will not enter into a forward foreign currency exchange contract with a term longer than one year.

Investment Policies

Credit Ratings and Unrated Securities

Rating agencies are private services that provide ratings of the credit quality of debt obligations, including convertible securities. Appendix A to the SAI describes the various ratings assigned to debt obligations by S&P, Moody's and Fitch. Ratings assigned by a rating agency are not absolute standards of credit quality and do not evaluate market risks or the liquidity of securities. Rating agencies may fail to make timely changes in credit ratings and an issuer's current financial condition may be better or worse than a rating indicates. Credit rating agencies may be paid by the companies whose debt they analyze and grade. To the extent that the issuer of a security pays a rating agency for the analysis of its security, an inherent conflict of interest may exist that could affect the reliability of the rating. The Fund will not necessarily sell a security when its rating is reduced below its rating at the time of purchase. The Adviser does not rely solely on credit ratings, and develops its own analysis of issuer credit quality. The ratings of a debt security may change over time. S&P, Moody's and Fitch monitor and evaluate the ratings assigned to securities on an ongoing basis. As a result, securities held by the Fund could receive a higher rating (which would tend to increase their value) or a lower rating (which would tend to decrease their value) during the period in which they are held.

The Fund may purchase unrated securities (securities which are not rated by a rating agency) if the Adviser determines that the securities are of comparable quality to rated securities that the Fund may purchase. Unrated securities may be less liquid than comparable rated securities and involve the risk that the Adviser may not accurately evaluate the security's comparative credit rating. To the extent that the Fund invests in high yield and/or unrated securities, the Fund's success in achieving its investment objectives may depend more heavily on the Adviser's analysis than if the Fund invested exclusively in higher-quality and rated securities. The Adviser attempts to reduce the risks of investing in lower rated or unrated debt instruments through active portfolio management, credit analysis and attention to current developments and trends in the economy and the financial markets.

The Fund is not required to dispose of a security in the event that a rating agency downgrades its assessment of the credit characteristics of a particular issue or withdraws its assessment, including in the event of a default. In determining whether to retain or sell such a security, the Adviser may consider such factors as Adviser's assessment of the credit quality of the issuers of such security, the price at which such security could be sold and the rating, if any, assigned to such security by other rating agencies.

Percentage Limitations

Compliance with any policy or limitation of the Fund that is expressed as a percentage of assets is determined at the time of purchase of portfolio securities. The policy will not be violated if these limitations are exceeded because of changes in the market value or investment rating of the Fund's assets or if a Borrower or issuer distributes equity securities incident to the purchase or ownership of a loan or fixed-income instrument or in connection with a reorganization of a Borrower or issuer.

Segregation and Cover Requirements

Certain portfolio management techniques, such as engaging in short sales, entering into credit default swaps or futures contracts, or purchasing securities on a when-issued or delayed delivery basis may be considered senior securities unless appropriate steps are taken to segregate the Fund's assets or otherwise cover its obligations. When employing these techniques, the Fund may segregate liquid assets, enter into offsetting transactions or own positions covering its obligations. To the extent the Fund covers its commitment under such

a portfolio management technique, such instrument will not be considered a senior security for the purposes of the 1940 Act. The Fund may cover such transactions using other methods currently or in the future permitted under the 1940 Act, the rules and regulations thereunder, or orders issued by the SEC thereunder. For these purposes, interpretations and guidance provided by the SEC staff may be taken into account when deemed appropriate by the Fund. These segregation and coverage requirements could result in the Fund maintaining securities positions that it would otherwise liquidate, segregating assets at a time when it might be disadvantageous to do so or otherwise restricting portfolio management. Such segregation and cover requirements will not limit or offset losses on related positions.

Portfolio Turnover

Active and frequent trading may lead to the realization and distribution to shareholders of higher capital gains, which would increase their tax liability. Frequent trading also increases transaction costs, which could detract from the Fund's performance.

Limited Term

On November 17, 2017, shareholders approved extending the term of the Fund by two years by changing the Fund's scheduled dissolution date from May 31, 2020 to May 31, 2022, absent any further extension approved by shareholders. Subsequently, on November 18, 2019, the Fund's Board approved a proposal to amend the Fund's Amended and Restated Agreement and Declaration of Trust (the "Agreement and Declaration of Trust") to allow an extension of up to five years in length. The Fund's Board also approved a proposal to extend the term of the Fund by five years by changing the Fund's scheduled dissolution date from May 31, 2022 to May 31, 2027. Shareholders approved extending the term of the Fund at a special shareholder meeting held on February 19, 2020. Upon dissolution, the Fund will distribute substantially all of its net assets to shareholders, after making appropriate provision for any liabilities of the Fund.

The Fund's Amended and Restated Agreement and Declaration of Trust (the "Agreement and Declaration of Trust") provides that the Fund will dissolve on May 31, 2020 (which was extended to May 31, 2022 and then to May 31, 2027), except for the purpose of paying, satisfying and discharging any existing debts or obligations, collecting and distributing its assets and doing all other acts required to liquidate and wind up its business and affairs, unless extended by shareholder approval. The dissolution process could be extended depending on market conditions at that time.

Pursuant to the Agreement and Declaration of Trust, prior to the date of dissolution a majority of the board of trustees, with the approval of a majority of the shareholders entitled to vote (as defined in the Investment Company Act of 1940, as amended (the "Investment Company Act")) may extend the life of the Fund. If approved, the dissolution date of the Fund may be extended by a period of two years or such shorter time as may be determined. However, the dissolution date of the Fund may be extended an unlimited number of times. In determining whether to extend the dissolution date of the Fund, the board of trustees may consider the inability to sell the Fund's assets in a time frame consistent with dissolution due to lack of market liquidity or other extenuating circumstances. Additionally, the board of trustees may determine that market conditions are such that it is reasonable to believe that, with an extension, the Fund's remaining assets will appreciate by an amount that is meaningful relative to the cost and expense of continuing the operation of the Fund.

The Fund has a reinvestment period that will end one year prior to the dissolution date of the Fund and accordingly is currently scheduled to end on May 31, 2026. The reinvestment period was extended in connection with the extension of the dissolution date. After the reinvestment period, the Fund will stop reinvesting principal proceeds generated by maturities, prepayments and sales of investments. Principal proceeds after the reinvestment period may be distributed on a pro rata basis among the Fund's common shareholders, preferred shareholders, noteholders and lenders, subject to any terms of any borrowing or preferred share and/or notes issuance. Principal proceeds distributed to shareholders may constitute tax-advantaged returns of capital for U.S. federal income tax purposes. See "Tax Matters." The Adviser will continue receiving a fee for investment advisory services after the reinvestment period on the Fund's Managed Assets.

LEVERAGE

The Fund incurs leverage as part of its investment strategy. All costs and expenses related to any form of leverage used by the Fund are borne entirely by common shareholders. The Fund uses Borrowings in an aggregate amount of up to 33 1/3% of the Fund's total assets, less all liabilities and indebtedness not represented by senior securities, immediately after such Borrowings. As of September 30, 2021, the Fund had a credit facility with a financial institution in place under which it had Borrowings representing approximately 32.68% of its total assets, less all liabilities and indebtedness not represented by senior securities. Furthermore, the Fund may add leverage to its portfolio through the issuance of Preferred Shares and may in the future continue to use leverage through such issuances in an aggregate amount of up to 33 1/3% of the Fund's total assets immediately after such issuance. As of September 30, 2021, our total leverage (including Borrowings and Preferred Shares) represented 32.68% of our total assets, less all liabilities and indebtedness not represented by senior securities. The leverage would generally have complete priority upon distribution of assets over the Fund's Common Shares. Although the timing of any leverage and the terms of the leverage would be determined by the Board, the Fund invests the proceeds derived from any leverage offering in securities consistent with the Fund's investment objectives and policies.

Leverage creates risk for the common shareholders, including the likelihood of greater volatility of NAV and market price of the Common Shares, and the risk that fluctuations in interest rates on Borrowings may affect the return to the common shareholders or will result in fluctuations in the dividends paid on the Common Shares. To the extent total return exceeds the cost of leverage, the Fund's return will be greater than if leverage had not been used. Conversely, if the total return derived from securities purchased with funds received from the use of leverage is less than the cost of leverage, the Fund's return will be less than if leverage had not been used, and therefore the amount available for distribution to common shareholders as dividends and other distributions will be reduced. In the latter case, the Adviser in its best judgment nevertheless may determine to maintain the Fund's leveraged position if it expects that the benefits to common shareholders of maintaining the leveraged position will outweigh the current reduced return. Under normal market conditions, the Fund anticipates that it will be able to invest the proceeds from leverage at a higher rate of return than the costs of leverage, which would enhance returns to common shareholders. The use of leverage creates risks and involves special considerations. See "Risks—Leverage Risk."

The Fund's Declaration of Trust authorizes the Fund, without prior approval of the common shareholders, to borrow money. In this connection, the Fund may issue notes or other evidence of indebtedness (including bank borrowings or commercial paper) and may secure any such borrowings by mortgaging, pledging or otherwise subjecting as security the Fund's assets. In connection with such borrowing, the Fund may be required to maintain minimum average balances with the lender or to pay a commitment or other fee to maintain a line of credit. Any such requirements will increase the cost of borrowing over the stated interest rate. Under the requirements of the 1940 Act, the Fund, immediately after any such borrowings, must have an "asset coverage" of at least 300%. With respect to such borrowing, asset coverage means the ratio which the value of the total assets of the Fund, less all liabilities and indebtedness other than senior securities (as defined in the 1940 Act), bears to the aggregate amount of such borrowing represented by senior securities issued by the Fund. The Fund will manage its short positions in securities and certain of its derivative positions by maintaining an amount of cash or liquid securities in a segregated account equal to the face value of those positions. The Fund may also offset derivative positions against one another or against other assets to manage the effective market exposure resulting from derivatives in its portfolio. To the extent that the Fund does not segregate liquid assets or otherwise cover its obligations under such transactions, such transactions will be treated as senior securities representing indebtedness ("Borrowings") for purposes of the requirement under the 1940 Act that the Fund may not enter into any such transactions if the Fund's Borrowings would thereby exceed 33 1/3% of its total assets, less all liabilities and indebtedness of the Fund other than senior securities.

The rights of lenders to the Fund to receive interest on and repayment of principal of any such Borrowings will be senior to those of the common shareholders, and the terms of any such Borrowings may contain provisions which limit certain activities of the Fund, including the payment of dividends to common shareholders in certain circumstances. Further, the 1940 Act does (in certain circumstances) grant to the lenders to the Fund certain voting rights in the event of default in the payment of interest on or repayment of principal. In the event that such provisions would impair the Fund's status as a regulated investment company under the Internal Revenue Code of 1986, as amended (the "Code"), the Fund intends to repay the Borrowings. Any borrowing will likely be ranked senior or equal to all other existing and future Borrowings of the Fund.

Certain types of borrowings may result in the Fund being subject to covenants in credit agreements relating to asset coverage and portfolio composition requirements. Generally, covenants to which the Fund may be subject include affirmative covenants, negative covenants, financial covenants, and investment covenants. An example of an affirmative covenant would be one that requires the Fund to send its annual audited financial report to the lender. An example of a negative covenant would be one that prohibits the Fund from making any amendments to its fundamental policies. An example of a financial covenant is one that would require the Fund to maintain a 3:1 asset coverage ratio. An example of an investment covenant is one that would require the Fund to limit its investment in a particular asset class. The Fund may be subject to certain restrictions on investments imposed by guidelines of one or more rating agencies, which may issue ratings for any short-term corporate debt securities or Preferred Shares issued by the Fund. These guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed by the 1940 Act. It is not anticipated that these covenants or guidelines will impede the Adviser from managing the Fund's portfolio in accordance with the Fund's investment objectives and policies.

Section 18(a) of the 1940 Act requires certain actions by the Fund if its asset coverage falls below certain levels. Under the 1940 Act, the Fund is not permitted to issue Preferred Shares unless immediately after such issuance the value of the Fund's total assets, less all liabilities and indebtedness of the Fund other than senior securities, is at least 200% of the liquidation value of the outstanding Preferred Shares (*i.e.*, the liquidation value may not exceed 50% of the Fund's total assets, less all liabilities and indebtedness of the Fund other than senior securities). In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless, at the time of such declaration, the Fund's total assets is at least 200% of the liquidation value of its outstanding Preferred Shares plus its outstanding liabilities and indebtedness. In order to reduce the likelihood of a situation arising where the Fund would be unable to make distributions on its Common Shares, the Fund may purchase or redeem Preferred Shares from time to time to the extent necessary in order to maintain asset coverage of any Preferred Shares of at least 200%. In addition, as a condition to obtaining ratings on the Preferred Shares, the terms of any Preferred Shares issued are expected to include more stringent asset coverage maintenance provisions which will require the redemption of the Preferred Shares in the event of non-compliance by the Fund and may also prohibit dividends and other distributions on the Common Shares in such circumstances. In order to meet redemption requirements, the Fund may have to liquidate portfolio securities. Such liquidations and redemptions would cause the Fund to incur related transaction costs and could result in capital losses to the Fund. Prohibitions on dividends and other distributions on the Common Shares could impair the Fund's ability to qualify as a regulated investment company under the Code.

If the Fund has preferred shares outstanding, two of the Fund's trustees will be elected by the holders of preferred shares voting separately as a class. The remaining trustees of the Fund will be elected by holders of Common Shares and preferred shares voting together as a single class. In the event the Fund failed to pay dividends on preferred shares for two years, holders of preferred shares would be entitled to elect a majority of the trustees of the Fund.

If the Fund issued preferred shares and/or notes, it may be subject to certain restrictions imposed by guidelines of one or more ratings agencies that may issue ratings for preferred shares issued by the Fund. These

guidelines would be expected to impose asset coverage or portfolio composition requirements that would be more stringent than those imposed on the Fund by the Investment Company Act. It is not anticipated that these covenants or guidelines would impede the Adviser from managing the Fund’s portfolio in accordance with the Fund’s investment objectives and policies. The Fund may also borrow money as a temporary measure for extraordinary or emergency purposes, including the payment of dividends and the settlement of securities transactions which otherwise might require detrimental dispositions of Fund securities.

Effects of Leverage

The Fund currently utilizes the credit facility to borrow up to an aggregate limit of \$142,000,000 under two loan tranches, Tranche A and Tranche B. The Tranche A commitment allows for borrowings up to \$48,000,000 and the Tranche B commitment allows for borrowings up to \$94,000,000. As of September 30, 2021, the Fund had \$108,500,000 outstanding under its credit facility, representing approximately 32.68% of its total assets, less all liabilities and indebtedness not represented by senior securities. As of September 30, 2021, the annual interest rate on such borrowings was 1.12%.

The following table is furnished in response to requirements of the SEC. It is designed to illustrate the effect of leverage on Common Shares total return, assuming investment portfolio total returns (comprised of income and changes in the value of securities held in the Fund’s portfolio) of (10)%, (5)%, 0%, 5% and 10%. These assumed investment portfolio returns are hypothetical figures and are not necessarily indicative of the investment portfolio returns experienced or expected to be experienced by the Fund. See “Risks.”

The table further reflects the Fund’s leverage as of September 30, 2021, and the Fund’s currently projected annual average interest on its leverage of 1.12%. The Fund must experience an annual rate of return of 0.54% in order to cover annual interest payments on borrowings under the Fund’s credit facility. These figures are estimates based on current market conditions, used for illustration purposes only. Actual expenses associated with borrowings used by the Fund may vary frequently and may be significantly higher or lower than the rate used for the example above.

Assumed Portfolio Total Return (Net of Expenses) . . .	(10)%	(5)%	0%	5%	10%
Common Shares Total Return	(15.40)%	(7.97)%	(0.54)%	6.88%	14.31%

Total Return is composed of two elements: the dividends on Common Shares paid by the Fund (the amount of which is largely determined by the net investment income of the Fund after paying dividends or interest on its leverage) and gains or losses on the value of the securities the Fund owns. As required by SEC rules, the table above assumes that the Fund is more likely to suffer capital losses than to enjoy capital appreciation. For example, to assume a total return of 0% the Fund must assume that the distributions it receives from its investments are entirely offset by losses in the value of those investments.

RISKS

The Fund is a diversified, closed-end management investment company designed primarily as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program and, due to the uncertainty inherent in all investments, there can be no assurance that the Fund will achieve its investment objectives. At any point in time an investment in the Fund's Common Shares may be worth less than the original amount invested, even after taking into account the distributions paid by and the ability of shareholders to reinvest dividends.

Market Discount Risk

The Fund's Common Shares have traded both at a premium and at a discount to its NAV. The last reported sale price, as of January 14, 2022 was \$16.44 per share. The Fund's NAV per share and percentage premium to NAV per share of its Common Shares as of January 14, 2022 were \$16.30 and 0.86%, respectively. Shares of closed-end investment companies frequently trade at a discount to their NAV. This characteristic is a risk separate and distinct from the risk that our NAV could decrease as a result of the Fund's investment activities and may be greater for investors expecting to sell their shares in a relatively short period following completion of any offering under this Prospectus. Although the value of the Fund's net assets is generally considered by market participants in determining whether to purchase or sell shares, whether investors will realize gains or losses upon the sale of the Fund's Common Shares depends upon whether the market price of the Fund's Common Shares at the time of sale is above or below the investor's purchase price for the Fund's Common Shares. Because the market price of the Fund's Common Shares is affected by factors such as NAV, dividend or distribution levels (which are dependent, in part, on expenses), supply of and demand for the Fund's Common Shares, stability of distributions, trading volume of the Fund's Common Shares, general market and economic conditions, and other factors beyond our control, the Fund cannot predict whether the Common Shares will trade at, below or above NAV or at, below or above the offering price. The Fund's Common Shares are designed primarily for long-term investors and you should not view the Fund as a vehicle for trading purposes.

Investment and Market Risk

An investment in the Fund's Common Shares is subject to investment risk, including the possible loss of the entire principal amount invested. An investment in the Fund's Common Shares represents an indirect investment in the portfolio of floating-rate instruments, other securities and derivative investments owned by the Fund, and the value of these investments may fluctuate, sometimes rapidly and unpredictably. At any point in time an investment in the Fund's Common Shares may be worth less than the original amount invested, even after taking into account distributions paid by the Fund and the ability of common shareholders to reinvest dividends. The Fund may also use leverage, which would magnify the Fund's investment, market and certain other risks. See "—Leverage Risks" below.

Senior Loans Risk

Under normal market conditions, the Fund will invest at least 80% of its Managed Assets in Senior Loans. This policy is not fundamental and may be changed by the board of trustees of the Fund with at least 60 days' written notice provided to shareholders. Senior Loans hold the most senior position in the capital structure of a business entity, are secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by unsecured creditors, subordinated debt holders and stockholders of the Borrower. Senior Loans are usually rated below investment grade or may also be unrated. As a result, the risks associated with Senior Loans are similar to the risks of below investment grade instruments, although Senior Loans are senior and secured in contrast to other below investment grade instruments, which are often subordinated or unsecured. Nevertheless, if a Borrower under a Senior Loan defaults or goes into bankruptcy, the Fund may recover only a fraction of what is owed on the Senior Loan or nothing at all. Senior Loans are subject to a number of risks described elsewhere in this Prospectus, including credit risk, liquidity risk and management risk. See "—Below Investment Grade Instruments Risk," "—Credit Risk" and "—Liquidity Risk."

There is less readily available and reliable information about most Senior Loans than is the case for many other types of securities, including securities issued in transactions registered under the Securities Act, or registered under the Exchange Act. As a result, the Adviser will rely primarily on its own evaluation of a Borrower's credit quality rather than on any available independent sources. Therefore, the Fund will be particularly dependent on the analytical abilities of the Adviser.

The Fund will typically invest in Senior Loans rated below investment grade, which are considered speculative because of the credit risk of their issuers. Such companies are more likely than investment grade issuers to default on their payments of interest and principal owed to the Fund, and such defaults could reduce the Fund's net asset value and income distributions. An economic downturn would generally lead to a higher non-payment rate, and a Senior Loan may lose significant market value before a default occurs. Moreover, any specific collateral used to secure a Senior Loan may decline in value or become illiquid, which would adversely affect the Senior Loan's value.

In general, the secondary trading market for Senior Loans is not well developed. No active trading market may exist for certain Senior Loans, which may make it difficult to value them. Illiquidity and adverse market conditions may mean that the Fund may not be able to sell Senior Loans quickly or at a fair price. To the extent that a secondary market does exist for certain Senior Loans, the market for them may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods.

Senior Loans and other variable rate debt instruments are subject to the risk of payment defaults of scheduled interest or principal. Such payment defaults would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the net asset value of the Fund. See "—Credit Risk." Similarly, a sudden and significant increase in market interest rates may increase the risk for payment defaults and cause a decline in the value of these investments and in the Fund's net asset value. Other factors (including, but not limited to, rating downgrades, credit deterioration, a large downward movement in stock prices, a disparity in supply and demand of certain securities or market conditions that reduce liquidity) can reduce the value of Senior Loans and other debt obligations, impairing the Fund's net asset value.

Although the Senior Loans in which the Fund will invest will be secured by collateral, there can be no assurance that such collateral could be readily liquidated or that the liquidation of such collateral would satisfy the Borrower's obligation in the event of non-payment of scheduled interest or principal. In the event of the bankruptcy or insolvency of a Borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a Senior Loan. In the event of a decline in the value of the already pledged collateral, if the terms of a Senior Loan do not require the Borrower to pledge additional collateral, the Fund will be exposed to the risk that the value of the collateral will not at all times equal or exceed the amount of the Borrower's obligations under the Senior Loans. To the extent that a Senior Loan is collateralized by stock in the Borrower or its subsidiaries, such stock may lose some or all of its value in the event of the bankruptcy or insolvency of the Borrower. Those Senior Loans that are under-collateralized involve a greater risk of loss.

Some Senior Loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the Senior Loans to presently existing or future indebtedness of the Borrower or take other action detrimental to lenders, including the Fund. Such court action could under certain circumstances include invalidation of Senior Loans.

If legislation or state or federal regulations impose additional requirements or restrictions on the ability of financial institutions to make loans, the availability of Senior Loans for investment by the Fund may be adversely affected. In addition, such requirements or restrictions could reduce or eliminate sources of financing for certain Borrowers. This would increase the risk of default. If legislation or federal or state regulations require financial institutions to increase their capital requirements this may cause financial institutions to dispose of Senior Loans that are considered highly levered transactions. Such sales could result in prices that, in the opinion of the

Adviser, do not represent fair value. If the Fund attempts to sell a Senior Loan at a time when a financial institution is engaging in such a sale, the price the Fund could get for the Senior Loan may be adversely affected.

The Fund may acquire Senior Loans through assignments or participations. The Fund will typically acquire Senior Loans through assignment and may elevate a participation interest into an assignment as soon as practicably possible. The purchaser of an assignment typically succeeds to all the rights and obligations of the assigning institution and becomes a lender under the credit agreement with respect to the debt obligation; however, the purchaser's rights can be more restricted than those of the assigning institution, and the Fund may not be able to unilaterally enforce all rights and remedies under the loan and with regard to any associated collateral. A participation typically results in a contractual relationship only with the institution participating out the interest, not with the Borrower. Sellers of participations typically include banks, broker-dealers, other financial institutions and lending institutions. The Adviser has adopted best execution procedures and guidelines to mitigate credit and counterparty risk in the atypical situation when the Fund must acquire a Senior Loan through a participation. The Adviser has established a risk and valuation committee that regularly reviews each broker-dealer counterparty for, among other things, its quality and the quality of its execution. The established procedures and guidelines require trades to be placed for execution only with broker-dealer counterparties approved by the risk and valuation committee of the Adviser. The factors considered by the committee when selecting and approving brokers and dealers include, but are not limited to: (i) quality, accuracy, and timeliness of execution, (ii) review of the reputation, financial strength and stability of the financial institution, (iii) willingness and ability of the counterparty to commit capital, (iv) ongoing reliability and (v) access to underwritten offerings and secondary markets. In purchasing participations, the Fund generally will have no right to enforce compliance by the Borrower with the terms of the loan agreement against the Borrower, and the Fund may not directly benefit from the collateral supporting the debt obligation in which it has purchased the participation. As a result, the Fund will be exposed to the credit risk of both the Borrower and the institution selling the participation. Further, in purchasing participations in lending syndicates, the Fund will not be able to conduct the due diligence on the Borrower or the quality of the Senior Loan with respect to which it is buying a participation that the Fund would otherwise conduct if it were investing directly in the Senior Loan, which may result in the Fund being exposed to greater credit or fraud risk with respect to the Borrower or the Senior Loan than the Fund expected when initially purchasing the participation. See "The Fund's Investments—Portfolio Composition—Senior Loans."

The Fund may obtain exposure to Senior Loans through the use of derivative instruments, which have become increasingly available. Although the Fund does not have an intention to do so, the Fund may utilize these instruments and similar instruments that may be available in the future. Derivative transactions involve the risk of loss due to unanticipated adverse changes in securities prices, interest rates, the inability to close out a position, imperfect correlation between a position and the desired hedge, tax constraints on closing out positions and portfolio management constraints on securities subject to such transactions. The potential loss on derivative instruments may be substantial relative to the initial investment therein. The Fund may also be subject to the risk that the counterparty in a derivative transaction will default on its obligations.

Subordinated Loans Risk

The Fund may invest up to 20% of its Managed Assets in Subordinated Loans. Subordinated Loans generally are subject to similar risks as those associated with investments in Senior Loans except that such loans are subordinated in payment and/or lower in lien priority to first lien holders. In the event of default on a Subordinated Loan, the first priority lien holder has first claim to the underlying collateral of the loan. Subordinated Loans are subject to the additional risk that the cash flow of the Borrower and property securing the loan or debt, if any, may be insufficient to meet scheduled payments after giving effect to the senior unsecured or senior secured obligations of the Borrower. This risk is generally higher for subordinated unsecured loans or debt, which are not backed by a security interest in any specific collateral. Subordinated Loans generally have greater price volatility than Senior Loans and may be less liquid. See "The Fund's Investments—Portfolio Composition—Subordinated Loans."

Below Investment Grade Instruments Risk

The Fund anticipates that it will invest the majority of its assets in Senior Loans, Subordinated Loans and other debt securities that are rated below investment grade. Below investment grade instruments are commonly referred to as “junk” or “high yield” instruments and are regarded as predominantly speculative with respect to the issuer’s capacity to pay interest and repay principal. Lower grade securities may be particularly susceptible to economic downturns. It is likely that a prolonged or deepening economic recession could adversely affect the ability of the issuers of such instruments to repay principal and pay interest thereon, increase the incidence of default for such instruments and severely disrupt the market value of such instruments.

Below investment grade instruments, though generally higher yielding, are characterized by higher risk. They may be subject to certain risks with respect to the issuing entity and to greater market fluctuations than certain lower yielding, higher rated instruments. The retail secondary market for lower grade instruments may be less liquid than that for higher rated securities. Adverse conditions could make it difficult at times for the Fund to sell certain securities or could result in lower prices than those used in calculating the Fund’s net asset value. Because of the substantial risks associated with investments in lower grade instruments, investors could lose money on their investment in Common Shares of the Fund, both in the short-term and the long-term. See “The Fund’s Investments—Portfolio Composition—Below Investment Grade Instruments.”

“Covenant-lite” Obligations Risk

The Fund may invest in, or obtain exposure to, obligations that may be “covenant-lite,” which means such obligations lack certain financial maintenance covenants. While these loans may still contain other collateral protections, a covenant-lite loan may carry more risk than a covenant-heavy loan made by the same borrower as it does not require the borrower to provide affirmation that certain specific financial tests have been satisfied on a routine basis as is required under a covenant-heavy loan agreement. Should a loan held by the Fund begin to deteriorate in quality, the Fund’s ability to negotiate with the borrower may be delayed under a covenant-lite loan compared to a loan with full maintenance covenants. This may in turn delay the Fund’s ability to seek to recover its investment.

Distressed and Defaulted Securities Risk

Investments in the securities of financially distressed companies involve substantial risks. These risks are often greater than those associated with below investment grade instruments because of the uncertainties of investing in the issuer undergoing the financial distress. These securities may present a substantial risk of default or may be in default at the time of investment. The Fund may incur additional expenses to the extent it is required to seek recovery upon a default in the payment of principal of or interest on its portfolio holdings. In any reorganization or liquidation proceeding relating to a Borrower or issuer, the Fund may lose its entire investment or may be required to accept cash or securities with a value less than its original investment. Among the risks inherent in investments in a troubled entity is the fact that it frequently may be difficult to obtain information as to the true financial condition of such Borrower or issuer. The Adviser’s judgments about the credit quality of the Borrower or issuer and the relative value of its securities may prove to be wrong. See “The Fund’s Investments—Portfolio Composition—Distressed and Defaulted Securities.”

Valuation Risk

Unlike publicly traded common stock which trades on national exchanges, there is no central place or exchange for most of the Fund’s investments to trade. The Fund’s investments generally trade on an “over-the-counter” market which may be anywhere in the world where the buyer and seller can settle on a price. Due to the lack of centralized information and trading, the valuation of floating rate instruments may carry more risk than that of common stock. Uncertainties in the conditions of the financial market, unreliable reference data, lack of transparency and inconsistency of valuation models and processes may lead to inaccurate asset pricing. In

addition, other market participants may value securities differently than the Fund. As a result, the Fund may be subject to the risk that when an instrument is sold in the market, the amount received by the Fund is less than the value of such floating rate instruments carried on the Fund's books.

Liquidity Risk

The Fund may invest up to 50% of its Managed Assets in securities that are considered illiquid. "Illiquid securities" are securities which cannot be sold within seven days in the ordinary course of business at approximately the value used by the Fund in determining its net asset value. The Fund may not be able to readily dispose of such securities at prices that approximate those at which the Fund could sell such securities if they were more widely-traded and, as a result of such illiquidity, the Fund may have to sell other investments or engage in borrowing transactions if necessary to raise cash to meet its obligations. Limited liquidity can also affect the market price of securities, thereby adversely affecting the Fund's net asset value and ability to make dividend distributions. Illiquid and restricted securities may be difficult to dispose of at a fair price at the times when the Fund believes it is desirable to do so. The market price of illiquid and restricted securities generally is more volatile than that of more liquid securities, which may adversely affect the price that the Fund pays for or recovers upon the sale of such securities. Illiquid and restricted securities are also more difficult to value, especially in challenging markets. The Adviser's judgment may play a greater role in the valuation process. Investment of the Fund's assets in illiquid and restricted securities may restrict the Fund's ability to take advantage of market opportunities. In order to dispose of an unregistered security, the Fund, where it has contractual rights to do so, may have to cause such security to be registered. A considerable period may elapse between the time the decision is made to sell the security and the time the security is registered, thereby enabling the Fund to sell it. Contractual restrictions on the resale of securities vary in length and scope and are generally the result of a negotiation between the issuer and acquirer of the securities. In either case, the Fund would bear market risks during that period.

Some Senior Loans are not readily marketable and may be subject to restrictions on resale. Senior Loans are not listed on any national securities exchange and no active trading market may exist for the Senior Loans in which the Fund will invest. Where a secondary market exists, the market for some Senior Loans may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. The Fund has no limitation on the amount of its assets which may be invested in securities that are not readily marketable or are subject to restrictions on resale.

Credit Risk

Credit risk is the risk that one or more Loans or other instruments in the Fund's portfolio will decline in price or fail to pay interest or principal when due because the issuer of the instrument experiences a decline in its financial status. While a senior position in the capital structure of a Borrower or issuer may provide some protection with respect to the Fund's investments in certain Loans, losses may still occur because the market value of Loans is affected by the creditworthiness of Borrowers or issuers and by general economic and specific industry conditions and the Fund's other investments will often be subordinate to other debt in the issuer's capital structure. To the extent the Fund invests in below investment grade instruments, it will be exposed to a greater amount of credit risk than a fund which invests in investment grade securities. The prices of lower grade instruments are more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher grade instruments. Instruments of below investment grade quality are predominantly speculative with respect to the issuer's capacity to pay interest and repay principal when due and therefore involve a greater risk of default. In addition, the Fund may enter into credit derivatives which may expose it to additional risk in the event that the instruments underlying the derivatives default.

Interest Rate Risk

The floating or variable rate feature of Senior Loans is a significant difference from typical fixed-income investments that carry significant interest rate risk. The Fund can normally be expected to have less significant

interest rate-related fluctuations in its net asset value per share than investment companies investing primarily in fixed income securities (other than money market funds and some short term bond funds). When interest rates decline, the value of a fixed income portfolio can normally be expected to rise. Conversely, when interest rates rise, the value of a fixed income portfolio can normally be expected to decline. Although the income available to the Fund will vary, the Adviser expects the Fund's policy of acquiring interests in Senior Loans may minimize fluctuations in net asset value of the Fund resulting from changes in market interest rates. However, because floating or variable rates on Senior Loans only reset periodically, changes in prevailing interest rates can be expected to cause some fluctuations in the Fund's net asset value. Similarly, a sudden and significant increase in market interest rates may cause a decline in the Fund's net asset value. In addition, Senior Loans may allow the Borrower to opt between LIBOR-based interest rates, or interest rates based on a replacement rate in the event that LIBOR is discontinued, and interest rates based on bank prime rates, which may have an impact on the Fund's net asset value. A material decline in the Fund's net asset value may impair the Fund's ability to maintain required levels of asset coverage.

Limited Term Risk

On or about May 31, 2027, the Fund will be dissolved, absent any further extension approved by shareholders. The Fund's limited term may cause it to sell securities when it otherwise would not, which could raise the Fund's returns to decrease and the market price of the Common Shares to fall. Rather than reinvesting the proceeds of its matured, called or sold securities, the Fund may distribute the proceeds in one or more liquidating distributions prior to the final dissolution, which may cause the Fund's fixed expenses to increase when expressed as a percentage of assets under management. Alternatively, the Fund may invest the proceeds in lower yielding securities or hold the proceeds in cash or cash equivalents, which may adversely affect the performance of the Fund. The board of trustees may in its sole discretion, without the consent or vote of the shareholders, choose to dissolve the Fund prior to the required dissolution date, which would cause the Fund to miss any market appreciation that occurs after the Fund is dissolved. Conversely, if the shareholders extend the dissolution date, market conditions may deteriorate and the Fund may experience losses. See "Certain Provisions in the Agreement and Declaration of Trust."

On November 18, 2019, the Fund's Board approved a proposal to amend the Fund's Amended and Restated Agreement and Declaration of Trust (the "Agreement and Declaration of Trust") to allow an extension of up to five years in length. The Fund's Board also approved a proposal to extend the term of the Fund by five years by changing the Fund's scheduled dissolution date from May 31, 2022 to May 31, 2027. Shareholders approved extending the term of the Fund at a special shareholder meeting held on February 19, 2020. Upon dissolution, the Fund will distribute substantially all of its net assets to shareholders, after making appropriate provision for any liabilities of the Fund.

The Fund's Amended and Restated Agreement and Declaration of Trust (the "Agreement and Declaration of Trust") provides that the Fund will dissolve on May 31, 2020 (which was extended to May 31, 2022 and then to May 31, 2027), except for the purpose of paying, satisfying and discharging any existing debts or obligations, collecting and distributing its assets and doing all other acts required to liquidate and wind up its business and affairs, unless extended by shareholder approval. The dissolution process could be extended depending on market conditions at that time.

Pursuant to the Agreement and Declaration of Trust, prior to the date of dissolution a majority of the board of trustees, with the approval of a majority of the shareholders entitled to vote (as defined in the Investment Company Act of 1940, as amended (the "Investment Company Act")) may extend the life of the Fund. If approved, the dissolution date of the Fund may be extended by a period of two years or such shorter time as may be determined. However, the dissolution date of the Fund may be extended an unlimited number of times. In determining whether to extend the dissolution date of the Fund, the board of trustees may consider the inability to sell the Fund's assets in a time frame consistent with dissolution due to lack of market liquidity or other extenuating circumstances. Additionally, the board of trustees may determine that market conditions are such that

it is reasonable to believe that, with an extension, the Fund's remaining assets will appreciate by an amount that is meaningful relative to the cost and expense of continuing the operation of the Fund.

The Fund has a reinvestment period that will end one year prior to the dissolution date of the Fund and accordingly is currently scheduled to end on May 31, 2026. The reinvestment period was extended in connection with the extension of the dissolution date. After the reinvestment period, the Fund will stop reinvesting principal proceeds generated by maturities, prepayments and sales of investments. Principal proceeds after the reinvestment period may be distributed on a pro rata basis among the Fund's common shareholders, preferred shareholders, noteholders and lenders, subject to any terms of any borrowing or preferred share and/or notes issuance. Principal proceeds distributed to shareholders may constitute tax-advantaged returns of capital for U.S. federal income tax purposes. See "Tax Matters." The Adviser will continue receiving a fee for investment advisory services after the reinvestment period on the Fund's Managed Assets.

Leverage Risk

The Fund currently anticipates utilizing leverage in an aggregate amount of up to 331/3% of its Managed Assets at the time the leverage is incurred in order to buy additional securities. The Fund currently anticipates that it will issue preferred shares and/or notes and it may also borrow funds from banks and other financial institutions. The use of leverage to purchase additional securities creates an opportunity for increased common share dividends, but also creates risks for the holders of Common Shares. Leverage is a speculative technique that exposes the Fund to greater risk and increased costs than if it were not implemented. Increases and decreases in the value of the Fund's portfolio will be magnified when the Fund uses leverage. As a result, leverage may cause greater changes in the Fund's net asset value which will be borne entirely by the Fund's common shareholders. The Fund will also have to pay dividends on its preferred shares or interest on its notes or borrowings, if any, which will increase expenses and may reduce the Fund's return. These dividend payments or interest expenses may be greater than the Fund's return on the underlying investments. The Fund's leveraging strategy may not be successful.

The Fund intends to issue preferred shares and/or notes as a form of leverage. Any such leverage of the Fund would be senior to the Fund's Common Shares, such that holders of preferred shares and/or notes would have priority over the common shareholders in the distribution of the Fund's assets, including dividends, distributions of principal proceeds after the reinvestment period and liquidating distributions. If preferred shares are issued and outstanding, holders of the preferred shares would elect two trustees of the Fund, and would vote separately as a class on certain matters which may at times give holders of preferred shares disproportionate influence over the Fund's affairs. If the preferred shares were limited in their term, redemptions of such preferred shares would require the Fund to liquidate its investments and would reduce the Fund's use of leverage, which could negatively impact common shareholders.

In addition, the Fund will pay (and the holders of Common Shares will bear) all costs and expenses relating to the issuance and ongoing maintenance of any preferred shares and/or notes issued by the Fund, including higher advisory fees. Accordingly, the Fund cannot assure you that the issuance of preferred shares and/or notes will result in a higher yield or return to the holders of the Common Shares.

The Fund anticipates that any money borrowed from a bank or other financial institution for investment purposes will accrue interest based on shorter-term interest rates that would be periodically reset. So long as the Fund's portfolio provides a higher rate of return, net of expenses, than the interest rate on borrowed money, as reset periodically, the leverage may cause the holders of Common Shares to receive a higher current rate of return than if the Fund were not leveraged. If, however, long-term and/or short-term rates rise, the interest rate on borrowed money could exceed the rate of return on securities held by the Fund, reducing return to the holders of Common Shares. Developments in the credit markets may adversely affect the ability of the Fund to borrow for investment purposes and may increase the costs of such borrowings, which would reduce returns to the holders of Common Shares.

There is no assurance that a leveraging strategy will be successful. Leverage involves risks and special considerations for common shareholders, including:

- the likelihood of greater volatility of NAV and market price and dividend rate of the Common Shares than a comparable portfolio without leverage;
- the risk that fluctuations in interest rates on borrowings and short-term debt or in dividend payments on, principal proceeds distributed to, or redemption of any preferred shares and/or notes that the Fund has issued will reduce the return to the common shareholders;
- the effect of leverage in a declining market, which is likely to cause a greater decline in the net asset value of the Common Shares than if the Fund were not leveraged, which may result in a greater decline in the market price of the Common Shares;
- when the Fund uses financial leverage, the investment advisory and administrative fees payable to the Adviser and ALPS will be higher than if the Fund did not use leverage, and may provide a financial incentive to the Adviser to increase the Fund's use of leverage and create an inherent conflict of interest; and
- leverage may increase expenses, which may reduce total return.

If the Fund issues preferred shares and/or notes or borrows money the Fund will be required to maintain asset coverage in conformity with the requirements of the 1940 Act.

The Fund may be subject to certain restrictions on investments imposed by guidelines of one or more rating agencies, which may issue ratings for the preferred shares and/or notes or short-term debt securities issued by the Fund. These guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed by the 1940 Act. Certain types of borrowings by the Fund may result in the Fund being subject to covenants in credit agreements relating to asset coverage and portfolio composition requirements. These covenants and restrictions may negatively affect the Fund's ability to achieve its investment objectives. See "Leverage."

Derivatives Risk

Under normal market conditions, the use of derivatives by the Fund, other than for hedging purposes, will not exceed 20% of the Fund's Managed Assets on a mark-to-market basis. The Fund's use of derivative instruments may be speculative and involves investment risks and transaction costs to which the Fund would not be subject absent the use of these instruments, and the use of derivatives generally involves leverage in the sense that the investment exposure created by the derivatives may be significantly greater than the Fund's initial investment in the derivatives. In some cases, the use of derivatives may result in losses in excess of principal or greater than if they had not been used. The ability to successfully use derivative instruments depends on the ability of the Adviser. The skills needed to employ derivatives strategies are different from those needed to select a portfolio security and, in connection with such strategies, the Adviser must make predictions with respect to market conditions, liquidity, currency movements, market values, interest rates and other applicable factors, which may be inaccurate. The use of derivative instruments may require the Fund to sell or purchase portfolio securities at inopportune times or for prices below or above the current market values, may limit the amount of appreciation the Fund can realize on an investment or may cause the Fund to hold a security that it might otherwise want to sell. The Fund may also have to defer closing out certain derivative positions to avoid adverse tax consequences and there may be situations in which derivative instruments are not elected that result in losses greater than if such instruments had been used. Amounts paid by the Fund as premiums and cash or other assets held in margin accounts with respect to the Fund's derivative instruments would not be available to the Fund for other investment purposes, which may result in lost opportunities for gain. Changes to the derivatives markets as a result of the continuous promulgation of rules under the Dodd- Frank Act and other government or international and other government regulation may also have an adverse effect on the Fund's ability to make use of derivative

transactions. In addition, the use of derivatives is subject to other risks, each of which may create additional risk of loss, including liquidity risk, interest rate risk, credit risk and management risk as well as the following risks:

- **Correlation Risk.** Imperfect correlation between the value of derivative instruments and the underlying assets of the Fund creates the possibility that the loss on such instruments may be greater than the gain in the value of the underlying assets in the Fund's portfolio.
- **Duration Mismatch Risk.** The duration of a derivative instrument may be significantly different than the duration of the related liability or asset.
- **Valuation Risk.** The prices of derivative instruments, including swaps, futures, forwards and options, could be highly volatile and such instruments may subject us to significant losses. The value of such derivatives also depends upon the price of the underlying asset, reference rate or index, which may also be subject to volatility. In addition, actual or implied daily limits on price fluctuations and speculative position limits on the exchanges or over-the-counter markets in which we may conduct our transactions in derivative instruments may prevent prompt liquidation of positions, subjecting us to the potential of greater losses. In addition, significant disparities may exist between "bid" and "asked" prices for derivative instruments that are traded over-the-counter and not on an exchange.
- **Liquidity Risk.** Derivative instruments, especially when purchased in large amounts, may not be liquid in all circumstances, so that in volatile markets we may not be able to close out a position without incurring a loss.
- **Counterparty Risk.** Derivative instruments also involve exposure to counterparty risk, since contract performance depends in part on the financial condition of the counterparty.

In addition, the Adviser may cause the Fund to invest in derivative instruments that are neither presently contemplated nor currently available, but which may be developed in the future, to the extent such opportunities are both consistent with the Fund's investment objectives and legally permissible. Any such investments may expose the Fund to unique and presently indeterminate risks, the impact of which may not be capable of determination until such instruments are developed and/or the Adviser determines to make such an investment on behalf of the Fund.

In October 2020, the SEC adopted a new rule that changes the regulatory framework around the use of derivatives by registered investment companies, such as the Fund. The new rule, which will go into effect on February 21, 2021 with a compliance date 18 months thereafter, will require registered investment companies to adopt a written policies and procedures reasonably designed to manage the Fund's derivatives risks. In the event that the Fund's derivatives exposure exceeds 10% of its net assets, the Fund will be required to adopt a written derivatives risk management program and comply with a value-at-risk based limit on leverage risk. The Board of Trustees will have an oversight role in ensuring these new requirements are being taken into account and, if required, will appoint a derivatives risk manager to handle the day-to-day responsibilities of the derivatives risk program.

Swap Risk

The Fund may also invest in swaps, including single name credit default swaps, single name loan credit default swaps, total return swaps, interest rate swaps and foreign currency swaps. Such transactions are subject to, among others, market risk, liquidity risk, risk of default by the other party to the transaction, known as "counterparty risk," and risk of imperfect correlation between the value of such instruments and the underlying assets and may involve commissions or other costs. Swaps (except when physically settled) generally do not involve the delivery of securities, other underlying assets or principal. Accordingly, the risk of loss with respect to swaps generally is limited to the net amount of payments that the Fund is contractually obligated to make, or in the case of the other party to a swap defaulting, the net amount of payments that the Fund is contractually entitled to receive. However, because some swap agreements have a leverage component, adverse changes in the

value or level of the underlying asset, reference rate, or index can result in a loss substantially greater than the amount invested in the swap itself. Certain swaps have the potential for unlimited loss, regardless of the size of the initial investment. To the extent credit default swaps are used, the Fund will generally sell protection and the risk of loss could be up to the notional value of the underlying asset and could be substantially greater than the amount received from the buyers. If, however, the Fund buys protection under a credit default swap, but such swap expires before any credit event is triggered, the Fund will lose the stream of payments made to the swap counterparty, should a credit event be triggered before expiration, there is also no assurance that the protection seller will honor its obligations under such credit default swap. In a total return swap, the Fund pays the counterparty a floating short-term interest rate and receives in exchange the total return of underlying debt securities. The Fund bears the risk of default on the underlying loans or debt securities, based on the notional amount of the swap. The Fund would typically have to post collateral to cover this potential obligation. The market for certain types of swaps has grown substantially in recent years with a large number of banks and investment banking firms acting both as principals and as agents utilizing standardized swap documentation. As a result, the swap market has become relatively liquid, however there is no guarantee that the swap market will continue to provide liquidity. If the Adviser is incorrect in its forecasts of market values, interest rates or currency exchange rates, the investment performance of the Fund would be less favorable than it would have been if these investment techniques were not used. See “The Fund’s Investments—Other Investment Techniques.”

In December 2012, the CFTC issued a final rule requiring certain credit default swaps and interest rate swaps denominated in certain currencies to be centrally cleared, which is applicable to all swap counterparties not eligible for certain narrowly-defined exemption or exceptions. In December 2016, the CFTC further expanded the categories of interest rate swaps subject to mandatory clearing. Such clearing requirements may affect the Fund’s ability to negotiate individualized terms and/or may increase the costs of entering into such derivative transactions (for example, by increasing margin or capital requirements).

Counterparty Risk

The Fund is subject to credit risk with respect to the counterparties to its derivatives contracts (whether a clearing corporation in the case of exchange-traded instruments or our hedge counterparty in the case of OTC instruments) purchased by the Fund. Counterparty risk is the risk that the other party in a derivative transaction will not fulfill its contractual obligation. Changes in the credit quality of the companies that serve as the Fund’s counterparties with respect to their derivative transactions will affect the value of those instruments. By entering into derivative transactions, the Fund assumes the risks that these counterparties could experience financial or other hardships that could call into question their continued ability to perform their obligations. In the case of a default by the counterparty, the Fund could become subject to adverse market movements while replacement transactions are executed. The ability of the Fund to transact business with any one or number of counterparties, the possible lack of a meaningful and independent evaluation of such counterparties’ financial capabilities, and the absence of a regulated market to facilitate settlement may increase the potential for losses by the Fund. Furthermore, concentration of derivatives in any particular counterparty would subject the Fund to an additional degree of risk with respect to defaults by such counterparty. The Adviser evaluates and monitors the creditworthiness of counterparties in order to ensure that such counterparties can perform their obligations under the relevant agreements. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial or other difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a dissolution, assignment for the benefit of creditors, liquidation, winding-up, bankruptcy or other analogous proceedings. In addition, in the event of the insolvency of a counterparty to a derivative transaction, the derivative contract would typically be terminated at its fair market value. If the Fund is owed this fair market value upon the termination of the derivative contract and its claim is unsecured, the Fund will be treated as a general creditor of such counterparty, and will not have any claim with respect to the underlying assets. The Fund may obtain only a limited recovery or may obtain

no recovery at all in such circumstances. In addition, regulations that were adopted by prudential regulators in 2019 require certain bank-regulated counterparties and certain of their affiliates to include in certain financial contracts, including many derivatives contracts, terms that delay or restrict the rights of counterparties, such as the Fund, to terminate such contracts, foreclose upon collateral, exercise other default rights or restrict transfers of credit support in the event that such counterparty and/or its affiliates are subject to certain types of resolution or insolvency proceedings.

Certain categories of interest rate and credit default swaps are subject to mandatory clearing, and more categories may be subject to mandatory clearing in the future. The counterparty risk for cleared derivatives is generally lower than for uncleared OTC derivative transactions because generally a clearing organization becomes substituted for each counterparty to a cleared derivative contract and, in effect, guarantees the parties' performance under the contract as each party to a trade looks only to the clearing house for performance of financial obligations. However, there can be no assurance that a clearing house, or its members, will satisfy the clearing house's obligations (including, but not limited to, financial obligations and legal obligations to segregate margins collected by the clearing house) to the Fund. Counterparty risk with respect to certain exchange-traded and over-the-counter derivatives may be further complicated by recently enacted U.S. financial reform legislation.

Credit Derivatives Risk

The use of credit derivatives is a highly specialized activity which involves strategies and risks different from those associated with ordinary portfolio security transactions. If the Adviser is incorrect in its forecasts of default risks, counterparty risk market spreads or other applicable factors, the investment performance of the Fund would diminish compared with what it would have been if these techniques were not used. Moreover, even if the Adviser is correct in its forecasts, there is a risk that a credit derivative position may correlate imperfectly with the price of the asset or liability being protected. The Fund's risk of loss in a credit derivative transaction varies with the form of the transaction. For example, if the Fund sells a default swap on a security, it would collect periodic fees from the buyer and would profit if the credit of the underlying issuer or reference entity remains stable or improves while the swap is outstanding, but the Fund would be required to pay an amount based on an agreed upon formula to the buyer (which may be the entire notional amount of the swap) if the reference entity defaults on the reference security. Credit default swap agreements may involve greater risks than if the Fund invested in the reference obligation directly.

In December 2012, the CFTC issued a final rule requiring certain index-based credit default swaps to be centrally cleared, which is applicable to all swap counterparties not eligible for certain narrowly-defined exemption or exceptions. Such clearing requirement may affect the Fund's ability to negotiate individualized terms and/or may increase the costs of entering into such credit default swap transactions (for example, by increasing margin or capital requirements). Clearing mandates with respect to other types of credit default swaps have not yet been issued by the regulators, but could have additional impact on the Fund's ability to use credit default swap transactions as part of its investment strategy.

Derivatives Legislation and Regulatory Risk

The enforceability of agreements governing hedging transactions may depend on compliance with applicable statutory and other regulatory requirements and, depending on the identity of the counterparty, applicable international requirements. New or amended regulations may be imposed by the CFTC, the SEC, the Federal Reserve, the EU or other financial regulators, other governmental or intergovernmental regulatory authorities or self-regulatory organizations that supervise the financial markets, and could adversely affect the Fund. In particular, the CFTC and the SEC are empowered to promulgate a variety of new rules pursuant to recently enacted financial reform legislation in the United States. The Fund also may be adversely affected by changes in the enforcement or interpretation of statutes and rules by these regulatory authorities or self-regulatory organizations.

In addition, the securities and futures markets are subject to comprehensive statutes and regulations. For instance, the Dodd-Frank Act could have an adverse effect on the Fund's ability to use derivative instruments. The Dodd-Frank Act is designed to impose stringent regulation on the over-the-counter derivatives market in an attempt to increase transparency and accountability and provides for, among other things, new clearing, execution, margin, reporting, recordkeeping, business conduct, documentation, disclosure, position limit, minimum net capital and registration requirements. Although the CFTC has released final rules relating to clearing, execution, reporting, risk management, compliance, position limit, anti-fraud, consumer protection, portfolio reconciliation, documentation, recordkeeping, business conduct, margin requirements and registration requirements under the Dodd-Frank Act, many of the provisions are subject to further final rulemaking and clarifications, and thus the Dodd-Frank Act's ultimate impact remains unclear.

New regulations could, among other things, restrict the Fund's ability to engage in derivatives transactions (for example, by making certain types of derivatives transactions no longer available to the Fund), increase the costs of using certain instruments (for example, by increasing margin, capital or reporting requirements) and/or make them less effective. In particular, new margin requirements and capital charges, even when not directly applicable to the Fund, may increase the pricing of derivatives transacted by the Fund. New exchange trading and trade reporting requirements and position limits may lead to changes in the liquidity of derivative transactions, or higher pricing or reduced liquidity in the derivatives markets, or the reduction of arbitrage opportunities for the Fund. Limits or restrictions applicable to the counterparties with which the Fund's engages in derivative transactions could also limit the ability of the Fund from using these instruments, affect the pricing or other factors relating to these instruments or may change the availability of certain investments. As a result, these changes could make it difficult for the Fund to execute its investment strategy.

It is unclear how the regulatory changes will affect counterparty risk. For instance, in December 2012, the CFTC issued a final rule requiring certain credit default swaps and interest rate swaps to be centrally cleared, which is applicable to all swap counterparties not eligible for certain narrowly-defined exemption or exceptions. Where the Fund enters into certain swaps subject to mandatory clearing, it may be required to execute such swaps on a registered designated contract market or swap execution facility ("SEF"). Such clearing requirements may affect the Fund's ability to negotiate individualized terms and/or may increase the costs of entering into such derivative transactions (for example, by increasing margin or capital requirements). Clearing mandates with respect to other types of derivative instruments have not yet been issued by the applicable regulators, but could have additional impact on the Fund's ability to use such instruments as part of its investment strategy. In addition, certain foreign jurisdictions may also impose clearing requirements or expand existing clearing requirements that could apply to the Fund's transactions with non-U.S. entities. For entities designated by the CFTC or the SEC as "swap dealers," "security-based swaps dealers," "major swap participants" or major "security-based swap participants," the Dodd-Frank Act imposes new regulatory, reporting and compliance requirements. On May 23, 2012, a joint final rulemaking by the CFTC and the SEC defining these key terms was published in the Federal Register. Based on those definitions, the Fund would not be a swap dealer, security-based swap dealer, major swap participant or security-based major swap participant at this time. If the Fund is later designated as a swap dealer, security-based swap dealer, major swap participant or major security-based swap participant, its business will be subject to increased regulatory requirements, including registration requirements, additional recordkeeping and reporting obligations, external and internal business conduct standards, position limits monitoring, capital and margin thresholds, which will in turn increase the Fund's compliance cost.

Furthermore, on December 15, 2015, the CFTC approved a final rule, which became effective in April 2016, but with later implementation dates as specified below, governing margin requirements for uncleared swaps entered into by registered swap dealers and major swap participants who are not supervised by the prudential regulators, referred to as "covered swap entities." The final rule generally requires covered swap entities, subject

to certain thresholds and exemptions, to collect and post margin in respect of uncleared swap transactions with other covered swap entities and financial end-users. In particular, the final rule requires covered swap entities and financial end-users having “material swaps exposure,” defined as an average aggregate daily notional amount of uncleared swaps exceeding a certain specified amount, to collect and/or post (as applicable) a minimum amount of “initial margin” in respect of uncleared swaps, subject to a phase-in schedule until September 1, 2021, when the average aggregate daily notional amount will thenceforth be \$8 billion as calculated from June, July and August of the previous calendar year. In addition, the final rule requires covered swap entities entering into uncleared swaps with other covered swap entities or financial-end-users, regardless of swaps exposure, to post and/or collect (as applicable) “variation margin” in reflection of changes in the mark-to-market value of an uncleared swap since the swap was executed or the last time such margin was exchanged. The implementation date for variation margin requirements was March 1, 2017, subject to no-action relief to delay, until September 1, 2017, for full compliance. The CFTC final rule is substantially consistent with a similar rule mandating the exchange of initial and variation margin adopted by the prudential regulators in October 2015. It is possible that such regulations could increase the cost of and limit the implementation of the Fund’s use of derivatives, which could have an adverse impact on the Fund.

On November 30, 2018, the CFTC published a proposed rule restructuring the regulatory framework applicable to SEFs and requiring more types of cleared swap contracts to be traded on SEFs. If implemented, the proposed rule may increase the cost of entering into certain swap contracts or reduce liquidity in those products. The proposed rule will require SEF registration of many non-U.S. swap facilities, which may have a disproportionate impact on certain cross-border swap contracts.

In addition to U.S. laws and regulations relating to derivatives, certain non-U.S. regulatory authorities, such as those in the EU, Australia, Japan and Hong Kong, have passed or proposed, or may propose in the future, legislation similar to that imposed by the Dodd-Frank Act. For example, as discussed above, in October 2020, the SEC adopted a new rule that changes the regulatory framework around the use of derivatives by registered investment companies, such as the Fund. Furthermore, the EU regulations on derivatives will impose position limits on commodity transactions, and the European Market Infrastructure Regulation (“EMIR”) already requires reporting of derivatives and various risk mitigation techniques to be applied to derivatives entered into by parties that are subject to the jurisdiction of EMIR. Certain entities, including private funds, may be required to clear certain derivatives and may become subject to initial and variation margin requirements with respect to their non-cleared derivatives, under the recently implemented “EMIR Refit” regulations. These EU regulatory changes may impact the Fund and a broad range of counterparties, both outside and within the EU, and are expected to potentially increase the cost of transacting derivatives for the Fund (particularly with banks and other dealers directly subject to such regulations).

Commodities Regulation

CFTC Rule 4.5 permits investment advisers to registered investment companies to claim an exclusion from the definition of “commodity pool operator” under the CEA with respect to a fund, provided certain requirements are met. In order to permit the Adviser to claim this exclusion with respect to the Fund, the Fund limits its transactions in certain futures, options on futures and swaps deemed “commodity interests” under CFTC rules (excluding transactions entered into for “bona fide hedging purposes,” as defined under CFTC regulations) such that either: (i) the aggregate initial margin and premiums required to establish such futures, options on futures and swaps do not exceed 5% of the liquidation value of the Fund’s portfolio, after taking into account unrealized profits and losses on such positions; or (ii) the aggregate net notional value of such futures, options on futures and swaps does not exceed 100% of the liquidation value of the Fund’s portfolio, after taking into account unrealized profits and losses on such positions. In addition to meeting one of the foregoing trading limitations, the Fund may not market itself as a commodity pool or otherwise as a vehicle for trading in the futures, options or swaps markets. Accordingly, the Fund is not subject to regulation under the CEA or otherwise regulated by the CFTC. If the Adviser was unable to claim the exclusion with respect to the Fund, the Adviser would become

subject to registration and regulation as a commodity pool operator, which would subject the Adviser and the Fund to additional registration and regulatory requirements and increased operating expenses.

Repurchase Agreements Risk

Subject to its investment objectives and policies, the Fund may invest in repurchase agreements as a buyer for investment purposes. Repurchase agreements typically involve the acquisition by the Fund of debt securities from a selling financial institution such as a bank, savings and loan association or broker-dealer. The agreement provides that the Fund will sell the securities back to the institution at a fixed time in the future. The Fund does not bear the risk of a decline in the value of the underlying security unless the seller defaults under its repurchase obligation. In the event of the bankruptcy or other default of a seller of a repurchase agreement, the Fund could experience both delays in liquidating the underlying securities and losses, including (1) possible decline in the value of the underlying security during the period in which the Fund seeks to enforce its rights thereto; (2) possible lack of access to income on the underlying security during this period; and (3) expenses of enforcing its rights. In addition, as described above, the value of the collateral underlying the repurchase agreement will be at least equal to the repurchase price, including any accrued interest earned on the repurchase agreement. In the event of a default or bankruptcy by a selling financial institution, the Fund generally will seek to liquidate such collateral. However, the exercise of the Fund's right to liquidate such collateral could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss.

Reverse Repurchase Agreements Risk

The Fund's use of reverse repurchase agreements involves many of the same risks involved in the Fund's use of leverage, as the proceeds from reverse repurchase agreements generally will be invested in additional securities. There is a risk that the market value of the securities acquired in the reverse repurchase agreement may decline below the price of the securities that the Fund has sold but remains obligated to repurchase. In addition, there is a risk that the market value of the securities retained by the Fund may decline. If the buyer of securities under a reverse repurchase agreement were to file for bankruptcy or experiences insolvency, the Fund may be adversely affected. Also, in entering into reverse repurchase agreements, the Fund would bear the risk of loss to the extent that the proceeds of the reverse repurchase agreement are less than the value of the underlying securities. In addition, due to the interest costs associated with reverse repurchase agreements transactions, the Fund's NAV will decline, and, in some cases, the Fund may be worse off than if it had not used such instruments.

Structured Products Risk

The Fund may invest up to 20% of its Managed Assets in structured products, including, without limitation, CLOs, structured notes, credit linked notes and derivatives, including credit derivatives. Holders of structured products bear risks of the underlying investments, index or reference obligation and are subject to counterparty risk. The Fund may have the right to receive payments only from the structured product, and generally does not have direct rights against the issuer or the entity that sold the assets to be securitized. While certain structured products enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding the same securities, investors in structured products generally pay their share of the structured product's administrative and other expenses. Although it is difficult to predict whether the prices of indices and securities underlying structured products will rise or fall, these prices (and, therefore, the prices of structured products) will be influenced by the same types of political and economic events that affect issuers of securities and capital markets generally. If the issuer of a structured product uses shorter term financing to purchase longer term securities, the issuer may be forced to sell its securities at below market prices if it experiences difficulty in obtaining short-term financing, which may adversely affect the value of the structured products owned by the Fund.

Certain structured products may be thinly traded or have a limited trading market. CLOs are typically privately offered and sold. As a result, investments in CLOs may be characterized by the Fund as illiquid

securities. In addition to the general risks associated with debt securities discussed herein, CLOs carry additional risks, including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the possibility that the investments in CLOs are subordinate to other classes or tranches thereof; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Investments in structured notes involve risks, including credit risk and market risk. Where the Fund's investments in structured notes are based upon the movement of one or more factors, including currency exchange rates, interest rates, referenced bonds and stock indices, depending on the factor used and the use of multipliers or deflators, changes in interest rates and movement of the factor may cause significant price fluctuations. Additionally, changes in the reference instrument or security may cause the interest rate on the structured note to be reduced to zero, and any further changes in the reference instrument may then reduce the principal amount payable on maturity. Structured notes may be less liquid than other types of securities and more volatile than the reference instrument or security underlying the note. See "The Fund's Investments—Portfolio Composition."

CLO Risk

In addition to the general risks associated with debt securities and structured products discussed herein, CLOs carry additional risks, including, but not limited to (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the possibility that the investments in CLOs are subordinate to other classes or tranches thereof, (iv) the potential of spread compression in the underlying loans of the CLO, which could reduce credit enhancement in the CLOs and (v) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

CLO junior debt securities that the Fund may acquire are subordinated to more senior tranches of CLO debt. CLO junior debt securities are subject to increased risks of default relative to the holders of superior priority interests in the same securities. In addition, at the time of issuance, CLO equity securities are under-collateralized in that the liabilities of a CLO at inception exceed its total assets. Though not exclusively, the Fund will typically be in a first loss or subordinated position with respect to realized losses on the assets of the CLOs in which it is invested. The Fund may recognize phantom taxable income from its investments in the subordinated tranches of CLOs.

Between the closing date and the effective date of a CLO, the CLO collateral manager will generally expect to purchase additional collateral obligations for the CLO. During this period, the price and availability of these collateral obligations may be adversely affected by a number of market factors, including price volatility and availability of investments suitable for the CLO, which could hamper the ability of the collateral manager to acquire a portfolio of collateral obligations that will satisfy specified concentration limitations and allow the CLO to reach the initial par amount of collateral prior to the effective date. An inability or delay in reaching the target initial par amount of collateral may adversely affect the timing and amount of interest or principal payments received by the holders of the CLO debt securities and distributions of the CLO on equity securities and could result in early redemptions which may cause CLO debt and equity investors to receive less than the face value of their investment.

The failure by a CLO in which the Fund invests to satisfy financial covenants, including with respect to adequate collateralization and/or interest coverage tests, could lead to a reduction in the CLO's payments to the Fund. In the event that a CLO fails certain tests, holders of CLO senior debt may be entitled to additional payments that would, in turn, reduce the payments the Fund would otherwise be entitled to receive. Separately, the Fund may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting CLO or any other investment the Fund may make. If any of these occur, it could adversely affect the Fund's operating results and cash flows.

The Fund's CLO investments are exposed to leveraged credit risk. If certain minimum collateral value ratios and/or interest coverage ratios are not met by a CLO, primarily due to senior secured loan defaults, then cash flow that otherwise would have been available to pay distributions to the Fund on its CLO investments may instead be used to redeem any senior notes or to purchase additional senior secured loans, until the ratios again exceed the minimum required levels or any senior notes are repaid in full.

Systematic Strategies Related to Bond Investments Risk

With respect to the bond portion of the Fund's portfolio, to the extent to which the Model or comparable methods or strategies are employed, certain of the Adviser's securities analysis methods will rely on the assumption that the companies whose securities are purchased or sold, the rating agencies that review these securities, and other publicly available sources of information about these securities, are providing accurate and unbiased data. While the Adviser is alert to indications that data may be incorrect, there is always a risk that the Adviser's analysis may be compromised by inaccurate or misleading information.

The Model the Adviser intends to utilize to manage the Fund's bond investments could lead to unsatisfactory investments. The Adviser might not be able to effectively implement the Model, and there can be no guarantee that the Fund will achieve the desired results.

Certain aspects of the Adviser's investment process with respect to the Model are dependent on complex proprietary software, which requires constant development and refinement. The Adviser has implemented procedures designed to appropriately control the development and implementation of the Model. However, analytical, coding and implementation errors present substantial risks to complex models and quantitative investment management strategies. The Adviser cannot guarantee that its internal controls will be effective in all circumstances.

The Fund could be negatively affected by undetected software defects or fundamental issues with the Adviser's method of interpreting and acting upon the Model's output. The Adviser's implementation of its investment strategy with respect to the Fund's bond portfolio utilizing the Model will rely on the analytical and mathematical foundation of the Model and the incorporation of the Model's outputs into a complex computational environment. Any such strategy is also dependent on the quality of the market data utilized by the Model, changes in credit market conditions, creation and maintenance of the Model's software and the successful incorporation of the Model's output into the construction of the Fund's bond portfolio. There is always a possibility of human error in the creation, maintenance and use of the Model.

Moreover, the Adviser's portfolio managers exercise discretion in the utilization of the Model, and the investment results of the relevant portion(s) of the Fund's investments are dependent on the ability of portfolio managers to correctly understand and implement or disregard the Model's signals. There can be no assurance that utilizing the Model will yield better results than any other investment method.

LIBOR Risk

On July 27, 2017, the Financial Conduct Authority ("FCA") announced that it would phase out the London Interbank Offered Rate ("LIBOR") as a benchmark by the end of 2021. It is unclear whether new methods of calculating LIBOR will be established such that it continues to exist after 2021. The administrator of LIBOR has announced it will consult on its intention to cease the publication of the one week and two month LIBOR settings immediately following the LIBOR publication on December 31, 2021, and the remaining USD LIBOR settings immediately following the LIBOR publication on June 30, 2023. The U.S. Federal Reserve System ("FRS"), Office of the Comptroller of the Currency, and Federal Deposit Insurance Corporation have issued guidance encouraging market participants to adopt alternatives to LIBOR in new contracts as soon as practicable and no later than December 31, 2021, and the FCA has indicated that market participants should not rely on LIBOR being available after 2021. As an alternative to LIBOR, for example, the FRS, in conjunction with the Alternative Reference Rates Committee, a steering committee comprised of large U.S. financial institutions, is considering replacing U.S.-dollar LIBOR with the Secured Overnight Financing Rate ("SOFR"), a new index calculated by

short-term repurchase agreements, backed by Treasury securities. Abandonment of, or modifications to, LIBOR could have adverse impacts on newly issued financial instruments and the Fund's existing financial instruments which reference LIBOR. While some instruments may contemplate a scenario where LIBOR is no longer available by providing for an alternative rate setting methodology, not all instruments may have such provisions and there is significant uncertainty regarding the effectiveness of any such alternative methodologies. Abandonment of, or modifications to, LIBOR could lead to significant short-term and long-term uncertainty and market instability. If LIBOR ceases to exist, the Fund and its portfolio companies may need to amend or restructure our existing LIBOR-based debt instruments and any related hedging arrangements that extend beyond December 31, 2021, or June 30, 2023, depending on the applicable LIBOR tenor and pending the outcome of the LIBOR administrator's consultation. Such amendments and restructurings may be difficult, costly and time consuming. In addition, from time to time the Fund invests in floating rate loans and investment securities whose interest rates are indexed to LIBOR. Uncertainty as to the nature of alternative reference rates and as to potential changes or other reforms to LIBOR, or any changes announced with respect to such reforms, may result in a sudden or prolonged increase or decrease in the reported LIBOR rates and the value of LIBOR-based loans and securities, including those of other issuers the Fund currently owns or may in the future own. It remains uncertain how such changes would be implemented and the effects such changes would have on us, issuers of instruments in which we invest and financial markets generally.

The expected discontinuation of LIBOR could have a significant impact on the Fund's business. There could be significant operational challenges for the transition away from LIBOR including, but not limited to, amending loan agreements with borrowers on investments that may have not been modified with fallback language and adding effective fallback language to new agreements in the event that LIBOR is discontinued before maturity. Beyond these challenges, the Fund anticipates there may be additional risks to the Fund's current processes and information systems that will need to be identified and evaluated by us. Due to the uncertainty of the replacement for LIBOR, the potential effect of any such event on the Fund's cost of capital and net investment income cannot yet be determined. In addition, the cessation of LIBOR could:

- Adversely impact the pricing, liquidity, value of, return on and trading for a broad array of financial products, including any LIBOR-linked securities, loans and derivatives that may be included in the Fund's assets and liabilities;
- Require extensive changes to documentation that governs or references LIBOR or LIBOR-based products, including, for example, pursuant to time-consuming renegotiations of documentation to modify the terms of investments;
- Result in inquiries or other actions from regulators in respect of the Fund's preparation and readiness for the replacement of LIBOR with one or more alternative reference rates;
- Result in disputes, litigation or other actions with portfolio companies, or other counterparties, regarding the interpretation and enforceability of provisions in the Fund's LIBOR-based investments, such as fallback language or other related provisions, including, in the case of fallbacks to the alternative reference rates, any economic, legal, operational or other impact resulting from the fundamental differences between LIBOR and the various alternative reference rates;
- Require the transition and/or development of appropriate systems and analytics to effectively transition the Fund's risk management processes from LIBOR-based products to those based on one or more alternative reference rates, which may prove challenging given the limited history of the proposed alternative reference rates; and
- Cause us to incur additional costs in relation to any of the above factors.

There is no guarantee that a transition from LIBOR to an alternative will not result in financial market disruptions, significant increases in benchmark rates, or borrowing costs to borrowers, any of which could have a material adverse effect on the Fund's business, result of operations, financial condition, and unit price. In addition, the transition to a successor rate could potentially cause (i) increased volatility or illiquidity in markets for instruments that currently rely on LIBOR, (ii) a reduction in the value of certain instruments held by the Fund, or (iii) reduced effectiveness of related Fund transactions, such as hedging. It remains uncertain how such changes would be implemented and the effects such changes would have on the Fund, issuers of instruments in which the Fund invests and financial markets generally.

Lender Liability Risk

A number of U.S. judicial decisions have upheld judgments of Borrowers against lending institutions on the basis of various evolving legal theories, collectively termed “lender liability.” Generally, lender liability is founded on the premise that a lender has violated a duty (whether implied or contractual) of good faith, commercial reasonableness and fair dealing, or a similar duty owed to the Borrower or has assumed an excessive degree of control over the Borrower resulting in the creation of a fiduciary duty owed to the Borrower or its other creditors or shareholders. Because of the nature of its investments, the Fund may be subject to allegations of lender liability.

In addition, under common law principles that in some cases form the basis for lender liability claims, if a lender or bondholder (a) intentionally takes an action that results in the undercapitalization of a Borrower to the detriment of other creditors of such Borrower, (b) engages in other inequitable conduct to the detriment of such other creditors, (c) engages in fraud with respect to, or makes misrepresentations to, such other creditors or (d) uses its influence as a stockholder to dominate or control a Borrower to the detriment of other creditors of such Borrower, a court may elect to subordinate the claim of the offending lender or bondholder to the claims of the disadvantaged creditor or creditors, a remedy called “equitable subordination.”

Because affiliates of, or persons related to, the Adviser may hold equity or other interests in obligors of the Fund, the Fund could be exposed to claims for equitable subordination or lender liability or both based on such equity or other holdings.

Potential Conflicts of Interest Risk

The Adviser will be subject to certain conflicts of interest in its management of the Fund. These conflicts will arise primarily from the involvement of the Adviser, Blackstone Alternative Credit Advisors LP (“Blackstone Credit”), Blackstone Inc. (“Blackstone”) and their affiliates in other activities that may conflict with those of the Fund. The Adviser, Blackstone Credit, Blackstone and their affiliates engage in a broad spectrum of activities. In the ordinary course of their business activities, the Adviser, Blackstone Credit, Blackstone and their affiliates may engage in activities where the interests of certain divisions of the Adviser, Blackstone Credit, Blackstone and their affiliates or the interests of their clients may conflict with the interests of the Fund or the common shareholders. Other present and future activities of the Adviser, Blackstone Credit, Blackstone and their affiliates may give rise to additional conflicts of interest, which may have a negative impact on the Fund.

In addressing these conflicts and regulatory, legal and contractual requirements across its various businesses, Blackstone has implemented certain policies and procedures (e.g., information walls) that may reduce the positive firm-wide synergies that the Adviser may have potentially utilized for purposes of finding attractive investments. Additionally, Blackstone may limit a client and/or its portfolio companies from engaging in agreements with or related to companies in which any fund of Blackstone has or has considered making an investment or which is otherwise an advisory client of Blackstone and/or from time to time restrict or otherwise limit the ability of the Fund to make investments in or otherwise engage in businesses or activities competitive with companies or other clients of Blackstone, either as result of contractual restrictions or otherwise. Finally, Blackstone has in the past entered, and is likely in the future to enter, into one or more strategic relationships in certain regions or with respect to certain types of investments that, although possibly intended to provide greater opportunities for the Fund, may require the Fund to share such opportunities or otherwise limit the amount of an opportunity the Fund can otherwise take.

As part of its regular business, Blackstone provides a broad range of services other than those provided by the Adviser, including investment banking, underwriting, capital markets syndication and advisory (including underwriting), placement, financial advisory, restructuring and advisory, consulting, asset/property management, mortgage servicing, insurance (including title insurance), monitoring, commitment, syndication, origination, servicing, management consulting and other similar operational and finance matters, healthcare consulting/brokerage, group purchasing, organizational, operational, loan servicing, financing, divestment and other services.

In addition, Blackstone may provide services in the future beyond those currently provided. The Fund will not receive a benefit from the fees or profits derived from such services. In such a case, a client of Blackstone would typically require Blackstone to act exclusively on its behalf. This request may preclude all of Blackstone

clients (including the Fund) from participating in related transactions that would otherwise be suitable. Blackstone will be under no obligation to decline any such engagements in order to make an investment opportunity available to the Fund. In connection with its other businesses, Blackstone will likely come into possession of information that limits its ability to engage in potential transactions. The Fund's activities are expected to be constrained as a result of the inability of the personnel of Blackstone to use such information. For example, employees of Blackstone from time to time are prohibited by law or contract from sharing information with members of the Adviser's investment team that would be relevant to monitoring the Fund's portfolio and other investment decisions. Additionally, there are expected to be circumstances in which one or more of certain individuals associated with Blackstone will be precluded from providing services related to the Fund's activities because of certain confidential information available to those individuals or to other parts of Blackstone (e.g., trading may be restricted). Blackstone has long term relationships with a significant number of corporations and their senior management. In determining whether to invest in a particular transaction on behalf of the Fund, the Adviser will consider those relationships, and may decline to participate in a transaction as a result of such relationships. To the extent permitted by the 1940 Act, the Fund may also coinvest with clients of Blackstone in particular investment opportunities, and the relationship with such clients could influence the decisions made by the Adviser with respect to such investments. The Fund may be forced to sell or hold existing investments (possibly at disadvantageous times or under disadvantageous conditions) as a result of various relationships that Blackstone may have or transactions or investments Blackstone and its affiliates may make or have made. The inability to transact in any security, derivative or loan held by the Fund could result in significant losses or lost opportunity costs to the Fund. See "Management of the Fund—Potential Conflicts of Interest" in the SAI for more information addressing potential conflicts of interest.

Limitations on Transactions with Affiliates Risk

The 1940 Act limits our ability to enter into certain transactions with certain of our affiliates. As a result of these restrictions, we may be prohibited from buying or selling any security directly from or to any portfolio company of or private equity fund managed by Blackstone, Blackstone Credit or any of their respective affiliates. However, the Fund may under certain circumstances purchase any such portfolio company's loans or securities in the secondary market, which could create a conflict for the Adviser between the interests of the Fund and the portfolio company, in that the ability of the Adviser to recommend actions in the best interest of the Fund might be impaired. The 1940 Act also prohibits certain "joint" transactions with certain of our affiliates, which could include investments in the same portfolio company (whether at the same or different times). These limitations may limit the scope of investment opportunities that would otherwise be available to us. Although the Fund has received an exemptive order from the SEC that permits it, among other things, to co-invest with certain affiliates of the Adviser and certain funds managed and controlled by the Adviser and its affiliates, it may only do so in accordance with certain terms and conditions that limit the types of transactions the Fund may engage in.

Dependence on Key Personnel Risk

The Adviser is dependent upon the experience and expertise of certain key personnel in providing services with respect to the Fund's investments. If the Adviser were to lose the services of these individuals, its ability to service the Fund could be adversely affected. As with any managed fund, the Adviser may not be successful in selecting the best-performing securities or investment techniques for the Fund's portfolio and the Fund's performance may lag behind that of similar funds. The Adviser has informed the Fund that the investment professionals associated with the Adviser are actively involved in other investment activities not concerning the Fund and will not be able to devote all of their time to the Fund's business and affairs. In addition, individuals not currently associated with the Adviser may become associated with the Fund and the performance of the Fund may also depend on the experience and expertise of such individuals.

Prepayment Risk

During periods of declining interest rates, Borrowers may exercise their option to prepay principal earlier than scheduled. For fixed rate securities, such payments often occur during periods of declining interest rates, forcing the Fund to reinvest in lower yielding securities, resulting in a possible decline in the Fund's income and distributions to shareholders. This is known as prepayment or "call" risk. Below investment grade instruments frequently have call features that allow the issuer to redeem the security at dates prior to its stated maturity at a specified price (typically greater than par) only if certain prescribed conditions are met ("call protection"). An

issuer may choose to redeem a below investment grade instrument if, for example, the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer. Senior Loans and Subordinated Loans typically do not have call protection. For premium bonds (bonds acquired at prices that exceed their par or principal value) purchased by the Fund, prepayment risk may be enhanced.

Inflation/Deflation Risk

Inflation risk is the risk that the value of certain assets or income from the Fund's investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions on the Common Shares can decline. In addition, during any periods of rising inflation, the borrowing costs associated with the Fund's use of leverage would likely increase, which would tend to further reduce returns to shareholders. Deflation risk is the risk that prices throughout the economy decline over time—the opposite of inflation. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer defaults more likely, which may result in a decline in the value of the Fund's portfolio.

Non-U.S. Securities Risk

The Fund may invest in Non-U.S. Securities. Such investments involve certain risks not involved in domestic investments and may experience more rapid and extreme changes in value than investments in securities of U.S. companies. Securities markets in foreign countries often are not as developed, efficient or liquid as securities markets in the United States, and therefore, the prices of Non-U.S. Securities can be more volatile. Certain foreign countries may impose restrictions on the ability of issuers of Non-U.S. Securities to make payments of principal and interest to investors located outside the country, whether from currency blockage or otherwise. In addition, the Fund will be subject to risks associated with adverse political and economic developments in foreign countries, including seizure or nationalization of foreign deposits, different legal systems and laws relating to creditors' rights and the potential inability to enforce legal judgments, all of which could cause the Fund to lose money on its investments in Non-U.S. Securities. Generally, there is less readily available and reliable information about non-U.S. issuers or Borrowers due to less rigorous disclosure or accounting standards and regulatory practices. The ability of a foreign sovereign issuer to make timely payments on its debt obligations will also be strongly influenced by the sovereign issuer's balance of payments, including export performance, its access to international credit facilities and investments, fluctuations of interest rates and the extent of its foreign reserves. The cost of servicing external debt will also generally be adversely affected by rising international interest rates, as many external debt obligations bear interest at rates which are adjusted based upon international interest rates. Because Non-U.S. Securities may trade on days when the Fund's Common Shares are not priced, net asset value can change at times when Common Shares cannot be sold.

Foreign Currency Risk

Because the Fund may invest in securities or other instruments denominated or quoted in currencies other than the U.S. dollar, changes in foreign currency exchange rates may affect the value of instruments held by the Fund and the unrealized appreciation or depreciation of investments. Currencies of certain countries may be volatile and therefore may affect the value of instruments denominated in such currencies, which means that the Fund's NAV could decline as a result of changes in the exchange rates between foreign currencies and the U.S. dollar. The Adviser may, but is not required to, seek to protect the Fund from changes in currency exchange rates through hedging transactions depending on market conditions. See "Risks—Swap Risk" The Fund may incur costs in connection with the conversions between various currencies. In addition, certain countries may impose foreign currency exchange controls or other restrictions on the repatriation, transferability or convertibility of currency.

Investments in Equity Securities or Warrants Incidental to Investments in Fixed-Income Instruments

From time to time the Fund also may invest in or hold common stock and other equity securities incidental to the purchase or ownership of a Senior Loan or in connection with a reorganization of a Borrower. Investments in equity securities incidental to investment in Senior Loans entail certain risks in addition to those associated with investments in Senior Loans. Because equity is merely the residual value of an issuer after all claims and

other interests, it is inherently more risky than the bonds or Senior Loans of the same Borrower. The value of the equity securities may be affected more rapidly, and to a greater extent, by company-specific developments and general market conditions. These risks may increase fluctuations in the Fund's net asset value. The Fund frequently may possess material non-public information about a Borrower as a result of its ownership of a Senior Loan of a Borrower. Because of prohibitions on trading in securities while in possession of material non-public information, the Fund might be unable to enter into a transaction in a security of the Borrower when it would otherwise be advantageous to do so.

U.S. Government Debt Securities Risk

The Fund may invest in debt securities issued or guaranteed by agencies, instrumentalities and sponsored enterprises of the U.S. Government. Some U.S. Government securities, such as U.S. Treasury bills, notes and bonds, and mortgage-related securities guaranteed by the Government National Mortgage Association ("GNMA"), are supported by the full faith and credit of the United States; others, such as those of the Federal Home Loan Banks ("FHLBs") or the Federal Home Loan Mortgage Corporation ("FHLMC"), are supported by the right of the issuer to borrow from the U.S. Treasury; others, such as those of the Federal National Mortgage Association ("FNMA"), are supported by the discretionary authority of the U.S. Government to purchase the agency's obligations; and still others are supported only by the credit of the agency, instrumentality or corporation. Although legislation has been enacted to support certain government sponsored entities, including the FHLBs, the FHLMC and FNMA, there is no assurance that the obligations of such entities will be satisfied in full, or that such obligations will not decrease in value or default. It is difficult, if not impossible, to predict the future political, regulatory or economic changes that could impact the government sponsored entities and the values of their related securities or obligations. In addition, certain governmental entities, including FNMA and FHLMC, have been subject to regulatory scrutiny regarding their accounting policies and practices and other concerns that may result in legislation, changes in regulatory oversight and/or other consequences that could adversely affect the credit quality, availability or investment character of securities issued by these entities. U.S. Government debt securities generally involve lower levels of credit risk than other types of debt securities of similar maturities, although, as a result, the yields available from U.S. Government debt securities are generally lower than the yields available from such other securities. Like other debt securities, the values of U.S. Government securities change as interest rates fluctuate. Fluctuations in the value of portfolio securities will not affect interest income on existing portfolio securities but will be reflected in the Fund's NAV.

Market Developments

Periods of market volatility remain, and may continue to occur in the future, in response to various political, social and economic events both within and outside of the United States. Instability in the credit markets has made it more difficult for a number of issuers of debt securities to obtain financing or refinancing for their investment or lending activities or operations. In particular, because of volatile conditions in the credit markets, issuers of debt securities may be subject to increased cost for debt, tightening underwriting standards and reduced liquidity for loans they make, securities they purchase and securities they issue.

For example, certain Borrowers may, due to macroeconomic conditions, be unable to repay the Senior Loans during this period. A Borrower's failure to satisfy financial or operating covenants imposed by lenders could lead to defaults and, potentially, termination of the Senior Loans and foreclosure on its secured assets, which could trigger cross-defaults under other agreements and jeopardize the Borrower's ability to meet its obligations under its debt securities. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting Borrower. In addition, if one of the Borrowers were to commence bankruptcy proceedings, even though the Fund may have structured its interest as senior debt, depending on the facts and circumstances, including the extent to which the Fund actually provided managerial assistance to such Borrower, a bankruptcy court might recharacterize the Fund's debt holding and subordinate all or a portion of its claim to that of other creditors. Adverse economic conditions also may decrease the value of collateral securing some of the Fund's loans and the value of its equity investments. A recession could lead to financial losses in our portfolio and a decrease in revenues, net income and the value of the Fund's assets.

These developments may increase the volatility of the value of securities owned by the Fund. These developments also may make it more difficult for the Fund to accurately value its securities or to sell its securities on a timely basis. These developments could adversely affect the ability of the Fund to use leverage for investment purposes and increase the cost of such leverage, which would reduce returns to the holders of Common Shares. These developments also may adversely affect the broader economy, which in turn may adversely affect the ability of issuers of securities owned by the Fund to make payments of principal and interest when due, lead to lower credit ratings of the issuer and increased defaults by the issuer. Such developments could, in turn, reduce the value of securities owned by the Fund and adversely affect the net asset value and market price of the Fund's Common Shares.

Market Disruption and Geopolitical Risk

The Fund may be adversely affected by uncertainties such as terrorism, international political developments, and changes in government policies, taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of the countries in which it is invested. Likewise, natural and environmental disasters, epidemics or pandemics, and systemic market dislocations may be highly disruptive to economies and markets. See “—Epidemic and Pandemic Risk” below. Uncertainties and events around the world may (i) result in market volatility, (ii) have long-term effects on the U.S. and worldwide financial markets and (iii) cause further economic uncertainties in the United States and worldwide. The Fund cannot predict the effects of geopolitical events in the future on the U.S. economy and securities markets.

UK Exit from the EU

The United Kingdom (the “UK”) formally left the European Union (the “EU”) on January 31, 2020 (commonly known as “Brexit”), followed by an implementation period, during which EU law continued to apply in the UK and the UK maintained its EU single market access rights and EU customs union membership. The implementation period expired on December 31, 2020. Consequently, the UK has become a third country vis-à-vis the EU, without access to the single market or membership of the EU customs union.

During the implementation period, on December 30, 2020, the UK and the EU signed a trade and cooperation agreement (the “TCA”) to govern their ongoing relationship. The TCA was officially ratified by the UK Parliament on December 30, 2020, and was ratified by the EU Parliament and Council on April 27, 2021. It is anticipated that further details of the relationship between the UK and the EU will continue to be negotiated even after formal ratification of the TCA.

Over time, UK regulated firms and other UK businesses may be adversely affected by the terms of the TCA (assuming it is formally ratified by the EU), as compared with the position prior to the expiration of the implementation period on December 31, 2020. For example, the TCA introduces new customs checks, as well as new restrictions on the provision of cross-border services and on the free movement of employees. These changes have the potential to materially impair the profitability of a business, and to require it to adapt or even relocate.

Although it is probable that any adverse effects flowing from the UK's withdrawal from the EU will principally affect the UK (and those having an economic interest in, or connected to, the UK), given the size and global significance of the UK's economy, the impact of the withdrawal is unpredictable and likely to be an ongoing source of instability, produce significant currency fluctuations, and/or have other adverse effects on international markets, international trade agreements and/or other existing cross-border cooperation arrangements (whether economic, tax, fiscal, legal, regulatory or otherwise). The withdrawal of the UK from the EU could therefore adversely affect us. In addition, although it seems less likely following the expiration of the transition period than at the time of the UK's referendum, the withdrawal of the UK from the EU could have a further destabilizing effect if any other member states were to consider withdrawing from the EU, presenting similar and/or additional potential risks and consequences to our business and financial results.

General Economic Conditions Risk

The global growth cycle is in a mature phase and signs of slowdown are evident in certain regions around the world, although most economists continue to expect moderate economic growth in the near term, with limited

signals of an imminent recession in the U.S. as consumer and government spending remain healthy. Although the broader outlook remains constructive and progress was made on trade, including a phase one deal with China and the United States-Mexico-Canada Agreement, geopolitical instability continues to pose risk. In particular, the recent outbreak of the novel coronavirus and COVID-19 in many countries, which is a rapidly evolving situation, has disrupted global travel and supply chains, and has adversely impacted global commercial activity and a number of industries, such as transportation, hospitality and entertainment. The rapid development and fluidity of this situation precludes any prediction as to the ultimate adverse impact of COVID-19, or any future pandemics that may arise, which may have a continued adverse impact on economic and market conditions, and may lead to significant declines in corporate earnings or loan performance, and the ability of corporate borrowers to service their debt, any of which could trigger a period of global economic slowdown, and have an adverse impact on the performance and financial results of the Fund and the obligors of the Fund, and the value and the liquidity of the Common Shares.

Force Majeure Risk

The Fund may be affected by force majeure events (*e.g.*, acts of God, fire, flood, earthquakes, outbreaks of an infectious disease, pandemic or any other serious public health concern, war, terrorism, nationalization of industry and labor strikes). Force majeure events could adversely affect the ability of the Fund or a counterparty to perform its obligations. The liability and cost arising out of a failure to perform obligations as a result of a force majeure event could be considerable and could be borne by the Fund. Certain force majeure events, such as war or an outbreak of an infectious disease, could have a broader negative impact on the global or local economy, thereby affecting the Fund. Additionally, a major governmental intervention into industry, including the nationalization of an industry or the assertion of control, could result in a loss to the Fund if an investment is affected, and any compensation provided by the relevant government may not be adequate.

Epidemic and Pandemic Risk

The world has been susceptible to epidemics/pandemics, most recently COVID-19, which has been designated as a pandemic by the World Health Organization. Any outbreak of COVID-19, SARS, H1N1/09 flu, avian flu, other coronavirus, Ebola or other existing or new epidemics/pandemics, or the threat thereof, together with any resulting restrictions on travel or quarantines imposed, has had, and will continue to have, an adverse impact on the economy and business activity globally (including in the countries in which the Fund invests), and thereby is expected to adversely affect the performance of the Fund's investments and the Fund's ability to fulfill its investment objectives. Furthermore, the rapid development of epidemics/pandemics could preclude prediction as to their ultimate adverse impact on economic and market conditions, and, as a result, presents material uncertainty and risk with respect to the Fund and the performance of its investments.

COVID-19 Risk

During the first quarter of 2020, there was a global outbreak of COVID-19, which has spread to over 200 countries and territories, including the United States, and has spread to every state in the United States. On March 11, 2020, the World Health Organization designated COVID-19 as a pandemic, and on March 13, 2020, the United States declared a national emergency with respect to COVID-19. The global impact of the outbreak has been rapidly evolving, and as cases of COVID-19 have continued to be identified in additional countries, many countries have reacted by instituting quarantines, restrictions on travel, closing financial markets and/or restricting trading, and limiting hours of operations of non-essential businesses. Such actions are creating disruption in global supply chains, and adversely impacting a number of industries, including industries in which our portfolio companies operate. The outbreak of COVID-19 could have a continued adverse impact on economic and market conditions and has triggered a period of global economic slowdown.

The outbreak of COVID-19 and related effects, which continue to be unpredictable, could have a material adverse impact on our NAV, financial condition, liquidity, results of operations, and the businesses of our portfolio companies, among other factors. Negative impacts to our business as a result of the pandemic could exacerbate other risks described herein, including:

- weakening financial conditions of or the bankruptcy or insolvency of portfolio companies, which may result in the inability of such portfolio companies to meet debt obligations, delays in collecting accounts receivable, defaults, or forgiveness or deferral of interest payments from such portfolio companies;

- significant volatility in the markets for syndicated loans, which could cause rapid and large fluctuations in the values of such investments and adverse effects on the liquidity of any such investments;
- deterioration in credit and financing market conditions, which may adversely impact our ability to access financing for our investments on favorable terms or at all;
- operational impacts on our Adviser, Administrator and our other third-party advisors, service providers, vendors and counterparties, including independent valuation firms, our sub-administrator, our lenders and other providers of financing, brokers and other counterparties that we purchase and sell assets to and from, derivative counterparties, and legal and diligence professionals that we rely on for acquiring our investments;
- limitations on our ability to ensure business continuity in the event our, or our third-party advisors' and service providers' continuity of operations plan is not effective or improperly implemented or deployed during a disruption;
- the availability of key personnel of the Adviser, Administrator and our other service providers as they face changed circumstances and potential illness during the pandemic;
- difficulty in valuing our assets in light of significant changes in the financial markets, including difficulty in forecasting discount rates and making market comparisons, and circumstances affecting the Adviser's, Administrator's and our service providers' personnel during the pandemic;
- limitations on our ability to raise new capital;
- significant changes to the valuations of pending investments; and
- limitations on our ability to make distributions to our shareholders due to material adverse impacts on our cash flows from operations or liquidity.

The rapid development and fluidity of this situation precludes any prediction as to the ultimate adverse impact of COVID-19 on economic and market conditions, and, as a result, present material uncertainty and risk with respect to us and the performance of our investments. The full extent of the impact and effects of COVID-19 will depend on future developments, including, among other factors, the duration and spread of the outbreak, along with related travel advisories, quarantines and restrictions, the recovery time of the disrupted supply chains and industries, the impact of labor market interruptions, the impact of government interventions, the availability and use of effective vaccines, and uncertainty with respect to the duration of the global economic slowdown. COVID-19 and the current financial, economic and capital markets environment, and future developments in these and other areas present uncertainty and risk with respect to our performance, financial condition, results of operations and ability to pay distributions. See “—Epidemic and Pandemic Risk” above.

Cyber-Security Risk and Identity Theft Risks

The Fund's operations are highly dependent on the Adviser's information systems and technology and the Fund relies heavily on the Adviser's financial, accounting, communications and other data processing systems. The Adviser's systems may fail to operate properly or become disabled as a result of tampering or a breach of its network security systems or otherwise. In addition, the Adviser's systems face ongoing cybersecurity threats and attacks. Attacks on the Adviser's systems could involve, and in some instances have in the past involved, attempts intended to obtain unauthorized access to its proprietary information, destroy data or disable, degrade or sabotage its systems, or divert or otherwise steal funds, including through the introduction of computer viruses, “phishing” attempts and other forms of social engineering. Cyberattacks and other security threats could originate from a wide variety of external sources, including cyber criminals, nation state hackers, hacktivists and other outside parties. Cyberattacks and other security threats could also originate from the malicious or accidental acts of insiders, such as employees of the Adviser.

There has been an increase in the frequency and sophistication of the cyber and security threats the Adviser faces, with attacks ranging from those common to businesses to those that are more advanced and persistent, which may target the Adviser because, as an alternative asset management firm, the Adviser holds a significant

amount of confidential and sensitive information about its investors, its portfolio companies or obligors (as applicable) and potential investments. As a result, the Adviser may face a heightened risk of a security breach or disruption with respect to this information. There can be no assurance that measures the Adviser takes to ensure the integrity of its systems will provide protection, especially because cyberattack techniques used change frequently or are not recognized until successful. If the Adviser's systems are compromised, do not operate properly or are disabled, or it fails to provide the appropriate regulatory or other notifications in a timely manner, the Adviser could suffer financial loss, a disruption of its businesses, liability to its investment funds and fund investors, including the Fund and common shareholders, regulatory intervention or reputational damage. The costs related to cyber or other security threats or disruptions may not be fully insured or indemnified by other means.

In addition, the Fund could also suffer losses in connection with updates to, or the failure to timely update, the Adviser's information systems and technology. In addition, the Adviser has become increasingly reliant on third party service providers for certain aspects of its business, including for the administration of certain funds, as well as for certain information systems and technology, including cloud-based services. These third party service providers could also face ongoing cyber security threats and compromises of their systems and as a result, unauthorized individuals could gain, and in some past instances have gained, access to certain confidential data.

Cybersecurity has become a top priority for regulators around the world. Many jurisdictions in which the Adviser operates have laws and regulations relating to data privacy, cybersecurity and protection of personal information, including, as examples, the General Data Protection Regulation in the EU and that went into effect in May 2018 and the California Consumer Privacy Act that went into effect in January 2020. Some jurisdictions have also enacted laws requiring companies to notify individuals and government agencies of data security breaches involving certain types of personal data.

Breaches in security, whether malicious in nature or through inadvertent transmittal or other loss of data, could potentially jeopardize the Adviser, its employees' or the Fund's investors' or counterparties' confidential, proprietary and other information processed and stored in, and transmitted through, the Adviser's computer systems and networks, or otherwise cause interruptions or malfunctions in its, its employees', the Fund's investors', the Fund's counterparties' or third parties' business and operations, which could result in significant financial losses, increased costs, liability to the Fund's investors and other counterparties, regulatory intervention and reputational damage. Furthermore, if the Adviser fails to comply with the relevant laws and regulations or fail to provide the appropriate regulatory or other notifications of breach in a timely matter, it could result in regulatory investigations and penalties, which could lead to negative publicity and reputational harm, and may cause the Fund's investors and clients to lose confidence in the effectiveness of its security measures.

Obligors of the Fund also rely on data processing systems and the secure processing, storage and transmission of information, including payment and health information. A disruption or compromise of these systems could have a material adverse effect on the value of these businesses. The Fund may invest in strategic assets having a national or regional profile or in infrastructure, the nature of which could expose it to a greater risk of being subject to a terrorist attack or security breach than other assets or businesses. Such an event may have material adverse consequences on the Fund's investment or assets of the same type or may require obligors of the Fund to increase preventative security measures or expand insurance coverage.

Finally, the Adviser's and the Fund's technology, data and intellectual property and the technology, data and intellectual property of their portfolio companies or obligors (as applicable) are also subject to a heightened risk of theft or compromise to the extent the Adviser and the Fund's portfolio companies or obligors (as applicable) engage in operations outside the United States, in particular in those jurisdictions that do not have comparable levels of protection of proprietary information and assets such as intellectual property, trademarks, trade secrets, know-how and customer information and records. In addition, the Adviser and the Fund and their portfolio companies or obligors (as applicable) may be required to compromise protections or forego rights to technology, data and intellectual property in order to operate in or access markets in a foreign jurisdiction. Any such direct or

indirect compromise of these assets could have a material adverse impact on the Adviser and the Fund and their portfolio companies or obligors (as applicable).

Portfolio Turnover Risk

The Fund's annual portfolio turnover rate may vary greatly from year to year, as well as within a given year. Although the Fund cannot accurately predict its annual portfolio turnover rate, it is not expected to exceed 100% under normal circumstances. However, portfolio turnover rate is not considered a limiting factor in the execution of investment decisions for the Fund. High portfolio turnover may result in the realization of net short-term capital gains by the Fund which, when distributed to Common Shareholders, will be taxable as ordinary income. In addition, a higher portfolio turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund.

Government Intervention in the Financial Markets

The recent instability in the financial markets has led the U.S. government to take a number of unprecedented actions designed to support certain financial institutions and segments of the financial markets that have experienced extreme volatility, and in some cases a lack of liquidity. Federal, state, and other governments, their regulatory agencies or self-regulatory organizations may take additional actions that affect the regulation of the securities or structured products in which the Fund invests, or the issuers of such securities or structured products, in ways that are unforeseeable. Borrowers under Secured Loans held by the Fund may seek protection under the bankruptcy laws. Legislation or regulation may also change the way in which the Fund itself is regulated. Such legislation or regulation could limit or preclude the Fund's ability to achieve its investment objectives. The Adviser will monitor developments and seek to manage the Fund's portfolio in a manner consistent with achieving the Fund's investment objectives, but there can be no assurance that it will be successful in doing so.

Anti-Takeover Provisions

The Fund's Declaration of Trust includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could deprive common shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares or at NAV. See "Certain Provisions in the Agreement and Declaration of Trust."

Inflation and Supply Chain Risk

Economic activity has continued to accelerate across sectors and regions. Nevertheless, due to global supply chain issues, a rise in energy prices and strong consumer demand as economies continue to reopen, inflation is showing signs of acceleration in the U.S. and globally. Inflation is likely to continue in the near to medium-term, particularly in the U.S., with the possibility that monetary policy may tighten in response. Persistent inflationary pressures could affect our obligors' profit margins.

Climate Change Risk

Climate change creates physical and financial risk and some of our obligors may be adversely affected by climate change. For example, the needs of customers of energy companies vary with weather conditions, primarily temperature and humidity. To the extent weather conditions are affected by climate change, energy use could increase or decrease depending on the duration and magnitude of any changes. Increases in the cost of energy could adversely affect the cost of operations of our obligors if the use of energy products or services is material to their business. A decrease in energy use due to weather changes may affect some of our obligors' financial condition, through decreased revenues. Extreme weather conditions in general require more system backup, adding to costs, and can contribute to increased system stresses, including service interruptions.

MANAGEMENT OF THE FUND

Trustees and Officers

The overall management of the business and affairs of the Fund is vested in the Board. The responsibilities of the Board include, among other things, the oversight of the Fund's investment activities, oversight of our financing arrangements, and corporate governance activities. The Board currently has an audit committee and a nominating and governance committee and may establish additional committees from time to time as necessary. The day-to-day operation of the Fund is delegated to the officers of the Fund and the Adviser, subject always to the investment objectives, restrictions, and policies of the Fund and to the general supervision of the Board.

There currently are five Trustees of the Fund. A majority of the Trustees are not "interested persons" (as defined in the 1940 Act) of the Fund. The name and business address of the Trustees and officers of the Fund and their principal occupations and other affiliations during the past five years are set forth under "Management of the Fund" in the SAI.

Investment Adviser

Blackstone Liquid Credit Strategies LLC acts as the Fund's investment adviser and also provides administrative and compliance oversight services to the Fund. The Adviser is located at 345 Park Avenue, 31st Floor, New York, NY 10154. The Adviser is a wholly-owned subsidiary of Blackstone Credit. Blackstone Credit is part of the credit platform of Blackstone, which is one of the world's leading investment firms with total assets under management of \$731 billion. Blackstone's asset management businesses include investment vehicles focused on real estate, private equity, public debt and equity, growth equity, opportunistic, non-investment grade credit, real assets and secondary funds, all on a global basis. As of September 30, 2021, Blackstone Credit's asset management operation had aggregate assets under management of \$178 billion across multiple strategies within the leveraged finance marketplace, including loans, high yield bonds, distressed and mezzanine debt and private equity, including hedge funds. In addition, as of December 31, 2020, the Adviser had total assets under management of approximately \$43 billion. The Adviser is part of the LCS business unit of Blackstone Credit and is responsible for managing long-only credit strategies, including investments in U.S. and European senior secured loans, high yield bonds, and structured credit investments, in vehicles, including CLOs, separately managed accounts, commingled funds, three other closed-end funds and a sub-advised ETF.

Competitive Advantages

The Adviser believes that it offers the following competitive advantages:

Global platform with seasoned investment professionals. The Adviser's senior management team believes that the breadth and depth of its experience, together with the wider resources of Blackstone Credit and Blackstone and their relationships with the investment community, provide the Adviser with a significant competitive advantage in sourcing and analyzing attractive investment opportunities worldwide. The Adviser's investment professionals have extensive experience in leveraged finance. Individual members of the Adviser's investment team also have experience in shorting and derivatives strategies.

Disciplined, income-oriented investment philosophy. The Adviser employs a defensive investment approach focused on long-term credit performance and principal protection. This investment approach involves a multi-stage selection process for each investment opportunity as well as ongoing monitoring of each investment made, with particular emphasis on early detection of credit deterioration. This strategy is designed to maximize current yield and minimize the risk of capital loss while maintaining potential for long-term capital appreciation.

Expertise across all levels of the corporate capital structure. The Adviser believes that its broad expertise and experience at all levels of a company's capital structure afford it numerous tools to manage risk while

preserving the opportunity for attractive returns on the Fund's investments. The Adviser attempts to capitalize on this expertise in an effort to produce and maintain an investment portfolio that can perform in a broad range of economic conditions.

Investment Team

Set forth below is information regarding the team of professionals at the Adviser primarily responsible for overseeing the day-to-day operations of the Fund. The Adviser utilizes a team approach, with decisions derived from interaction among various investment management sector specialists. Under this team approach, management of the Fund's portfolio will reflect a consensus of interdisciplinary views.

Robert Zable is a Senior Managing Director and Senior Portfolio Manager of the U.S. CLOs, closed-end funds in Blackstone Credit's LCS unit. He is also a member of Blackstone Credit's LCS Management Committee and sits on Blackstone Credit's U.S. Syndicated Credit Investment Committee, Global Structured Credit Investment Committee, LCS Global Asset Allocation Committee, and CLO Origination Committee. Before joining Blackstone Credit in 2007, Mr. Zable was a Vice President at FriedbergMilstein LLC, where he was responsible for credit opportunity investments and junior capital origination and execution. Prior to that, Mr. Zable was a Principal with Abacus Advisors Group, a boutique restructuring and distressed investment firm. Mr. Zable began his career at JP Morgan Securities Inc., where he focused on leveraged finance in New York and London. Mr. Zable received a B.S. from Cornell University and an M.B.A in Finance from The Wharton School at the University of Pennsylvania.

Gordon McKemie is a Managing Director and a Portfolio Manager of the closed-end and exchange-traded funds in Blackstone Credit's Liquid Credit Strategies ("LCS") unit. He sits on LCS's U.S. Syndicated Credit Investment Committee. Prior to joining Blackstone Credit in 2012 Mr. McKemie was an Associate in Leveraged Finance at Citigroup and an Assistant Vice President in high yield research at Barclays Capital. He began his career at Lehman Brothers. Mr. McKemie received a B.B.A. with a concentration in Finance from the Goizueta Business School at Emory University and is a CFA Charterholder.

Robert Post is a Principal and Portfolio Manager of the US leveraged loan and high yield strategies in Blackstone Credit's LCS unit. Prior to joining Blackstone Credit in 2017, Mr. Post was a Junior Portfolio Manager at BlackRock, where his responsibilities included various leveraged loan and high yield mandates. Previously, Mr. Post was an Analyst at BMO Capital Markets, where he was involved with the ongoing monitoring and structuring of leveraged finance transactions. Mr. Post began his career at MetLife Investments as a credit analyst focused on corporate bonds. Mr. Post received a B.A. in Economics with a concentration in Financial Markets from Colby College.

Additional information about the portfolio managers' compensation, other accounts managed by them and other information is provided in the SAI.

Investment Advisory Agreement

The Adviser provides services to the Fund pursuant to an investment advisory agreement between the Fund and the Adviser. Under the investment advisory agreement, subject to the supervision and direction of the Board, the Adviser will manage the Fund's portfolio in accordance with the Fund's investment objectives and policies, make investment decisions for the Fund, place orders to purchase and sell securities, and employ professional portfolio managers and securities analysts who provide research services to the Fund.

The Fund's investment advisory agreement will continue in effect, unless otherwise terminated, until May 31, 2022, and then will continue from year to year thereafter provided such continuance is specifically approved at least annually (a) by the Board or by a majority of the outstanding voting securities of the Fund (as

defined in the 1940 Act) and (b) in either event, by a majority of the Board who are not “interested persons” of the Fund within the meaning of Section 2(a)(19) of the 1940 Act (the “Independent Trustees”) with such Independent Trustees casting votes in person at a meeting called for such purpose (or at a meeting that is not held in person as may be permitted by SEC exemptive relief). The Fund’s investment advisory agreement provides that the Adviser may render services to others. The Fund’s investment advisory agreement is terminable without penalty on not more than 60 days’ nor less than 30 days’ written notice by the Fund when authorized either by a vote of a majority of the outstanding securities entitled to vote (as defined in the 1940 Act) or by a vote of a majority of the Fund’s Trustees, or by the Adviser on not less than 90 days’ written notice, and will automatically terminate in the event of its assignment. The Fund’s investment advisory agreement provides that neither the Adviser nor its personnel or affiliates shall be liable for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of security transactions for the Fund, except for willful misfeasance, bad faith or gross negligence or reckless disregard of its or their obligations and duties.

The Fund has agreed to pay the Adviser a management fee at an annual rate equal to 0.90% of the average daily value of the Fund’s Managed Assets. The term “Managed Assets” means the Fund’s total assets (including any assets attributable to any leverage used) minus the sum of the Fund’s accrued liabilities (other than Fund liabilities incurred for any leverage).

A discussion regarding the basis for the continuation of the investment advisory agreement by the Board is available in the Fund’s annual report to shareholders for the fiscal year ended December 31, 2020. The basis for subsequent continuations of the Fund’s investment advisory agreement will be provided in annual or semi-annual reports to shareholders for the periods during which such continuations occur.

In addition to the fees paid to the Adviser, the Fund pays all other costs and expenses of its operations, including compensation of its Trustees (other than those affiliated with the Adviser), custodian, leveraging expenses, transfer and dividend disbursing agent expenses, legal fees, rating agency fees, listing fees and expenses, expenses of independent auditors, expenses of repurchasing Common Shares, expenses of preparing, printing and distributing shareholder reports, notices, proxy statements and reports to governmental agencies and taxes, if any.

Administrator

ALPS, located at 1290 Broadway, Suite 1000, Denver, Colorado 80203, serves as administrator to the Fund. Under the Administration Agreement, ALPS maintains the Fund’s general ledger and is responsible for calculating the NAV of the Common Shares, and generally managing the administrative affairs of the Fund. ALPS is entitled to receive a monthly fee based on the Fund’s average daily net assets plus out-of-pocket expenses.

Control Persons

A control person is any person who owns beneficially more than 25% of the voting securities of the Fund or who is otherwise deemed to “control” the Fund. Such person may be able to determine or significantly influence the outcome of matters submitted to a vote of common shareholders. As of December 31, 2021, the Fund did not know of any person or entity who “controlled” the Fund.

NET ASSET VALUE

The NAV of the Common Shares of the Fund is computed based upon the value of the Fund's Managed Assets. NAV per Common Share is determined daily by ALPS on each day that the Exchange is open for business as of the close of the regular trading session on the Exchange. The Fund calculates NAV per common share by subtracting liabilities (including accrued expenses or dividends) from the total assets of the Fund (the value of the securities plus cash or other assets, including interest accrued but not yet received) and dividing the result by the total number of outstanding Common Shares of the Fund.

The Fund values its investments primarily by using the mid-price of market quotations from a nationally recognized loan pricing service. Short-term debt investments having a remaining maturity of 60 days or less when purchased will be valued at cost adjusted for amortization of premiums and accretion of discounts. Any investments and other assets for which such current market quotations are not readily available are valued at fair value ("Fair Valued Assets") as determined in good faith under procedures established by, and under the general supervision and responsibility of, the Board. The Adviser submits its recommendations regarding the valuation and/or valuation methodologies for Fair Valued Assets to a valuation committee comprised of officers and employees of the Adviser. The valuation committee may accept, modify or reject any recommendations. The pricing of all Fair Valued Assets shall be subsequently reported to the Board or the appropriate committee thereof.

Non-U.S. Securities are valued by translating available quotes into U.S. dollar equivalents, if the quotes are considered reliable, and are otherwise valued at fair value. Over-the-counter options are priced on the basis of dealer quotes. Other types of derivatives for which quotes may not be available are valued at fair value.

When determining the price for a Fair Valued Asset, the Adviser seeks to determine the price that the Fund might reasonably expect to receive from the current sale of that asset in an arm's-length transaction. Fair value determinations are based upon all available factors that the Adviser deems relevant.

DISTRIBUTIONS

The Fund makes regular monthly cash distributions of all or a portion of its net investment income to common shareholders. The Fund pays common shareholders at least annually all or substantially all of its net investment income after the payment of interest, fees or dividends, if any, owed with respect to any forms of leverage utilized by the Fund. The Fund pays any capital gains distributions at least annually. The Fund utilizes a “dynamic” distribution strategy that is based on the net income earned by the Fund. The Fund declares a set of monthly distributions each quarter in amounts closely tied to the Fund’s recent average monthly net income. As a result, the monthly distribution amounts for the Fund typically vary quarter-to-quarter. The following table sets forth information about distributions we paid to our common shareholders during the past three fiscal years, percentage participation by common shareholders in our DRIP, and reinvestments and related issuances of additional Common Shares as a result of such participation (the information in the table is unaudited):

<u>Distribution Payable Date to Common Shareholders</u>	<u>Amount of Distribution Per Share</u>	<u>Percentage of Common Shareholders Electing to Participate in DRIP</u>	<u>Amount of Corresponding Reinvestment through DRIP</u>	<u>Additional Common Shares Issued through DRIP</u>
Issued through DRIP

The U.S. federal income tax treatment and characterization of the Fund’s distributions may vary significantly from time to time because of the varied nature of the Fund’s investments. In light of the Fund’s investment policies, the 1940 Act requires the Fund to accompany each monthly distribution with a statement setting forth the estimated source (as between net income, capital gains and return of capital) of the distribution made. The Fund will indicate the proportion of its capital gains distributions that constitute long-term and short-term gains annually. The ultimate U.S. federal income tax characterization of the Fund’s distributions made in a calendar or fiscal year cannot finally be determined until after the end of that taxable year. As a result, there is a possibility that the Fund may make total distributions during a calendar or taxable year in an amount that exceeds the Fund’s net investment company taxable income and net capital gains for the relevant taxable year. In such situations, if a distribution exceeds the Fund’s current and accumulated earnings and profits (as determined for U.S. federal income tax purposes), such distribution would generally be treated as a tax-free return of capital reducing the amount of a shareholder’s tax basis in such shareholder’s shares. A return of capital is a return to shareholders of a portion of their original investment in the Fund’s Common Shares. A return of capital is treated as a non-dividend distribution for tax purposes and is not subject to current tax. A return of capital reduces a shareholder’s tax cost basis in the Fund’s Common Shares. When you sell your Common Shares in the Fund, the amount, if any, by which your sales price exceeds your basis in the Common Shares is gain subject to tax. Because a return of capital reduces your basis in the shares, it will increase the amount of your gain or decrease the amount of your loss when you sell the Common Shares, all other things being equal. To the extent that the amount of any return of capital distribution exceeds the shareholder’s basis in such shareholder’s shares, the excess will be treated as gain from a sale or exchange of the shares. See “Tax Matters.”

Various factors affect the level of the Fund’s income, including the asset mix, the average maturity of the Fund’s portfolio, the amount of leverage utilized by the Fund and the Fund’s use of hedging. To permit the Fund to maintain a more stable monthly distribution, the Fund may from time to time distribute less than the entire amount of income earned in a particular period. The undistributed income would be available to supplement future distributions. As a result, the distributions paid by the Fund for any particular monthly period may be more or less than the amount of income actually earned by the Fund during that period. Undistributed income will add to the Fund’s NAV (and indirectly benefit the Adviser and ALPS by increasing their fees) and, correspondingly, distributions from undistributed income will reduce the Fund’s NAV.

Section 19(b) of the 1940 Act and Rule 19b-1 thereunder generally limit the Fund to one long-term capital gain distribution per year, subject to certain exceptions.

DIVIDEND REINVESTMENT PLAN

Pursuant to the DRIP, shareholders whose Common Shares are registered in their own name may “opt-in” to the plan and elect to reinvest all or a portion of their distributions in our Common Shares by providing the required enrollment notice to Computershare, the DRIP administrator. Common shareholders whose shares are held in the name of a broker or other nominee may have distributions reinvested only if such a service is provided by the broker or the nominee or if the broker or the nominee permits participation in the DRIP. Common shareholders whose shares are held in the name of a broker or other nominee should contact the broker or nominee for details. A shareholder may terminate participation in the DRIP at any time by notifying the DRIP administrator before the record date of the next distribution through the Internet, by telephone or in writing. All distributions to shareholders who do not participate in the DRIP, or have elected to terminate their participation in the DRIP, will be paid by check mailed directly to the record holder by or under the direction of the DRIP administrator when the Board declares a distribution.

When we declare a distribution, common shareholders who are participants in the DRIP receive the equivalent of the amount of the distribution in our Common Shares. If you participate in the DRIP, the number of Common Shares of the Fund you will receive will be determined as follows:

- (1) If the market price of the Common Shares plus any brokerage commissions on the payable date (or, if the payable date is not an Exchange trading day, the immediately preceding trading day) for determining shareholders eligible to receive the relevant distribution (the “determination date”) is equal to or exceeds 98% of the NAV per common share, the Fund will issue new Common Shares at a price equal to the greater of:
 - (a) 98% of the NAV per share at the close of trading on the Exchange on the determination date or
 - (b) 95% of the market price per common share on the determination date.
- (2) If 98% of the NAV per common share exceeds the market price of the Common Shares plus any brokerage commissions on the determination date, the DRIP administrator will receive the distribution in cash and will buy Common Shares in the open market, on the Exchange or elsewhere, for your account as soon as practicable commencing on the trading day following the determination date and terminating no later than the earlier of (a) 30 days after the distribution payment date, or (b) the record date for the next succeeding distribution to be made to the shareholders; except when necessary to comply with applicable provisions of the federal securities laws. If during this period: (i) the market price plus any brokerage commissions rises so that it equals or exceeds 98% of the NAV per common share at the close of trading on the Exchange on the determination date before the DRIP administrator has completed the open market purchases or (ii) the DRIP administrator is unable to invest the full amount eligible to be reinvested in open market purchases, the DRIP administrator will cease purchasing Common Shares in the open market and the Fund will issue the remaining Common Shares at a price per share equal to the greater of (a) 98% of the NAV per share at the close of trading on the Exchange on the determination date or (b) 95% of the then current market price per share.

The DRIP administrator maintains all shareholder accounts in the DRIP and furnishes written confirmations of all transactions in the account, including information needed by shareholders for personal and tax records. Our Common Shares in the account of each DRIP participant are held by the DRIP administrator in non-certificated form in the name of the participant, and each shareholder’s proxy includes shares purchased pursuant to the DRIP.

There is no charge to participants for reinvesting regular distributions and capital gains distributions. The fees of the DRIP administrator for handling the reinvestment of regular distributions and capital gains distributions are included in the fee to be paid by us to our transfer agent. There are no brokerage charges with respect to Common Shares issued directly by us as a result of regular distributions or capital gains distributions payable either in shares or in cash. However, each participant bears a pro rata share of brokerage commissions

incurred with respect to the DRIP administrator's open market purchases in connection with the reinvestment of such distributions. Shareholders that opt-in to the DRIP will add to their investment through dollar cost averaging. Because all dividends and distributions paid to such shareholder will be automatically reinvested in additional Common Shares, the average cost of such shareholder's Common Shares will decrease over time. Dollar cost averaging is a technique for lowering the average cost per share over time if the Fund's NAV declines. While dollar cost averaging has definite advantages, it cannot assure profit or protect against loss in declining markets.

Although participants may from time to time have an undivided fractional interest (computed to six decimal places) in a share of Common Shares, no certificates for a fractional share will need to be issued. However, distributions on fractional shares will be credited to participant accounts. In the event of the termination of a participant's account under the DRIP, the DRIP administrator will adjust for any such undivided fractional interest in cash at the market value of the Fund's shares at the time of termination less the pro rata expense of any sale required to make such an adjustment.

The automatic reinvestment of such dividends or distributions does not relieve participants of any income tax that may be payable on such dividends or distributions. See "Tax Matters."

You may obtain additional information about the DRIP by contacting the DRIP administrator at the following address: Computershare, Attn: Sales Dept., P.O. Box 358035, Pittsburgh, PA 15252.

DESCRIPTION OF SHARES

As of September 30, 2021, the following amount of the Fund’s classes of securities was authorized for registration and outstanding:

(1)	(2)	(3)	(4)
Title of Class	Amount Authorized	Amount Held by the Fund for its Account	Amount Outstanding Exclusive of Amount Shown Under ⁽³⁾
Common Shares	Unlimited	N/A	13,527,019

Common Shares

The Fund is a statutory trust organized under the laws of Delaware pursuant to the Agreement and Declaration of Trust dated as of March 4, 2010, as amended and restated on May 25, 2010 and September 9, 2021. The Fund is authorized to issue an unlimited number of Common Shares. Each Common Share has one vote and, when issued and paid for in accordance with the terms of this offering, will be fully paid and non-assessable. Common shareholders will not be entitled to receive any distributions from the Fund unless all accrued interest, fees and dividends, if any, with respect to the Fund’s leverage have been paid, unless certain asset coverage tests with respect to the leverage employed by the Fund are satisfied after giving effect to the distributions, and unless certain other requirements imposed by any rating agencies rating any preferred shares issued by the Fund have been met. See “—Preferred Shares” below. All Common Shares are equal as to dividends, assets and voting privileges and have no conversion, preemptive or other subscription rights. The Fund sends annual and semi-annual reports, including financial statements, when available, to all common shareholders.

The Fund may issue additional Common Shares under the Fund’s DRIP, and otherwise may make additional offerings of shares with approval by the Board. Any additional offering of Common Shares will be subject to the requirements of the 1940 Act, which provides that shares may not be issued at a price below the then current NAV, exclusive of the sales load, except in connection with an offering to existing common shareholders or with the consent of a majority of the Fund’s outstanding voting securities.

The Fund’s Common Shares are listed on the New York Stock Exchange and trade under the ticker symbol “BSL”.

The Fund’s NAV per share generally increases when interest rates decline, and decreases when interest rates rise. However, because the Secured Loans that the Fund invests in are floating rate in nature, the Fund’s NAV per share will be less affected by interest rate fluctuations than if it were investing primarily in other forms of securities.

Unlike open-end funds, closed-end funds like the Fund do not continuously offer shares and do not provide daily redemptions. Rather, if a shareholder decides to buy additional Common Shares or sell shares already held, the shareholder may do so by trading through a broker on the Exchange or otherwise. Shares of closed-end investment companies frequently trade on an exchange at prices lower than NAV. Shares of the Fund and of closed-end investment companies like the Fund that invest predominantly in Secured Loans and fixed-income instruments have traded during some periods at prices higher than NAV and have traded during other periods at prices lower than NAV. Because the market value of the Common Shares may be influenced by such factors as dividend levels (which are in turn affected by expenses), dividend stability, portfolio credit quality, NAV, relative demand for and supply of such Common Shares in the market, general market and economic conditions and other factors beyond the control of the Fund, the Fund cannot assure you that its Common Shares will trade at a price equal to or higher than NAV in the future. The Common Shares are designed primarily for long-term investors and you should not purchase the Common Shares if you intend to sell them soon after purchase.

Preferred Shares

The Fund's Declaration of Trust provides that the Board of Trustees of the Fund may authorize and issue Preferred Shares, with rights as determined by the Board of Trustees, without the approval of the holders of the Common Shares. Holders of Common Shares have no preemptive right to purchase any Preferred Shares that might be issued.

While the Fund does not anticipate doing so, it may issue Preferred Shares in an aggregate amount of up to 33 1/3% of its total assets less all liabilities and indebtedness of the Fund other than senior securities at the time the leverage is incurred in order to buy additional securities. The use of leverage can create risks. The Board of Trustees reserves the right to change the foregoing percentage limitation and may issue Preferred Shares to the extent permitted by the 1940 Act, which currently limits the aggregate liquidation preference of all outstanding Preferred Shares to 50% of the value of the Fund's total assets, less liabilities and indebtedness of the Fund. We cannot assure you, however, that Preferred Shares will not be issued. The terms of any Preferred Shares, including distribution rate, liquidation preference and redemption provisions restrictions on the declaration of distributions, maintenance of asset ratios and restrictions while distributions are in arrears will be determined by the Board of Trustees, subject to applicable law and the Declaration of Trust. The Fund also believes that it is likely that the liquidation preference, voting rights and redemption provisions of any Preferred Shares will be similar to those stated below.

In the event of any voluntary or involuntary liquidation, dissolution or winding up of the Fund, the holders of any Preferred Shares will be entitled to receive a preferential liquidating distribution. After payment of the full amount of the liquidating distribution to which they are entitled, the holders of Preferred Shares will not be entitled to any further participation in any distribution of assets by the Fund.

The 1940 Act requires that the holders of any Preferred Shares, voting separately as a single class, have the right to elect at least two trustees at all times. The remaining trustees will be elected by holders of Common Shares and Preferred Shares, voting together as a single class. Holders of Common Shares will experience diminished voting power if the Fund issues Preferred Shares. In addition, subject to the prior rights, if any, of the holders of any other class of senior securities outstanding, the holders of any Preferred Shares have the right to elect a majority of the trustees of the Fund at any time two years' dividends on any Preferred Shares are unpaid. The 1940 Act also requires that, in addition to any approval by shareholders that might otherwise be required, the approval of the holders of a majority of any outstanding Preferred Shares, voting separately as a class, would be required to (1) adopt any plan of reorganization that would adversely affect the Preferred Shares and (2) take any action requiring a vote of security holders under Section 13(a) of the 1940 Act, including, among other things, changes in the Fund's sub-classification as a closed-end investment company or changes in its fundamental restrictions. See "Certain Provisions in the Agreement and Declaration of Trust." As a result of these voting rights, the Fund's ability to take any such actions may be impeded to the extent that there are any Preferred Shares outstanding. The Board of Trustees presently intends that, except as otherwise indicated in this prospectus and except as otherwise required by applicable law, holders of Preferred Shares will have equal voting rights with holders of Common Shares (one vote per share, unless otherwise required by the 1940 Act) and will vote together with holders of Common Shares as a single class.

The terms of any Preferred Shares issued by the Fund are expected to provide that the affirmative vote of the holders of a majority of any outstanding Preferred Shares, voting as a separate class, would be required to amend, alter or repeal any of the preferences, rights or powers of holders of Preferred Shares so as to affect materially and adversely such preferences, rights or powers, or to increase or decrease the authorized number of Preferred Shares. The class vote of holders of Preferred Shares described above will in each case be in addition to any other vote required to authorize the action in question.

The terms of any Preferred Shares issued by the Fund are expected to provide that (i) they are redeemable by the Fund in whole or in part at the original purchase price per share plus accrued distributions per share;

(ii) the Fund may tender for or purchase Preferred Shares and (iii) the Fund may subsequently resell any Preferred Shares so tendered for or purchased. Any redemption or purchase of Preferred Shares by the Fund will reduce the leverage applicable to the Common Shares, while any resale of such Preferred Shares by the Fund will increase that leverage.

The discussion above describes the possible offering of Preferred Shares by the Fund. If the Board of Trustees determines to proceed with such an offering, the terms of the Preferred Shares may be the same as, or different from, the terms described above, subject to applicable law and the terms of the Fund's Declaration of Trust. The Board of Trustees, without the approval of the holders of Common Shares, may authorize an offering of Preferred Shares or may determine not to authorize such an offering, and may fix the terms of the Preferred Shares to be offered.

CERTAIN PROVISIONS IN THE AGREEMENT AND DECLARATION OF TRUST

The Fund's Declaration of Trust includes provisions that could have the effect of limiting the ability of other entities or persons to acquire control of the Fund or to change the composition of the Board. This could have the effect of depriving common shareholders of an opportunity to sell their Common Shares at a premium over prevailing market prices by discouraging a third party from seeking to obtain control over the Fund. Such attempts could have the effect of increasing the expenses of the Fund and disrupting the normal operation of the Fund. The Trustees are elected and divided into three classes, with the terms of one class expiring at each annual meeting of shareholders. At each annual meeting, one class of Trustees is elected to a three-year term. This provision could delay for up to two years the replacement of a majority of the Board. A Trustee may be removed from office for cause only, and not without cause, and only by the action of a majority of the remaining Trustees followed by a vote of the holders of a majority of the Shares then entitled to vote for the election of the respective Trustee.

The Declaration of Trust grants special approval rights with respect to certain matters to members of the Board who qualify as "Continuing Trustees," which term means trustees who either (i) have been members of the Board for a period of at least thirty-six months (or since November 18, 2010, if less than thirty-six months) or (ii) were nominated to serve as members of the Board by a majority of the Continuing Trustees then members of the Board.

The Declaration of Trust requires the affirmative vote or consent of at least seventy-five percent (75%) of the Trustees and holders of at least seventy-five percent (75%) of the Shares to authorize certain Fund transactions not in the ordinary course of business, including a merger or consolidation, certain issuances or transfers by the Fund of the Shares (except as may be pursuant to a public offering, the Fund's DRIP or upon exercise of any stock subscription rights), certain sales, transfers or other dispositions of Fund assets, or any shareholder proposal regarding specific investment decisions, unless the transaction is authorized by both a majority of the Trustees and seventy-five percent (75%) of the Continuing Trustees (in which case no shareholder authorization would be required by the Declaration of Trust, but may be required in certain cases under the 1940 Act). The Declaration of Trust also requires the affirmative vote or consent of holders of a majority of the Trustees and of holders of a majority of the outstanding voting securities of the Fund (as defined in the 1940 Act) to authorize a conversion of the Fund from a closed-end to an open-end investment company. Also, the Declaration of Trust provides that the Fund may dissolve upon the vote of a majority of the Trustees and two-thirds of the Shares. See "Risks—Anti-Takeover Provisions."

The Trustees may from time to time grant other voting rights to shareholders with respect to these and other matters, certain of which are required by the 1940 Act.

The overall effect of these provisions is to render more difficult the accomplishment of a merger or the assumption of control by a third party. These provisions also provide, however, the advantage of potentially requiring persons seeking control of the Fund to negotiate with its management regarding the price to be paid and facilitating the continuity of the Fund's investment objectives and policies. The provisions of the Declaration of Trust and Bylaws described above could have the effect of discouraging a third party from seeking to obtain control of the Fund in a tender offer or similar transaction. The Board has considered the foregoing anti-takeover provisions and concluded that they are in the best interests of the Fund and its shareholders.

Derivative Actions

No person, other than a Trustee, who is not a Shareholder shall be entitled to bring any derivative action, suit or other proceeding on behalf of the Trust. No Shareholder may maintain a derivative action on behalf of the Trust unless holders of at least ten percent (10%) of the outstanding Shares join in the bringing of such action.

In addition to the requirements set forth in Section 3816 of the Delaware Statutory Trust Statute, a Shareholder may bring a derivative action on behalf of the Trust only if the following conditions are met: (i) the Shareholder or Shareholders must make a pre-suit demand upon the Trustees to bring the subject action unless an effort to cause the Trustees to bring such an action is not likely to succeed; and a demand on the Trustees shall only be deemed not likely to succeed and therefore excused if a majority of the Trustees, or a majority of any committee established to consider the merits of such action, has a personal financial interest in the transaction at issue, and a Trustee shall not be deemed interested in a transaction or otherwise disqualified from ruling on the merits of a Shareholder demand by virtue of the fact that such Trustee receives remuneration for his service as a Trustee of the Trust or as a trustee or director of one or more investment companies that are under common management with or otherwise affiliated with the Trust; and (ii) unless a demand is not required under clause (i) of this paragraph, the Trustees must be afforded a reasonable amount of time to consider such Shareholder request and to investigate the basis of such claim; and the Trustees shall be entitled to retain counsel or other advisors in considering the merits of the request and may require an undertaking by the Shareholders making such request to reimburse the Trust for the expense of any such advisors in the event that the Trustees determine not to bring such action. The conditions on a shareholder's ability to bring a derivative action do not apply to claims arising under the federal securities laws. For purposes of this this paragraph, the Trustees may designate a committee of one or more Trustees to consider a Shareholder demand if necessary to create a committee with a majority of Trustees who do not have a personal financial interest in the transaction at issue.

The foregoing is intended only as a summary and is qualified in its entirety by reference to the full text of the Declaration of Trust and the Bylaws, both of which are on file with the SEC.

The Declaration of Trust contains an express disclaimer of shareholder personal liability for debts or obligations or any other form of personal liability in connection with the property or actions of the Fund.

For the purposes of calculating "a majority of the outstanding voting securities" under the Declaration of Trust, each class and series of the Fund will vote together as a single class, except to the extent required by the 1940 Act or the Declaration of Trust, with respect to any class or series of Shares. If a separate class vote is required, the applicable proportion of Shares of the class or series, voting as a separate class or series, also will be required.

The Board has determined that provisions with respect to the Board and the shareholder voting requirements described above, which voting requirements are greater than the minimum requirements under Delaware law or the 1940 Act, are in the best interest of shareholders generally. For a more complete explanation, see the full text of these provisions in the Declaration of Trust, which is on file with the SEC.

CLOSED-END FUND STRUCTURE

The Fund is a diversified, closed-end management investment company (commonly referred to as a “closed-end fund”). Closed-end funds differ from open-end funds (which are generally referred to as mutual funds) in that closed-end funds generally list their Common Shares for trading on a stock exchange and do not redeem their Common Shares at the request of the shareholder. This means that if shareholders wish to sell common shares of a closed-end fund, they must trade them on the market like any other stock at the prevailing market price at that time. In a mutual fund, if the shareholder wishes to sell shares of the mutual fund, the mutual fund will redeem or buy back the shares at “NAV.” Also, mutual funds generally offer new shares on a continuous basis to new investors, and closed-end funds generally do not. The continuous inflows and outflows of assets in a mutual fund can make it difficult to manage a mutual fund’s investments. By comparison, closed-end funds are generally able to stay more fully invested in securities that are consistent with their investment objectives, and also have greater flexibility to make certain types of investments, and to use certain investment strategies, such as financial leverage.

Shares of closed-end funds frequently trade at a discount to their NAV. Because of this possibility and the recognition that any such discount may not be in the interest of shareholders, the Board might consider from time to time engaging in open-market repurchases, tender offers for shares or other programs intended to reduce the discount. We cannot guarantee or assure, however, that the Board will decide to engage in any of these actions. There is also no guarantee or assurance that such actions, if undertaken, would result in the shares trading at a price equal or close to NAV per share.

REPURCHASE OF COMMON SHARES

The Fund is a closed-end management investment company and, as a result, its shareholders will not have the right to cause the Fund to redeem their Common Shares. Instead, the Fund's Common Shares will trade in the open market at a price that will be a function of several factors, including dividend levels (which are in turn affected by expenses), NAV, dividend stability, relative demand for and supply of such shares in the market, general market and economic conditions and other factors. Notice is hereby given in accordance with Section 23(c) of the 1940 Act that the Fund may purchase at market prices from time to time its Common Shares in the open market but is under no obligation to do so. Because common shares of a closed-end investment company may frequently trade at prices lower than NAV, the Board may consider action that might be taken to reduce or eliminate any material discount from NAV in respect of Common Shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares or the conversion of the Fund to an open-end investment company. The Board may decide not to take any of these actions. In addition, there can be no assurance that common share repurchases or tender offers, if undertaken, will reduce market discount.

Notwithstanding the foregoing, if at any time the Fund has Preferred Shares outstanding, the Fund may not purchase, redeem or otherwise acquire any of its Common Shares unless (1) all accrued Preferred Shares dividends have been paid and (2) at the time of such purchase, redemption or acquisition, the NAV of the Fund's portfolio (determined after deducting the acquisition price of the Common Shares) is at least 200% of the liquidation value of the outstanding Preferred Shares (expected to equal the original purchase price per share plus any accrued and unpaid dividends thereon). Any service fees incurred in connection with any tender offer made by the Fund will be borne by the Fund and will not reduce the stated consideration to be paid to tendering shareholders.

Subject to its investment restrictions, the Fund may borrow to finance the repurchase of Common Shares or to make a tender offer. Interest on any borrowings to finance share repurchase transactions or the accumulation of cash by the Fund in anticipation of share repurchases or tenders will reduce the Fund's net income. Any share repurchase, tender offer or borrowing that might be approved by the Board would have to comply with the Exchange Act, the 1940 Act and the rules and regulations under the Exchange.

There is no assurance that, if action is undertaken to repurchase or tender for Common Shares, such action will result in the Common Shares trading at a price which approximates their NAV. Although share repurchases and tenders could have a favorable effect on the market price of the Fund's Common Shares, shareholders should be aware that the acquisition of Common Shares by the Fund will decrease the total net assets of the Fund and, therefore, may have the effect of increasing the Fund's expense ratio and decreasing the asset coverage with respect to any Preferred Shares if any outstanding and to any amounts borrowed.

TAX MATTERS

The discussion below and certain disclosure in the SAI provide general tax information related to an investment in Common Shares of the Fund. Because tax laws are complex and often change, common shareholders should consult their tax advisors about the tax consequences of an investment in the Fund. Unless otherwise noted, the following tax discussion applies only to U.S. shareholders that hold the Common Shares as capital assets. A U.S. shareholder is an individual who is a citizen or resident of the United States, a U.S. corporation, a trust if it (a) is subject to the primary supervision of a court in the United States and one or more U.S. persons have the authority to control all substantial decisions of the trust or (b) has made a valid election to be treated as a U.S. person, or any estate the income of which is subject to U.S. federal income tax regardless of its source.

The Fund has elected to be treated, and intends to continue to qualify annually, as a regulated investment company (a "RIC") under Subchapter M of the Code. To qualify under Subchapter M for the favorable tax treatment accorded to RICs, the Fund must, among other things: (1) distribute to its shareholders in each taxable year at least 90% of the sum of its investment company taxable income (as that term is defined in the Code, but without regard to the deduction for dividends paid) and its net tax-exempt income; (2) derive in each taxable year at least 90% of its gross income from (a) dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including but not limited to gain from options, futures and forward contracts) derived with respect to its business of investing in such stock, securities or foreign currencies; and (b) net income derived from interests in certain publicly traded partnerships that are treated as partnerships for U.S. federal income tax purposes and that derive less than 90% of their gross income from the items described in (a) above (each, a "Qualified Publicly Traded Partnership"); and (3) diversify its holdings so that, at the end of each quarter of each taxable year of the Fund (a) at least 50% of the value of the Fund's total assets is represented by cash, cash items, U.S. government securities and securities of other RICs, and other securities, with these other securities limited, with respect to any one issuer, to an amount not greater in value than 5% of the value of the Fund's total assets, and to not more than 10% of the outstanding voting securities of such issuer, and (b) not more than 25% of the value of the Fund's total assets is represented by the securities (other than U.S. government securities or securities of other RICs) of (I) any one issuer, (II) any two or more issuers that the Fund controls and that are determined to be engaged in the same or similar trades or businesses or related trades or businesses or (III) any one or more Qualified Publicly Traded Partnerships. As a RIC, the Fund generally will not be subject to U.S. federal income tax on its investment company taxable income and net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, that it distributes in each taxable year to its shareholders. The Fund distributes to its shareholders, at least annually, substantially all of its investment company taxable income and net capital gain.

If the Fund failed to qualify for the favorable tax treatment accorded to RICs in any taxable year, the Fund would be subject to U.S. federal income tax at regular corporate rates on its taxable income (including its net capital gain), even if such income were distributed to its shareholders, and all distributions out of earnings and profits would be taxed to shareholders as ordinary dividend income. Such distributions generally would be eligible (i) to be treated as "qualified dividend income" in the case of individual and other non-corporate shareholders and (ii) for the dividends received deduction in the case of corporate shareholders. In addition, the Fund could be required to recognize unrealized gains, pay taxes and make distributions (which could be subject to interest charges) before requalifying for taxation as a RIC.

A RIC that fails to distribute, by the close of each calendar year, an amount at least equal to the sum of 98% of its ordinary taxable income for such calendar year and 98.2% of its capital gain net income (adjusted for certain ordinary losses) for the one-year period ending on October 31 of such calendar year, plus any shortfalls from any prior year's required distribution, is liable for a 4% excise tax on the portion of the undistributed amounts of such income that are less than the required distributions. For these purposes, the Fund will be deemed to have distributed any income or gains on which it paid U.S. federal income tax.

Distributions to common shareholders of ordinary income (including “market discount” realized by the Fund on the sale of debt securities), and of net short-term capital gains, if any, realized by the Fund will generally be taxable to common shareholders as ordinary income to the extent such distributions are paid out of the Fund’s current or accumulated earnings and profits. Distributions, if any, of net capital gains properly reported as “capital gain dividends” will be taxable as long-term capital gains, regardless of the length of time the common shareholder has owned Common Shares of the Fund. A distribution of an amount in excess of the Fund’s current and accumulated earnings and profits (as determined for U.S. federal income tax purposes) will be treated by a common shareholder as a return of capital which will be applied against and reduce the common shareholder’s basis in his or her Common Shares. To the extent that the amount of any such distribution exceeds the common shareholder’s basis in his or her Common Shares, the excess will be treated by the common shareholder as gain from a sale or exchange of the Common Shares. Distributions paid by the Fund generally will not be eligible for the dividends received deduction allowed to corporations or for the reduced rates applicable to certain qualified dividend income received by non-corporate common shareholders.

Distributions will be treated in the manner described above regardless of whether such distributions are paid in cash or invested in additional Common Shares of the Fund pursuant to the DRIP. Common shareholders receiving distributions in the form of additional Common Shares of the Fund will be treated as receiving a distribution in the amount of cash that they would have received if they had elected to receive the distribution in cash, unless the Fund issues additional Common Shares with a fair market value equal to or greater than NAV, in which case, such common shareholders will be treated as receiving a distribution in the amount of the fair market value of the distributed Common Shares. The additional Common Shares received by a common shareholder pursuant to the DRIP will have a new holding period commencing on the day following the day on which the Common Shares were credited to the common shareholder’s account.

Although dividends generally will be treated as distributed when paid, dividends declared in October, November or December, payable to common shareholders of record on a specified date in one of those months, and paid during the following January, will be treated as having been distributed by the Fund (and received by common shareholders) on December 31 of the year in which declared.

In general, the sale or other disposition of Common Shares will result in capital gain or loss to common shareholders. A holder’s gain or loss generally will be a long-term capital gain or loss if the Common Shares have been held for more than one year. Present law taxes both long- and short-term capital gains of corporations at the rates applicable to ordinary income. For non-corporate taxpayers, however, long-term capital gains are currently eligible for reduced rates of taxation. Losses realized by a holder on the sale or exchange of Common Shares held for six months or less are treated as long-term capital losses to the extent of any distribution of long-term capital gain received (or amounts designated as undistributed capital gains, as discussed under “Tax Matters—Distributions” in the SAI) with respect to such Common Shares. In addition, no loss will be allowed on the sale or other disposition of Common Shares if the owner acquires (including pursuant to the DRIP) or enters into a contract or option to acquire securities that are substantially identical to such Common Shares within 30 days before or after the disposition. In such case, the basis of the securities acquired will be adjusted to reflect the disallowed loss.

The Fund may be required to withhold from all distributions and redemption proceeds payable to U.S. shareholders who fail to provide the Fund with their correct taxpayer identification numbers or to make required certifications, or who have been notified by the Internal Revenue Service that they are subject to backup withholding. Certain shareholders specified in the Code generally are exempt from such backup withholding. This backup withholding is not an additional tax. Any amounts withheld may be refunded or credited against the common shareholder’s U.S. federal income tax liability, provided the required information is timely furnished to the Internal Revenue Service.

If a common shareholder (other than a partnership) is not a U.S. shareholder (other than such a common shareholder whose ownership of shares is effectively connected with a U.S. trade or business), certain dividends

received by such common shareholder may be subject to U.S. federal withholding tax. To the extent that Fund distributions consist of ordinary dividends that are subject to withholding, the applicable withholding agent will generally be required to withhold U.S. federal income tax at the rate of 30% (or such lower rate as may be determined in accordance with any applicable treaty). However, dividends paid by the Fund that are “interest-related dividends” or “short-term capital gain dividends” will generally be exempt from such withholding, in each case to the extent the Fund properly reports such dividends to shareholders. For these purposes, interest-related dividends and short-term capital gain dividends generally represent distributions of interest or short-term capital gains that would not have been subject to U.S. federal withholding tax at the source if received directly by a non-U.S. shareholder, and that satisfy certain other requirements. Net capital gain dividends (that is, distributions of the excess of net long-term capital gain over net short-term capital loss) distributed by the Fund to a non-U.S. shareholder will not be subject to U.S. federal withholding tax.

The Fund may be required to withhold from distributions to a non-U.S. shareholder that are otherwise exempt from U.S. federal withholding tax (or taxable at a reduced treaty rate) unless the non-U.S. shareholder certifies his or her foreign status under penalties of perjury or otherwise establishes an exemption.

Under Sections 1471 through 1474 of the Code (such Sections commonly referred to as “FATCA”), a 30% U.S. federal withholding tax may apply to any ordinary dividends and other distributions that the Fund pays to (i) a “foreign financial institution” (as specifically defined in the Code), whether such foreign financial institution is the beneficial owner or an intermediary, unless such foreign financial institution agrees to verify, report and disclose its United States “account” holders (as specifically defined in the Code) and meets certain other specified requirements or (ii) a non-financial foreign entity, whether such non-financial foreign entity is the beneficial owner or an intermediary, unless such entity provides a certification that the beneficial owner of the payment does not have any substantial United States owners or provides the name, address and taxpayer identification number of each such substantial United States owner and certain other specified requirements are met. In certain cases, the relevant foreign financial institution or non-financial foreign entity may qualify for an exemption from, or be deemed to be in compliance with, these rules. In addition, foreign financial institutions located in jurisdictions that have an intergovernmental agreement with the United States governing FATCA may be subject to different rules. You should consult your own tax advisor regarding FATCA and whether it may be relevant to your ownership and disposition of Common Shares.

The foregoing tax discussion is for general information only. The provisions of the Code and regulations thereunder presently in effect as they directly govern the taxation of the Fund and common shareholders are subject to change by legislative or administrative action, and any such change may be retroactive with respect to the Fund’s transactions. The foregoing does not represent a detailed description of the U.S. federal income tax considerations relevant to special classes of taxpayers including, without limitation, financial institutions, insurance companies, investors in pass-through entities, U.S. shareholders whose “functional currency” is not the U.S. dollar, tax-exempt organizations, dealers in securities or currencies, traders in securities or commodities that elect mark to market treatment, or persons that will hold Common Shares as a position in a “straddle,” “hedge” or as part of a “constructive sale” for U.S. federal income tax purposes. In addition, this discussion does not address the application of the Medicare tax on net investment income or the U.S. federal alternative minimum tax.

Common shareholders are advised to consult with their own tax advisors for more detailed information concerning federal income tax matters.

PLAN OF DISTRIBUTION

We may sell our Common Shares from time to time under this Prospectus and any related Prospectus Supplement in any one or more of the following ways (1) directly to one or more purchasers, (2) through agents for the period of their appointment, (3) to underwriters as principals for resale to the public, (4) to dealers as principals for resale to the public, (5) through “at-the-market” transactions or (6) pursuant to our DRIP.

Our securities may be sold from time to time in one or more transactions at a fixed price or fixed prices, which may change; at prevailing market prices at the time of sale; prices related to prevailing market prices; at varying prices determined at the time of sale; or at negotiated prices. Our securities may be sold other than for cash, including in exchange transactions for non-control securities, or may be sold for a combination of cash and securities. The Prospectus Supplement will describe the method of distribution of our securities offered therein.

Each Prospectus Supplement relating to an offering of our securities will state the terms of the offering, including:

- the names of any agents, underwriters or dealers;
- any sales loads, underwriting discounts and commissions or agency fees and other items constituting underwriters’ or agents’ compensation;
- any discounts, commissions, fees or concessions allowed or reallocated or paid to dealers or agents;
- the public offering or purchase price of the offered securities and the estimated net proceeds we will receive from the sale; and
- any securities exchange on which the offered securities may be listed.

Any public offering price and any discounts or concessions allowed or reallocated or paid to dealers may be changed from time to time.

Direct Sales

We may sell our securities directly to, and solicit offers from, purchasers, including institutional investors or others who may be deemed to be underwriters as defined in the Securities Act for any resales of the securities. In this case, no underwriters or agents would be involved. We may use electronic media, including the internet, to sell offered securities directly. We will describe the terms of any of those sales in a Prospectus Supplement.

Distribution Through Agents

We may offer and sell our securities on a continuous basis through agents that we designate. We will name any agent involved in the offer and sale and describe any commissions payable by us in the Prospectus Supplement. Unless otherwise indicated in the Prospectus Supplement, the agents will be acting on a best efforts basis for the period of their appointment.

Offers to purchase our securities may be solicited directly by the issuer or by agents designated by the issuer from time to time. Any such agent, who may be deemed to be an underwriter as the term is defined in the Securities Act, involved in the offer or sale of the offered securities in respect of which this Prospectus is delivered will be named, and any commissions payable by the issuer to such agent set forth, in a Prospectus Supplement.

Distribution Through Underwriters

We may offer and sell our securities from time to time to one or more underwriters who would purchase the securities as principal for resale to the public either on a firm commitment or best efforts basis. If we sell our

securities to underwriters, we will execute an underwriting agreement with them at the time of the sale and will name them in the Prospectus Supplement. In connection with these sales, the underwriters may be deemed to have received compensation from us in the form of underwriting discounts and commissions. The underwriters also may receive commissions from purchasers of our securities for whom they may act as agent. Unless otherwise stated in the Prospectus Supplement, the underwriters will not be obligated to purchase our securities unless the conditions set forth in the underwriting agreement are satisfied, and if the underwriters purchase any of the securities, they will be required to purchase all of the offered securities. In the event of default by any underwriter, in certain circumstances, the purchase commitments may be increased among the non-defaulting underwriters or the underwriting agreement may be terminated. The underwriters may sell the offered securities to or through dealers, and those dealers may receive discounts, concessions or commissions from the underwriters as well as from the purchasers for whom they may act as agent. Sales of the offered securities by underwriters may be in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale. The Prospectus Supplement will describe the method of reoffering by the underwriters. The Prospectus Supplement will also describe the discounts and commissions to be allowed or paid to the underwriters, if any, all other items constituting underwriting compensation, and the discounts and commissions to be allowed or paid to dealers, if any. If a Prospectus Supplement so indicates, we may grant the underwriters an option to purchase additional shares of our securities at the public offering price, less the underwriting discounts and commissions, within a specified number of days from the date of the Prospectus Supplement, to cover any overallotments.

Distribution Through Dealers

We may offer and sell our securities from time to time to one or more dealers who would purchase the securities as principal. The dealers then may resell the offered securities to the public at fixed or varying prices to be determined by those dealers at the time of resale. We will set forth the names of the dealers and the terms of the transaction in the Prospectus Supplement.

Distribution Through At-the-Market Offerings

We may engage in at-the-market offerings to or through a market maker or into an existing trading market, on an exchange or otherwise, in accordance with Rule 415(a)(4). An at-the-market offering may be through one or more underwriters or dealers, including but not limited to UBS Securities LLC, acting as principal or agent for us.

General Information

Agents, underwriters, or dealers participating in an offering of our securities may be deemed to be underwriters, and any discounts and commissions received by them and any profit realized by them on resale of the offered securities for whom they may act as agent, may be deemed to be underwriting discounts and commissions under the Securities Act.

We may offer to sell our securities either at a fixed price or at prices that may vary, at market prices prevailing at the time of sale, at prices related to prevailing market prices, or at negotiated prices.

If indicated in the applicable Prospectus Supplement, we may authorize underwriters or other persons acting as our agents to solicit offers by certain institutions to purchase securities from us pursuant to contracts providing for payment and delivery on a future date. Institutions with which these contracts may be made include: commercial and savings banks, insurance companies, pension funds, educational and charitable institutions and others, but in all cases these institutions must be approved by us. The obligations of any purchaser under any contract will be subject only to those conditions described in the applicable Prospectus Supplement. The underwriters and the other agents will not have any responsibility for the validity or performance of the contracts. The applicable Prospectus Supplement will describe the commission payable for solicitation of those contracts.

In connection with any offering of the securities in an underwritten transaction, the underwriters may engage in transactions that stabilize, maintain, or otherwise affect the market price of the Common Shares. Those transactions may include over-allotment, entering stabilizing bids, effecting syndicate covering transactions, and reclaiming selling concessions allowed to an underwriter or a dealer.

- An over-allotment in connection with an offering creates a short position in the offered securities for the underwriters' own account.
- An underwriter may place a stabilizing bid to purchase an offered security for the purpose of pegging, fixing, or maintaining the price of that security.
- Underwriters may engage in syndicate covering transactions to cover over-allotments or to stabilize the price of the offered securities by bidding for, and purchasing, the offered securities or any other securities in the open market in order to reduce a short position created in connection with the offering.
- The managing underwriter may impose a penalty bid on a syndicate member to reclaim a selling concession in connection with an offering when offered securities originally sold by the syndicate member are purchased in syndicate covering transactions or otherwise.

Any of these activities may stabilize or maintain the market price of the securities above independent market levels. The underwriters are not required to engage in these activities, and may end any of these activities at any time.

Any underwriters that are qualified market makers on the Exchange may engage in passive market making transactions in our securities on the Exchange in accordance with Regulation M under the Securities Exchange Act of 1934, as amended, during the business day prior to the pricing of the offering, before the commencement of offers or sales of the Common Shares. Passive market makers must comply with applicable volume and price limitations and must be identified as passive market makers. In general, a passive market maker must display its bid at a price not in excess of the highest independent bid for such security; if all independent bids are lowered below the passive market maker's bid, however, the passive market maker's bid must then be lowered when certain purchase limits are exceeded. Passive market making may stabilize the market price of the securities at a level above that which might otherwise prevail in the open market and, if commenced, may be discontinued at any time.

We will not require underwriters or dealers to make a market in the Common Shares. Any underwriters to whom the offered securities are sold for offering and sale may make a market in the offered securities, but the underwriters will not be obligated to do so and may discontinue any market-making at any time without notice.

Under agreements entered into with us, underwriters and agents may be entitled to indemnification by us against certain civil liabilities, including liabilities under the Securities Act, or to contribution for payments the underwriters or agents may be required to make. The underwriters, agents, and their affiliates may engage in financial or other business transactions with us and our subsidiaries, if any, in the ordinary course of business.

The aggregate offering price specified on the cover of this Prospectus relates to the offering of the securities not yet issued as of the date of this Prospectus. The place and time of delivery for the offered securities in respect of which this Prospectus is delivered are set forth in the accompanying Prospectus Supplement.

To the extent permitted under the 1940 Act and the rules and regulations promulgated thereunder, the underwriters may from time to time act as a broker or dealer and receive fees in connection with the execution of our portfolio transactions after the underwriters have ceased to be underwriters and, subject to certain restrictions, each may act as a broker while it is an underwriter.

A Prospectus and accompanying Prospectus Supplement in electronic form may be made available on the websites maintained by the underwriters. The underwriters may agree to allocate our securities for sale to their

online brokerage account holders. Such allocations of our securities for internet distributions will be made on the same basis as other allocations. In addition, our securities may be sold by the underwriters to securities dealers who resell securities to online brokerage account holders.

Dividend Reinvestment Plan

We may issue and sell Common Shares pursuant to our DRIP.

CUSTODIAN AND TRANSFER AGENT

The custodian of the assets of the Fund is The Bank of New York Mellon located at 240 Greenwich Street, New York, New York 10286. Computershare Inc., located at 150 Royall Street, Canton, Massachusetts 02021, serves as the Fund's transfer agent and dividend paying agent with respect to the Common Shares.

LEGAL MATTERS

Simpson Thacher & Bartlett LLP is counsel to the Fund. Richards, Layton & Finger, P.A. has opined on certain matters of Delaware law relating to the offering of the securities and the legality of the securities to be offered hereby.

INCORPORATION BY REFERENCE

As noted above, this prospectus is part of a registration statement filed with the SEC. Pursuant to the final rule and form amendments adopted by the SEC on April 8, 2020, the Fund is permitted to "incorporate by reference" certain information filed with the SEC, which means that the Fund can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus, and later information that the Fund files with the SEC will automatically update and supersede this information.

The documents listed below, and any reports and other documents subsequently filed with the SEC pursuant to Rule 30(b)(2) under the 1940 Act and Sections 13(a), 13(c), 14 or 15(d) of the Exchange Act, prior to the termination of the offering will be incorporated by reference into this Prospectus and deemed to be part of this Prospectus from the date of the filing of such reports and documents:

- the Fund's Statement of Additional Information, dated January 26, 2022 filed with the accompanying Prospectus;
- the Fund's Semi-Annual Report on Form N-CSR, filed on September 7, 2021;
- the Fund's Annual Report on Form N-CSR, filed on March 5, 2021;
- the Fund's Proxy Statement on Form DEF 14, filed on March 5, 2021; and
- the Fund's description of Common Shares on Form N-8A, filed on March 5, 2010.

You may obtain copies of any information incorporated by reference into this prospectus, at no charge, by calling toll-free (888) 777-0102 or by writing to the Fund at 620 Eighth Avenue, 47th Floor, New York, NY 10018. The Fund's periodic reports filed pursuant to Section 30(b)(2) of the 1940 Act and Sections 13 and 15(d) of the Exchange Act, as well as this Prospectus and the Statement of Additional Information, are available on the Fund's website <http://www.blackstone.com/bsl/>. In addition, the SEC maintains a website at www.sec.gov, free of charge, that contains these reports, the Fund's proxy and information statements, and other information relating to the Fund.

PRIVACY POLICY

This privacy policy sets forth the Adviser’s policies with respect to nonpublic personal information of individual investors, shareholders, prospective investors and former investors of investment funds managed by the Adviser. These policies apply to individuals only and are subject to change.

GDPR PRIVACY STATEMENT

INVESTOR DATA PRIVACY NOTICE

1. Why are you seeing this notice?

- You may need to provide Personal Data to us as part of your investment into a fund or other investment vehicle (as applicable, the **Fund**) managed or advised by investment advisers that are subsidiaries of The Blackstone Group Inc. or its affiliates (and, where applicable, the general partner of the relevant Fund) (collectively, **Blackstone**).
- We want you to understand how and why we use, store and otherwise process your Personal Data when you deal with us or our relevant affiliates (including under applicable data protection laws). If this notice (the **Data Privacy Notice**) has been made available to you, you may have certain rights with respect to your Personal Data under applicable data protection laws (including as described in this Data Privacy Notice).
- “**Personal Data**” has the meaning given to it under data protection laws that apply to our processing of your personal information, and includes any information that relates to, describes, identifies or can be used, directly or indirectly, to identify an individual (such as name, address, date of birth, personal identification numbers, sensitive personal information, and economic information).
- We ask that investors promptly provide the information contained in this Data Privacy Notice to any individuals whose Personal Data they provide to the Fund or its affiliates in connection with ‘know your client’/anti-money laundering requests or otherwise.

Please read the information below carefully. It explains how and why Personal Data is processed by us.

2. Who is providing this notice?

Blackstone is committed to protecting and respecting your privacy. Blackstone is a global financial services firm with offices, operations and entities globally, including as described at this link: <https://www.blackstone.com/privacy#appendixA>.

- For transparency, the Blackstone entities on whose behalf this privacy statement is made are: (i) the Fund; and (ii) where applicable, the Blackstone general partner and/or investment adviser of the relevant Fund, in each case, with which you contract, transact or otherwise share Personal Data (together, the **Fund Parties**).
- Where we use the terms “**we**”, “**us**” and “**our**” in this Data Privacy Notice, we are referring to the Fund and the Fund Parties.
- Please consult your subscription documents, private placement memorandum or other offering documentation provided to you by or on behalf of the Fund Parties which will further specify the entities and contact details of the Fund Parties relevant to our relationship with you.
- We welcome investors and their representatives to contact us if they have any queries with respect to the Fund Parties (in particular, which Fund Parties are relevant to their relationship with Blackstone). If you have any queries, our contact details are below.

When you provide us with your Personal Data, each Fund Party that decides how and why Personal Data is processed acts as a “**data controller**”. In simple terms, this means that the Fund Party makes certain decisions on how to use and protect your Personal Data – but only to the extent that we have informed you about the use or are otherwise permitted by law.

Where your Personal Data is processed by an entity controlled by, or under common control with, the Blackstone entity/ies managing a Fund for its own purposes, this entity will also be a data controller.

3. What Personal Data do we collect about you?

The types of Personal Data that we collect and share depends on the product or service you have with us and the nature of your investment.

The Personal Data collected about you will help us to provide you with a better service and facilitate our business relationship.

We may combine Personal Data that you provide to us with Personal Data that we collect from you, or about you from other sources, in some circumstances. This will include Personal Data collected in an online or offline context.

As a result of our relationship with you as an investor, in the past 12 months we may have collected Personal Data concerning you in the following categories:

- a) Identifiers (*e.g.*, real name, alias, postal address, email address, social security or driver's licence number, government ID, signature, telephone number, education, employment, employment history, financial information, including tax-related information/codes and bank account details, information used for monitoring and background checks to comply with laws and regulations, including 'know your client', anti-money laundering, and sanctions checks, online registration details, and other contact information);
- b) Sensitive/protected characteristic information (*e.g.*, age/date of birth, nationality, citizenship, country of residence, gender, and other information used to comply with laws and regulations);
- c) Commercial information (*e.g.*, assets, income, transaction and investment history, accounts at other institutions, financial positions/returns, information concerning source of funds and any applicable restrictions on your investment such as political exposure or sanctions);
- d) Internet or other network activity (*e.g.*, browsing or search history, information regarding interaction with an internet website, application, or advertisement, online identifiers such as cookies);
- e) Sensory and surveillance data (*e.g.*, recordings of telephone calls where permitted or required by law, video (surveillance) recordings, closed-circuit television (CCTV) images and recordings, and other records of your interactions with us or our service providers, including electronic communications);
- f) Professional or employment-related information (*e.g.*, current or past job history); and
- g) Inferences drawn from other personal information (*e.g.*, profiles reflecting preferences and trends, based on information such as assets, investment experience, risk tolerance, investment activity, and transaction history).

4. Where do we obtain your Personal Data?

We collect, and have collected, Personal Data about you from a number of sources, including from you directly:

WHAT	HOW
<p>1 <i>Personal Data that you give us</i></p>	<ul style="list-style-type: none"> • from the forms and any associated documentation that you complete when subscribing for an investment, shares, interests, and/or opening an account with us. This can include information about your name, address, date of birth, passport details or other national identifier, driving licence, your national insurance or social security number and income, employment information and details about your investment or retirement portfolio(s), and financial-related data (such as returns and financial positions) • when you provide it to us in correspondence and conversations, including electronic communications such as email and telephone calls • when you make transactions with respect to the Fund • when you interact with our online platforms and websites (such as bxaccess.com) • when you purchase securities from us and/or tell us where to send money • from cookies, web beacons, and similar interactions when you or your devices access our sites
<p>2 <i>Personal Data that we obtain from others</i></p>	<ul style="list-style-type: none"> • when we need to identify you and/or complete necessary security checks, where you visit one of our buildings or attend meetings. This can include form of ID, and your image for CCTV purposes. <p>We obtain Personal Data from:</p> <ul style="list-style-type: none"> • publicly available and accessible directories and sources • bankruptcy registers • tax authorities, including those that are based outside the territory in which you are located or domiciled, including the Cayman Islands, the United Kingdom (UK) and the European Economic Area (EEA), if you are subject to tax in another jurisdiction • governmental and competent regulatory authorities to whom we have regulatory obligations • credit agencies • fraud prevention and detection agencies/organisations • transaction counterparties

5. Why do we process your Personal Data?

We may process or disclose your Personal Data for the following reasons:

WHY	HOW
<p>1 <i>Contract</i></p>	<p>It is necessary to perform our contract with you to:</p> <ul style="list-style-type: none"> • administer, manage and set up your investor account(s) to allow you to purchase your holding (of shares or interests) in our Funds • meet the resulting contractual obligations we have to you • facilitate the continuation or termination of the contractual relationship between you and the Fund • facilitate the transfer of funds, and administering and facilitating any other transaction, between you and the Fund
<p>2 <i>Compliance with law</i></p>	<p>It is necessary for compliance with an applicable legal or regulatory obligation to which we are subject, in order to:</p> <ul style="list-style-type: none"> • undertake our client and investor due diligence, and on-boarding checks • carry out verification, ‘know your client’, terrorist financing, sanctions, and anti-money laundering checks • verify the identity and addresses of our investors (and, if applicable, their beneficial owners) • comply with requests from regulatory, governmental, tax and law enforcement authorities • carry out surveillance and investigations • carry out audit checks • maintain statutory registers • prevent and detect fraud • comply with sanctions requirements
<p><i>Legitimate interests</i></p>	<p>For our legitimate interests or those of a third party (such as a transaction counterparty or lender) to:</p> <ul style="list-style-type: none"> • manage and administer your holding in any Funds in which you are invested, and any related accounts on an ongoing basis • assess and process any applications or requests made by you • open, maintain or close accounts in connection with your investment in, or withdrawal from, the Fund scheme • send updates, information and notices or otherwise correspond with you in connection with your investment in the Fund scheme • address or investigate any complaints, claims, proceedings or disputes • provide you with, and inform you about, our investment products and services • monitor and improve our relationships with investors • comply with applicable regulatory obligations, including anti-money laundering, sanctions and ‘know your client’ checks

WHY

HOW

- assist our transaction counterparties to comply with their regulatory and legal obligations (including anti-money laundering, 'know your client' and sanctions checks)
- manage our risk and operations
- comply with our accounting and tax reporting requirements
- comply with our audit requirements
- assist with internal compliance with our policies and processes
- ensure appropriate group management and governance
- keep our internal records
- prepare reports on incidents/accidents
- protect our business against fraud, breach of confidence, theft of proprietary materials, and other financial or business crimes (to the extent that this is not required of us by law)
- analyse and manage commercial risks
- seek professional advice, including legal advice
- enable any actual or proposed assignee or transferee, participant or sub-participant of the partnership's or Fund vehicles' rights or obligations to evaluate proposed transactions
- facilitate business asset transactions involving the Fund partnership or Fund-related vehicles
- monitor communications to/from us using our systems
- protect the security and integrity of our information technology systems
- protect the security and safety of our buildings and locations where we operate
- operate, run and schedule online meetings, webinars and conferences (for example, using Zoom and other online meeting platforms)
- manage our financing arrangements with our financiers and financing transaction counterparties, including payment providers, intermediaries, and correspondent/agent banks
- We only rely on these interests where we have considered that, on balance, the legitimate interests are not overridden by your interests, fundamental rights or freedoms.

Monitoring as described at (3) above

We monitor communications where the law requires us to do so. We will also monitor where we are required to do so to comply with our regulatory rules and practices and, where we are permitted to do so, to protect our business and the security of our systems.

6. Who we share your Personal Data with

Your Personal Data will be shared with:

WHO	WHY
<i>Fund Associates</i>	<p>We share your Personal Data with our associates, related parties and members of our group. This is:</p> <ul style="list-style-type: none"> to manage our relationship with you for the legitimate interests of a third party in carrying out anti-money laundering and compliance checks required of them under applicable laws and regulations for the purposes set out in this Data Privacy Notice
<i>Fund Managers, Depositories, Administrators, Custodians, Investment Advisers</i>	<ul style="list-style-type: none"> delivering the services you require managing your investment supporting and administering investment-related activities complying with applicable investment, anti-money laundering and other laws and regulations
<i>Tax Authorities</i>	<ul style="list-style-type: none"> to comply with applicable laws and regulations where required or requested by tax authorities in the territory in which you are located or domiciled (in particular, Cayman Island or UK/EEA tax authorities) who, in turn, may share your Personal Data with foreign tax authorities where required or requested by foreign tax authorities, including outside of the territory in which you are located or domiciled (including outside the Cayman Islands or UK/EEA)
<i>Service Providers</i>	<ul style="list-style-type: none"> delivering and facilitating the services needed to support our business relationship with you supporting and administering investment-related activities where disclosure to the service provider is considered necessary to support Blackstone with the purposes described in section 5 of this Data Privacy Notice
<i>Financing Counterparties, Lenders, Correspondent and Agent Banks</i>	<ul style="list-style-type: none"> assisting these transaction counterparties with regulatory checks, such as ‘know your client’, and anti-money laundering procedures sourcing credit for Fund-related entities in the course of our transactions and fund life cycles
<i>Our Lawyers, Auditors and other Professional Advisers</i>	<ul style="list-style-type: none"> providing you with investment-related services to comply with applicable legal and regulatory requirements

In exceptional circumstances, we will share your Personal Data with:

- competent regulatory, prosecuting and other governmental agencies or litigation counterparties, in any country or territory; and
- other organisations and agencies – where we are required to do so by law.

For California residents, in the preceding 12 months, we may have disclosed Personal Data listed in any of the categories in section 3 above for a business purpose (in particular, as described in this section).

We have not sold Personal Data in the 12 months preceding the date of this Data Privacy Notice.

7. Do you have to provide us with this Personal Data?

Where we collect Personal Data from you, we will indicate if:

- provision of the Personal Data is necessary for our compliance with a legal obligation; or
- it is purely voluntary and there are no implications for you if you do not wish to provide us with it.
- Unless otherwise indicated, you should assume that we require the Personal Data for business and/or compliance purposes.

Some of the Personal Data that we request is necessary for us to perform our contract with you and if you do not wish to provide us with this Personal Data, it will affect our ability to provide our services to you and manage your investment.

8. Sending your Personal Data internationally

We will transfer your Personal Data between different countries to our affiliates and group members, members of the Fund's partnership, transaction counterparties, and third party service providers. These countries may not have similarly strict data protection and privacy laws, and will include those countries in which our affiliates and service providers operate (and may include, for example, transfers from the UK/EEA, Cayman Islands, Australia, Hong Kong, Japan or Singapore to a jurisdiction outside of such territory).

Where we transfer Personal Data to other members of our group, our service providers or another third party recipient from one country to another, we will ensure that our arrangements with them are governed by data transfer agreements or appropriate safeguards, designed to ensure that your Personal Data is protected as required under applicable data protection law (including, where appropriate, under an agreement on terms approved for this purpose by the European Commission or by obtaining your consent).

Please contact us if you would like to know more about these agreements or receive a copy of them. Please see below for our contact details.

9. Consent – and your right to withdraw it

Except as may otherwise be required by local law, we do not generally rely on obtaining your consent to process your Personal Data. In particular, we do not generally rely on obtaining your consent where our processing of your personal data is subject only to the data protection laws of the UK/EEA (in these circumstances we will usually rely on another legal basis more appropriate in the circumstances, including those set out in section 5 above). If we do rely on consent for processing of your Personal Data, you have the right to withdraw this consent at any time. Please contact us or send us an email at PrivacyQueries@Blackstone.com at any time if you wish to do so.

Where required by applicable law, we will obtain your consent for the processing of your Personal Data for direct marketing purposes. If you do receive direct marketing communications from us (for example, by post, email, fax or telephone), you may opt-out by clicking the link in the relevant communication, completing the forms provided to you (where relevant), or by contacting us (see paragraph 13 below).

10. Retention and deletion of your Personal Data

We keep your Personal Data for as long as it is required by us for our legitimate business purposes, to perform our contractual obligations or, where longer, such longer period as is required or permitted by law or regulatory obligations which apply to us.

We will generally:

- retain Personal Data about you throughout the life cycle of any investment you are involved in; and
- retain some Personal Data after your relationship with us ends.

As a general principle, we do not retain your Personal Data for longer than we need it.

We will usually delete your Personal Data (at the latest) after you cease to be an investor in any fund and there is no longer any legal/regulatory requirement, or business purpose, for retaining your Personal Data.

11. Your rights

You may, subject to certain limitations, have data protection rights depending on the data protection laws that apply to our processing of your Personal Data, including the right to:

- access your Personal Data, and some related information, including the purpose for processing the Personal Data, the categories of recipients of that Personal Data to the extent that it has been transferred internationally, and, where the Personal Data has not been collected directly from you, the source (the **category information**)
- restrict the use of your Personal Data in certain circumstances
- have incomplete or inaccurate Personal Data corrected
- ask us to stop processing your Personal Data
- require us to delete your Personal Data in some limited circumstances

You also have the right in some circumstances to request us to “port” your Personal Data in a portable, re-usable format to other organisations (where this is possible).

California residents may also request certain information about our disclosure of Personal Data during the prior year, including category information (as defined above).

We review and verify requests to protect your Personal Data, and will action data protection requests fairly and in accordance with applicable data protection laws and principles.

If you wish to exercise any of these rights, please contact us (details below).

12. Concerns or queries

We take your concerns very seriously. We encourage you to bring it to our attention if you have any concerns about our processing of your Personal Data. This Data Privacy Notice was drafted with simplicity and clarity in mind. We are, of course, happy to provide any further information or explanation needed. Our contact details are below.

Please also contact us via any of the below contact methods if you have a disability and require an alternative format of this Data Privacy Notice

If you want to make a complaint, you can also contact the body regulating data protection in your country, where you live or work, or the location where the data protection issue arose. In particular:

<i>Country</i>	Supervisory Authority
<i>Cayman Islands</i>	Cayman Islands Ombudsman (available at: https://ombudsman.ky)
<i>European Union</i>	A list of the EU data protection authorities and contact details is available by clicking this link: http://ec.europa.eu/newsroom/article29/item-detail.cfm?item_id=612080
<i>United Kingdom</i>	Information Commissioner's Office (available at: https://ico.org.uk/global/contact-us/)

13. Contact us

Please contact us if you have any questions about this Data Privacy Notice or the Personal Data we hold about you.

Contact us by **email** or access our web form by emailing PrivacyQueries@Blackstone.com.

Contact us in **writing** using this address:

<i>Address</i>	<u>For EU/UK related queries:</u> 40 Berkeley Square, London, W1J 5AL, United Kingdom <u>All other queries:</u> 345 Park Avenue, New York, NY 10154
----------------	--

A list of country-specific addresses and contacts for locations where we operate is available at <https://www.blackstone.com/privacy#appendixA>.

14. Changes to this Data Privacy Notice

We keep this Data Privacy Notice under regular review. Please check regularly for any updates at our investor portal (www.bxaccess.com).

This Data Privacy Notice was last updated on December 15, 2020.

**BLACKSTONE
SENIOR FLOATING RATE TERM FUND**

STATEMENT OF ADDITIONAL INFORMATION

Blackstone Senior Floating Rate Term Fund (the “Fund”) is a diversified, closed-end management investment company. This Statement of Additional Information relating to the common shares of beneficial interest (“Common Shares”) of the Fund does not constitute a prospectus, but should be read in conjunction with the prospectus relating thereto dated January 26, 2022 (“Prospectus”). This Statement of Additional Information, which is not a prospectus, does not include all information that a prospective investor should consider before purchasing Common Shares, and investors should obtain and read the Prospectus prior to purchasing such shares. A copy of the Prospectus may be obtained without charge by calling toll-free (844) 702-1299. You may also obtain a copy of the Prospectus on the Securities and Exchange Commission’s Web site (<http://www.sec.gov>). *Capitalized terms used but not defined in this Statement of Additional Information have the meanings ascribed to them in the Prospectus.*

This Statement of Additional Information is dated January 26, 2022.

Appendix A—Description of S&P, Moody’s and Fitch Ratings	A-1
Appendix B—Proxy Voting Policies and Procedures of the Adviser	B-1

INVESTMENT OBJECTIVES

The Fund's primary investment objective is to seek high current income, with a secondary objective to seek preservation of capital, consistent with its primary goal of high current income. There can be no assurance that the Fund will achieve its investment objectives. Under normal market conditions, the Adviser expects the Fund to maintain an average duration of less than one year (including the effect of anticipated leverage).

The Fund will pursue its investment objectives by investing primarily in Senior Loans. Senior Loans are made to U.S. and, to a limited extent, non-U.S. corporations, partnerships and other business entities which operate in various industries and geographical regions. Senior Loans pay interest at rates which are determined periodically by reference to a base lending rate, primarily LIBOR, or a replacement rate in the event that LIBOR is discontinued, plus a premium.

INVESTMENT RESTRICTIONS

Fundamental Restrictions

Except as described below, the Fund, as a fundamental policy, may not, without the approval of the holders of a majority of the outstanding Common Shares and preferred Shares ("Preferred Shares" and collectively with Common Shares, the "Shares"), if any, voting together as a single class, and of the holders of a majority of the outstanding Shares, voting as a separate class:

(1) invest 25% or more of the value of its total assets in any one industry, provided that securities issued or guaranteed by the U.S. government or its agencies or instrumentalities ("U.S. government securities") and tax-exempt securities of governments or their political subdivisions will not be considered to represent an industry;

(2) issue senior securities or borrow money to purchase additional securities other than as permitted by the Investment Company Act of 1940, as amended (the "1940 Act");

(3) make loans to other persons, except as permitted by (i) the 1940 Act, or interpretations or modifications by the Securities and Exchange Commission (the "SEC"), the SEC staff or other authority with appropriate jurisdiction, or (ii) exemptive or other relief or permission from the SEC, the SEC staff or other authority;

(4) underwrite the securities of other issuers, except to the extent that, in connection with the disposition of portfolio securities or the sale of its own securities, the Fund may be deemed to be an underwriter;

(5) purchase or sell real estate, except that the Fund may invest in securities or other interests of companies that deal in real estate or are engaged in the real estate business and instruments secured by real estate or interests therein, and the Fund may acquire, hold and sell real estate acquired through default, liquidation, or other distributions of an interest in real estate as a result of the Fund's ownership of such other assets; or

(6) purchase or sell physical commodities unless acquired as a result of ownership of securities or other instruments (but this shall not prevent the Fund from purchasing or selling options, futures contracts or derivative instruments or from investing in securities or other instruments backed by physical commodities).

For purposes of applying the limitation set forth in subparagraph (1) above, securities of the U.S. government, its agencies or instrumentalities and securities backed by the credit of a U.S. governmental entity are not considered to represent industries. If the Fund were to "concentrate" its investments in a particular industry, investors would be exposed to greater risks because the Fund's performance would be largely dependent on that industry's performance.

With respect to the limitation regarding the issuance of senior securities set forth in subparagraph (2) above, “senior securities” are defined as any bond, debenture, note, or similar obligation or instrument constituting a security and evidencing indebtedness, and any stock of a class having priority over any other class as to distribution of assets or payment of dividends.

The ability of a closed-end fund to issue senior securities is severely circumscribed by complex regulatory constraints under the 1940 Act that restrict, for instance, the amount, timing and form of senior securities that may be issued. Certain portfolio management techniques, such as credit default swaps, the purchase of securities on margin, short sales or the writing of puts on portfolio securities, may be considered senior securities unless appropriate steps are taken to segregate the Fund’s assets or otherwise cover its obligations. To the extent the Fund covers its commitment under these transactions, including by the segregation of liquid assets, equal in value to the amount of the Fund’s commitment, such instrument will not be considered a “senior security” by the Fund and therefore will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by the Fund.

Under the Investment Company Act, a “senior security” does not include any promissory note or evidence of indebtedness where such loan is for temporary purposes only and in an amount not exceeding 5% of the value of the total assets of the issuer at the time the loan is made. A loan is presumed to be for temporary purposes if it is repaid within sixty days and is not extended or renewed.

Section 18(a) of the 1940 Act requires certain actions by the Fund if its asset coverage falls below certain levels. Under the 1940 Act, the Fund is not permitted to issue Preferred Shares unless immediately after such issuance the value of the Fund’s total assets, less all liabilities and indebtedness of the Fund other than senior securities, is at least 200% of the liquidation value of the outstanding Preferred Shares (*i.e.*, the liquidation value may not exceed 50% of the Fund’s total assets, less all liabilities and indebtedness of the Fund other than senior securities). In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless, at the time of such declaration, the value of the Fund’s total assets is at least 200% of the liquidation value of its outstanding Preferred Shares plus its outstanding liabilities and indebtedness. If Preferred Shares are issued, the Fund may purchase or redeem Preferred Shares from time to time to the extent necessary in order to maintain assets coverage of any Preferred Shares of at least 200%.

The 1940 Act requires the Fund to maintain at all times an asset coverage of at least 300% of the amount of its borrowings. For the purpose of borrowing money, “asset coverage” means the ratio that the value of the Fund’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Certain trading practices and investments may be considered to be borrowings and thus subject to the 1940 Act restrictions. On the other hand, certain practices and investments may involve leverage but are not considered to be borrowings under the 1940 Act.

With respect to the limitation regarding making loans to other persons set forth in subparagraph (3) above, the 1940 Act does not prohibit a fund from making loans; however, SEC staff interpretations currently prohibit funds from lending more than one third of their total assets, except through the purchase of debt obligations or the use of repurchase agreements. A repurchase agreement is an agreement to purchase a security, coupled with an agreement to sell that security back to the original seller on an agreed-upon date at a price that reflects current interest rates. The SEC frequently treats repurchase agreements as loans.

With respect to the limitation regarding underwriting the securities of other issuers set forth in subparagraph (4) above, a technical provision of the Securities Act of 1933, as amended (the “Securities Act”) deems certain persons to be “underwriters” if they purchase a security from an issuer and later sell it to the public. Although it is not believed that the application of this Securities Act provision would cause a fund to be engaged in the business of underwriting, the policy set forth in subparagraph (4) will be interpreted not to prevent the Fund from engaging in transactions involving the acquisition or disposition of portfolio securities, regardless of whether the Fund may be considered to be an underwriter under the Securities Act. Under the Securities Act, an underwriter may be liable for material omissions or misstatements in an issuer’s registration statement or prospectus.

When used with respect to particular Shares of the Fund, “majority of the outstanding voting securities” means (i) 67% or more of the Shares present at a meeting of shareholders, if the holders of more than 50% of the Shares are present or represented by proxy or (ii) more than 50% of the Shares, whichever is less. Except for the fundamental policies disclosed above, all other policies of the Fund disclosed herein and in the Prospectus are non-fundamental policies which may be changed by the Board of Trustees of the Fund (the “Board”) without shareholder approval.

Non-Fundamental Restrictions

The Fund is also subject to the following non-fundamental restrictions and policies, which may be changed by the board of trustees without the approval of the holders of a majority of the outstanding Common Shares or preferred shares, if any. The Fund may not:

(1) change or alter the Fund’s investment objective; and

(2) under normal market conditions, invest less than 80% of its total assets of the Fund (including any assets attributable to money borrowed for investment purposes and including assets attributable to any preferred shares that may be outstanding) minus the sum of the Fund’s accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage) (“Managed Assets”) in senior secured, floating rate loans (“Senior Loans”). The Fund will provide shareholders with notice at least 60 days prior to changing this non-fundamental policy of the Fund unless such change was previously approved by shareholders. See “Risks.”

In addition, to comply with U.S. federal income tax requirements for qualification as a regulated investment company, the Fund’s investments will be limited in a manner such that at the close of each quarter of each taxable year, (a) no more than 25% of the value of the Fund’s total assets are invested (i) in the securities (other than U.S. government securities or securities of other regulated investment companies) of a single issuer or two or more issuers controlled (by owning 20% or more of their voting power) by the Fund and determined to be engaged in the same, similar or related trades or businesses or (ii) in the securities of one or more “qualified publicly traded partnerships” (as defined under Section 851(h) of the Internal Revenue Code of 1986, as amended (the “Code”)) and (b) with regard to at least 50% of the value of the Fund’s total assets, no more than 5% of the value of its total assets are invested in the securities (other than U.S. government securities or securities of other regulated investment companies) of a single issuer and no investment represents more than 10% of the outstanding voting securities of such issuer. These tax-related limitations may be changed by the Board only to the extent appropriate in light of changes to applicable tax requirements.

The percentage limitations applicable to the Fund’s portfolio described in the prospectus and this Statement of Additional Information apply only at the time of investment and the Fund will not be required to sell securities due to subsequent changes in the value of securities it owns.

INVESTMENT POLICIES AND TECHNIQUES

The following information supplements the discussion of the Fund's investment policies and techniques in the Prospectus.

Portfolio Contents

Senior Loans

A Senior Loan is typically originated, negotiated and structured by a U.S. or foreign commercial bank, insurance company, finance company or other financial institution (the "Agent") for a group of loan investors ("Loan Investors"). The Agent typically administers and enforces the Senior Loan on behalf of the other Loan Investors in the syndicate. In addition, an institution, typically but not always the Agent, holds any collateral on behalf of the Loan Investors.

Senior Loans primarily include senior floating rate loans to corporations and secondarily institutionally traded senior floating rate debt obligations issued by an asset-backed pool and interests therein. Loan interests primarily take the form of assignments purchased in the primary or secondary market. Loan interests may also take the form of participation interests in a Senior Loan. Such loan interests may be acquired from U.S. or foreign commercial banks, insurance companies, finance companies or other financial institutions who have made loans or are Loan Investors or from other investors in loan interests.

The Fund may purchase "Assignments" from the Agent or other Loan Investors. The purchaser of an Assignment typically succeeds to all the rights and obligations under the Loan Agreement (as defined herein) of the assigning Loan Investor and becomes a Loan Investor under the Loan Agreement with the same rights and obligations as the assigning Loan Investor. Assignments may, however, be arranged through private negotiations between potential assignees and potential assignors, and the rights and obligations acquired by the purchaser of an Assignment may differ from, and be more limited than, those held by the assigning Loan Investor.

The Fund also may invest in "Participations." Participations by the Fund in a Loan Investor's portion of a Senior Loan typically will result in the Fund having a contractual relationship only with such Loan Investor, not with the Borrower. As a result, the Fund may have the right to receive payments of principal, interest and any fees to which it is entitled only from the Loan Investor selling the Participation and only upon receipt by such Loan Investor of such payments from the Borrower. In connection with purchasing Participations, the Fund generally will have no right to enforce compliance by the Borrower with the terms of the loan agreement, nor any rights with respect to any funds acquired by other Loan Investors through set-off against the Borrower and the Fund may not directly benefit from the collateral supporting the Senior Loan in which it has purchased the Participation. As a result, the Fund will assume the credit risk of both the Borrower and the Loan Investor selling the Participation. In the event of the insolvency of the Loan Investor selling a Participation, the Fund may be treated as a general creditor of such Loan Investor. The selling Loan Investors and other persons interpositioned between such Loan Investors and the Fund with respect to such Participations will likely conduct their principal business activities in the banking, finance and financial services industries. Persons engaged in such industries may be more susceptible to, among other things, fluctuations in interest rates, changes in the Federal Open Market Committee's monetary policy, governmental regulations concerning such industries and concerning capital raising activities generally and fluctuations in the financial markets generally.

The Fund will only acquire Participations if the Loan Investor selling the Participation, and any other persons interpositioned between the Fund and the Loan Investor, at the time of investment has outstanding debt or deposit obligations rated investment grade (Baa3 or higher by Moody's or BBB- or higher by S&P or Fitch, or comparably rated by another nationally recognized rating agency) or determined by the Adviser to be of comparable quality. The effect of industry characteristics and market compositions may be more pronounced.

Indebtedness of companies whose creditworthiness is poor involves substantially greater risks, and may be highly speculative. Some companies may never pay off their indebtedness, or may pay only a small fraction of the amount owed. Consequently, when investing in indebtedness of companies with poor credit, the Fund bears a substantial risk of losing the entire amount invested.

In order to borrow money pursuant to a Senior Loan, a Borrower will for the term of the Senior Loan, pledge collateral, including but not limited to, (i) working capital assets, such as accounts receivable and inventory; (ii) tangible fixed assets, such as real property, buildings and equipment; (iii) intangible assets, such as trademarks and patent rights (but excluding goodwill) and (iv) security interests in shares of stock of subsidiaries or affiliates. In the case of Senior Loans made to non-public companies, the company's shareholders or owners may provide collateral in the form of secured guarantees and/or security interests in assets that they own. In many instances, a Senior Loan may be secured only by stock in the Borrower or its subsidiaries. Collateral may consist of assets that may not be readily liquidated, and there is no assurance that the liquidation of such assets would satisfy fully a Borrower's obligations under a Senior Loan.

In the process of buying, selling and holding Senior Loans, the Fund may receive and/or pay certain fees. These fees are in addition to interest payments received and may include facility fees, commitment fees, amendment fees, commissions and prepayment penalty fees. When the Fund buys a Senior Loan it may receive a facility fee and when it sells a Senior Loan it may pay a facility fee. On an ongoing basis, the Fund may receive a commitment fee based on the undrawn portion of the underlying line of credit portion of a Senior Loan. In certain circumstances, the Fund may receive a prepayment penalty fee upon the prepayment of a Senior Loan by a Borrower. Other fees received by the Fund may include covenant waiver fees, covenant modification fees or other amendment fees.

A Borrower must comply with various restrictive covenants contained in a loan agreement or note purchase agreement between the Borrower and the holders of the Senior Loan (the "Loan Agreement"). Such covenants, in addition to requiring the scheduled payment of interest and principal, may include restrictions on dividend payments and other distributions to shareholders, provisions requiring the Borrower to maintain specific minimum financial ratios and limits on total debt. In addition, the Loan Agreement may contain a covenant requiring the Borrower to prepay the Loan with any free cash flow. Free cash flow is generally defined as net cash flow after scheduled debt service payments and permitted capital expenditures, and includes the proceeds from asset dispositions or sales of securities. A breach of a covenant which is not waived by the Agent, or by the Loan Investors directly, as the case may be, is normally an event of acceleration; i.e., the Agent, or the Loan Investors directly, as the case may be, has the right to call the outstanding Senior Loan. The typical practice of an Agent or a Loan Investor in relying exclusively or primarily on reports from the Borrower to monitor the Borrower's compliance with covenants may involve a risk of fraud by the Borrower. In the case of a Senior Loan in the form of a Participation, the agreement between the buyer and seller may limit the rights of the holder to vote on certain changes which may be made to the Loan Agreement, such as waiving a breach of a covenant. However, the holder of the Participation will, in almost all cases, have the right to vote on certain fundamental issues such as changes in principal amount, payment dates and interest rate.

In a typical Senior Loan the Agent administers the terms of the Loan Agreement. In such cases, the Agent is normally responsible for the collection of principal and interest payments from the Borrower and the apportionment of these payments to the credit of all institutions which are parties to the Loan Agreement. The Fund will generally rely upon the Agent or an intermediate participant to receive and forward to the Fund its portion of the principal and interest payments on the Senior Loan. Furthermore, unless under the terms of a Participation Agreement the Fund has direct recourse against the Borrower, the Fund will rely on the Agent and the other Loan Investors to use appropriate credit remedies against the Borrower. The Agent is typically responsible for monitoring compliance with covenants contained in the Loan Agreement based upon reports prepared by the Borrower. The seller of the Senior Loan usually does, but is often not obligated to, notify holders of Senior Loans of any failures of compliance. The Agent may monitor the value of the collateral and, if the value of the collateral declines, may accelerate the Senior Loan, may give the Borrower an opportunity to provide

additional collateral or may seek other protection for the benefit of the participants in the Senior Loan. The Agent is compensated by the Borrower for providing these services under a Loan Agreement, and such compensation may include special fees paid upon structuring and funding the Senior Loan and other fees paid on a continuing basis. With respect to Senior Loans for which the Agent does not perform such administrative and enforcement functions, the Fund will perform such tasks on its own behalf, although a collateral bank will typically hold any collateral on behalf of the Fund and the other Loan Investors pursuant to the applicable Loan Agreement.

A financial institution's appointment as Agent may usually be terminated in the event that it fails to observe the requisite standard of care or becomes insolvent, enters Federal Deposit Insurance Corporation ("FDIC") receivership, or, if not FDIC insured, enters into bankruptcy proceedings. A successor Agent would generally be appointed to replace the terminated Agent, and assets held by the Agent under the Loan Agreement should remain available to holders of Senior Loans. However, if assets held by the Agent for the benefit of the Fund were determined to be subject to the claims of the Agent's general creditors, the Fund might incur certain costs and delays in realizing payment on a Senior Loan, or suffer a loss of principal and/or interest. In situations involving intermediate participants, similar risks may arise.

Senior Loans will usually require, in addition to scheduled payments of interest and principal, the prepayment of the Senior Loan from free cash flow, as defined above. The degree to which Borrowers prepay Senior Loans, whether as a contractual requirement or at their election, may be affected by general business conditions, the financial condition of the Borrower and competitive conditions among Loan Investors, among others. As such, prepayments cannot be predicted with accuracy. Upon a prepayment, either in part or in full, the actual outstanding debt on which the Fund derives interest income will be reduced. However, the Fund may receive both a prepayment penalty fee from the prepaying Borrower and a facility fee upon the purchase of a new Senior Loan with the proceeds from the prepayment of the former.

From time to time, Blackstone and its affiliates may borrow money from various banks in connection with their business activities. Such banks may also sell interests in Senior Loans to, or acquire them from, the Fund or may be intermediate participants with respect to Senior Loans in which the Fund owns interests. Such banks may also act as Agents for Senior Loans held by the Fund.

The Fund may acquire interests in Senior Loans which are designed to provide temporary or "bridge" financing to a Borrower pending the sale of identified assets or the arrangement of longer-term loans or the issuance and sale of debt obligations. The Fund may also invest in Senior Loans of Borrowers that have obtained bridge loans from other parties. A Borrower's use of bridge loans involves a risk that the Borrower may be unable to locate permanent financing to replace the bridge loan, which may impair the Borrower's perceived creditworthiness.

The Fund will be subject to the risk that collateral securing a loan will decline in value or have no value. Such a decline, whether as a result of bankruptcy proceedings or otherwise, could cause the Senior Loan to be undercollateralized or unsecured. In most credit agreements there is no formal requirement to pledge additional collateral. In addition, the Fund may invest in Senior Loans guaranteed by, or secured by assets of, shareholders or owners, even if the Senior Loans are not otherwise collateralized by assets of the Borrower; provided, however, that such guarantees are fully secured. There may be temporary periods when the principal asset held by a Borrower is the stock of a related company, which may not legally be pledged to secure a Senior Loan. On occasions when such stock cannot be pledged, the Senior Loan will be temporarily unsecured until the stock can be pledged or is exchanged for or replaced by other assets, which will be pledged as security for the Senior Loan. However, the Borrower's ability to dispose of such securities, other than in connection with such pledge or replacement, will be strictly limited for the protection of the holders of Senior Loans and, indirectly, Senior Loans themselves.

If a Borrower becomes involved in bankruptcy proceedings, a court may invalidate the Fund's security interest in the loan collateral or subordinate the Fund's rights under the Senior Loan to the interests of the

Borrower's unsecured creditors or cause interest previously paid to be refunded to the Borrower. If a court required interest to be refunded, it could negatively affect the Fund's performance. Such action by a court could be based, for example, on a "fraudulent conveyance" claim to the effect that the Borrower did not receive fair consideration for granting the security interest in the loan collateral to the Fund. For Senior Loans made in connection with a highly leveraged transaction, consideration for granting a security interest may be deemed inadequate if the proceeds of the Loan were not received or retained by the Borrower, but were instead paid to other persons (such as shareholders of the Borrower) in an amount which left the Borrower insolvent or without sufficient working capital. There are also other events, such as the failure to perfect a security interest due to faulty documentation or faulty official filings, which could lead to the invalidation of the Fund's security interest in loan collateral. If the Fund's security interest in loan collateral is invalidated or the Senior Loan is subordinated to other debt of a Borrower in bankruptcy or other proceedings, the Fund would have substantially lower recovery, and perhaps no recovery, on the full amount of the principal and interest due on the Senior Loan.

The Fund may acquire warrants and other equity securities as part of a unit combining a Senior Loan and equity securities of a Borrower or its affiliates. The acquisition of such equity securities will only be incidental to the Fund's purchase of a Senior Loan. The Fund may also acquire equity securities or credit securities (including non-dollar denominated equity or credit securities) issued in exchange for a Senior Loan or issued in connection with the debt restructuring or reorganization of a Borrower, or if such acquisition, in the judgment of Blackstone Liquid Credit Strategies LLC (the "Adviser") may enhance the value of a Senior Loan or would otherwise be consistent with the Fund's investment policies.

Subordinated Loans

The Fund may invest in Subordinated Loans, which have the same characteristics as Senior Loans except that such loans are subordinated in payment and/or in lien priority to first lien holders. Accordingly, the risks associated with Subordinated Loans are higher than the risk of loans with first priority over the collateral. In the event of default on a Subordinated Loans, the first priority lien holder has first claim to the underlying collateral of the loan. It is possible that no collateral value would remain for the second priority lien holder and therefore result in a loss of investment to the Fund.

Subordinated Loans generally are subject to similar risks as those associated with investments in Senior Loans. Because Subordinated Loans are subordinated and thus lower in priority of payment and/or in priority of lien to Senior Loans, they are subject to the additional risk that the cash flow of the borrower and property securing the loan or debt, if any, may be insufficient to meet scheduled payments after giving effect to the senior unsecured or senior secured obligations of the borrower. This risk is generally higher for subordinated unsecured loans or debt, which are not backed by a security interest in any specific collateral. Subordinated Loans generally have greater price volatility than Senior Loans and may be less liquid. There is also a possibility that originators will not be able to sell participations in Subordinated Loans, which would create greater credit risk exposure for the holders of such loans. Subordinated Loans share the same risks as other below investment grade instruments.

Restricted and Illiquid Securities

The Fund may not be able to readily dispose of illiquid securities at prices that approximate those at which the Fund could sell such securities if they were more widely traded and, as a result of such illiquidity, the Fund may have to sell other investments or engage in borrowing transactions if necessary to raise cash to meet its obligations.

The Fund may purchase certain securities eligible for resale to qualified institutional buyers as contemplated by Rule 144A under the Securities Act of 1933, as amended (the "Securities Act") ("Rule 144A Securities"). Rule 144A provides an exemption from the registration requirements of the Securities Act for the resale of certain restricted securities to certain qualified institutional buyers. One effect of Rule 144A is that certain restricted securities may be considered liquid, though no assurance can be given that a liquid market for

Rule 144A Securities will develop or be maintained. However, where a substantial market of qualified institutional buyers has developed for certain unregistered securities purchased by the Fund pursuant to Rule 144A under the Securities Act, the Fund intends to treat such securities as liquid securities in accordance with procedures approved by the Fund's board of trustees. Because it is not possible to predict with assurance how the market for Rule 144A Securities will develop, the Fund's board of trustees has directed the Adviser to monitor carefully the Fund's investments in such securities with particular regard to trading activity, availability of reliable price information and other relevant information. To the extent that, for a period of time, qualified institutional buyers cease purchasing restricted securities pursuant to Rule 144A, the Fund's investing in such securities may have the effect of increasing the level of illiquidity in its investment portfolio during such period.

Rights Offerings and Warrants to Purchase

The Fund may participate in rights offerings and may purchase warrants, which are privileges issued by corporations enabling the owners to subscribe to and purchase a specified number of shares of the corporation at a specified price during a specified period of time. Subscription rights normally have a short life span to expiration. The purchase of rights or warrants involves the risk that the Fund could lose the purchase value of a right or warrant if the right to subscribe to additional shares is not exercised prior to the rights' and warrants' expiration. Also, the purchase of rights and/or warrants involves the risk that the effective price paid for the right and/or warrant added to the subscription price of the related security may exceed the value of the subscribed security's market price such as when there is no movement in the level of the underlying security.

Equity Securities

In addition to common stocks, the Fund may invest in equity securities, including preferred stocks, convertible securities, warrants and depository receipts.

Preferred Stock. Preferred stock has a preference over common stock in liquidation (and generally dividends as well) but is subordinated to the liabilities of the issuer in all respects. As a general rule, the market value of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the market price of convertible preferred stock generally also reflects some element of conversion value. Because preferred stock is junior to credit securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior credit security with similar stated yield characteristics. Unlike interest payments on credit securities, preferred stock dividends are payable only if declared by the issuer's board of trustees. Preferred stock also may be subject to optional or mandatory redemption provisions.

Convertible Securities. A convertible security is a bond, debenture, note, preferred stock or other security that may be converted into or exchanged for a prescribed amount of common stock or other equity security of the same or a different issuer within a particular period of time at a specified price or formula. A convertible security entitles the holder to receive interest paid or accrued on debt or the dividend paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities have characteristics similar to nonconvertible income securities in that they ordinarily provide a stable stream of income with generally higher yields than those of common stocks of the same or similar issuers, but lower yields than comparable nonconvertible securities. The value of a convertible security is influenced by changes in interest rates, with investment value declining as interest rates increase and increasing as interest rates decline. The credit standing of the issuer and other factors also may have an effect on the convertible security's investment value. Convertible securities rank senior to common stock in a corporation's capital structure but are usually subordinated to comparable nonconvertible securities. Convertible securities may be subject to redemption at the option of the issuer at a price established in the convertible security's governing instrument.

Warrants. Warrants are privileges issued by corporations enabling the owners to subscribe to and purchase a specified number of shares of the corporation at a specified price during a specified period of time. Subscription

rights normally have a short life span to expiration. The purchase of warrants involves the risk that the Fund could lose the purchase value of a right or warrant if the right to subscribe to additional shares is not exercised prior to the warrants' expiration. Also, the purchase of warrants involves the risk that the effective price paid for the warrant added to the subscription price of the related security may exceed the value of the subscribed security's market price such as when there is no movement in the level of the underlying security.

Depository Receipts. The Fund may hold investments in sponsored and unsponsored American Depository Receipts ("ADRs"), European Depository Receipts ("EDRs"), Global Depository Receipts ("GDRs") and other similar global instruments. ADRs typically are issued by a U.S. bank or trust company and evidence ownership of underlying securities issued by a non-U.S. corporation. EDRs, which are sometimes referred to as Continental Depository Receipts, are receipts issued in Europe, typically by non-U.S. banks and trust companies, that evidence ownership of either non-U.S. or domestic underlying securities. GDRs are depository receipts structured like global debt issues to facilitate trading on an international basis. Unsponsored ADR, EDR and GDR programs are organized independently and without the cooperation of the issuer of the underlying securities. As a result, available information concerning the issuer may not be as current as for sponsored ADRs, EDRs and GDRs, and the prices of unsponsored ADRs, EDRs and GDRs may be more volatile than if such instruments were sponsored by the issuer. Investments in ADRs, EDRs and GDRs present additional investment considerations of Non-U.S. Securities.

Cash Equivalents and Short-Term Debt securities

For temporary defensive purposes, the Fund may invest up to 100% of its Managed Assets in cash equivalents and short-term debt securities. Short-term debt investments having a remaining maturity of 60 days or less when purchased will be valued at cost adjusted for amortization of premiums and accretion of discounts. Short-term debt securities are defined to include, without limitation, the following:

(1) U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest that are either issued or guaranteed by the U.S. Treasury or by U.S. government agencies or instrumentalities. U.S. government securities include securities issued by (a) the Federal Housing Administration, Farmers Home Administration, Export-Import Bank of the United States, Small Business Administration and Government National Mortgage Association, whose securities are supported by the full faith and credit of the United States; (b) the Federal Home Loan Banks, Federal Intermediate Credit Banks and Tennessee Valley Authority, whose securities are supported by the right of the agency to borrow from the U.S. Treasury; (c) the Federal National Mortgage Association, whose securities are supported by the discretionary authority of the U.S. government to purchase certain obligations of the agency or instrumentality; and (d) the Student Loan Marketing Association, whose securities are supported only by its credit. While the U.S. government provides financial support to such U.S. government-sponsored agencies or instrumentalities, no assurance can be given that it always will do so since it is not so obligated by law. The U.S. government, its agencies and instrumentalities do not guarantee the market value of their securities. Consequently, the value of such securities may fluctuate. The recent economic crisis in the United States has negatively impacted government-sponsored entities, which include Federal Home Loan Banks, the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac"). As the real estate market has deteriorated through declining home prices and increasing foreclosure, government-sponsored entities, which back the majority of U.S. mortgages have experienced extreme volatility, and in some cases a lack of liquidity. In September 2008, Fannie Mae and Freddie Mac were placed under a conservatorship of the U.S. federal government. Any Fund investments for temporary defensive purposes in securities issued by Federal Home Loan Banks and Fannie Mae may ultimately lose value. The Adviser will monitor developments and seek to manage the Fund's portfolio in a manner consistent with achieving the Fund's investment objectives, but there can be no assurance that it will be successful in doing so.

(2) Certificates of deposit issued against funds deposited in a bank or a savings and loan association. Such certificates are for a definite period of time, earn a specified rate of return and are normally negotiable. The

issuer of a certificate of deposit agrees to pay the amount deposited plus interest to the bearer of the certificate on the date specified thereon. Certificates of deposit purchased by the Fund may not be fully insured by the FDIC.

(3) Repurchase agreements, which involve purchases of debt securities. At the time the Fund purchases securities pursuant to a repurchase agreement, it simultaneously agrees to resell and redeliver such securities to the seller, who also simultaneously agrees to buy back the securities at a fixed price and time. This assures a predetermined yield for the Fund during its holding period, since the resale price is always greater than the purchase price and reflects an agreed-upon market rate. Such actions afford an opportunity for the Fund to invest temporarily available cash. The Fund may enter into repurchase agreements only with respect to obligations of the U.S. government, its agencies or instrumentalities; certificates of deposit; or bankers' acceptances in which the Fund may invest. Repurchase agreements may be considered loans to the seller, collateralized by the underlying securities. The risk to the Fund is limited to the ability of the seller to pay the agreed-upon sum on the repurchase date; in the event of default, the repurchase agreement provides that the Fund is entitled to sell the underlying collateral. If the value of the collateral declines after the agreement is entered into, and if the seller defaults under a repurchase agreement when the value of the underlying collateral is less than the repurchase price, the Fund could incur a loss of both principal and interest. The Adviser monitors the value of the collateral at the time the action is entered into and at all times during the term of the repurchase agreement. The Adviser does so in an effort to determine that the value of the collateral always equals or exceeds the agreed-upon repurchase price to be paid to the Fund. If the seller were to be subject to a federal bankruptcy proceeding, the ability of the Fund to liquidate the collateral could be delayed or impaired because of certain provisions of the bankruptcy laws.

(4) Commercial paper, which consists of short-term unsecured promissory notes, including variable rate master demand notes issued by corporations to finance their current operations. Master demand notes are direct lending arrangements between the Fund and a corporation. There is no secondary market for such notes. However, they are redeemable by the Fund at any time. The Adviser will consider the financial condition of the corporation (e.g., earning power, cash flow and other liquidity ratios) and will continuously monitor the corporation's ability to meet all of its financial obligations, because the Fund's liquidity might be impaired if the corporation were unable to pay principal and interest on demand. Investments in commercial paper will be limited to commercial paper rated in the highest categories by a major rating agency and which mature within one year of the date of purchase or carry a variable or floating rate of interest.

When-Issued and Forward Commitment Securities

The Fund may purchase securities on a "when-issued" basis and may purchase or sell securities on a "forward commitment" basis in order to acquire the security or to hedge against anticipated changes in interest rates and prices. When such transactions are negotiated, the price, which is generally expressed in yield terms, is fixed at the time the commitment is made, but delivery and payment for the securities take place at a later date. When-issued securities and forward commitments may be sold prior to the settlement date, but the Fund will enter into when-issued and forward commitments only with the intention of actually receiving or delivering the securities, as the case may be. If the Fund disposes of the right to acquire a when-issued security prior to its acquisition or disposes of its right to deliver or receive against a forward commitment, it might incur a gain or loss. At the time the Fund enters into a transaction on a when-issued or forward commitment basis, it will designate on its books and records cash or liquid credit securities equal to at least the value of the when-issued or forward commitment securities. The value of these assets will be monitored daily to ensure that their marked to market value will at all times equal or exceed the corresponding obligations of the Fund. There is always a risk that the securities may not be delivered and that the Fund may incur a loss. Settlements in the ordinary course, which may take substantially more than five business days, are not treated by the Fund as when-issued or forward commitment transactions and accordingly are not subject to the foregoing restrictions.

Securities purchased on a forward commitment or when-issued basis are subject to changes in value (generally changing in the same way, i.e., appreciating when interest rates decline and depreciating when interest

rates rise) based upon the public's perception of the creditworthiness of the issuer and changes, actual or anticipated, in the level of interest rates. Securities purchased with a forward commitment or when-issued basis may expose the Fund to risks because they may experience such fluctuations prior to their actual delivery. Purchasing securities on a when-issued basis can involve the additional risks that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. Purchasing securities on a forward commitment or when-issued basis when the Fund is fully invested may result in greater potential fluctuation in the value of the Fund's net assets and its net asset value per share.

The risks and effect of settlements in the ordinary course on the Fund's net asset value are not the same as the risks and effect of when-issued and forward commitment securities.

The purchase price of when-issued and forward commitment securities are expressed in yield terms, which reference a floating rate of interest, and is therefore subject to fluctuations of the security's value in the market from the date of the Fund's commitment (the "Commitment Date") to the date of the actual delivery and payment for such securities (the "Settlement Date"). There is a risk that, on the Settlement Date, the Fund's payment of the final purchase price, which is calculated on the yield negotiated on the Commitment Date, will be higher than the market's valuation of the security on the Settlement Date. This same risk is also borne if the Fund disposes of its right to acquire a when-issued security, or its right to deliver or receive, a forward commitment security, and there is a downward market movement in the value of the security from the Commitment Date to the Settlement Date. No income accrues to the Fund during the period from the Commitment Date to the Settlement Date. On the other hand, the Fund may incur a gain if the Fund invests in when-issued and forward commitment securities and correctly anticipates the rise in interest rates and prices in the market.

The settlements of secondary market purchases of Senior Loans in the ordinary course, on a settlement date beyond the period expected by loan market participants (i.e. T+7 for par loans and T+20 for distressed loans, in other words more than seven or twenty business days beyond the trade date, respectively) are subject to the delayed compensation mechanics prescribed by the Loan Syndications and Trading Association ("LSTA"). For par loans, income accrues to the buyer of the Senior Loan (the "Buyer") during the period beginning on the last date by which the Senior Loan purchase should have settled (T+7) to and including the actual settlement date. Should settlement of a par Senior Loan purchase in the secondary market be delayed beyond the T+7 period prescribed by the LSTA, the Buyer is typically compensated for such delay through a payment from the seller of the Senior Loan (this payment may be netted from the wire released on settlement date for the purchase price of the Senior Loan paid by the Buyer). In brief, the adjustment is typically calculated by multiplying the notional amount of the trade by the applicable margin in the Loan Agreement pro-rated for the number of business days (calculated using a year of 360 days) beyond the settlement period prescribed by the LSTA, plus any amendment or consent fees that the Buyer should have received. Furthermore, the purchase of a Senior Loan in the secondary market is typically negotiated and finalized pursuant to a binding trade confirmation, and therefore, the risk of non-delivery of the security to the Fund is reduced or eliminated when compared with such risk when investing in when-issued or forward commitment securities.

Repurchase Agreements

As temporary investments, the Fund may invest in repurchase agreements. A repurchase agreement is a contractual agreement whereby the seller of securities agrees to repurchase the same security at a specified price on a future date agreed upon by the parties. The agreed-upon repurchase price determines the yield during the Fund's holding period. Repurchase agreements are considered to be loans collateralized by the underlying security that is the subject of the repurchase contract. The Fund will only enter into repurchase agreements with registered securities dealers or domestic banks that, in the opinion of the Adviser, presents minimal credit risk. The risk to the Fund is limited to the ability of the issuer to pay the agreed-upon repurchase price on the delivery date; however, although the value of the underlying collateral at the time the transaction is entered into always equals or exceeds the agreed-upon repurchase price, if the value of the collateral declines there is a risk of loss of both principal and interest. In the event of default, the collateral may be sold but the Fund might incur a loss if

the value of the collateral declines, and might incur disposition costs or experience delays in connection with liquidating the collateral. In addition, if bankruptcy proceedings are commenced with respect to the seller of the security, realization upon the collateral by the Fund may be delayed or limited. The Adviser will monitor the value of the collateral at the time the transaction is entered into and at all times subsequent during the term of the repurchase agreement in an effort to determine that such value always equals or exceeds the agreed-upon repurchase price. In the event the value of the collateral declines below the repurchase price, the Adviser will demand additional collateral from the issuer to increase the value of the collateral to at least that of the repurchase price, including interest.

Short Sales

The Fund may make short sales of securities. A short sale is a transaction in which the Fund sells a security it does not own in anticipation that the market price of that security will decline. The Fund may make short sales to hedge positions, for risk management, in order to maintain portfolio flexibility or to enhance income or gain.

When the Fund makes a short sale, it must borrow the security sold short and deliver it to the broker-dealer through which it made the short sale as collateral for its obligation to deliver the security upon conclusion of the sale. The Fund may have to pay a fee to borrow particular securities and is often obligated to pay over any payments received on such borrowed securities.

The Fund's obligation to replace the borrowed security will be secured by collateral deposited with the broker-dealer, usually cash, U.S. government securities or other liquid securities. The Fund will also be required to designate on its books and records similar collateral with its custodian to the extent, if any, necessary so that the aggregate collateral value is at all times at least equal to the current market value of the security sold short. Depending on arrangements made with the broker-dealer from which it borrowed the security regarding payment over of any payments received by the Fund on such security, the Fund may not receive any payments (including interest) on its collateral deposited with such broker-dealer.

If the price of the security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a gain. Any gain will be decreased, and any loss increased, by the transaction costs described above. Although the Fund's gain is limited to the price at which it sold the security short, its potential loss is theoretically unlimited.

MANAGEMENT OF THE FUND

Board of Trustees

The overall management of the business and affairs of the Fund, including oversight of the Adviser, is vested in the Board. The Board is classified into three classes—Class I, Class II and Class III—as nearly equal in number as reasonably possible, with the Trustees in each class to hold office until their successors are elected and qualified. At each succeeding annual meeting of shareholders, the successors to the class of Trustees whose terms expire at that meeting shall be elected to hold office for terms expiring at the later of the annual meeting of shareholders held in the third year following the year of their election or the election and qualification of their successors. Under the terms of the Fund’s charter, the holders of Preferred Shares of the Fund are entitled as a class, to the exclusion of common shareholders, to elect two trustees of the Fund (the “Preferred Trustees”). Currently, Thomas W. Jasper and Michael F. Holland are serving as the Preferred Trustees.

Below is a list of the Trustees and officers of the Fund and their present positions and principal occupations during the past five years. The business address of the Fund, the Adviser and their board members and officers is 345 Park Avenue, 31st Floor, New York, NY 10154, unless specified otherwise below.

Daniel H. Smith, Jr. Birth Year: 1963	Chairman of the Board, President, Chief Executive Officer, Trustee	Since April 2010 Class II	Mr. Smith is a Senior Managing Director of Blackstone Credit and is Head of Blackstone Liquid Credit Strategies LLC. He joined Blackstone Credit from the Royal Bank of Canada in July 2005 where he was a Managing Partner and Co-head of RBC Capital Market’s Alternative Investments Unit.	6	None
--	--	---------------------------	---	---	------

- (1) The “Fund Complex” consists of the Blackstone Credit Closed-End Funds, Blackstone Secured Lending Fund, Blackstone Private Credit Fund, the “Blackstone Real Estate Funds” (Blackstone Real Estate Income Fund, Blackstone Real Estate Income Fund II and Blackstone Real Estate Income Master Fund) and Blackstone Alternative Multi-Strategy Fund. BDCs are included in the list of funds in the “Fund Complex.”
- (2) Jane Siebels was appointed to the Board on November 18, 2021.
- (3) “Interested person” of the Fund as defined in Section 2(a)(19) of the 1940 Act. Mr. Smith is an interested person due to his employment with the Adviser.

Experience of Trustees

The Trustees were selected to join the Board based upon the following as to each Trustee: his character and integrity; his service as a member of other boards of his willingness to serve and willingness and ability to commit the time necessary to perform the duties of a Trustee; as to each Trustee other than Mr. Smith, his status as not being an “interested person” as defined in the 1940 Act; and, as to Mr. Smith, his role with Blackstone Credit and Blackstone Inc. No factor, by itself, was controlling. In addition to the information provided in the table included below, each Trustee possesses the following attributes: Mr. D’Alelio, experience as an investment

professional; Mr. Holland, experience as an investment professional and service as a board member of other registered management investment companies; Mr. Jasper, experience as an investment professional in the structured products market and experience concerning risk management; Mr. Schpero, experience as a legal professional specializing in asset management and service as a board member of other registered management investment companies; Ms. Siebels, experience as an investment professional and service as a board member; and Mr. Smith, experience as an executive and portfolio manager and leadership roles with Blackstone Credit and Blackstone Inc. References to the qualifications, attributes and skills of the Trustees are pursuant to requirements of the SEC, do not constitute holding out the Board or any Trustees as having any special expertise or experience, and shall not impose any greater responsibility or liability on any such person or on the Board by reason thereof.

Share Ownership

Set forth in the table below is the dollar range of equity securities held in the Fund and on an aggregate basis for the entire Family of Investment Companies overseen by each Trustee as of December 31, 2021. Investment companies are considered to be in the same family if they share the same investment adviser or principal underwriter and hold themselves out to investors as related companies for purposes of investment and investor services.

<u>Name of Trustee</u>	<u>Dollar Range⁽¹⁾ of Equity Securities in the Fund</u>	<u>Aggregate Dollar Range of Equity Securities Overseen by Trustee in the Family of Investment Companies⁽²⁾</u>

Daniel H. Smith, Jr.	Over \$100,000	Over \$100,000

- (1) “Beneficial Ownership” is determined in accordance with Section 16a-1(a)(2) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”).
- (2) The term “Family of Investment Companies” means any two registered investment companies that:
 - (i) share the same investment adviser or principal underwriter; and
 - (ii) hold themselves out to investors as related companies for purposes of investment and investor services.

Trustee Transactions with Fund Affiliates

As of December 31, 2021, none of the independent trustees, meaning those Trustees who are not “interested persons” as defined in Section 2(a)(19) of the 1940 Act (each an “Independent Trustee” and collectively the “Independent Trustees”), nor members of their immediate families owned securities, beneficially or of record, in Blackstone Liquid Credit Strategies LLC (the “Adviser”), or an affiliate or person directly or indirectly controlling, controlled by, or under common control with the Adviser, other than investments in the Fund and investments in affiliated investment vehicles that, pursuant to guidance from the SEC Staff, do not affect such Trustee’s independence. Furthermore, during the two most recently completed calendar years, neither the

Independent Trustees nor members of their immediate families have had any direct or indirect interest, the value of which exceeds \$120,000, in the Adviser or any of its affiliates. In addition, since the beginning of the last two calendar years, neither the Independent Trustees nor members of their immediate families have conducted any transactions (or series of transactions) or maintained any direct or indirect relationship in which the amount involved exceeds \$120,000 and to which the Adviser or any affiliate of the Adviser was a party.

Compensation of Trustees

The fees and expenses of the Trustees of the Fund are paid by the Fund. The Trustee who is a member of the Blackstone organization receives no compensation from the Fund. The following table sets forth compensation received by the Independent Trustees for the fiscal year ended December 31, 2021.

Name of Trustee	Aggregate Compensation from the Fund	Total Compensation from the Fund and Fund Complex Paid to Trustees ⁽¹⁾
NON-INTERESTED TRUSTEES:		
Edward H. D’Alelio	\$25,674	\$226,625

Jane Siebels ⁽²⁾	\$ 2,767	\$ 17,479
INTERESTED TRUSTEES:		
Daniel H. Smith, Jr.	\$ —	\$ —

- (1) Total compensation paid from the Fund Complex includes the following: \$65,625 of compensation paid to each of Messrs. D’Alelio, Holland and Jasper by the Blackstone Real Estate Income Funds; \$37,116, \$33,427, \$36,193, \$36,193, and \$4,163 of compensation paid to Messrs. D’Alelio, Holland, Jasper, Schpero, and Ms. Siebels respectively by BGFLX; \$75,539, \$68,032, \$73,663, \$73,663 and \$8,113 of compensation paid to Messrs. D’Alelio, Holland, Jasper, Schpero, and Ms. Siebels respectively by BGB; and \$22,671, \$20,418, \$22,108, \$22,108, and \$2,436 of compensation paid to Messrs. D’Alelio, Holland, Jasper, Schpero, and Ms. Siebels respectively by BGX.] BGSL, the Blackstone Alternative Alpha Funds and Blackstone Alternative Multi-Strategy Fund do not pay compensation to Trustees of the Fund.
- (2) Ms. Siebels became a Trustee of the Fund on November 18, 2021.

The Fund, together with Blackstone Senior Floating Rate Term Fund, Blackstone Strategic Credit Fund and Blackstone Floating Rate Enhanced Income Fund (the “Blackstone Credit Closed-End Funds”), pay every Trustee who is not a director, officer, employee, or affiliate of Blackstone Credit or ALPS Fund Services, Inc. (“ALPS”), the Fund’s administrator, a retainer fee of \$155,000 per annum. The Chairman of the Audit Committee and the Chairman of the Nominating and Governance Committee also receive a retainer fee of \$12,000 per annum from the Blackstone Credit Closed-End Funds. The Lead Independent Trustee receives a retainer fee of \$16,000 per annum from the Blackstone Credit Closed-End Funds.

Board Committees

The Board currently has two committees: an Audit Committee and a Nominating and Governance Committee.

The Audit Committee consists of Edward H. D’Alelio, Michael F. Holland, Thomas W. Jasper Gary S. Schpero and Jane Siebels. The Audit Committee acts according to the Audit Committee charter (the “Audit Committee Charter”). Thomas W. Jasper has been appointed as Chair of the Audit Committee of the Board. The Audit Committee is responsible for assisting the Board in fulfilling its oversight responsibilities relating to accounting and financial reporting policies and practices of the Fund, including, but not limited to, the adequacy of the Fund’s accounting and financial reporting processes, policies and practices; the integrity of the Fund’s

financial statements; the adequacy of the Fund's overall system of internal controls; the Fund's compliance with legal and regulatory requirements; the qualification and independence of the Fund's independent registered public accounting firm; and the performance of the Fund's internal audit function provided by the Adviser and the Fund's other service providers. The independent accountant is ultimately accountable to the Board and Audit Committee, as representatives of the common shareholders. The independent accountant for the Fund reports directly to the Audit Committee. The Board adopted an Audit Committee Charter at its organizational meeting. The Audit Committee held six meetings during the fiscal year ended December 31, 2021.

The Nominating and Governance Committee consists of Edward H. D'Alelio, Michael F. Holland, Thomas W. Jasper, Gary S. Schpero and Jane Siebels. The Nominating and Governance Committee is responsible for selecting and nominating candidates for election as Trustees to the Board. Gary S. Schpero has been appointed as Chairman of the Nominating and Governance Committee. When vacancies or creations occur, the Nominating and Governance Committee will consider Trustee candidates recommended by a variety of sources to nominate for election by the common shareholders. The Nominating and Governance Committee may accept nominees recommended by a common shareholder as it deems appropriate. Common shareholders who wish to recommend a nominee for the Board should send recommendations to the Fund's Secretary at 345 Park Avenue, 31st Floor, New York, New York 10154 and include all information relating to such person that is required to be disclosed in solicitations of proxies for the election of Trustees. A recommendation must be accompanied by a written consent of the individual to stand for election if nominated by the Board and to serve if elected by the common shareholders. In considering Trustee candidates, the Nominating and Governance Committee will take into consideration the interest of common shareholders, the needs of the Board and the Trustee candidate's qualifications, which include but are not limited to, the quality and diversity of the individual's professional experience, education, individual qualification or skills. The Board adopted a Nominating and Governance Committee Charter at its organizational meeting. The Nominating and Governance Committee held three meetings during the fiscal year ended December 31, 2021.

Risk Oversight

The Board's role in risk oversight of the Fund reflects its responsibility under applicable state law to oversee generally, rather than to manage, the operations of the Fund. In line with its oversight responsibility, the Board receives reports and makes inquiries at its regular meetings and as needed regarding the nature and extent of significant Fund risks (including investment, compliance and valuation risks) that potentially could have a materially adverse impact on the business operations, investment performance or reputation of the Fund, but relies upon the Fund's management (including the Fund's portfolio managers) and Chief Compliance Officer, who reports directly to the Board, and the Adviser to assist it in identifying and understanding the nature and extent of such risks and determining whether, and to what extent, such risks may be eliminated or mitigated. In addition to reports and other information received from Fund management and the Adviser regarding the Fund's investment program and activities, the Board as part of its risk oversight efforts expects to meet at its regular meetings and as needed with the Fund's Chief Compliance Officer to discuss, among other things, risk issues and issues regarding the policies, procedures and controls of the Fund. The Board may be assisted in performing aspects of its role in risk oversight by the Audit Committee and such other standing or special committees as may be established from time to time by the Board. For example, the Audit Committee of the Board will meet regularly with the Fund's independent public accounting firm to review, among other things, reports on the Fund's internal controls for financial reporting.

The Board believes that not all risks that may affect the Funds can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Funds' goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters may be summaries of relevant information and may be inaccurate or incomplete. As a result of the foregoing and other factors, the Board's risk management oversight is expected to be subject to substantial limitations.

Officers of the Fund

The Fund's executive officers will be chosen each year at a regular meeting of the Board to hold office until their respective successors are duly elected and qualified. The executive officers of the Fund currently are:

<u>Name and Year of Birth</u>	<u>Position(s) Held with Registrant</u>	<u>Length of Time Served</u>	<u>Principal Occupation During the Past Five Years</u>	<u>Number of Registered Investment Companies in Fund Complex Overseen</u>
Daniel H. Smith, Jr. Birth Year: 1963	Trustee, Chairman of the Board, President, Chief Executive Officer	Since April 2010	Mr. Smith is a Senior Managing Director of Blackstone Credit and is Head of Blackstone Liquid Credit Strategies LLC. Mr. Smith joined Blackstone Credit in 2005 from the Royal Bank of Canada where he was a Managing Partner and Co-head of RBC Capital Market's Alternative Investments Unit.	5
Robert W. Busch Birth Year: 1982	Chief Financial Officer and Treasurer	Since March 2019	Mr. Busch is a Managing Director of Blackstone Credit and part of Blackstone Credit's Finance team. Before joining Blackstone Credit in 2018, Mr. Busch worked previously at Fifth Street Asset Management, where he was Senior Vice President of Finance and served as Controller of the Firm's two publicly traded business development companies and publicly traded alternative asset manager. Prior to that, Mr. Busch worked at Deloitte & Touche LLP, a global public accounting firm.	5
Robert Zable Birth Year: 1972	Executive Vice President and Assistant Secretary	Since September 2015	Mr. Zable is a Senior Managing Director of Blackstone Credit and Senior Portfolio Manager of the U.S. CLOs and closed-end funds within Blackstone Credit's Liquid Credit Strategies business. Before joining Blackstone Credit in 2007, Mr. Zable was a Vice President at FriedbergMilstein LLC, where he was responsible for credit opportunity investments and junior capital origination and execution. Prior to that, Mr. Zable was a Principal with Abacus Advisors Group, a restructuring and distressed investment firm. Mr. Zable began his career at JP Morgan Securities Inc., where he focused on leveraged finance in New York and London.	4
Marisa Beeney Birth Year: 1970	Chief Compliance Officer, Chief Legal Counsel and Secretary	Since April 2010	Ms. Beeney is a Senior Managing Director of Blackstone Credit and General Counsel of Blackstone Credit. Before joining Blackstone Credit in 2007, she was with the finance group of DLA Piper. Ms. Beeney began her career at Latham & Watkins LLP working	5

<u>Name and Year of Birth</u>	<u>Position(s) Held with Registrant</u>	<u>Length of Time Served</u>	<u>Principal Occupation During the Past Five Years</u>	<u>Number of Registered Investment Companies in Fund Complex Overseen</u>
Valerie Naratil Birth Year: 1988	Public Relations Officer	Since February 2021	primarily on project finance and development transactions, as well as other structured credit products. Ms. Naratil is a Principal of Blackstone Credit and part of the Institutional Client Solutions team for Blackstone Credit's Liquid Credit Strategies business. Before joining Blackstone Credit in 2014, Ms. Naratil worked at UBS Investment Bank, advising corporate clients across the Healthcare industry.	5

The Fund's officers do not receive compensation from the Fund, but are reimbursed for all out-of-pocket expenses relating to attendance at meetings of the Board.

The Adviser

Blackstone Liquid Credit Strategies LLC acts as the Fund's investment adviser and also provides administrative and compliance oversight services to the Fund. The Adviser, a wholly-owned subsidiary of Blackstone Alternative Credit Advisors LP (collectively with its affiliates, "Blackstone Credit"), is a registered investment adviser. Blackstone Credit is part of the credit platform of Blackstone Inc. (collectively with its affiliates, "Blackstone"), which is one of the world's leading investment firms with total assets under management of \$731 billion. Blackstone's asset management businesses include investment vehicles focused on real estate, private equity, public debt and equity, growth equity, opportunistic, non-investment grade credit, real assets and secondary funds, all on a global basis. As of September 30, 2021, Blackstone Credit's asset management operation had aggregate assets under management of \$178 billion across multiple strategies within the leveraged finance marketplace, including loans, high yield bonds, distressed and mezzanine debt and private equity, including hedge funds. In addition, as of December 31, 2020, the Adviser had total assets under management of approximately \$43 billion. The Adviser is part of the Liquid Credit Strategies ("LCS") business unit of Blackstone Credit and is responsible for managing long-only credit strategies, including investments in U.S. and European senior secured loans, high yield bonds, and structured credit investments, in vehicles, including CLOs, separately managed accounts, commingled funds, three other closed-end funds and a sub-advised ETF.

Pursuant to the investment advisory agreement, the Adviser manages the Fund's investment portfolio, directs purchases and sales of portfolio securities and reports thereon to the Fund's officers and Trustees regularly. The Adviser or its parent also provides the office space, facilities, equipment and personnel necessary to perform the following services for the Fund: SEC compliance, including record keeping, reporting requirements and registration statements and proxies; supervision of Fund operations, including coordination of functions of the transfer agent, custodian, accountants, counsel and other parties performing services or operational functions for the Fund; and certain administrative and clerical services, including certain accounting services and maintenance of certain books and records.

The 1940 Act requires that the Board, including a majority of its members who are not considered to be "interested persons" under the 1940 Act (the "Independent Trustees") voting separately, approve on an annual basis the continuation of the Fund's investment advisory agreement with the Adviser. On May 26, 2021, the

Board, including the Independent Trustees, considered and approved the continuation of the Agreement for an additional one-year term.

The investment advisory agreement provides for the Fund to pay a management fee at an annual rate equal to 1.00% of the average daily value of the Fund's Managed Assets. The term "Managed Assets" means the total assets of the Fund (including assets attributable to money borrowed for investment purposes, including assets attributable to any preferred stock that may be outstanding) minus the sum of the Fund's accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Effective November 17, 2017, the Adviser agreed to reduce a portion of the previous management fee ("Reduced Management Fee"), from an annual rate of 1.00% to 0.90% of the Fund's Managed Assets, in connection with the extension of the Fund's term through May 31, 2022. Due to the approval of the extension of the Fund's term to May 31, 2027, the Reduced Management Fee will continue through the Fund's dissolution date. If the Fund's term is extended again by shareholders beyond May 31, 2027, the Reduced Management Fee will be assessed at that time. During the fiscal year ended December 31, 2021, December 31, 2020 and December 31, 2019, the Fund paid the Adviser \$2,949,205, \$2,919,060, and \$3,423,353, respectively, under the investment advisory agreement.

The investment advisory agreement had an initial term of two years and continues in effect for successive periods of 12 months thereafter, provided that each continuance is specifically approved at least annually by both (1) the vote of a majority of the Board or the vote of a majority of the outstanding securities entitled to vote (as such term is defined in the 1940 Act) and (2) by the vote of a majority of the Independent Trustees, cast in person at a meeting called for the purpose of voting on such approval. The agreement may be terminated at any time, without the payment of any penalty, by the Fund (upon the vote of a majority of the Board or a majority of the outstanding securities entitled to vote) or by the Adviser, upon not more than 60 nor less than 30 days' written notice by either party to the other which can be waived by the non-terminating party. The agreement will terminate automatically in the event of its assignment (as such term is defined in the 1940 Act and the rules thereunder).

The investment advisory agreement provides that in the absence of willful misfeasance, bad faith, gross negligence or reckless disregard of its obligations thereunder, the Adviser is not liable to the Fund or any of the common shareholders for any act or omission by the Adviser in the supervision or management of its respective investment activities or for any loss sustained by the Fund or the common shareholders and provides for indemnification by the Fund of the Adviser, its Trustees, officers, employees, agents and control persons for liabilities incurred by them in connection with their services to the Fund, subject to certain limitations and conditions.

Although the professional staff of the Adviser will devote as much time to the management of the Fund as the Adviser deems appropriate to perform its duties in accordance with the investment advisory agreement and in accordance with reasonable commercial standards, the professional staff of the Adviser may have conflicts in allocating its time and services among the Fund and the Adviser's other investment vehicles and accounts. The Adviser has informed the Board that the services of the Adviser are not exclusive, and the Adviser provides similar services to other investment companies and other clients and may engage in other activities. A discussion regarding the basis for the approval of the investment advisory agreement by the Board is available in the Fund's Annual Report.

Administrator

ALPS Fund Services, Inc., located at 1290 Broadway, Suite 1000, Denver, Colorado 80203, serves as administrator to the Fund. Under the Administration, Bookkeeping and Pricing Services Agreement (the "Administration Agreement"), ALPS maintains the Fund's general ledger and is responsible for calculating the NAV of the Common Shares, and generally managing the administrative affairs of the Fund. ALPS is entitled to receive a monthly fee based on the Fund's average daily net assets plus out-of-pocket expenses. For the fiscal year ended December 31, 2021, the Fund paid ALPS \$351,195 under the Administration Agreement.

Portfolio Managers

Unless otherwise indicated, the information below is provided as of the date of this Statement of Additional Information.

The table below identifies the number of accounts (other than the Fund) for which the Fund's portfolio managers have day-to-day management responsibilities and the total assets in such accounts, within each of the following categories: registered investment companies, other pooled investment vehicles and other accounts. For each category, the number of accounts and total assets in the accounts where fees are based on performance is also indicated as of September 30, 2021.

As of September 30, 2021, Robert Zable managed, or was a member of the management team for, the following client accounts:

	<u>Number of Accounts</u>	<u>Assets of Accounts</u>	<u>Number of Accounts Subject to a Performance Fee</u>	<u>Assets Subject to a Performance Fee</u>
Registered Investment Companies . .	4	\$ 2.166 billion	—	\$ —
Pooled Investment Vehicles Other Than Registered Investment Companies	40	\$44.157 billion	40	\$44.157 billion
Other Accounts	1	\$ 0.136 billion	—	\$ —

As of September 30, 2021, Gordon McKemie managed, or was a member of the management team for, the following client accounts:

	<u>Number of Accounts</u>	<u>Assets of Accounts</u>	<u>Number of Accounts Subject to a Performance Fee</u>	<u>Assets Subject to a Performance Fee</u>
Registered Investment Companies . . .	5	\$9.872 billion	—	\$—

As of September 30, 2021, Robert Post managed, or was a member of the management team for, the following client accounts:

	<u>Number of Accounts</u>	<u>Assets of Accounts</u>	<u>Number of Accounts Subject to a Performance Fee</u>	<u>Assets Subject to a Performance Fee</u>
Registered Investment Companies . .	4	\$ 2.166 billion	—	\$ —
Pooled Investment Vehicles Other Than Registered Investment Companies	39	\$21.992 billion	39	\$21.992 billion
Other Accounts	1	\$ 0.136 billion	—	\$ —

Portfolio Manager Compensation

The Adviser's financial arrangements with its portfolio managers, its competitive compensation and its career path emphasis at all levels reflect the value senior management places on key resources. Compensation

may include a variety of components and may vary from year to year based on a number of factors. The principal components of compensation include a base salary and a discretionary bonus.

Base Compensation. Generally, portfolio managers receive base compensation and employee benefits based on their individual seniority and/or their position with the firm.

Discretionary Compensation. In addition to base compensation, portfolio managers may receive discretionary compensation. Discretionary compensation is based on individual seniority, contributions to the Adviser and performance of the client assets that the portfolio manager has primary responsibility for. The discretionary compensation is not based on a precise formula, benchmark or other metric. These compensation guidelines are structured to closely align the interests of employees with those of the Adviser and its clients.

Securities Ownership of Portfolio Managers

The following table shows the dollar range of equity securities owned by the portfolio managers in the Fund as of December 31, 2021.

<u>Name of Portfolio Manager</u>	<u>Dollar Range of Equity Securities in the Fund</u>
Robert Zable	\$50,001 - \$100,000
Gordon McKemie	None
Robert Post	None

Potential Conflicts of Interest

The purchase of Common Shares in the Fund involves a number of significant risks that should be considered before making any investment. The Fund and common shareholders will be subject to a number of actual and potential conflicts of interest involving Blackstone and Blackstone Credit (together, the “Firm”). In addition, as a consequence of Blackstone holding a controlling interest in Blackstone Credit and Blackstone’s status as a public company, the officers, directors, members, managers and employees of Blackstone Credit will take into account certain additional considerations and other factors in connection with the management of the business and affairs of the Fund that would not necessarily be taken into account if Blackstone were not a public company. The following discussion enumerates certain, but not all, potential conflicts of interest that should be carefully evaluated before making an investment in the Fund, but is not intended to be an exclusive list of all such conflicts. The Firm and its personnel may in the future engage in further activities that may result in additional conflicts of interest not addressed below. Any references to the Firm, Blackstone Credit, Blackstone or Blackstone Liquid Credit Strategies LLC (the “Adviser”) in this section will be deemed to include their respective affiliates, partners, members, shareholders, officers, directors and employees, except that portfolio companies of managed clients shall only be included to the extent the context shall require and references to Blackstone Credit affiliates shall only be to affiliates operating as a part of Blackstone’s credit focused business group.

For purposes of this discussion and ease of reference, the following terms shall have the meanings as set forth below:

“**Other Blackstone Credit Clients**” means, collectively, the investment funds, client accounts (including managed accounts) and proprietary accounts and/or other similar arrangements (including such arrangements in which the Fund or one or more Other Blackstone Credit Clients own interests) that Blackstone Credit may

establish, advise or sub-advise from time to time and to which Blackstone Credit provides investment management or sub-advisory services (other than the Fund and any such funds and accounts in which the Fund has an interest), in each case including any alternative investment vehicles and additional capital vehicles relating thereto and any vehicles established by Blackstone Credit to exercise its side-by-side or other general partner investment rights as set forth in their respective governing documents; provided, that for the avoidance of doubt, “Other Blackstone Credit Clients” shall not include Blackstone Credit in its role as principal of any account, including any accounts for which Blackstone Credit or an affiliate thereof acts as an advisor.

“**Blackstone Clients**” means, collectively, the investment funds, client accounts (including managed accounts) and proprietary accounts and/or other similar arrangements (including such arrangements in which the Fund or one or more Blackstone Clients own interests) that Blackstone may establish, advise or sub-advise from time to time and to which Blackstone provides investment management or sub-advisory services (other than the Fund, any such funds and accounts in which the Fund has an interest and Other Blackstone Credit Clients), in each case including any alternative investment vehicles and additional capital vehicles relating thereto and any vehicles established by Blackstone to exercise its side-by-side or other general partner investment rights as set forth in their respective governing documents; provided that, for the avoidance of doubt, “Blackstone Clients” shall not include Blackstone in its role as principal of any account, including any accounts for which Blackstone or an affiliate thereof acts as an advisor.

“**Other Clients**” means, collectively, Other Blackstone Credit Clients and Blackstone Clients.

The Firm’s Policies and Procedures. The Firm has implemented policies and procedures to address conflicts that arise as a result of its various activities, as well as regulatory and other legal considerations. Because the Firm has many different asset management and advisory businesses, including private equity, a credit business, a hedge fund business, a capital markets group, a life sciences business and a real estate advisory business, it is subject to a number of actual and potential conflicts of interest, greater regulatory oversight and more legal and contractual restrictions than that to which it would be subject if it had just one line of business. In addressing these conflicts and regulatory, legal and contractual requirements across its various businesses and to protect against the inappropriate sharing and/or use of information between the Fund and the other business units at the Firm, the Firm has implemented certain policies and procedures (*e.g.*, implemented by the Firm to mitigate potential conflicts of interest and address certain regulatory requirements and contractual restrictions, such as the Firm’s information wall policy) regarding the sharing of information that may from time to time reduce the positive synergies that the Fund expects to utilize for purposes of identifying and managing attractive investments. For example, the Firm will from time to time come into possession of material non-public information with respect to companies, in which Other Clients may be considering making an investment. The information, which could be of benefit to the Fund, is likely to be restricted to those other businesses and otherwise be unavailable to the Fund. It is also possible that the Fund could be restricted from trading despite the fact that the Fund did not receive such information. There can be no assurance, however, that any such policies and/or procedures will be effective in accomplishing their stated purpose and/or that they will not otherwise adversely affect the ability of the Fund to effectively achieve its investment objective by unduly limiting the investment flexibility of the Fund and/or the flow of otherwise appropriate information between Blackstone Credit and other business units at the Firm. Personnel of the Firm may be unable, for example, to assist with the activities of the Fund as a result of these walls. There can be no assurance that additional restrictions will not be imposed that would further limit the ability of the Firm to share information internally. In addition, to the extent that the Firm is in possession of material non-public information or is otherwise restricted from trading in certain securities, the Fund and Blackstone Credit may also be deemed to be in possession of such information or otherwise restricted. Additionally, the terms of confidentiality or other agreements with or related to companies in which any Other Client has or has considered making an investment or which is otherwise a client of the Firm will from time to time restrict or otherwise limit the ability of the Fund and/or its obligors and their affiliates to make investments in or otherwise engage in businesses or activities competitive with companies. The Firm may enter into one or more strategic relationships in certain regions or with respect to certain types of investments

that, although intended to provide greater opportunities for the Fund, may require the Fund to share such opportunities or otherwise limit the amount of an opportunity the Fund can otherwise take.

Broad and Wide-Ranging Activities. The Firm engages in a broad spectrum of activities. In the ordinary course of its business activities, the Firm will engage in activities where the interests of certain divisions of the Firm or the interests of its clients will conflict with the interests of the common shareholders in the Fund. Other present and future activities of the Firm will give rise to additional conflicts of interest. In the event that a conflict of interest arises, the Adviser will attempt to resolve such conflict in a fair and equitable manner, subject to the limitations of the 1940 Act and the Board's oversight. Common shareholders should be aware that conflicts will not necessarily be resolved in favor of the Fund's interests. Investors should be aware that conflicts will not necessarily be resolved in favor of the Fund's interests. In addition, the Adviser may in certain situations choose to obtain the consent of the Board with respect to any specific conflict of interest, including with respect to the approvals required under the 1940 Act and the Advisers Act. The Fund may enter into joint transactions or cross-trades with clients or affiliates of the Adviser to the extent permitted by the 1940 Act, the Advisers Act and any applicable co-investment order from the SEC. Subject to the limitations of the 1940 Act, the Fund may invest in loans or other securities, the proceeds of which may refinance or otherwise repay debt or securities of companies whose debt is owned by other funds managed by Blackstone Credit.

Allocation of Personnel. The Adviser and its members, officers and employees will devote as much of their time to the activities of the Fund as they deem necessary to conduct its business affairs in an appropriate manner. By the terms of the investment advisory agreement, the Firm is not restricted from forming additional investment funds, from entering into other investment advisory relationships or from engaging in other business activities, even though such activities may be in competition with the Fund and/or may involve substantial time and resources of the Adviser. Firm personnel, including members of the investment committee, will work on other projects, serve on other committees and source potential investments for and otherwise assist the investment programs of Other Clients and their portfolio companies, including other investment programs to be developed in the future. These activities could be viewed as creating a conflict of interest in that the time and effort of the members of the Adviser and its officers and employees will not be devoted exclusively to the business of the Fund, but will be allocated between the business of the Fund and the management of the monies of such Other Clients of the Adviser. Time spent on these other initiatives diverts attention from the activities of the Fund, which could negatively impact the common shareholders. Furthermore, Blackstone Credit and Blackstone Credit personnel derive financial benefit from these other activities, including fees and performance-based compensation. Firm personnel outside of Blackstone Credit may share in the fees and performance-based compensation from the Fund; similarly, Blackstone Credit personnel may share in the fees and performance-based compensation generated by Other Clients. These and other factors create conflicts of interest in the allocation of time by Firm personnel. Blackstone Credit's determination of the amount of time necessary to conduct the Fund's activities will be conclusive.

Outside Activities of Principals and Other Personnel and their Related Parties. Certain of the principals and employees of the Adviser may be subject to a variety of conflicts of interest relating to their responsibilities to the Fund, Other Clients and their respective portfolio companies, and their outside business activities as members of investment or advisory committees or boards of directors of or advisors to investment funds, corporations, foundations or other organizations. Such positions create a conflict if such other entities have interests that are adverse to those of the Fund, including if such other entities compete with the Fund for investment opportunities or other resources. The other managed accounts and/or investment funds in which such individuals may become involved may have investment objectives that overlap with the Fund. Although such principals and employees will seek to limit any such conflicts in a manner that is in accordance with their fiduciary duties to the Fund, there can be no assurance that conflicts of interest between the interests of the Fund and Other Clients will be resolved favorably for the Fund. Furthermore, certain principals and employees of the Adviser may have a greater financial interest in the performance of such other funds or accounts than the performance of the Fund. Such involvement may create conflicts of interest in making investments on behalf of the Fund and such other funds and accounts. Also, Blackstone personnel, Firm employees, including employees

of the Adviser, are generally permitted to invest in alternative investment funds, private equity funds, real estate funds, hedge funds and other investment vehicles, as well as engage in other personal trading activities relating to companies, assets, securities or instruments (subject to the Firm's Code of Ethics requirements), some of which will involve conflicts of interests. Such personal securities transactions will, in certain circumstances, relate to securities or instruments which can be expected to also be held or acquired by Other Clients, the Fund, or otherwise relate to the obligors in which the Fund has or acquires a different principal investment (including, for example, with respect to seniority). There can be no assurance that conflicts of interest arising out of such activities will be resolved in favor of the Fund. Common shareholders will not receive any benefit from any such investments, and the financial incentives of such Firm personnel in such other investments could be greater than their financial incentives in relation to the Fund.

Additionally, certain employees and other professionals of the Firm may have family members or relatives employed by advisers and service providers (or their affiliates) or otherwise actively involved in industries and sectors in which the Fund invests, or have business, financial, personal or other relationships with companies in such industries and sectors (including the advisors and service providers described above) or other industries, which gives rise to potential or actual conflicts of interest. For example, such family members or relatives might be employees, officers, directors or owners of companies or assets that are actual or potential investments of the Fund or other counterparties of the Fund and its obligors and/or assets, or service providers of the Fund. Moreover, in certain instances, the Fund or its obligors may issue loans to or acquire securities from, or otherwise transact with, companies that are owned by such family members or relatives or in respect of which such family members or relatives have other involvement. These relationships also may influence Blackstone, the Adviser and/or Blackstone Credit in deciding whether to select or recommend certain service providers to perform services for the Fund or obligors (the cost of which will generally be borne directly or indirectly by the Fund or such obligors, as applicable). Notwithstanding the foregoing, investment transactions relating to the Fund that require the use of a service provider will generally be allocated to service providers on the basis of best execution, the evaluation of which includes, among other considerations, such service provider's provision of certain investment-related services and research that the Adviser believes to be of benefit to the Fund. To the extent that the Firm determines appropriate, conflict mitigation strategies may be put in place with respect to a particular circumstance, such as internal information barriers or recusal, disclosure or other steps determined appropriate by the Firm.

Secondments and Internships. Certain personnel of the Firm and its affiliates, including consultants, will, in certain circumstances, be seconded to one or more portfolio companies, vendors, service providers and vendors or common shareholders or other investors of the Fund and Other Clients to provide finance, accounting, operation support, data management and other similar services, including the sourcing of investments for the Fund or other parties. The salaries, benefits, overhead and other similar expenses for such personnel during the secondment could be borne by the Firm and its affiliates or the organization for which the personnel are working or both. In addition, personnel of portfolio companies, vendors and service providers (including law firms and accounting firms) and common shareholders or other investors of the Fund and Other Clients will, in certain circumstances, be seconded to, serve internships at or otherwise provide consulting services to, the Firm, the Fund and its obligors, and Other Clients and its portfolio companies. While often the Fund, Other Clients and their obligors or portfolio companies (as applicable) are the beneficiaries of these types of arrangements, the Firm is from time to time a beneficiary of these arrangements as well, including in circumstances where the vendor or service provider also provides services to the Fund, Other Clients, their obligors or portfolio companies (as applicable) or the Firm in the ordinary course. The Firm, the Fund, Other Clients or their obligors or portfolio companies (as applicable) could receive benefits from these arrangements at no cost, or alternatively could pay all or a portion of the fees, compensation or other expenses in respect of these arrangements. The management fee will not be reduced as a result of these arrangements or any fees, expense reimbursements or other costs related thereto and the Fund may not receive any benefit as a result of these arrangements. The personnel described above may provide services in respect of multiple matters, including in respect of matters related to the Firm, the Fund, Other Clients, portfolio companies, each of their respective affiliates and related parties, and the Firm will endeavor in good faith to allocate the costs of these arrangements, if any, to the Firm, the Fund, Other

Clients, portfolio companies and other parties based on time spent by the personnel or another methodology the Firm deems appropriate in a particular circumstance.

Other Benefits. Blackstone Credit and its personnel will receive certain intangible and/or other benefits, rebates and/or discounts and/or perquisites arising or resulting from their activities on behalf of the Fund, the value of which will not reduce the management fee or incentive fees or otherwise be shared with the Fund, investors and/or portfolio companies. For example, airline travel or hotel stays incurred as Fund expenses, as set forth in the investment advisory agreement (“Fund Expenses”), may result in “miles” or “points” or credit in loyalty/status programs, and such benefits and/or amounts will, whether or not de minimis or difficult to value, inure exclusively to Blackstone Credit and/or such personnel (and not the Fund and/or portfolio companies) even though the cost of the underlying service is borne by the Fund and/or portfolio companies. Blackstone Credit, its personnel, and other related persons also receive discounts on products and services provided by portfolio companies and/or customers or suppliers of such portfolio companies. Such other benefits or fees may give rise to conflicts of interest in connection with the Fund’s investment activities, and while the Adviser and Blackstone Credit will seek to resolve any such conflicts in a fair and equitable manner, there is no assurance that any such conflicts will be resolved in favor of the Fund. (See also “—Obligor/Portfolio Company Service Providers and Vendors” and “—Obligor/Portfolio Company Relationships Generally” below.)

Senior Advisors, Industry Experts and Operating Partners. Blackstone Credit may engage and retain strategic advisers, consultants, senior advisers, executive advisers, industry experts, operating partners, deal sourcers, consultants and other similar professionals (which may include former employees of Blackstone and/or Blackstone Credit, as well as current employees of Blackstone’s and/or Blackstone Credit’s portfolio companies) (“Senior and Other Advisors”) who are not employees or affiliates of Blackstone Credit, including through joint ventures, investment platforms, other entities or similar arrangements, and who will, from time to time, receive payments from, or allocations of a profits interest with respect to, portfolio companies (as well as from Blackstone Credit or the Fund). In particular, in some cases, consultants, including those with a “Senior Advisor” title, have been and will be engaged with the responsibility to source and recommend transactions to Blackstone Credit or to undertake a build-up strategy to acquire and develop assets and businesses in a particular sector or involving a particular strategy, potentially on a full-time and/or exclusive basis and notwithstanding any overlap with the responsibilities of Blackstone Credit under the investment advisory agreement, the compensation to such consultants may be borne fully by the Fund and/or portfolio companies (with no reduction to the management fee payable by the Fund) and not Blackstone Credit. In such circumstances, such payments from, or allocations of a profits interest with respect to, portfolio companies and/or the Fund may, subject to applicable law, be treated as Fund Expenses and will not, even if they have the effect of reducing any retainers or minimum amounts otherwise payable by Blackstone Credit, be deemed paid to or received by Blackstone Credit, and such amounts will not reduce the management fees or incentive fees payable.

To the extent permitted by applicable law and/or any applicable SEC-granted exemptive or no-action relief, these Senior and Other Advisors often have the right or may be offered the ability to (i) co-invest alongside the Fund, including in the specific investments in which they are involved (and for which they may be entitled to receive performance-related incentive fees, which will reduce the Fund’s returns), (ii) otherwise participate in equity plans for management of any such portfolio company or (iii) invest directly in the Fund or in a vehicle controlled by the Fund subject to reduced or waived management fees and/or incentive fees, including after the termination of their engagement by or other status with the Firm. Such co-investment and/or participation generally will result in the Fund being allocated a smaller share of the applicable investment. Such co-investment and/or participation may vary by transaction and such participation may, depending on its structure, reduce the Fund’s returns. Additionally, and notwithstanding the foregoing, these Senior and Other Advisors, as well as other Blackstone Clients, may be (or have the preferred right to be) investors in Blackstone Credit’s portfolio companies (which, in some cases, may involve agreements to pay performance fees or allocate profits interests to such persons in connection with the Fund’s investment therein, which will reduce the Fund’s returns) and/or Other Clients. Such Senior and Other Advisors, as well as other Blackstone Clients, may also, subject to applicable law, have rights to co-invest with the Fund on a side-by-side basis, which rights are generally offered

on a no-fee/no-carried interest basis and generally result in the Fund being allocated a smaller share of an investment than would otherwise be the case in the absence of such side-by-side participation.

The time, dedication and scope of work of, and the nature of the relationship with each of the Senior and Other Advisors vary considerably. In certain cases, they may advise Blackstone on transactions, provide the Adviser and/or Blackstone with industry-specific insights and feedback on investment themes, assist in transaction due diligence or make introductions to and provide reference checks on management teams. In other cases, they take on more extensive roles (and may be exclusive service providers to Blackstone) and serve as executives or directors on the boards of portfolio companies or contribute to the identification and origination of new investment opportunities. The Fund may rely on these Senior and Other Advisors to recommend Blackstone as a preferred investment partner, identify investments, source opportunities, and otherwise carry out its investment program, but there is no assurance that these advisers will continue to be involved with the Fund for any length of time. In certain instances, Blackstone has formal arrangements with these Senior and Other Advisors (which may or may not be terminable upon notice by any party), and in other cases the relationships are more informal. They are either compensated (including pursuant to retainers and expense reimbursement, and, in any event, pursuant to negotiated arrangements) by Blackstone, the Fund, and/or portfolio companies or otherwise uncompensated unless and until an engagement with a portfolio company develops. In certain cases, they have certain attributes of Blackstone “employees” (*e.g.*, they may have dedicated offices at Blackstone, receive administrative support from Blackstone Credit personnel, participate in general meetings and events for Blackstone personnel, work on Blackstone Credit matters as their primary or sole business activity, service Blackstone exclusively, have Blackstone-related e-mail addresses and/or business cards and participate in certain benefit arrangements typically reserved for Blackstone employees, etc.) even though they are not considered Blackstone employees, affiliates or personnel for purposes of the investment advisory agreement between the Fund and Blackstone. Some Senior and Other Advisors may provide services only for the Fund and its obligors, while others may have other clients. Senior and Other Advisors could have conflicts of interest between their services for the Fund and its obligors, on the one hand, and themselves or other clients, on the other hand, and Blackstone is limited in its ability to monitor and mitigate these conflicts. Blackstone expects, where applicable, to allocate the costs of such Senior and Other Advisors to the Fund and/or applicable portfolio companies, and to the extent any such costs are allocated to the Fund, they would be treated as Fund Expenses. Payments or allocations to Senior and Other Advisors will not be reduced by the management fee, and can be expected to increase the overall costs and expenses borne indirectly by investors in the Fund. There can be no assurance that any of the Senior and Other Advisors, to the extent engaged, will continue to serve in such roles and/or continue their arrangements with Blackstone, the Fund and/or any portfolio companies for the duration of the relevant investments.

As an example of the foregoing, in certain investments through joint ventures, investment platforms, other entities or similar arrangements, the Fund will from time to time enter into an arrangement with one or more individuals (who may be former personnel of the Firm or current or former personnel of portfolio companies of the Fund or Other Clients, may have experience or capability in sourcing or managing investments, and may form a management team) to undertake a build-up strategy to acquire and develop assets and businesses in a particular sector or involving a particular strategy. The services provided by such individuals or relevant portfolio company, as the case may be, could include the following with respect to investments: origination or sourcing, due diligence, evaluation, negotiation, servicing, development, management (including turnaround) and disposition. The individuals or relevant portfolio company could be compensated with a salary and equity incentive plan, including a portion of profits derived from the Fund or a portfolio company or asset of the Fund, or other long-term incentive plans. Compensation could also be based on assets under management, a waterfall similar to a carried interest, respectively, or other similar metric. The Fund could initially bear the cost of overhead (including rent, utilities, benefits, salary or retainers for the individuals or their affiliated entities) and the sourcing, diligence and analysis of investments, as well as the compensation for the individuals and entity undertaking the build-up strategy. Such expenses could be borne directly by the Fund as Fund Expenses (or broken deal expenses, if applicable) or indirectly through expenditures by a portfolio company. None of the fees, costs or expenses described above will reduce the management fee.

In addition, the Adviser may engage third parties as Senior and Other Advisors (or in another similar capacity) in order to advise it with respect to existing investments, specific investment opportunities, and economic and industry trends. Such Senior and Other Advisors may receive reimbursement of reasonable related expenses by portfolio companies or the Fund and may have the opportunity to invest in a portion of the equity and/or debt available to the Fund for investment that would otherwise be taken by the Adviser and its affiliates. If such Senior and Other Advisors generate investment opportunities on the Fund's behalf, such Senior and Other Advisors may receive special additional fees or allocations comparable to those received by a third party in an arm's length transaction and such additional fees or allocations would be borne fully by the Fund and/or portfolio companies (with no reduction to the management fee payable by the Fund) and not Blackstone Credit.

Multiple Firm Business Lines. The Firm has multiple business lines, including the Blackstone Capital Markets Group, which, subject to applicable law, Blackstone, Blackstone Credit, the Fund, Other Clients, portfolio companies of the Fund and Other Clients and third parties may engage for debt and equity financings and to provide other investment banking, brokerage, investment advisory or other services. As a result of these activities, the Firm is subject to a number of actual and potential conflicts of interest, greater regulatory oversight and more legal and contractual restrictions than if it had one line of business. For example, the Firm may come into possession of information that limits the Fund's ability to engage in potential transactions. Similarly, other Firm businesses and their personnel may be prohibited by law or contract from sharing information with Blackstone Credit that would be relevant to monitoring the Fund's investments and other activities. Additionally, Blackstone, Blackstone Credit or Other Clients can be expected to enter into covenants that restrict or otherwise limit the ability of the Fund or its obligors and their affiliates to make investments in, or otherwise engage in, certain businesses or activities. For example, Other Clients could have granted exclusivity to a joint venture partner that limits the Fund and Other Clients from owning assets within a certain distance of any of the joint venture's assets, or Blackstone, Blackstone Credit or an Other Client could have entered into a non-compete in connection with a sale or other transaction. These types of restrictions may negatively impact the ability of the Fund to implement its investment program. (See also "—Other Blackstone and Blackstone Credit Clients; Allocation of Investment Opportunities"). Finally, Blackstone and Blackstone Credit personnel who are members of the investment team or investment committee may be excluded from participating in certain investment decisions due to conflicts involving other Firm businesses or for other reasons, including other business activities in which case the Fund will not benefit from their experience. The common shareholders will not receive a benefit from any fees earned by the Firm or their personnel from these other businesses.

Blackstone is under no obligation to decline any engagements or investments in order to make an investment opportunity available to the Fund. The Firm has long-term relationships with a significant number of corporations and their senior management. In determining whether to invest in a particular transaction on behalf of the Fund, the Adviser will consider those relationships and may decline to participate in a transaction as a result of one or more of such relationships (e.g., investments in a competitor of a client or other person with whom Blackstone has a relationship). The Fund may be forced to sell or hold existing investments as a result of investment banking relationships or other relationships that the Firm may have or transactions or investments the Firm may make or have made. (See "—Other Blackstone and Blackstone Credit Clients; Allocation of Investment Opportunities" and "—Obligor/Portfolio Company Relationships Generally.") Subject to the 1940 Act and any applicable co-investment order issued by the SEC, the Fund may also co-invest with clients of the Firm in particular investment opportunities, and the relationship with such clients could influence the decisions made by the Adviser with respect to such investments. There can be no assurance that all potentially suitable investment opportunities that come to the attention of the Firm will be made available to the Fund.

Finally, Blackstone and other Blackstone Clients could acquire shares in the Fund in the secondary market. Blackstone and other Blackstone Clients would generally have greater information than counterparties in such transactions, and the existence of such business could produce conflicts, including in the valuation of the Fund's Investments.

Minority Investments in Asset Management Firms. Blackstone and other Blackstone Clients, including Blackstone Strategic Capital Holdings ("BSCH") and its related parties, regularly make minority investments in

alternative asset management firms that are not affiliated with Blackstone, the Fund, other Blackstone Clients and their respective portfolio companies, and which may from time to time engage in similar investment transactions, including with respect to purchase and sale of investments, with these asset management firms and their sponsored funds and portfolio companies. Typically, the Blackstone related party with an interest in the asset management firm would be entitled to receive a share of carried interest/performance based incentive compensation and net fee income or revenue share generated by the various products, vehicles, funds and accounts managed by that third party asset management firm that are included in the transaction or activities of the third party asset management firm, or a subset of such activities such as transactions with a Blackstone related party. In addition, while such minority investments are generally structured so that Blackstone does not “control” such third party asset management firms, Blackstone may nonetheless be afforded certain governance rights in relation to such investments (typically in the nature of “protective” rights, negative control rights or anti-dilution arrangements, as well as certain reporting and consultation rights) that afford Blackstone the ability to influence the firm. Although Blackstone and other Blackstone Clients, including BSCH, do not intend to control such third party asset management firms, there can be no assurance that all third parties will similarly conclude that such investments are non-control investments or that, due to the provisions of the governing documents of such third party asset management firms or the interpretation of applicable law or regulations, investments by Blackstone and other Blackstone Clients, including BSCH, will not be deemed to have control elements for certain contractual, regulatory or other purposes. While such third party asset managers may not be affiliated with the Fund within the meaning of the 1940 Act, Blackstone may, under certain circumstances, be in a position to influence the management and operations of such asset managers and the existence of its economic/revenue sharing interest therein may give rise to conflicts of interest. Participation rights in a third party asset management firm (or other similar business), negotiated governance arrangements and/or the interpretation of applicable law or regulations could expose the investments of the Fund to claims by third parties in connection with such investments (as indirect owners of such asset management firms or similar businesses) that may have an adverse financial or reputational impact on the performance of the Fund. The Fund, its affiliates and their respective obligors and portfolio companies may from time to time engage in transactions with, and buy and sell investments from, any such third party asset managers and their sponsored funds, and such transactions and other commercial arrangements between such third party asset managers and the Fund and its obligors are not subject to approval by the Board. There can be no assurance that the terms of these transactions between parties related to Blackstone, on the one hand, and the Fund and its obligors, on the other hand, will be at arm’s length or that Blackstone will not receive a benefit from such transactions, which can be expected to incentivize Blackstone to cause these transactions to occur. Such conflicts related to investments in and arrangements with other asset management firms will not necessarily be resolved in favor of the Fund. Shareholders will not be entitled to receive notice or disclosure of the terms or occurrence of either the investments in alternative asset management firms or transactions therewith and will not receive any benefit from such transactions. These conflicts related to investments in and arrangements with other asset management firms, will not necessarily be resolved in favor of the Fund.

Data. The Firm receives or obtains various kinds of data and information from the Fund, Other Clients and their obligors or portfolio companies (as applicable), including data and information relating to business operations, trends, budgets, customers and other metrics, some of which is sometimes referred to as “big data.” The Firm can be expected to be better able to anticipate macroeconomic and other trends, and otherwise develop investment themes, as a result of its access to (and rights regarding) this data and information from the Fund, Other Clients and their obligors or portfolio companies (as applicable). The Firm has entered and will continue to enter into information sharing and use arrangements with the Fund, Other Clients and their obligors or portfolio companies (as applicable), related parties and service providers, which may give the Firm access to (and rights regarding) data that it would not otherwise obtain in the ordinary course. Although the Firm believes that these activities improve the Firm’s investment management activities on behalf of the Fund and Other Clients, information obtained from the Fund and its obligors also provides material benefits to Blackstone, Blackstone Credit or Other Clients without compensation or other benefit accruing to the Fund or common shareholders. For example, information from a portfolio company in which the Fund holds an interest can be expected to enable the Firm to better understand a particular industry and execute trading and investment strategies in reliance on that

understanding for Blackstone, Blackstone Credit and Other Clients that do not own an interest in the portfolio company, without compensation or benefit to the Fund or its obligors.

Furthermore, except for contractual obligations to third parties to maintain confidentiality of certain information, and regulatory limitations on the use of material nonpublic information, the Firm is generally free to use data and information from the Fund's activities to assist in the pursuit of the Firm's various other activities, including to trade for the benefit of the Firm and/or an Other Client. Any confidentiality obligations in the operative documents do not limit the Firm's ability to do so. For example, the Firm's ability to trade in securities of an issuer relating to a specific industry may, subject to applicable law, be enhanced by information of a portfolio company in the same or related industry. Such trading can be expected to provide a material benefit to the Firm without compensation or other benefit to the Fund or common shareholders.

The sharing and use of "big data" and other information presents potential conflicts of interest and the common shareholders acknowledge and agree that any benefits received by the Firm or its personnel (including fees, costs and expenses) will not reduce the management fees or incentive fees payable to the Adviser or otherwise be shared with the Fund or common shareholders. As a result, the Adviser has an incentive to pursue investments that have data and information that can be utilized in a manner that benefits the Firm or Other Clients.

Data Management Services. Blackstone or an affiliate of Blackstone formed in the future may provide data management services to portfolio companies and may also provide such services directly to the Fund and Other Clients (collectively, "Data Holders"). Such services may include assistance with obtaining, analyzing, curating, processing, packaging, organizing, mapping, holding, transforming, enhancing, marketing and selling such data (among other related data management and consulting services) for monetization through licensing or sale arrangements with third parties and, subject to applicable law and the limitations in the investment advisory agreement and any other applicable contractual limitations, with the Fund, Other Clients, portfolio companies and other Blackstone affiliates and associated entities (including funds in which Blackstone and Other Clients make investments, and portfolio companies thereof). Where Blackstone believes appropriate, data from one Data Holder may be pooled with data from other Data Holders. Any revenues arising from such pooled data sets would be allocated between applicable Data Holders on a fair and reasonable basis as determined by Blackstone Credit in its sole discretion, with Blackstone Credit able to make corrective allocations should it determine subsequently that such corrections were necessary or advisable. Blackstone is expected to receive compensation for such data management services, which may include a percentage of the revenues generated through any licensing or sale arrangements with respect to the relevant data, and which compensation may also include fees, royalties and cost and expense reimbursement (including start-up costs and allocable overhead associated with personnel working on relevant matters (including salaries, benefits and other similar expenses)), and will not offset the management fee or otherwise shared with the Fund or shareholders; provided, that any such expenses or related costs shall not be greater than what would be paid to an unaffiliated third party for substantially similar services. Additionally, Blackstone may determine to share the products from such Data Management Services within Blackstone or its affiliates (including Other Clients or their portfolio companies) at no charge and, in such cases, the Data Holders would not receive any financial or other benefit from having provided such data to Blackstone. The potential receipt of such compensation by Blackstone could create incentives for the Firm to cause the Fund to invest in portfolio companies with a significant amount of data that it might not otherwise have invested in or on terms less favorable than it otherwise would have sought to obtain.

Blackstone and Blackstone Credit Strategic Relationships. Blackstone and Blackstone Credit have entered, and it can be expected that Blackstone and Blackstone Credit in the future will enter, into strategic relationships with investors (and/or one or more of their affiliates) that involve an overall relationship with Blackstone or Blackstone Credit that could incorporate one or more strategies in addition to the Fund's strategy ("Strategic Relationships"), with terms and conditions applicable solely to such investor and its investment in multiple Blackstone or Blackstone Credit strategies that would not apply to any other investor's investment in the Fund. A Strategic Relationship often involves an investor agreeing to make a capital commitment to multiple Blackstone

or Blackstone Credit funds, one of which may include the Fund. Common shareholders will not receive a copy of any agreement memorializing such a Strategic Relationship program (even if in the form of a side letter) and will be unable to elect in the “most-favored-nations” election process any rights or benefits afforded through a Strategic Relationship. Specific examples of such additional rights and benefits include, among others, specialized reporting, discounts or reductions on and/or reimbursements or rebates of management fees or carried interest, secondment of personnel from the investor to Blackstone or Blackstone Credit (or vice versa), rights to participate in the investment review and evaluation process, as well as priority rights or targeted amounts for co-investments alongside Blackstone Credit or Blackstone funds (including, without limitation, preferential or favorable allocation of co-investment and preferential terms and conditions related to co-investment or other participation in Blackstone or Blackstone Credit funds (including in respect of any carried interest and/or management fees to be charged with respect thereto, as well as any additional discounts, reductions, reimbursements or rebates with respect thereto or other penalties that may result if certain target co-investment allocations or other conditions under such arrangements are not achieved)). The co-investment that is part of a Strategic Relationship may include co-investment in investments made by the Fund. Blackstone, including its personnel (including Blackstone Credit personnel), may receive compensation from Strategic Relationships and be incentivized to allocate investment opportunities away from the Fund to or source investment opportunities for Strategic Relationships. Strategic Relationships may therefore result in fewer co-investment opportunities (or reduced or no allocations) being made available to common shareholders, subject to the 1940 Act.

Buying and Selling Investments or Assets from Certain Related Parties. The Fund and its obligors may purchase investments or assets from or sell investments or assets to common shareholders, other obligors of the Fund, portfolio companies of Other Clients or their respective related parties. Purchases and sales of investments or assets between the Fund or its obligors, on the one hand, and common shareholders, other obligors of the Fund, portfolio companies of Other Clients or their respective related parties, on the other hand, are not, unless required by applicable law, subject to the approval of the Board or any common shareholder. These transactions involve conflicts of interest, as the Firm may receive fees and other benefits, directly or indirectly, from or otherwise have interests in both parties to the transaction, including different financial incentives Blackstone may have with respect to the parties to the transaction. For example, there can be no assurance that any investment or asset sold by the Fund to a common shareholder, other obligors of the Fund, portfolio company of Other Clients or any of their respective related parties will not be valued or allocated a sale price that is lower than might otherwise have been the case if such asset were sold to a third party rather than to a common shareholder, portfolio company of Other Clients or any of their respective related parties. The Firm will not be required to solicit third party bids or obtain a third party valuation prior to causing the Fund or any of its obligors to purchase or sell any asset or investment from or to a common shareholder, other obligors of the Fund, portfolio company of Other Clients or any of their respective related parties as provided above.

Other Firm Businesses, Activities and Relationships. As part of its regular business, Blackstone provides a broad range of investment banking, advisory and other services. In addition, from time to time, the Firm will provide services in the future beyond those currently provided. Common shareholders will not receive any benefit from any fees relating to such services.

In the regular course of its capital markets, investment banking, real estate advisory and other businesses, Blackstone represents potential purchasers, sellers and other involved parties, including corporations, financial buyers, management, shareholders and institutions, with respect to transactions that could give rise to other transactions that are suitable for the Fund. In such a case, a Blackstone advisory client would typically require Blackstone to act exclusively on its behalf. Such advisory client requests may preclude all Blackstone-affiliated clients, including the Fund, from participating in related transactions that would otherwise be suitable. Blackstone will be under no obligation to decline any such engagements in order to make an investment opportunity available to the Fund. In connection with its capital markets, investment banking, advisory, real estate and other businesses, Blackstone comes into possession of information that limits its ability to engage in potential transactions. The Fund’s activities are expected to be constrained as a result of the inability of Blackstone personnel to use such information. For example, employees of Blackstone from time to time are

prohibited by law or contract from sharing information with members of the Fund's investment team. Additionally, there are expected to be circumstances in which one or more individuals associated with Blackstone affiliates (including clients) will be precluded from providing services related to the Fund's activities because of certain confidential information available to those individuals or to other parts of Blackstone (e.g., trading may be restricted). Where Blackstone affiliates are engaged to find buyers or financing sources for potential sellers of assets, the seller may permit the Fund to act as a participant in such transactions (as a buyer or financing partner), which would raise certain conflicts of interest inherent in such a situation (including as to the negotiation of the purchase price).

The Fund may invest in securities of the same issuers as Other Clients, other investment vehicles, accounts and clients of the Firm and the Adviser. To the extent that the Fund holds interests that are different (or more senior or junior) than those held by such Other Clients, Blackstone Credit may be presented with decisions involving circumstances where the interests of such Other Clients are in conflict with those of the Fund. Furthermore, it is possible the Fund's interest may be subordinated or otherwise adversely affected by virtue of such Other Clients' involvement and actions relating to its investment.

In addition, the 1940 Act may limit the Fund's ability to undertake certain transactions with its affiliates that are registered under the 1940 Act or regulated as business development companies under the 1940 Act. As a result of these restrictions, the Fund may be prohibited from executing "joint" transactions with such affiliates, which could include investments in the same portfolio company (whether at the same or different times). These limitations may limit the scope of investment opportunities that would otherwise be available to the Fund.

Blackstone Credit has received an exemptive order that permits certain funds, among other things, to co-invest with certain other persons, including certain affiliates of Blackstone Credit, and certain funds managed and controlled by Blackstone Credit and its affiliates subject to certain terms and conditions. In addition, other present and future activities of the Firm and its affiliates (including Blackstone Credit and the Adviser) will from time to time give rise to additional conflicts of interest relating to the Firm and its investment activities. In the event that any such conflict of interest arises, the Adviser will attempt to resolve such conflicts in a fair and equitable manner. Investors should be aware that, subject to applicable law, conflicts will not necessarily be resolved in favor of the Fund's interests.

Transactions with Clients of Blackstone Insurance Solutions. Blackstone Insurance Solutions ("BIS") is a business unit of Blackstone that is comprised of two affiliated registered investment advisers. BIS provides investment advisory services to insurers (including insurance companies that are owned, directly or indirectly, by Blackstone or Other Clients, in whole or in part). Actual or potential conflicts of interest may arise with respect to the relationship of the Fund and its obligors with the funds, vehicles or accounts BIS advises or sub-advises, including accounts where an insurer participates in investments directly and there is no separate vehicle controlled by Blackstone (collectively, "BIS Clients"). BIS Clients have invested and are expected to continue investing in Other Clients and the Fund. BIS Clients may have investment objectives that overlap with those of the Fund or its obligors, and such BIS Clients may invest, as permitted by applicable law and the Fund's exemptive relief, alongside the Fund or such obligors in certain investments, which will reduce the investment opportunities otherwise available to the Fund or such obligors. BIS Clients will also participate in transactions related to the Fund and/or its obligors (e.g., as originators, co-originators, counterparties or otherwise). Other transactions in which BIS Clients will participate include, without limitation, investments in debt or other securities issued by portfolio companies or other forms of financing to portfolio companies (including special purpose vehicles established by the Fund or such portfolio companies). When investing alongside the Fund or its obligors or in other transactions related to the Fund or its obligors, BIS Clients may or may not invest or divest at the same time or on the same terms as the Fund or the applicable obligors. BIS Clients may also from time to time acquire investments and obligors directly or indirectly from the Fund, including one or more royalty streams, which may be securitized with other royalty streams, as permitted by applicable law and the Fund's exemptive relief. In circumstances where Blackstone Credit determines in good faith that the conflict of interest is mitigated in whole or in part through various measures that Blackstone or Blackstone Credit implements,

Blackstone Credit may determine to proceed with the applicable transaction (subject to oversight by the Board and the applicable law to which the Fund is subject). In order to seek to mitigate any potential conflicts of interest with respect to such transactions (or other transactions involving BIS Clients), Blackstone may, in its discretion, involve independent members of the board of a portfolio company or a third party stakeholder in the transaction to negotiate price and terms on behalf of the BIS Clients or otherwise cause the BIS Clients to “follow the vote” thereof, and/or cause an independent client representative or other third party to approve the investment or otherwise represent the interests of one or more of the parties to the transaction. In addition, Blackstone or the Adviser may limit the percentage interest of the BIS Clients participating in such transaction, or obtain appropriate price quotes or other benchmarks, or, alternatively, a third-party price opinion or other document to support the reasonableness of the price and terms of the transaction. BIS will also from time to time require the applicable BIS Clients participating in a transaction to consent thereto (including in circumstances where the Adviser does not seek the consent of the Board). There can be no assurance that any such measures or other measures that may be implemented by Blackstone will be effective at mitigating any actual or potential conflicts of interest.

Allocation of Portfolios. The Firm may have an opportunity to acquire a portfolio or pool of assets, securities and instruments that it determines should be divided and allocated among the Fund and Other Clients. Such allocations generally would be based on the Firm’s assessment of the expected returns and risk profile of each of the assets. For example, some of the assets in a pool may have a return profile appropriate for the Fund, while others may have a return profile not appropriate for the Fund but appropriate for Other Clients. Also, a pool may contain both debt and equity instruments that the Firm determines should be allocated to different funds. In all of these situations, the combined purchase price paid to a seller would be allocated among the multiple assets, securities and instruments in the pool and therefore, subject to applicable law and the conditions of the Fund’s co-investment relief, among the Fund and Other Clients acquiring any of the assets, securities and instruments. Similarly, there will likely be circumstances in which the Fund and Other Clients will sell assets in a single or related transactions to a buyer. In some cases a counterparty will require an allocation of value in the purchase or sale contract, though the Firm could determine such allocation of value is not accurate and should not be relied upon. The Firm will generally rely upon internal analysis to determine the ultimate allocation of value, though it could also obtain third party valuation reports. Regardless of the methodology for allocating value, the Firm will have conflicting duties to the Fund and Other Clients when they buy or sell assets together in a portfolio, including as a result of different financial incentives the Firm has with respect to different vehicles, most clearly when the fees and compensation, including performance-based compensation, earned from the different vehicles differ. There can be no assurance that an investment will not be valued or allocated a purchase price that is higher or lower than it might otherwise have been allocated if such investment were acquired or sold independently rather than as a component of a portfolio shared with Other Clients.

Other Affiliate Transactions and Investments in Different Levels of Capital Structure. From time to time, the Fund and the Other Clients may make investments at different levels of an issuer’s capital structure or otherwise in different classes of an issuer’s securities or loans, subject to the limitations of the 1940 Act. Such investments may inherently give rise to conflicts of interest or perceived conflicts of interest between or among the various classes of securities or loans that may be held by such entities. To the extent the Fund holds securities or loans that are different (including with respect to their relative seniority) than those held by an Other Client, the Adviser and its affiliates may be presented with decisions when the interests of the funds are in conflict. For example, conflicts could arise where the Fund lends funds to a portfolio company while an Other Client invests in equity securities of such portfolio company. In this circumstance, for example, if such portfolio company were to go into bankruptcy, become insolvent or otherwise be unable to meet its payment obligations or comply with its debt covenants, conflicts of interest could arise between the holders of different types of securities or loans as to what actions the portfolio company should take. In addition, purchases or sales of securities or loans for the account of the Fund (particularly marketable securities) will be bunched or aggregated with orders for Other Clients, including other funds. It is frequently not possible to receive the same price or execution on the entire volume of securities sold, and the various prices may be averaged, which may be disadvantageous to the Fund. Further conflicts could arise after the Fund and Other Clients have made their respective initial investments. For

example, if additional financing is necessary as a result of financial or other difficulties, it may not be in the best interests of the Fund to provide such additional financing. If the Other Clients were to lose their respective investments as a result of such difficulties, the ability of the Adviser to recommend actions in the best interests of the Fund might be impaired. Any applicable co-investment order issued by the SEC may restrict the Fund's ability to participate in follow-on financings. Blackstone Credit may in its discretion take steps to reduce the potential for adversity between the Fund and the Other Clients, including causing the Fund and/or such Other Clients to take certain actions that, in the absence of such conflict, it would not take. Such conflicts will be more difficult if the Fund and Other Clients hold significant or controlling interests in competing or different tranches of a portfolio company's capital structure. Equity holders and debt holders have different (and often competing) motives, incentives, liquidity goals and other interests with respect to a portfolio company. In addition, there may be circumstances where Blackstone Credit agrees to implement certain procedures to ameliorate conflicts of interest that may involve a forbearance of rights relating to the Fund or Other Clients, such as where Blackstone Credit may cause the Fund or Other Clients to decline to exercise certain control- and/or foreclosure-related rights with respect to a portfolio company.

Further, the Fund is prohibited under the 1940 Act from participating in certain transactions with certain of its affiliates (including portfolio companies of Other Clients) without the prior approval of a majority of the independent members of the Board and, in some cases, the SEC. Any person that owns, directly or indirectly, 5% or more of the outstanding voting securities of the Fund will be an affiliate of the Fund for purposes of the 1940 Act and generally the Fund will be prohibited from buying or selling any securities from or to such affiliate, absent the prior approval of the Board. However, the Fund may under certain circumstances purchase any such affiliate's loans or securities in the secondary market, which could create a conflict for the Adviser between the Fund's interests and the interests of such affiliate, in that the ability of the Adviser to recommend actions in the Fund's best interest may be limited. The 1940 Act also prohibits certain "joint" transactions with certain affiliates, which could include investments in the same portfolio company (whether at the same or closely related times), without prior approval of the Board and, in some cases, the SEC.

In addition, conflicts may arise in determining the amount of an investment, if any, to be allocated among potential investors and the respective terms thereof. There can be no assurance that any conflict will be resolved in favor of the Fund, and, subject to applicable law, a decision by Blackstone Credit to take any particular action could have the effect of benefiting an Other Client (and, incidentally, may also have the effect of benefiting Blackstone Credit) and therefore may not have been in the best interests of, and may be adverse to, the Fund. There can be no assurance that the return on the Fund's investment will be equivalent to or better than the returns obtained by the Other Clients participating in the transaction. The common shareholders will not receive any benefit from fees paid to any affiliate of the Adviser from a portfolio company in which an Other Client also has an interest to the extent permitted by the 1940 Act.

Related Financing Counterparties. The Fund may invest in companies or other entities in which Other Clients make an investment in a different part of the capital structure (and vice versa) subject to the requirements of the 1940 Act and the Fund's co-investment order. The Adviser requests in the ordinary course proposals from lenders and other sources to provide financing to the Fund and its obligors. Blackstone Credit takes into account various facts and circumstances it deems relevant in selecting financing sources, including whether a potential lender has expressed an interest in evaluating debt financing opportunities, whether a potential lender has a history of participating in debt financing opportunities generally and with the Firm in particular, the size of the potential lender's loan amount, the timing of the relevant cash requirement, the availability of other sources of financing, the creditworthiness of the lender, whether the potential lender has demonstrated a long-term or continuing commitment to the success of Blackstone, Blackstone Credit and their funds, and such other factors that Blackstone and Blackstone Credit deem relevant under the circumstances. The cost of debt alone is not determinative.

The Firm could have incentives to cause the Fund and its obligors to accept less favorable financing terms from a common shareholder, Other Clients, their portfolio companies, Blackstone, and other parties with material

relationships with the Firm than it would from a third party. If the Fund or a portfolio company occupies a more senior position in the capital structure than a common shareholder, Other Client, their portfolio companies and other parties with material relationships with Blackstone, Blackstone could have an incentive to cause the Fund or portfolio company to offer more favorable financing terms to such parties. In the case of a related party financing between the Fund or its obligors, on the one hand, and Blackstone or Other Clients' portfolio companies, on the other hand, to the extent permitted by the 1940 Act, the Adviser could, but is not obligated to, rely on a third party agent to confirm the terms offered by the counterparty are consistent with market terms, or the Adviser could instead rely on its own internal analysis, which the Adviser believes is often superior to third party analysis given the Firm's scale in the market. If however any of the Firm, the Fund, an Other Client or any of their obligors or portfolio companies (as applicable) delegates to a third party, such as another member of a financing syndicate or a joint venture partner, the negotiation of the terms of the financing, the transaction will be assumed to be conducted on an arms-length basis, even though the participation of the Firm related vehicle impacts the market terms. For example, in the case of a loan extended to the Fund or a portfolio company by a financing syndicate in which an Other Client has agreed to participate on terms negotiated by a third party participant in the syndicate, it may have been necessary to offer better terms to the financing provider to fully subscribe the syndicate if the Other Client had not participated. It is also possible that the frequent participation of Other Clients in such syndicates could dampen interest among other potential financing providers, thereby lowering demand to participate in the syndicate and increasing the financing costs to the Fund. The Adviser does not believe either of these effects is significant, but no assurance can be given to common shareholders that these effects will not be significant in any circumstance. Unless required by applicable law, the Adviser will not seek any consent or approvals from common shareholders or the Board in the case of any of these conflicts.

The Firm could cause actions adverse to the Fund to be taken for the benefit of Other Clients that have made an investment more senior in the capital structure of a portfolio company than the Fund (*e.g.*, provide financing to a portfolio company, the equity of which is owned by the Fund) and, vice versa, actions may be taken for the benefit of the Fund and its obligors that are adverse to Other Clients. The Firm could seek to implement procedures to mitigate conflicts of interest in these situations such as (i) a forbearance of rights, including some or all non-economic rights, by the Fund or relevant Other Client (or their respective obligors or portfolio companies, as the case may be) by, for example, agreeing to follow the vote of a third party in the same tranche of the capital structure, or otherwise deciding to recuse itself with respect to both normal course ongoing matters (such as consent rights with respect to loan modifications in intercreditor agreements) and also decisions on defaults, foreclosures, workouts, restructurings and other similar matters, (ii) causing the Fund or relevant Other Client (or their respective obligors or portfolio companies, as the case may be) to hold only a non-controlling interest in any such portfolio company, (iii) retaining a third party loan servicer, administrative agent or other agent to make decisions on behalf of the Fund or relevant Other Client (or their respective obligors or portfolio companies, as the case may be), or (iv) create groups of personnel within the Firm separated by information barriers (which may be temporary and limited purpose in nature), each of which would advise one of the clients that has a conflicting position with other clients. As an example, to the extent an Other Client holds an interest in a loan or security that is different (including with respect to relative seniority) than those held by the Fund or its obligors, the Firm may decline to exercise, or delegate to a third party, certain control, foreclosure and other similar governance rights of the Other Client. In these cases, the Firm would generally act on behalf of one of its clients, though the other client would generally retain certain control rights, such as the right to consent to certain actions taken by the trustee or administrative or other agent of the investment, including a release, waiver, forgiveness or reduction of any claim for principal or interest; extension of maturity date or due date of any payment of any principal or interest; release or substitution of any material collateral; release, waiver, termination or modification of any material provision of any guaranty or indemnity; subordination of any lien; and release, waiver or permission with respect to any covenants.

In connection with negotiating loans and bank financings in respect of Blackstone Credit-sponsored transactions, Blackstone Credit will generally obtain the right to participate (for its own account or an Other Client) in a portion of the financings with respect to such Blackstone Credit-sponsored transactions on the same terms negotiated by third parties with the Firm or other terms the Adviser determines to be consistent with the

market. Although the Firm could rely on third parties to verify market terms, the Firm may nonetheless have influence on such third parties. No assurance can be given that negotiating with a third party, or verification of market terms by a third party, will ensure that the Fund and its obligors receive market terms.

In addition, it is anticipated that in a bankruptcy proceeding the Fund's interests will likely be subordinated or otherwise adverse to the interests of Other Clients with ownership positions that are more senior to those of the Fund. For example, an Other Client that has provided debt financing to an investment of the Fund may take actions for its benefit, particularly if the Fund's Investment is in financial distress, which adversely impact the value of the Fund's subordinated interests.

Although Other Clients can be expected to provide financing to the Fund and its obligors subject to the requirements of the 1940 Act, there can be no assurance that any Other Client will indeed provide any such financing with respect to any particular Investment. Participation by Other Clients in some but not all financings of the Fund and its obligors may adversely impact the ability of the Fund and its obligors to obtain financing from third parties when Other Clients do not participate, as it may serve as a negative signal to market participants.

Any financing provided by a common shareholder or an affiliate to the Fund or a portfolio company is not a capital contribution to the Fund.

The respective investment programs of the Fund and the Other Clients may or may not be substantially similar. Blackstone Credit and/or Blackstone may give advice to, and recommend securities for, Other Clients that may differ from advice given to, or securities recommended or bought for, the Fund, even though their investment objectives may be the same as or similar to those of the Fund. While Blackstone Credit will seek to manage potential conflicts of interest in a fair and equitable manner, the portfolio strategies employed by Blackstone Credit and Blackstone in managing their respective Other Clients are likely to conflict from time to time with the transactions and strategies employed by Blackstone Credit in managing the Fund and may affect the prices and availability of the securities and instruments in which the Fund invests. Conversely, participation in specific investment opportunities may be appropriate, at times, for both the Fund and Other Clients. In any event, it is the policy of Blackstone Credit to allocate investment opportunities and sale opportunities on a basis deemed by Blackstone Credit, in its sole discretion, to be fair and equitable over time.

Conflicting Fiduciary Duties to Debt Funds. Other Clients include funds and accounts that make investments in senior secured loans, distressed debt, subordinated debt, high-yield securities, commercial mortgage-backed securities and other debt instruments. As discussed above, it is expected that these Other Clients or investors therein will be offered the opportunity, subject to applicable law, to provide financing with respect to investments made by the Fund and its obligors. The Firm owes a fiduciary duty to these Other Clients as well as to the Fund and will encounter conflicts in the exercise of these duties. For example, if an Other Client purchases high-yield securities or other debt instruments of a portfolio company of the Fund, or otherwise occupies a senior (or other different) position in the capital structure of an investment relative to the Fund, the Firm will encounter conflicts in providing advice to the Fund and to these Other Clients with regard to appropriate terms of such high-yield securities or other instruments, the enforcement of covenants, the terms of recapitalizations and the resolution of workouts or bankruptcies, among other matters. For example, in a bankruptcy proceeding, in circumstances where the Fund holds an equity investment in a portfolio company, the holders of such portfolio company's debt instruments (which may include one or more Other Clients) may take actions for their benefit (particularly in circumstances where such portfolio company faces financial difficulties or distress) that subordinate or adversely impact the value of the Fund's investment in such portfolio company. More commonly, the Fund could hold an investment that is senior in the capital structure, such as a debt instrument, to an Other Client. Although measures described above in "Related Financing Counterparties" above can mitigate these conflicts, they cannot completely eliminate them.

Similarly, certain Other Clients may invest in securities of publicly traded companies that are actual or potential investments of the Fund or its obligors. The trading activities of those vehicles may differ from or be

inconsistent with activities that are undertaken for the account of the Fund or its obligors in any such securities or related securities. In addition, the Fund may not pursue an investment in a portfolio company otherwise within the investment strategy of the Fund as a result of such trading activities by Other Clients.

Other Blackstone and Blackstone Credit Clients; Allocation of Investment Opportunities. Certain inherent conflicts of interest arise from the fact that the Adviser, Blackstone Credit and Blackstone provide investment management, advisory and sub-advisory services to the Fund and Other Clients.

The respective investment programs of the Fund and the Other Clients may or may not be substantially similar. Blackstone Credit and/or Blackstone may give advice to, and recommend securities for, Other Clients that may differ from advice given to, or securities recommended or bought for, the Fund, even though their investment objectives may be the same as or similar to those of the Fund. While Blackstone Credit will seek to manage potential conflicts of interest in a fair and equitable manner, the portfolio strategies employed by Blackstone Credit and Blackstone in managing their respective Other Clients are likely to conflict from time to time with the transactions and strategies employed by the Adviser in managing the Fund and may affect the prices and availability of the securities and instruments in which the Fund invests. In addition, certain investment opportunities that fall within the Fund's investment objectives or strategy may be allocated in whole or in part (a) to Blackstone or Blackstone Credit itself, such as strategic investments made by Blackstone or Blackstone Credit itself (whether in financial institutions or otherwise), or (b) to Other Clients, such as Other Clients that have investment objectives or guidelines similar to or overlapping, in whole or in part, with the Fund to some extent, or pursue similar returns as the Fund but have a different investment strategy or objective.

Allocation Methodology Considerations

Blackstone Credit will share any investment and sale opportunities with such Other Clients and the Fund in accordance with the Advisers Act, and Firm-wide allocation policies, which generally provide for sharing pro rata based on targeted acquisition size or targeted sale size.

Notwithstanding the foregoing, Blackstone Credit may also consider the following factors in making any allocation determinations, and such factors may result in a different allocation of investment and/or sale opportunities: (i) the risk-return and target return profile of the proposed investment relative to the Fund's and the Other Clients' current risk profiles; (ii) the Fund's and/or the Other Clients' investment guidelines, restrictions, terms and objectives, including whether such objectives are considered solely in light of the specific investment under consideration or in the context of the respective portfolios' overall holdings; (iii) the need to re-size risk in the Fund's or the Other Clients' portfolios (including the potential for the proposed investment to create an industry, sector or issuer imbalance in the Fund's and Other Clients' portfolios, as applicable) and taking into account any existing non-pro rata investment positions in the portfolio of the Fund and Other Clients; (iv) liquidity considerations of the Fund and the Other Clients, including during a ramp-up or wind-down of one or more of the Fund or such Other Clients, proximity to the end of the Fund's or Other Clients' specified term or investment period, any redemption/withdrawal requests, anticipated future contributions and available cash; (v) legal, tax, accounting, political, national security and other consequences; (vi) regulatory or contractual restrictions or consequences (including, without limitation, requirements under the 1940 Act and any related rules, orders, guidance or other authority applicable to the Fund or Other Blackstone Credit Clients); (vii) avoiding a de minimis or odd lot allocation; (viii) availability and degree of leverage and any requirements or other terms of any existing leverage facilities; (ix) the Fund's or Other Clients' investment focus on a classification attributable to an investment or issuer of an investment, including, without limitation, investment strategy, geography, industry or business sector; (x) the nature and extent of involvement in the transaction on the part of the respective teams of investment professionals dedicated to the Fund or such Other Clients; (xi) the management of any actual or potential conflict of interest; (xii) with respect to investments that are made available to Blackstone Credit by counterparties pursuant to negotiated trading platforms (e.g., ISDA contracts), the absence of such relationships which may not be available to the Fund and all Other Clients; (xiii) available capital of the Fund and the Other Clients, (xiv) primary and permitted investment strategies, guidelines, liquidity

positions and requirements, and objectives of the Fund and the Other Clients, including, without limitation, with respect to Other Clients that expect to invest in or alongside other funds or across asset classes based on expected return (such as certain managed accounts with similar investment strategies and objectives), (xv) sourcing of the investment, (xvi) the specific nature (including size, type, amount, liquidity, holding period, anticipated maturity and minimum investment criteria) of the investment, (xvii) expected investment return, (xviii) expected cash characteristics (such as cash-on-cash yield, distribution rates or volatility of cash flows), (xix) capital expenditure required as part of the investment, (xx) portfolio diversification and concentration concerns (including, but not limited to, whether a particular fund already has its desired exposure to the investment, sector, industry, geographic region or markets in question), (xxi) relation to existing investments in a fund, if applicable (*e.g.*, “follow on” to existing investment, joint venture or other partner to existing investment, or same security as existing investment), and (xxii) any other considerations deemed relevant by Blackstone Credit in good faith.

Blackstone Credit shall not have any obligation to present any investment opportunity (or portion of any investment opportunity) to the Fund if Blackstone Credit determines in good faith that such opportunity (or portion thereof) should not be presented to the Fund for any one or a combination of the reasons specified above, or if Blackstone Credit is otherwise restricted from presenting such investment opportunity to the Fund.

In addition, Blackstone Credit has received an exemptive order from the SEC that permits certain existing and future funds regulated under the 1940 Act (each, a “Regulated Fund”), among other things, to co-invest with certain other persons, including certain affiliates of Blackstone Credit, and certain funds managed and controlled by Blackstone Credit and its affiliates, including the Fund, subject to certain terms and conditions. For so long as any privately negotiated investment opportunity falls within the investment criteria of one or more Regulated Funds, such investment opportunity shall also be offered to such Regulated Fund(s). In the event that the aggregate targeted investment sizes of the Fund and such Regulated Fund(s) exceed the amount of such investment opportunity, allocation of such investment opportunity to each of the Fund and such Regulated Fund(s) will be reduced proportionately based on their respective “available capital” as defined in the exemptive order, which may result in allocation to the Fund in an amount less than what it would otherwise have been if such Regulated Fund(s) did not participate in such investment opportunity. The exemptive order also restricts the ability of the Fund (or any other Blackstone Credit fund) from investing in any privately negotiated investment opportunity alongside a Regulated Fund except at the same time and on same terms. As a result, the Fund may be unable to make investments in different parts of the capital structure of the same issuer in which a Regulated Fund has invested or seeks to invest. The rules promulgated by the SEC under the 1940 Act, as well as any related guidance from the SEC and/or the terms of the exemptive order itself, are subject to change, and Blackstone Credit could undertake to amend the exemptive order (subject to SEC approval), obtain additional exemptive relief, or otherwise be subject to other requirements in respect of co-investments involving the Fund and any Regulated Funds, any of which may impact the amount of any allocation made available to Regulated Funds and thereby affect (and potentially decrease) the allocation made to the Fund.

Moreover, with respect to Blackstone Credit’s ability to allocate investment opportunities, including where such opportunities are within the common objectives and guidelines of the Fund and one or more Other Clients (which allocations are to be made on a basis that Blackstone Credit believes in good faith to be fair and reasonable), Blackstone Credit and Blackstone have established general guidelines and policies, which it may update from time to time, for determining how such allocations are to be made, which, among other things, set forth principles regarding what constitutes “debt” or “debt-like” investments, criteria for defining “control-oriented equity” or “infrastructure” investments, guidance regarding allocation for certain types of investments (*e.g.*, distressed energy) and other matters. In addition, certain Other Clients may receive certain priority or other allocation rights with respect to certain investments, subject to various conditions set forth in such Other Clients’ respective governing agreements. The application of those guidelines and conditions may result in the Fund or Other Clients not participating (and/or not participating to the same extent) in certain investment opportunities in which they would have otherwise participated had the related allocations been determined without regard to such guidelines and conditions and based only on the circumstances of those particular investments. Additionally, investment opportunities sourced by Blackstone Credit will be allocated in accordance with Blackstone’s and

Blackstone Credit's allocation policies, which may provide that investment opportunities will be allocated in whole or in part to other business units of the Firm on a basis that Blackstone and Blackstone Credit believe in good faith to be fair and reasonable, based on various factors, including the involvement of the respective teams from Blackstone Credit and such other business units. It should also be noted that investment opportunities sourced by business units of the Firm other than Blackstone Credit will be allocated in accordance with such business units' allocation policies, which will result in such investment opportunities being allocated, in whole or in part, away from Blackstone Credit, the Fund and Other Blackstone Credit Clients.

When Blackstone Credit determines not to pursue some or all of an investment opportunity for the Fund that would otherwise be within the Fund's objectives and strategies, and Blackstone or Blackstone Credit provides the opportunity or offers the opportunity to Other Clients, Blackstone or Blackstone Credit, including their personnel (including Blackstone Credit personnel), may receive compensation from the Other Clients, whether or not in respect of a particular investment, including an allocation of carried interest or referral fees, and any such compensation could be greater than amounts paid by the Fund to Blackstone Credit. As a result, Blackstone Credit (including Blackstone Credit personnel who receive such compensation) could be incentivized to allocate investment opportunities away from the Fund to or source investment opportunities for Other Clients. In addition, in some cases Blackstone or Blackstone Credit may earn greater fees when Other Clients participate alongside or instead of the Fund in an Investment.

Blackstone Credit makes good faith determinations for allocation decisions based on expectations that may prove inaccurate. Information unavailable to Blackstone Credit, or circumstances not foreseen by Blackstone Credit at the time of allocation, may cause an investment opportunity to yield a different return than expected. Conversely, an investment that Blackstone Credit expects to be consistent with the Fund's objectives may fail to achieve them.

The Adviser may, but will be under no obligation to, provide co-investment opportunities relating to investments made by the Fund to common shareholders, Other Clients, and investors of such Other Clients, subject to the Fund's exemptive relief and the 1940 Act. Such co-investment opportunities may be offered to such parties in the Adviser's discretion, subject to the Fund's exemptive relief. From time to time, Blackstone Credit may form one or more funds or accounts to co-invest in transactions with the Fund (or transactions alongside any of the Fund and one or more Other Clients). Furthermore, for the avoidance of doubt, to the extent that the Fund has received its target amount in respect of an investment opportunity, any remaining portion of such investment opportunity initially allocated to the Fund may be allocated to Other Clients or to co-investors in Blackstone Credit's discretion pursuant to the Fund's exemptive relief.

Orders may be combined for the Fund and all other participating Other Clients, and if any order is not filled at the same price, they may be allocated on an average price basis. Similarly, if an order on behalf of more than one account cannot be fully executed under prevailing market conditions, securities may be allocated among the different accounts on a basis that Blackstone Credit or its affiliates consider equitable.

There may be circumstances, including in the case where there is a seller who is seeking to dispose of a pool or combination of assets, properties, securities or instruments, where the Fund and Other Clients participate, subject to applicable law, in a single or related transactions with a particular seller where certain of such assets, properties, securities or instruments are specifically allocated (in whole or in part) to any of the Fund and such Other Clients. The allocation of such specific items generally would be based on Blackstone Credit's determination of, among other things, the expected returns for such items, and in any such case the combined purchase price paid to a seller would be allocated among the multiple assets, properties, securities or instruments based on a determination by the seller, by a third-party valuation firm and/or by Blackstone Credit and its affiliates. Additionally, it can be expected that the Firm will, from time to time, enter into arrangements or strategic relationships with third parties, including other asset managers, financial firms or other businesses or companies, that, among other things, provide for referral, sourcing or sharing of investment opportunities. Blackstone or Blackstone Credit may pay management fees and performance-based compensation in connection

with such arrangements. Blackstone or Blackstone Credit may also provide for or receive reimbursement of certain expenses incurred or received in connection with these arrangements, including diligence expenses and general overhead, administrative, deal sourcing and related corporate expenses. The amount of such reimbursements may relate to allocations of co-investment opportunities and increase if certain co-investment allocations are not made. While it is possible that the Fund will, along with the Firm itself, benefit from the existence of those arrangements and/or relationships, it is also possible that investment opportunities that would otherwise be presented to or made by the Fund would instead be referred (in whole or in part) to such third party, or, as indicated above, to other third parties, either as a contractual obligation or otherwise, resulting in fewer opportunities (or reduced allocations) being made available to the Fund and/or common shareholders. This means that co-investment opportunities that are sourced by the Fund may be allocated to investors that are not common shareholders. For example, a firm with which the Firm has entered into a strategic relationship may be afforded with “first-call” rights on a particular category of investment opportunities, although there is not expected to be substantial overlap in the investment strategies and/or objectives between the Fund and any such firm.

Certain Investments Inside the Fund’s Strategy that are not Pursued by the Fund. Under certain circumstances, Blackstone or Blackstone Credit may determine not to pursue some or all of an investment opportunity within the Fund’s strategy, including without limitation, as a result of business, reputational or other reasons applicable to the Fund, Other Clients, their respective obligors or portfolio companies or Blackstone. In addition, Blackstone Credit may determine that the Fund should not pursue some or all of an investment opportunity, including, by way of example and without limitation, because the Fund has already invested sufficient capital in the investment, sector, industry, geographic region or markets in question, as determined by Blackstone Credit in its sole discretion, or the investment is not appropriate for the Fund for other reasons as determined by Blackstone Credit in its sole discretion. In any such case Blackstone or Blackstone Credit could, thereafter, offer such opportunity to other parties, including Other Clients or portfolio companies or limited partners or common shareholders of the Fund or Other Clients, joint venture partners, related parties or third parties. Any such Other Clients may be advised by a different Blackstone or Blackstone Credit business group with a different investment committee, which could determine an investment opportunity to be more attractive than Blackstone Credit believes to be the case. In any event, there can be no assurance that Blackstone Credit’s assessment will prove correct or that the performance of any investments actually pursued by the Fund will be comparable to any investment opportunities that are not pursued by the Fund. Blackstone and Blackstone Credit, including their personnel, may receive compensation from any such party that makes the investment, including an allocation of carried interest or referral fees, and any such compensation could be greater than amounts paid by the Fund to Blackstone Credit. In some cases, Blackstone or Blackstone Credit earns greater fees when Other Clients participate alongside or instead of the Fund in an Investment.

Cross Transactions. Situations may arise where certain assets held by the Fund may be transferred to Other Clients and vice versa. Such transactions will be conducted in accordance with, and subject to, the Adviser’s contractual obligations to the Fund and applicable law, including the 1940 Act and in accordance with the practices set out in “Other Conflicts” herein.

Fund Co-Investment Opportunities. As a registered investment company under the 1940 Act, the Fund is subject to certain limitations relating to co-investments and joint transactions with affiliates, which likely will in certain circumstances limit the Fund’s ability to make investments or enter into other transactions alongside the Other Clients. There can be no assurance that such regulatory restrictions will not adversely affect the Fund’s ability to capitalize on attractive investment opportunities. However, subject to the 1940 Act and any applicable co-investment order issued by the SEC, the Fund may co-invest with Other Clients (including co-investment or other vehicles in which the Firm or its personnel invest and that co-invest with such Other Clients) in investments that are suitable for the Fund and one or more of such Other Clients. Even if the Fund and any such Other Clients and/or co-investment or other vehicles invest in the same securities, conflicts of interest may still arise.

The Fund has received an exemptive order from the SEC that permits it, among other things, to co-invest with certain other persons, including certain affiliates of the Adviser and certain funds managed and controlled

by the Adviser and its affiliates, subject to certain terms and conditions. Such order may restrict the Fund's ability to enter into follow-on investments or other transactions. Pursuant to such order, the Fund may co-invest in a negotiated deal with certain affiliates of the Adviser or certain funds managed and controlled by the Adviser and its affiliates, subject to certain terms and conditions. The Fund may also receive an allocation in such a deal alongside affiliates pursuant to other mechanisms to the extent permitted by the 1940 Act.

Investments in Portfolio Companies Alongside Other Clients. From time to time, the Fund will co-invest with Other Clients (including co-investment or other vehicles in which the Firm or its personnel invest and that co-invest with such Other Clients) in investments that are suitable for both the Fund and such Other Clients, as permitted by applicable law and/or any applicable SEC-granted order. Even if the Fund and any such Other Clients invest in the same securities or loans, conflicts of interest may still arise. For example, it is possible that as a result of legal, tax, regulatory, accounting, political, national security or other considerations, the terms of such investment (and divestment thereof) (including with respect to price and timing) for the Fund and such other funds and vehicles may not be the same. Additionally, the Fund and such Other Clients and/or vehicles will generally have different investment periods and/or investment objectives (including return profiles) and Blackstone Credit, as a result, may have conflicting goals with respect to the price and timing of disposition opportunities. Such Other Clients may also have certain governance rights for legal, regulatory or other reasons that the Fund will not have. As such, subject to applicable law and any applicable order issued by the SEC, the Fund and/or such Other Clients may dispose of any such shared investment at different times and on different terms.

Debt Financings in connection with Acquisitions and Dispositions. The Fund may from time to time provide financing as part of a third party purchaser's bid for, or acquisition of, a portfolio entity or the underlying assets thereof owned by one or more Other Clients. This generally would include the circumstance where the Fund is making commitments to provide financing at or prior to the time such third party purchaser commits to purchase such investments or assets from one or more Other Clients. The Fund may also make investments and provide debt financing with respect to obligors in which Other Clients and/or affiliates hold or propose to acquire an interest, including when such investments or debt financing would result in the repayment of an Other Client's existing investment. While the terms and conditions of any such arrangements will generally be at arm's length and negotiated on a case by case basis, the involvement of the Fund and/or such Other Clients or affiliates may affect the terms of such transactions or arrangements and/or may otherwise influence the applicable management company's decisions with respect to the management of the Fund and/or such Other Clients or the relevant portfolio company, which may give rise to potential or actual conflicts of interest and which could adversely impact the Fund.

Firm Involvement in Financing of Third Party Dispositions by the Fund. The Fund may from time to time dispose of all or a portion of an investment by way of accepting a third-party purchaser's bid where the Firm or one or more Other Clients is providing financing as part of such bid or acquisition of the investment or underlying assets thereof. This generally would include the circumstance where the Firm or one or more Other Clients is making commitments to provide financing at or prior to the time such third-party purchaser commits to purchase such investments or assets from the Fund. Such involvement of the Firm or one or more Other Clients as such a provider of debt financing in connection with the potential acquisition of portfolio investments by third parties from the Fund may give rise to potential or actual conflicts of interest.

Material, Non-Public Information. Blackstone Credit will come into possession of confidential information with respect to an Issuer. Blackstone Credit may be restricted from buying, originating or selling securities, loans of, or derivatives with respect to, the issuer on behalf of the Fund until such time as the information becomes public or is no longer deemed material such that it would preclude the Fund from participating in an investment. Disclosure of such information to the Adviser's personnel responsible for the affairs of the Fund will be on a need-to-know basis only, and the Fund may not be free to act for the Fund upon any such information. Therefore, the Fund may not have access to confidential information in the possession of Blackstone Credit that might be relevant to an investment decision to be made for the Fund. In addition, Blackstone Credit, in an effort to avoid

buying or selling restrictions on behalf of the Fund or Other Blackstone Credit Clients, may choose to forego an opportunity to receive (or elect not to receive) information that other market participants or counterparties, including those with the same positions in the issuer as the Fund, are eligible to receive or have received, even if possession of such information would otherwise be advantageous to the Fund.

In addition, affiliates of Blackstone Credit within Blackstone may come into possession of confidential information with respect to an issuer. Blackstone Credit may be restricted from buying, originating or selling securities, loans of, or derivatives with respect to, the issuer on behalf of the Fund if the Firm deemed such restriction appropriate. Disclosure of such information to the Adviser's personnel responsible for the affairs of the Fund will be on a need-to-know basis only, and the Fund may not be free to act upon any such information. Therefore, the Fund may not have access to confidential information in the possession of the Firm that might be relevant to an investment decision to be made by the Fund. Accordingly, the Fund may not be able to initiate a transaction that it otherwise might have initiated and may not be able to sell an investment that it otherwise might have sold.

Break-up and other Similar Fees. Break-up or topping fees with respect to the Fund's investments can be paid to Blackstone Credit. Alternatively, the Fund could receive the break-up or topping fees directly. Break-up or topping fees paid to Blackstone Credit or the Fund in connection with a transaction could be allocated, or not, to Other Clients or co-investment vehicles that invest (or are expected to invest) alongside the Fund, as determined by Blackstone Credit to be appropriate in the circumstances. Generally, Blackstone Credit would not allocate break-up or topping fees with respect to a potential investment to the Fund, an Other Client or co-investment vehicle unless such person would also share in broken deal expenses related to the potential investment. In the case of fees for services as a director of a portfolio company, the management fee will not be reduced to the extent any Firm personnel continues to serve as a director after the Fund has exited (or is in the process of exiting) the applicable portfolio company and/or following the termination of such employee's employment with the Firm. For the avoidance of doubt, although the financial advisory and restructuring business of Blackstone has been spun out, to the extent any investment banking fees, consulting (including management consulting) fees, syndication fees, capital markets syndication and advisory fees (including underwriting fees), origination fees, servicing fees, healthcare consulting / brokerage fees, fees relating to group purchasing, financial advisory fees and similar fees for arranging acquisitions and other major financial restructurings, loan servicing and/or other types of insurance fees, operations fees, financing fees, fees for asset services, title insurance fees, data management and services fees or payments and other similar fees and annual retainers (whether in cash or in kind) are received by Blackstone, such fees will not be required to be shared with the Fund or the common shareholders and will not reduce the management fee payable by the Fund.

Broken Deal Expenses. Any expenses that may be incurred by the Fund for actual investments as described herein may also be incurred by the Fund with respect to broken deals (*i.e.*, investments that are not consummated). Blackstone Credit is not required to and in most circumstances will not seek reimbursement of broken deal expenses (*i.e.*, expenses incurred in pursuit of an investment that is not consummated) from third parties, including counterparties to the potential transaction or potential co-investors. Examples of such broken deal expenses include, but are not limited to, reverse termination fees, extraordinary expenses such as litigation costs and judgments, travel and entertainment expenses incurred, costs of negotiating co-investment documentation, and legal, accounting, tax and other due diligence and pursuit costs and expenses. Any such broken deal expenses could, in the sole discretion of Blackstone Credit, be allocated solely to the Fund and not to Other Clients or co-investment vehicles that could have made the investment, even when the Other Client or co-investment vehicle commonly invests alongside the Fund in its investments or the Firm or Other Clients in their investments. In such cases, the Fund's share of expenses would increase. In the event broken deal expenses are allocated to an Other Client or a co-investment vehicle, Blackstone Credit may advance such fees and expenses without charging interest until paid by the Other Client or co-investment vehicle, as applicable.

Other Firm Business Activities. The Firm, Other Clients, their obligors/portfolio companies, and personnel and related parties of the foregoing will receive fees and compensation, including performance-based and other

incentive fees, for products and services provided to the Fund and its obligors, such as fees for asset and property management; investment management, underwriting, syndication or refinancing of a loan or investment; loan servicing; special servicing; administrative services; advisory services on purchase or sale of an asset or company; advisory services; investment banking and capital markets services; placement agent services; fund administration; internal legal and tax planning services; information technology products and services; insurance procurement; brokerage; solutions and risk management services; data extraction and management products and services; and other products and services (including but not limited to restructuring, consulting, monitoring, commitment, syndication, origination, organization and financing, and divestment services). Such parties will also provide products and services for fees to the Firm, Other Clients and their obligors/portfolio companies, and their personnel and related parties, as applicable, as well as third parties. Through its Innovations group, Blackstone incubates businesses that can be expected to provide goods and services to the Fund (subject to the requirements of the 1940 Act and applicable guidance) and Other Clients and their obligors/portfolio companies, as well as other Firm-related parties and third parties. By contracting for a product or service from a business related to the Firm, the Fund and its obligors would provide not only current income to the business and its stakeholders, but could also create significant enterprise value in them, which would not be shared with the Fund or common shareholders and could benefit the Firm directly and indirectly. Also, the Firm, Other Clients and their obligors/portfolio companies, and their personnel and related parties may receive compensation or other benefits, such as through additional ownership interests or otherwise, directly related to the consumption of products and services by the Fund and its obligors. The Fund and its obligors will incur expense in negotiating for any such fees and services, which will be treated as Fund Expenses. In addition, the Firm may receive fees associated with capital invested by co-investors relating to investments in which the Fund participates or otherwise, in connection with a joint venture in which the Fund participates (subject to the 1940 Act) or otherwise with respect to assets or other interests retained by a seller or other commercial counterparty with respect to which the Firm performs services. Finally, the Firm and its personnel and related parties may also receive compensation in connection with referrals and related activities of such business incubated by the Blackstone Innovations group.

Blackstone Credit, Other Clients and their portfolio companies, and their affiliates, personnel and related parties could continue to receive fees, including performance-based or incentive fees, for the services described in the preceding paragraphs with respect to investments sold by the Fund or a portfolio company to a third party buyer after the sale is consummated. Such post-disposition involvement will give rise to potential or actual conflicts of interest, particularly in the sale process. Moreover, Blackstone Credit, Other Clients and their portfolio companies, and their affiliates, personnel and related parties may acquire a stake in the relevant asset as part of the overall service relationship, at the time of the sale or thereafter.

Blackstone Credit does not have any obligation to ensure that fees for products and services contracted by the Fund or its obligors are at market rates unless the counterparty is considered an affiliate of the Firm and given the breadth of the Firm's investments and activities Blackstone Credit may not be aware of every commercial arrangement between the Fund and its obligors, on the one hand, and the Firm, Other Clients and their obligors/portfolio companies, and personnel and related parties of the foregoing, on the other hand.

Except as set forth above, the Fund and common shareholders will not receive the benefit (*e.g.*, through a reduction to the management fee or otherwise) of any fees or other compensation or benefit received by Blackstone Credit, its affiliates or their personnel and related parties. (See also “—Service Providers, Vendors and Other Counterparties Generally” and “—Other Firm Business Activities.”)

Securities and Lending Activities. Blackstone, its affiliates and their related parties and personnel will from time to time participate in underwriting or lending syndicates with respect to current or potential portfolio companies, or may otherwise act as arrangers of financing, including with respect to the public offering and/or private placement of debt or equity securities issued by, or loan proceeds borrowed by the Fund and its obligors, or otherwise in arranging financing (including loans) for such obligors or advise on such transactions. Such underwritings or engagements may be on a firm commitment basis or may be on an uncommitted “best efforts”

basis, and the underwriting or financing parties are under no duty to provide any commitment unless specifically set forth in the relevant contract. Blackstone may also provide placement or other similar services to purchasers or sellers of securities, including loans or instruments issued by portfolio companies. There may also be circumstances in which the Fund commits to purchase any portion of such issuance from the portfolio company that a Blackstone broker-dealer intends to syndicate to third parties. As a result thereof, subject to the limitations of the 1940 Act, Blackstone may receive commissions or other compensation, thereby creating a potential conflict of interest. This could include, by way of example, fees and/or commissions for equity syndications to co-investment vehicles. In certain cases, subject to the limitations of the 1940 Act, a Blackstone broker-dealer will from time to time act as the managing underwriter or a member of the underwriting syndicate or broker for the Fund or its obligors, or as dealer, broker or advisor to a counterparty to the Fund or a portfolio company and purchase securities from or sell securities to the Fund, Other Clients or obligors/portfolio companies of the Fund or Other Clients or advise on such transactions. Blackstone will also from time to time, on behalf of the Fund or other parties to a transaction involving the Fund or its obligors, effect transactions, including transactions in the secondary markets that result in commissions or other compensation paid to Blackstone by the Fund or its obligors or the counterparty to the transaction, thereby creating a potential conflict of interest. This could include, by way of example, fees and/or commissions for equity syndications to co-investment vehicles. Subject to applicable law, Blackstone will from time to time receive underwriting fees, discounts, placement commissions, loan modification or restructuring fees, servicing fees, capital markets advisory fees, lending arrangement fees, asset/property management fees, insurance (including title insurance) fees and consulting fees, monitoring fees, commitment fees, syndication fees, origination fees, organizational fees, operational fees, loan servicing fees, and financing and divestment fees (or, in each case, rebates in lieu of any such fees, whether in the form of purchase price discounts or otherwise, even in cases where Blackstone, an Other Client or its portfolio companies are purchasing debt) or other compensation with respect to the foregoing activities, which are not required to be shared with the Fund. In addition, the management fee with respect to the Fund generally will not be reduced by such amounts. Therefore, Blackstone will from time to time have a potential conflict of interest regarding the Fund and the other parties to those transactions to the extent it receives commissions, discounts or other compensation from such other parties. The Board, in its sole discretion, will approve any transactions, subject to the limitations of the 1940 Act, in which a Blackstone broker-dealer acts as an underwriter, as broker for the Fund, or as dealer, broker or advisor, on the other side of a transaction with the Fund only where the Board believes that such transactions are appropriate for the Fund and, by investing in Common Shares, a common shareholder consents to all such transactions, along with the other transactions involving conflicts of interest described herein, to the fullest extent permitted by law.

Sales of loans or securities for the account of the Fund and its portfolio companies will from time to time be bunched or aggregated with orders for other accounts of the Firm including Other Clients. It could be impossible, as determined by Blackstone Credit in its sole discretion, to receive the same price or execution on the entire volume of securities sold, and the various prices will, in certain circumstances, therefore be averaged which may be disadvantageous to the Fund.

When Blackstone serves as underwriter with respect to securities of the Fund or its obligors, the Fund and such obligors could from time to time be subject to a “lock-up” period following the offering under applicable regulations during which time the Fund or portfolio company would be unable to sell any securities subject to the “lock-up.” This may prejudice the ability of the Fund and its obligors to dispose of such securities at an opportune time. In addition, Blackstone Capital Markets may serve as underwriter in connection with the sale of securities by the Fund or its obligors. Conflicts may arise because such engagement would result in Blackstone Capital Markets receiving selling commissions or other compensation in connection with such sale. (See also “—Obligor/Portfolio Company Relationships Generally” below.)

Blackstone and Blackstone Credit employees are generally permitted to invest in alternative investment funds, real estate funds, hedge funds or other investment vehicles, including potential competitors of the Fund. The Fund will not receive any benefit from any such investments.

PJT Partners Inc. On October 1, 2015, Blackstone spun off its financial and strategic advisory services, restructuring and reorganization advisory services, and its Park Hill fund placement businesses and combined these businesses with PJT Partners Inc. (“PJT”), an independent financial advisory firm founded by Paul J. Taubman. While the combined business operates independently from Blackstone and is not an affiliate thereof, it is expected that there will be substantial overlapping ownership between Blackstone and PJT for a considerable period of time going forward. Therefore, conflicts of interest will arise in connection with transactions between or involving the Fund and its obligors, on the one hand, and PJT, on the other. The pre-existing relationship between Blackstone and its former personnel involved in financial and strategic advisory services at PJT, the overlapping ownership and co-investment and other continuing arrangements between PJT and Blackstone may influence Blackstone Credit to select or recommend PJT to perform services for the Fund or its obligors, the cost of which will generally be borne directly or indirectly by the Fund. Given that PJT is no longer an affiliate of Blackstone, Blackstone Credit and its affiliates will be free to cause the Fund and portfolio companies to transact with PJT generally without restriction under the applicable governing documents, notwithstanding the relationship between Blackstone and PJT.

Obligor/Portfolio Company Relationships Generally. The Fund’s obligors are expected to be counterparties to or participants in agreements, transactions or other arrangements with portfolio companies of Other Clients or other Blackstone affiliates for the provision of goods and services, purchase and sale of assets and other matters. Although the Firm may determine that such agreements, transactions or other arrangements are consistent with the requirements of such Other Clients’ offering and/or governing agreements, such agreements, transactions or other arrangements may not have otherwise been entered into but for the affiliation with Blackstone Credit and/or Blackstone. These agreements, transactions or other agreements involve fees, commissions, servicing payments and/or discounts to Blackstone Credit, any Blackstone affiliate (including personnel) or a portfolio company, none of which reduce the management fee payable by the Fund). For example, the Firm may cause, or offer the opportunity to, portfolio companies to enter into agreements regarding group procurement (such as the group purchasing organization), benefits management, purchase of title and/or other insurance policies (which may be pooled across portfolio companies and discounted due to scale) and other operational, administrative or management related matters from a third party or a Firm affiliate, and other similar operational initiatives that may result in commissions or similar payments, including related to a portion of the savings achieved by the portfolio company. Such agreements, transactions or other arrangements may be entered into without the consent or direct involvement of the Fund and/or such Other Client or the consent of the Board and/or the common shareholders of the Fund or such Other Client (including, without limitation, in the case of minority and/or non-controlling investments by the Fund in such portfolio companies or the sale of assets from one portfolio company to another) and/or such Other Client. In any such case, the Fund may not be involved in the negotiation process, and there can be no assurance that the terms of any such agreement, transaction or other arrangement will be as favorable to the Fund as otherwise would be the case if the counterparty were not related to the Firm.

In addition, it is possible that certain portfolio companies of Other Clients or companies in which Other Clients have an interest will compete with the Fund for one or more investment opportunities and/or engage in activities that may have adverse consequences on the Fund and/or its obligors. As an example of the latter, the laws and regulations of certain jurisdictions (*e.g.*, bankruptcy, environmental, consumer protection and/or labor laws) may not recognize the segregation of assets and liabilities as between separate entities and may permit recourse against the assets of not just the entity that has incurred the liabilities, but also the other entities that are under common control with, or part of the same economic group as, such entity. In such circumstances, the assets of the Fund and/or its obligors may be used to satisfy the obligations or liabilities of one or more Other Clients, their portfolio companies and/or affiliates.

In addition, Blackstone and affiliates of Blackstone may also establish other investment products, vehicles and platforms focusing on specific asset classes or industry sectors that fall within the Fund’s investment strategy, which may compete with the Fund for investment opportunities (it being understood that such arrangements may give rise to conflicts of interest that may not necessarily be resolved in favor of the Fund).

Certain portfolio companies may have established or invested in, or may in the future establish or invest in, vehicles that are managed exclusively by the portfolio company (and not the Fund or the Firm or any of its affiliates) and that invest in asset classes or industry sectors (such as cyber security) that fall within the Fund's investment strategy. Such vehicles, which may not be considered affiliates of the Firm and would not be subject to the Firm's policies and procedures, may compete with the Fund for investment opportunities. Portfolio companies and affiliates of the Firm may also establish other investment products, vehicles and platforms focusing on specific asset classes or industry sectors (such as reinsurance) that may compete with the Fund for investment opportunities (it being understood that such arrangements may give rise to conflicts of interest that may not necessarily be resolved in favor of the Fund). Portfolio companies and affiliates of the Firm may also establish other investment products, vehicles and platforms focusing on specific asset classes or industry sectors (such as reinsurance) that may compete with the Fund for investment opportunities (it being understood that such arrangements may give rise to conflicts of interest that may not necessarily be resolved in favor of the Fund). In addition, the Fund may hold non-controlling interests in certain portfolio companies and, as a result, such portfolio companies could engage in activities outside of the Fund's control that may have adverse consequences on the Fund and/or its other obligors.

In addition, the Firm has also entered into certain investment management arrangements whereby it provides investment management services for compensation to insurance companies including (i) FGL Holdings which was formerly known as Fidelity & Guaranty Life Insurance Company (and was acquired by Fidelity National Financial Inc., and certain of its affiliates ("FGL")), (ii) Everlake Life Insurance Company and certain of its affiliates ("ALIC") and (iii) the insurance companies comprising American International Group Inc.'s life and retirement business ("AIG L&R"). As of the date of this Memorandum, ALIC is a portfolio entity of Other Blackstone Clients, which involve investments across a variety of asset classes (including investments that may otherwise be appropriate for the Fund), and Blackstone has acquired a 9.9% equity interest in the parent company of AIG L&R. As a result, in addition to the compensation Blackstone receives for providing investment management services to insurance companies in which Blackstone or an Other Blackstone Client owns an interest, in certain instances Blackstone receives additional compensation in its capacity as an indirect owner of such insurance companies and/or Other Blackstone Clients. In the future Blackstone will likely enter into similar arrangements with other portfolio companies of the Fund, Other Blackstone Clients or other insurance companies. Such arrangements may reduce the allocations of investments to the Fund, and the Firm may be incentivized to allocate investments away from the Fund to the counterparties to such investment management arrangements or other vehicles/accounts to the extent the economic arrangements related thereto are more favorable to Blackstone relative to the terms of the Fund.

Further, obligors with respect to which the Fund may elect members of the board of directors may, as a result, subject the Fund and/or such directors to fiduciary obligations to make decisions that they believe to be in the best interests of any such portfolio company. Although in most cases the interests of the Fund and any such portfolio company will be aligned, this may not always be the case. This may create conflicts of interest between the relevant director's obligations to any such portfolio company and its stakeholders, on the one hand, and the interests of the Fund, on the other hand. Although Blackstone Credit will generally seek to minimize the impact of any such conflicts, there can be no assurance they will be resolved favorably for the Fund.

Obligor/Portfolio Company Service Providers and Vendors. Subject to applicable law, the Fund, Other Clients, obligors/portfolio companies of each of the foregoing and Blackstone Credit can be expected to engage obligors/portfolio companies of the Fund and Other Clients to provide some or all of the following services: (a) corporate support services (including, without limitation, accounts payable, accounts receivable, accounting/audit (including valuation support services), account management, insurance, procurement, placement, brokerage, consulting, cash management, corporate secretarial services, domiciliation, data management, directorship services, finance/budget, human resources, information technology/systems support, internal compliance, know-your-client reviews and refreshes, judicial processes, legal, environmental due diligence support (e.g., review of property condition reports), operational coordination (*i.e.*, coordination with JV partners, property managers), risk management, reporting, such as tax reporting, debt reporting or other), tax and treasury,

tax analysis and compliance (*e.g.*, CIT and VAT compliance), transfer pricing and internal risk control, treasury and valuation services); (b) loan services (including, without limitation, monitoring, restructuring and work-out of performing, sub-performing and nonperforming loans, administrative services, and cash management); (c) management services (*i.e.*, management by a portfolio company, Blackstone affiliate or third party (*e.g.*, a third-party manager) of operational services); (d) operational services (*i.e.*, general management of day to day operations); (e) risk management (tax and treasury); (f) insurance procurement, placement, brokerage and consulting services; and (g) other services. Similarly, Blackstone Credit, Other Clients and their portfolio companies can be expected to engage obligors of the Fund to provide some or all of these services. Some of the services performed by portfolio company service providers could also be performed by Blackstone Credit from time to time and vice versa. Fees paid by the Fund or its obligors to the other portfolio company service providers do not reduce the management fee payable by the Fund and are not otherwise shared with the Fund. Portfolio company service providers described in this section are generally owned and controlled by one or more Other Clients. In certain instances, a similar company could be owned and controlled by Blackstone directly.

Obligors/portfolio companies of the Fund and Other Clients some of which can be expected to provide services to the Fund and its obligors include, without limitation, the following, and may include additional obligors that may be formed or acquired in the future:

BTIG. BTIG, LLC (“BTIG”) is a global financial services firm in which certain Blackstone entities own a strategic minority investment. BTIG provides institutional trading, investment banking, research and related brokerage services and may provide goods and services for the Fund or its obligors.

Optiv. Optiv Security, Inc. is a portfolio company held by certain Blackstone private equity funds that provides a full slate of information security services and solutions and may provide goods and services for the Fund and its obligors.

PSAV. PSAV, Inc. is a portfolio company held by certain Blackstone private equity funds that provides outsourced audiovisual services and event production and may provide goods and services for the Fund and its obligors.

Refinitiv. On October 1, 2018, a consortium led by Blackstone announced that private equity funds managed by Blackstone had completed an acquisition of Thomson Reuters’ Financial & Risk business (“Refinitiv”). On January 29, 2021, Refinitiv was sold to London Stock Exchange Group (“LSEG”), with Blackstone private equity funds receiving a minority stake in LSEG. Refinitiv operates a pricing service that provides valuation services and provides goods and services for the Fund and its obligors.

Kryalos. Blackstone through one or more of its Other Clients has made a minority investment in Kryalos Investments S.r.l. (“Kryalos”), an operating partner in certain real estate investments made by Other Clients, and Kryalos may perform services for the Fund and its portfolio companies.

The Fund and its obligors will compensate one or more of these service providers and vendors owned by the Fund or Other Clients, including through incentive based compensation payable to their management teams and other related parties. The incentive based compensation paid with respect to a portfolio company or asset of the Fund or Other Clients will vary from the incentive based compensation paid with respect to other portfolio companies and assets of the Fund and Other Clients; as a result the management team or other related parties can be expected to have greater incentives with respect to certain assets and portfolio companies relative to others, and the performance of certain assets and portfolio companies may provide incentives to retain management that also service other assets and portfolio companies. Some of these service providers and vendors owned or controlled by the Fund or Other Clients will charge the Fund and its obligors for goods and services at rates generally consistent with those available in the market for similar goods and services. The discussion regarding the determination of market rates under “Firm Affiliated Service Providers” herein applies equally in respect of the fees and expenses of the portfolio company service providers, if charged at rates generally consistent with

those available in the market. Other service providers and vendors owned and/or controlled by the Fund or Other Clients pass through expenses on a cost reimbursement, no-profit or break-even basis, in which case the service provider allocates costs and expenses directly associated with work performed for the benefit of the Fund and its obligors to them, along with any related tax costs and an allocation of the service provider's overhead, including any of the following: salaries, wages, benefits and travel expenses; marketing and advertising fees and expenses; legal, accounting and other professional fees and disbursements; office space and equipment (including, without limitation, rent and refurbishment costs and office space); insurance premiums; technology expenditures, including hardware and software costs; costs to engage recruitment firms to hire employees; diligence expenses; one-time costs, including costs related to building-out and winding-down a portfolio company; costs that are of a limited duration or non-recurring (such as start-up or technology build-up costs, one-time technology and systems implementation costs, employee on-boarding and severance payments, and IPO-readiness and other infrastructure costs); taxes; and other operating and capital expenditures. Any of the foregoing costs, although allocated in a particular period, will, in certain circumstances, relate to activities occurring outside the period, and therefore the Fund could pay more than its pro rata portion of fees for services. The allocation of overhead among the entities and assets to which services are provided can be expected to be based on any of a number of different methodologies, including, without limitation, "cost" basis as described above, "time-allocation" basis, "per unit" basis, "per square footage" basis or "fixed percentage" basis, and the particular methodology used to allocate such overhead among the entities and assets to which services are provided are expected to vary depending on the types of services provided and the applicable asset class involved. There can be no assurance that a different manner of allocation would result in the Fund and its obligors bearing less or more costs and expenses. In certain instances, particularly where such service providers and vendors are located in Europe or Asia, such service providers and vendors will charge the Fund and its portfolio companies for goods and services at cost plus a percentage of cost for transfer pricing or other tax, legal, regulatory, accounting or other reasons. The Firm is not expected to perform or obtain benchmarking analysis or third-party verification of expenses with respect to services provided on a cost reimbursement, no profit or break even basis. There can be no assurances that amounts charged by portfolio company service providers that are not controlled by the Fund or Other Clients will be consistent with market rates or that any benchmarking, verification or other analysis will be performed with respect to such charges. If benchmarking is performed, the related expenses will be borne by the Fund, Other Clients and their respective obligors/portfolio companies and will not reduce the management fee. A portfolio company service provider will, in certain circumstances, subcontract certain of its responsibilities to other portfolio companies. In such circumstances, the relevant subcontractor could invoice the portfolio company for fees (or in the case of a cost reimbursement arrangement, for allocable costs and expenses) in respect of the services provided by the subcontractor. The portfolio company, if charging on a cost reimbursement, no-profit or break-even basis, would in turn allocate those costs and expenses as it allocates other fees and expenses as described above. Similarly, Other Clients, their portfolio companies and Blackstone Credit can be expected to engage portfolio companies of the Fund to provide services, and these portfolio companies will generally charge for services in the same manner described above, but the Fund and its obligors generally will not be reimbursed for any costs (such as start-up costs) relating to such portfolio companies incurred prior to such engagement. Some of the services performed by these service providers could also be performed by Blackstone Credit from time to time and vice versa. Fees paid by the Fund or its obligors to these service providers do not the offset or reduce the management fee payable to the Adviser.

Service Providers, Vendors and Other Counterparties Generally. Certain third party advisors and other service providers and vendors to the Fund and its obligors (including accountants, administrators, lenders, bankers, brokers, attorneys, consultants, title agents and investment or commercial banking firms) are owned by the Firm, the Fund or Other Clients or provide goods or services to, or have other business, personal, financial or other relationships with, the Firm, the Other Clients and their respective portfolio companies and affiliates and personnel. Such advisors and service providers referred to above may be investors in the Fund, affiliates of the Adviser, sources of financing and investment opportunities or co-investors or commercial counterparties or entities in which the Firm and/or Other Clients have an investment, and payments by the Fund and/or such entities may indirectly benefit the Firm, the Other Clients (including co-investment vehicles) and their respective portfolio companies or any affiliates or personnel. Also, advisors, lenders, investors, commercial counterparties,

vendors and service providers (including any of their affiliates or personnel) to the Fund and its obligors could have other commercial or personal relationships with the Firm, Other Clients and their respective portfolio companies, or any affiliates, personnel or family members of personnel of the foregoing. Although the Firm selects service providers and vendors it believes are most appropriate in the circumstances based on its knowledge of such service providers and vendors (which knowledge is generally greater in the case of service providers and vendors that have other relationships to the Firm), the relationship of service providers and vendors to the Firm as described above will influence the Firm in deciding whether to select, recommend or form such an advisor or service provider to perform services for the Fund, subject to applicable law, or a portfolio company, the cost of which will generally be borne directly or indirectly by the Fund and can be expected to incentivize the Firm to engage such service provider over a third party, utilize the services of such service providers and vendors more frequently than would be the case absent the conflict, or to pay such service providers and vendors higher fees or commissions, resulting in higher fees and expenses being borne by the Fund, than would be the case absent the conflict. The incentive could be created by current income and/or the generation of enterprise value in a service provider or vendor; the Firm can be expected to also have an incentive to invest in or create service providers and vendors to realize on these opportunities. Blackstone has an incentive to use third party services providers who do so as a result of the indirect benefit to Blackstone and additional business for the related service providers and vendors. Fees paid by the Fund or its portfolio companies to or value created in these service providers and vendors do not offset or reduce Fund Fees payable by the Shareholders and are not otherwise shared with the Fund. In the case of brokers, Blackstone has a best execution policy that it updates from time to time to comply with regulatory requirements in applicable jurisdictions.

The Firm has a practice of not entering into any arrangements with advisors, vendors or service providers that provide lower rates or discounts to the Firm itself compared to those it enters into on behalf of the Fund and its obligors for the same services. However, legal fees for unconsummated transactions are often charged at a discounted rate, such that if the Fund and its obligors consummate a higher percentage of transactions with a particular law firm than the Firm, the Fund, Other Clients and their obligors/portfolio companies, the shareholders could indirectly pay a higher net effective rate for the services of that law firm than the Firm, the Fund or Other Clients or their obligors/portfolio companies. Also, advisors, vendors and service providers often charge different rates or have different arrangements for different types of services. For example, advisors, vendors and service providers often charge fees based on the complexity of the matter as well as the expertise and time required to handle it. Therefore, to the extent the types of services used by the Fund and its obligors are different from those used by the Firm, Other Clients and their portfolio companies, and their affiliates and personnel, the Fund and its obligors can be expected to pay different amounts or rates than those paid by such other persons. Similarly, the Firm, the Fund, the Other Clients and their obligors/portfolio companies and affiliates can be expected to enter into agreements or other arrangements with vendors and other similar counterparties (whether such counterparties are affiliated or unaffiliated with the Firm) from time to time whereby such counterparty will, in certain circumstances, charge lower rates (or no fee) or provide discounts or rebates for such counterparty's products or services depending on the volume of transactions in the aggregate or other factors.

Subject to applicable law, the Fund, Other Clients and their obligors/portfolio companies are expected to enter into joint ventures with third parties to which the service providers and vendors described above will provide services. In some of these cases, the third party joint venture partner may negotiate to not pay its pro rata share of fees, costs and expenses to be allocated as described above, in which case the Fund, Other Clients and their obligors/portfolio companies that also use the services of the portfolio company service provider will, directly or indirectly, pay the difference, or the portfolio company service provider will bear a loss equal to the difference.

The Firm may, from time to time, encourage service providers to funds and investments to use, generally at market rates and/or on arm's length terms, the Firm-affiliated (and/or on the basis of best execution, if applicable), service providers in connection with the business of the Fund, obligors/portfolio companies, and

unaffiliated entities. This practice provides an indirect benefit to the Firm in the form of added business for the Firm-affiliated service providers.

Certain obligors/portfolio companies that provide services to the Fund, Other Clients and/or obligors/portfolio companies or assets of the Fund and/or Other Clients may be transferred between and among the Fund and/or Other Clients (where the Fund may be a seller or a buyer in any such transfer) for minimal or no consideration (based on a third party valuation confirming the same). Such transfers may give rise to actual or potential conflicts of interest for Blackstone Credit.

Firm Affiliated Service Providers. Certain of the Fund's, the Firm's and/or obligor/portfolio companies' advisers and other service providers, or their affiliates (including accountants, administrators, lenders, bankers, brokers, attorneys, consultants, and investment or commercial banking firms) also provide goods or services to, or have business, personal, financial or other relationships with, the Firm, its affiliates and portfolio companies. Such advisers and service providers (or their affiliates) may be investors in the Fund, affiliates of the Firm, sources of investment opportunities, co-investors, commercial counterparties and/or portfolio companies in which the Firm and/or the Fund has an investment. Accordingly, payments to such entities may indirectly benefit the Fund and/or its affiliates, including the Firm and Other Clients. No fees charged by these service providers and vendors will reduce the management fees payable to the Adviser. Furthermore, the Firm, the Other Clients and their portfolio companies and their affiliates and related parties will use the services of these Firm affiliates, including at different rates. Although the Firm believes the services provided by its affiliates are equal or better than those of third parties, the Firm directly benefits from the engagement of these affiliates, and there is therefore an inherent conflict of interest such as those described above.

Because the Firm has many different businesses, including the Blackstone Capital Markets Group, which Blackstone investment teams and portfolio companies may engage to provide underwriting and capital market advisory services, it is subject to a number of actual and potential conflicts of interest, greater regulatory oversight and more legal and contractual restrictions than that to which it would be subject if it had just one line of business. To the extent Blackstone determines appropriate, conflict mitigation strategies may be put in place with respect to a particular circumstance, such as internal information barriers or recusal, disclosure or other steps determined appropriate by the Adviser. Service providers affiliated with the Firm, which are generally expected to receive competitive market rate fees (as determined by the Adviser or its affiliates) with respect to certain Investments, include:

- **Equity Healthcare.** Equity Healthcare LLC ("Equity Healthcare") is a Blackstone affiliate that negotiates with providers of standard administrative services for health benefit plans and other related services for cost discounts, quality of service monitoring, data services and clinical consulting. Because of the combined purchasing power of its client participants, which include unaffiliated third parties, Equity Healthcare is able to negotiate pricing terms that are believed to be more favorable than those that the portfolio companies could obtain for themselves on an individual basis. The fees received by Equity Healthcare in connection with services provided to investments will not reduce the management fee payable by the Fund.
- **Refinitiv.** See "—Obligor/Portfolio Company Service Providers and Vendors."

In addition, Blackstone has acquired a 9.9% equity interest in the parent company of American International Group Inc.'s life and retirement business. As a result, in addition to the compensation Blackstone receives for providing investment management services to insurance companies in which Blackstone or an Other Blackstone Client owns an interest, in certain instances Blackstone receives additional compensation in its capacity as an indirect owner of such insurance companies and/or Other Blackstone Clients. Such arrangements may reduce the allocations of investments to the Fund, and Blackstone may be incentivized to allocate investments away from the Fund to the counterparties to such investment management arrangements or other vehicles/accounts to the extent the economic arrangements related thereto are more favorable to Blackstone relative to the terms of the Fund.

Certain Blackstone-affiliated service providers and their respective personnel will receive a management promote, an incentive fee and other performance-based compensation in respect of investments, sales or other transaction volume. Furthermore, Blackstone-affiliated service providers may charge costs and expenses based on allocable overhead associated with personnel working on relevant matters (including salaries, benefits and other similar expenses).

In connection with such relationships, Blackstone Credit and, if required by applicable law, the Board, will make determinations of competitive market rates based on its consideration of a number of factors, which are generally expected to include Blackstone Credit's experience with non-affiliated service providers, benchmarking data and other methodologies determined by Blackstone Credit to be appropriate under the circumstances (*i.e.*, rates that fall within a range that Blackstone Credit has determined is reflective of rates in the applicable market and certain similar markets, though not necessarily equal to or lower than the median rate of comparable firms). In respect of benchmarking, while Blackstone Credit often obtains benchmarking data regarding the rates charged or quoted by third parties for services similar to those provided by Blackstone Credit affiliates in the applicable market or certain similar markets, relevant comparisons may not be available for a number of reasons, including, without limitation, as a result of a lack of a substantial market of providers or users of such services or the confidential or bespoke nature of such services (*e.g.*, different assets may receive different services). In addition, benchmarking data is based on general market and broad industry overviews, rather than determined on an asset by asset basis. As a result, benchmarking data does not take into account specific characteristics of individual assets then invested in by the Fund (such as location or size), or the particular characteristics of services provided. For these reasons, such market comparisons may not result in precise market terms for comparable services. Expenses to obtain benchmarking data will be borne by the Fund, Other Clients and their respective obligors/portfolio companies and will not reduce the management fee. Finally, in certain circumstances Blackstone Credit may determine that third party benchmarking is unnecessary, either because the price for a particular good or service is mandated by law (*e.g.*, title insurance in rate regulated states) or because in Blackstone Credit's view no comparable service provider offering such good or service exists or because in Blackstone Credit's view no comparable service provider offering such good or service exists or because Blackstone Credit has access to adequate market data to make the determination without reference to third party benchmarking. For example, certain portfolio companies may enter into an employer health program arrangement or similar arrangements with Equity Healthcare, a Blackstone affiliate that negotiates with providers of standard administrative services and insurance carriers for health benefit plans and other related services for cost discounts, quality of service monitoring, data services and clinical consulting. Because of the combined purchasing power of its client participants, Equity Healthcare is able to negotiate pricing terms from providers that are believed to be more favorable than the companies could obtain for themselves on an individual basis. The payments made to Blackstone in connection with Equity Healthcare, group purchasing, insurance and benefits management will not reduce the management fee payable to the Adviser.

Advisers and service providers, or their affiliates, often charge different rates, including below-market or no fee, or have different arrangements for different types of services. With respect to service providers, for example, the fee for a given type of work may vary depending on the complexity of the matter as well as the expertise required and demands placed on the service provider. Therefore, to the extent the types of services used by the Fund and/or portfolio companies differ from those used by the Firm and its affiliates (including personnel), Blackstone Credit and/or Blackstone or their respective affiliates (including personnel) may pay different amounts or rates than those paid by the Fund and/or portfolio companies. However, Blackstone Credit and its affiliates have a longstanding practice of not entering into any arrangements with advisers or service providers that could provide for lower rates or discounts than those available to the Fund, Other Clients and/or portfolio companies for the same services. Furthermore, advisers and service providers may provide services exclusively to the Firm and its affiliates, including the Fund, Other Clients and their obligors/portfolio companies, although such advisers and service providers would not be considered employees of Blackstone or Blackstone Credit. Similarly, Blackstone, Blackstone Credit, each of their respective affiliates, the Fund, the Other Clients and/or their obligors/portfolio companies, may enter into agreements or other arrangements with vendors and other similar counterparties (whether such counterparties are affiliated or unaffiliated with the Firm) from time to time

whereby such counterparty may charge lower rates (or no fee) and/or provide discounts or rebates for such counterparty's products and/or services depending on certain factors, including volume of transactions entered into with such counterparty by the Firm, its affiliates, the Fund, the Other Clients and their obligors/portfolio companies in the aggregate.

In addition, investment banks or other financial institutions, as well as Blackstone employees, may also be investors in the Fund. These institutions and employees are a potential source of information and ideas that could benefit the Fund. Blackstone has procedures in place reasonably designed to prevent the inappropriate use of such information by the Fund.

Transactions with Portfolio Companies. The Firm and obligors/portfolio companies of the Fund and Other Clients operate in multiple industries and provide products and services to or otherwise contract with the Fund and its obligors, among others. In the alternative, the Firm may form a joint venture with such a company to implement such referral arrangement. For example, such arrangements may include the establishment of a joint venture or other business arrangement between the Firm, on the one hand, and a portfolio company of the Fund, portfolio company of an Other Client or third party, on the other hand, pursuant to which the joint venture or business provides services (including, without limitation, corporate support services, loan management services, management services, operational services, ongoing account services (e.g., interacting and coordinating with banks generally and with regard to their know your client requirements), risk management services, data management services, consulting services, brokerage services, insurance procurement, placement, brokerage and consulting services, and other services) to obligors of the Fund (and portfolio companies of Other Clients) that are referred to the joint venture or business by the Firm. The Firm, the Fund and Other Clients and their respective obligors/portfolio companies and personnel and related parties of the foregoing may make referrals or introductions to obligors/portfolio companies of the Fund or Other Clients in an effort, in part, to increase the customer base of such companies or businesses (and therefore the value of the investment held by the Fund or Other Client, which would also benefit the Firm financially through its participation in such joint venture or business) or because such referrals or introductions may result in financial benefits, such as additional equity ownership and/or milestones benefitting the referring or introducing party that are tied or related to participation by the obligors/portfolio companies of the Fund and/or of Other Clients, accruing to the party making the introduction. Such joint venture or business could use data obtained from such portfolio entities (see "Data" herein). The Fund and the common shareholders will not share in any fees, economics, equity or other benefits accruing to the Firm, Other Clients and their portfolio companies as a result of the introduction of the Fund and its obligors. Moreover, payments made to the Firm in connection with such arrangements will not reduce the management fee payable to the Adviser. There may, however, be instances in which the applicable arrangements provide that the Fund or its obligors share in some or all of any resulting financial incentives (including, in some cases, cash payments, additional equity ownership, participation in revenue share and/or milestones) based on structures and allocation methodologies determined in the sole discretion of the Firm. Conversely, where the Fund or one of its obligors is the referring or introducing party, rather than receiving all of the financial incentives (including, in some cases, additional equity ownership) for similar types of referrals and/or introductions, such financial incentives (including, in some cases, equity ownership) may be similarly shared with the participating Other Clients or their respective portfolio companies.

The Firm may also enter into commercial relationships with third party companies, including those in which the Fund considered making an investment (but ultimately chose not to pursue). For example, the Firm may enter into an introducer engagement with such company, pursuant to which the Firm introduces the company to unaffiliated third parties (which may include current and former portfolio companies and portfolio companies of Other Clients and/or their respective employees) in exchange for a fee from, or equity interest in, such company. Even though the Firm may benefit financially from this commercial relationship, the Firm will be under no obligation to reimburse the Fund for Broken Deal Expenses incurred in connection with its consideration of the prospective investment and such arrangements will not be subject to the management fee payable to the Adviser and otherwise described herein.

Additionally, the Firm or an affiliate thereof will from time to time hold equity or other investments in companies or businesses that provide services to or otherwise contract with portfolio companies. Blackstone and Blackstone Credit have in the past entered (and can be expected in the future to enter) into relationships with companies in the information technology, corporate services and related industries whereby Blackstone acquires an equity or similar interest in such company. In connection with such relationships, Blackstone and/or Blackstone Credit may also make referrals and/or introductions to portfolio companies (which may result in financial incentives (including additional equity ownership) and/or milestones benefitting Blackstone and/or Blackstone Credit that are tied or related to participation by portfolio companies). Such joint venture or business could use data obtained from obligors of the Fund and/or portfolio companies of Other Clients. (See “—Data.”) These arrangements may be entered into without the consent or direct involvement of the Fund. The Fund and the common shareholders will not share in any fees or economics accruing to Blackstone and/or Blackstone Credit as a result of these relationships and/or participation by portfolio companies.

With respect to transactions or agreements with portfolio companies (including, for the avoidance of doubt, long-term incentive plans), at times if officers unrelated to the Firm have not yet been appointed to represent a portfolio company, the Firm may negotiate and execute agreements between the Firm and/or the Fund on the one hand, and the portfolio company or its affiliates, on the other hand, without arm’s length representation of the portfolio company, which could entail a conflict of interest in relation to efforts to enter into terms that are arm’s length. Among the measures the Firm may use to mitigate such conflicts are to involve outside counsel to review and advise on such agreements and provide insights into commercially reasonable terms, or establish separate groups with information barriers within the Firm to advise on each side of the negotiation.

Related Party Leasing. Subject to applicable law, the Fund and its obligors may lease property to or from Blackstone, Other Clients and their portfolio companies and affiliates and other related parties. The leases are generally expected to, but may not always, be at market rates. Blackstone may confirm market rates by reference to other leases it is aware of in the market, which Blackstone expects to be generally indicative of market given the scale of Blackstone’s real estate business and with regard to other decisions related to such assets and investments. Blackstone can be expected to, but may not always, nonetheless have conflicts of interest in making these determinations, and with regard to other decisions related to such assets and investments. There can be no assurance that the Fund and its obligors will lease to or from any such related parties on terms as favorable to the Fund and its obligors as would apply if the counterparties were unrelated.

Cross-Guarantees and Cross-Collateralization. While Blackstone Credit generally seeks to use reasonable efforts to avoid cross-guarantees and other similar arrangements, a counterparty, lender or other participant in any transaction to be pursued by the Fund (other than alternative investment vehicles) and/or the Other Clients may require or prefer facing only one fund entity or group of entities, which may result in any of the Fund, such Other Clients, the portfolio companies, such Other Clients’ portfolio companies and/or other vehicles being jointly and severally liable for such applicable obligation (subject to any limitations set forth in the applicable partnership agreements or other governing documents thereof), which in each case may result in the Fund, such Other Clients, such portfolio companies, and/or vehicles entering into a back-to-back or other similar reimbursement agreement, subject to applicable law. In such situation, better financing terms may be available through a cross-collateralized arrangement, but it is not expected that any of the Fund or such Other Clients or vehicles would be compensated (or provide compensation to the other) for being primarily liable vis-à-vis such third party counterparty. Also, it is expected that cross-collateralization will generally occur at portfolio companies rather than the Fund for obligations that are not recourse to the Fund except in limited circumstances such as “bad boy” events. Any cross-collateralization arrangements with Other Clients could result in the Fund losing its interests in otherwise performing investments due to poorly performing or non-performing investments of Other Clients in the collateral pool or such persons otherwise defaulting on their obligations under the terms of such arrangements.

Similarly, a lender could require that it face only one portfolio company of the Fund and Other Clients, even though multiple obligors of the Fund and Other Clients benefit from the lending, which will typically result in

(i) the portfolio company facing the lender being solely liable with respect to the entire obligation, and therefore being required to contribute amounts in respect of the shortfall attributable to other portfolio companies, and (ii) obligors of the Fund and Other Clients being jointly and severally liable for the full amount of the obligation, liable on a cross-collateralized basis or liable for an equity cushion (which cushion amount may vary depending upon the type of financing or refinancing (e.g., cushions for refinancings may be smaller)). The obligor/portfolio companies of the Fund and Other Clients benefiting from a financing may enter into a back-to-back or other similar reimbursement agreements to ensure no obligor/portfolio company bears more than its pro rata portion of the debt and related obligations. It is not expected that the obligors/portfolio companies would be compensated (or provide compensation to other portfolio companies) for being primarily liable, or jointly liable, for other portfolio companies pro rata share of any financing.

Joint Venture Partners. The Fund will from time to time enter into one or more joint venture arrangements with third party joint venture partners. Investments made with joint venture partners will often involve performance-based compensation and other fees payable to such joint venture partners, as determined by the Adviser in its sole discretion. The joint venture partners could provide services similar to those provided by the Adviser to the Fund. Yet, no compensation or fees paid to the joint venture partners would reduce the management fees payable by the Fund. Additional conflicts would arise if a joint venture partner is related to the Firm in any way, such as a limited partner investor in, lender to, a shareholder of, or a service provider to the Firm, the Fund, Other Clients, or their respective obligors/portfolio companies, or any affiliate, personnel, officer or agent of any of the foregoing.

Group Procurement; Discounts. The Fund (subject to applicable law) and certain portfolio companies will enter into agreements regarding group procurement (including, but not limited to, CoreTrust, an independent group purchasing organization), benefits management, purchase of title and/or other insurance policies (which may include brokerage and/or placement thereof, and will from time to time be pooled across portfolio companies and discounted due to scale, including through sharing of deductibles and other forms of shared risk retention) from a third party or an affiliate of Blackstone Credit and/or Blackstone, and other operational, administrative or management related initiatives. The Firm will allocate the cost of these various services and products purchased on a group basis among the Fund, Other Clients and their obligors/portfolio companies. Some of these arrangements result in commissions, discounts, rebates or similar payments to Blackstone Credit and/or Blackstone or their affiliates (including personnel), or Other Clients and their portfolio companies, including as a result of transactions entered into by the Fund and its obligors and/or related to a portion of the savings achieved by the obligors. Such commissions or payment will not reduce the management fee. The Firm may also receive consulting or other fees from the parties to these group procurement arrangements. To the extent that a portfolio company of an Other Client is providing such a service, such portfolio company and such Other Client will benefit. Further, the benefits received by a particular portfolio company providing the service may be greater than those received by the Fund and its obligors receiving the service. Conflicts exist in the allocation of the costs and benefits of these arrangements, and common shareholders rely on the Adviser to handle them in its sole discretion.

Diverse Shareholder Group. The common shareholders are expected to be based in a wide variety of jurisdictions and take a wide variety of forms. The common shareholders may have conflicting investment, tax and other interests with respect to their investments in the Fund and with respect to the interests of investors in other investment vehicles managed or advised by the Adviser and Blackstone Credit that may participate in the same investments as the Fund, and investor personnel may have incentives or conflicts with respect to their investments in the Fund or Other Clients, including matters Blackstone Credit is not aware of, such as interests in Blackstone. The conflicting interests of individual common shareholders with respect to other common shareholders and relative to investors in other investment vehicles would generally relate to or arise from, among other things, the nature of investments made by the Fund and such other partnerships, the structuring or the acquisition of investments, financing, tax profile and timing of disposition of investments. As a consequence, conflicts of interest may arise in connection with the decisions made by the Adviser or Blackstone Credit, including with respect to the nature or structuring of investments that may be more beneficial for one investor

than for another investor, especially with respect to investors' individual tax situations. In addition, the Fund may make investments that may have a negative impact on related investments made by the common shareholders in separate transactions. In selecting and structuring investments appropriate for the Fund, the Adviser or Blackstone Credit will consider the investment and tax objectives of the Fund and the common shareholders (and those of investors in other investment vehicles managed or advised by the Adviser or Blackstone Credit) as a whole, not the investment, tax or other objectives of any common shareholder individually.

In addition, certain common shareholders also may be investors in Other Clients, including supplemental capital vehicles and co-investment vehicles that may invest alongside the Fund in one or more investments, consistent with applicable law and/or any applicable SEC-granted order. Common shareholders also may include affiliates of the Firm, such as Other Clients, affiliates of obligors/portfolio companies of the Fund or Other Clients, charities, foundations or other entities or programs associated with Firm personnel and/or current or former Firm employees, the Firm's senior advisors and/or operating partners and any affiliates, funds or persons may also invest in the Fund through the vehicles established in connection with the Firm's side-by-side co-investment rights, subject to applicable law, in each case, without being subject to management fees, and common shareholders will not be afforded the benefits of such arrangements. Some of the foregoing Firm related parties are sponsors of feeder vehicles that could invest in the Fund as common shareholders. The Firm related sponsors of feeder vehicles generally charge their investors additional fees, including performance based fees, which could provide the Firm current income and increase the value of its ownership position in them. The Firm will therefore have incentives to refer potential investors to these feeder vehicles. All of these Firm related shareholders will have equivalent rights to vote and withhold consents as nonrelated shareholders. Nonetheless, the Firm may have the ability to influence, directly or indirectly, these Firm related shareholders.

It is also possible that the Fund or its obligors will, in certain circumstances, be a counterparty (such as counterparties dealt with on an arm's-length basis) or participant in agreements, transactions or other arrangements with a common shareholder or an affiliate of a common shareholder (which may occur in connection with such shareholder or its affiliates making an investment in the Fund or Other Clients), including with respect to one or more investments (or types of investments). Such transactions may include agreements to pay performance fees to operating partners, a management team and other related persons in connection with the Fund's investment therein, which will reduce the Fund's returns. Such common shareholders described in the previous sentences may therefore have different information about the Firm and the Fund than common shareholders not similarly positioned. In addition, conflicts of interest may arise in dealing with any such common shareholders, and the Adviser and its affiliates may be motivated to enter into agreements, transactions or arrangements with shareholders or their affiliates in order to secure capital commitments from investors in Other Clients and may otherwise be motivated by factors other than the interests of the Fund. Similar information disparity may occur as a result of common shareholders monitoring their investments in vehicles such as the Fund differently. For example, certain common shareholders may periodically request from the Adviser information regarding the Fund, its investments and/or obligors that is not otherwise set forth in (or has yet to be set forth) in the reporting and other information required to be delivered to all common shareholders. In such circumstances, the Adviser may provide such information to such common shareholders, subject to applicable law and regulations. Unless required by applicable law, the Adviser will not be obligated to affirmatively provide such information to all common shareholders (although Blackstone Credit will generally provide the same information upon request and treat common shareholders equally in that regard). As a result, certain common shareholders may have more information about the Fund than other common shareholders, and, unless required by applicable law, the Adviser will have no duty to ensure all common shareholders seek, obtain or process the same information regarding the Fund, its investments and/or obligors. Therefore, certain common shareholders may be able to take actions on the basis of such information which, in the absence of such information, other common shareholders do not take. Furthermore, at certain times the Firm may be restricted from disclosing to the common shareholders material non-public information regarding any assets in which the Fund invests, particularly those investments in which an Other Client or portfolio company that is publicly registered co-invests with the Fund. In addition, investment banks or other financial institutions, as well as Firm personnel, may also be common shareholders. These institutions and personnel are a potential source of information and

ideas that could benefit the Fund, and may receive information about the Fund and its obligors in their capacity as a service provider or vendor to the Fund and its obligors.

Possible Future Activities. The Firm and its affiliates may expand the range of services that it provides over time. Except as provided herein, the Firm and its affiliates will not be restricted in the scope of its business or in the performance of any such services (whether now offered or undertaken in the future) even if such activities could give rise to conflicts of interest, and whether or not such conflicts are described herein. The Firm and its affiliates have, and will continue to develop, relationships with a significant number of companies, financial sponsors and their senior managers, including relationships with clients who may hold or may have held investments similar to those intended to be made by the Fund. These clients may themselves represent appropriate investment opportunities for the Fund or may compete with the Fund for investment opportunities.

Restrictions Arising under the Securities Laws. The Firm's activities and the activities of Other Clients (including the holding of securities positions or having one of its employees on the board of directors of a portfolio company) could result in securities law restrictions on transactions in securities held by the Fund, affect the prices of such securities or the ability of such entities to purchase, retain or dispose of such investments, or otherwise create conflicts of interest, any of which could have an adverse impact on the performance of the Fund and thus the return to the common shareholders.

The 1940 Act may limit the Fund's ability to undertake certain transactions with or alongside its affiliates that are registered under the 1940 Act. As a result of these restrictions, the Fund may be prohibited from executing "joint" transactions with the Fund's 1940 Act registered affiliates, which could include investments in the same portfolio company (whether at the same or different times) or buying investments from, or selling them to, Other Clients. These limitations may limit the scope of investment opportunities that would otherwise be available to the Fund.

The Fund has received an exemptive order from the SEC that permits us, among other things, to co-invest with certain other persons, including certain affiliates of the Adviser and certain funds managed and controlled by the Adviser and its affiliates, subject to certain terms and conditions.

Shareholders' Outside Activities. A common shareholder shall be entitled to and may have business interests and engage in activities in addition to those relating to the Fund, including business interests and activities in direct competition with the Fund and its obligors, and may engage in transactions with, and provide services to, the Fund or its obligors (which may include providing leverage or other financing to the Fund or its obligors as determined by the Adviser in its sole discretion). None of the Fund, any common shareholder or any other person shall have any rights by virtue of the Fund's operative documents in any business ventures of any common shareholder. The common shareholder, and in certain cases the Adviser, will have conflicting loyalties in these situations.

Insurance. The Fund will purchase, and/or bear premiums, fees, costs and expenses (including any expenses or fees of insurance brokers) for insurance to insure the Fund and the Board against liability in connection with the activities of the Fund. This includes a portion of any premiums, fees, costs and expenses for one or more "umbrella," group or other insurance policies maintained by the Firm that cover the Fund and one or more of the Other Clients, the Adviser, Blackstone Credit and/or Blackstone (including their respective directors, officers, employees, agents, representatives, independent client representative (if any) and other indemnified parties). The Adviser will make judgments about the allocation of premiums, fees, costs and expenses for such "umbrella," group or other insurance policies among the Fund, one or more Other Clients, the Adviser, Blackstone Credit and/or Blackstone on a fair and reasonable basis, subject to approval by the Board.

Additional Potential Conflicts of Interest. The officers, directors, members, managers, employees and personnel of the Adviser can be expected to may trade in securities for their own accounts, subject to restrictions and reporting requirements as may be required by law or the Firm's policies, or otherwise determined from time

to time by the Adviser. In addition, certain Other Clients may be subject to the 1940 Act or other regulations that, due to the role of the Firm, could restrict the ability of the Fund to buy investments from, to sell investments to or to invest in the same securities as, such Other Clients. Such regulations may have the effect of limiting the investment opportunities available to the Fund. Such personal securities transactions and investments will, in certain circumstances, result in conflicts of interest, including to the extent they relate to (i) a company in which the Fund holds or acquires an investment (either directly through a privately negotiated investment or indirectly through the purchase of securities or other traded instruments related thereto) and (ii) entities that have interests which are adverse to those of the Fund or pursue similar investment opportunities as the Fund. In addition, as a consequence of Blackstone's status as a public company, the officers, directors, members, managers and personnel of the Adviser may take into account certain considerations and other factors in connection with the management of the business and affairs of the Fund and its affiliates that would not necessarily be taken into account if Blackstone were not a public company. The directors of Blackstone have fiduciary duties to shareholders of the public company that may conflict with their duties to the Fund. Finally, although the Firm believes its positive reputation in the marketplace provides benefit to the Fund and Other Clients, the Adviser could decline to undertake investment activity or transact with a counterparty on behalf of the Fund for reputational reasons, and this decision could result in the Fund foregoing a profit or suffering a loss.

Proxy Voting Policies

The Board has delegated the voting of proxies for Fund securities to the Adviser pursuant to the Adviser's proxy voting guidelines. Under these guidelines, the Adviser will vote proxies related to Fund securities in the best interests of the Fund and its shareholders. A copy of the Adviser's proxy voting policy is attached as Appendix B to this Statement of Additional Information.

Information on how the Fund voted proxies (if any) relating to portfolio securities during the most recent 12-month period ended June 30 will be available without charge by calling toll-free (877) 876-1121, or on the SEC's website at <http://www.sec.gov>.

Codes of Ethics

The Fund and the Adviser have adopted codes of ethics pursuant to Rule 17j-1 under the 1940 Act. These codes govern personal trading by Fund and Adviser personnel. Among other requirements, the codes require certain persons to report certain of their personal securities transactions and holdings (in reportable securities) to the Adviser or Fund, and the Adviser and Fund are required to review such reports. The Fund's code permits the Fund's personnel to trade in securities, but prohibits insider trading and trades knowingly made within certain time frames of trades made by the Fund in the same securities. The Adviser's code permits the Adviser's personnel to trade in securities, but not to trade in securities in which the Fund invests. These codes of ethics are available on the EDGAR Database on the SEC's Web site (<http://www.sec.gov>), and copies of these codes may be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov.

PORTFOLIO TRANSACTIONS AND BROKERAGE

The Adviser is responsible for decisions to buy and sell securities for the Fund, the selection of brokers and dealers to effect the transactions and the negotiation of prices and any brokerage commissions. With respect to Secured Loans and Subordinated Loans, the Fund generally will engage in privately negotiated transactions for purchase or sale in which the Adviser will negotiate on behalf of the Fund, although a more developed market may exist or develop for certain Secured Loans and Subordinated Loans. Most of these transactions will be principal transactions at net prices for which the Fund will generally incur little or no brokerage costs. The Fund may be required to pay fees, or forgo a portion of interest and any fees payable to the Fund, to a lender selling Assignment or Participations to the Fund. The Adviser will determine the lenders from whom the Fund will purchase Assignments and Participations by considering their professional ability, level of service, relationship with the Borrower, financial condition, credit standards and quality of management. Affiliates of the Adviser may participate in the primary and secondary market for Secured Loans and Subordinated Loans. Because of certain limitations imposed by the 1940 Act, this may restrict the Fund's ability to acquire some Secured Loans and Subordinated Loans. The Adviser does not believe that this will have a material effect on the Fund's ability to acquire Secured Loans and Subordinated Loans consistent with its investment policies. Sales to dealers are effected at bid prices. The illiquidity of many Secured Loans and Subordinated Loans may restrict the ability of the Adviser to locate in a timely manner persons willing to purchase the Fund's interests in Secured Loans or Subordinated Loans at a fair price should the Fund desire to sell such interests.

With respect to fixed-income instruments and other types of securities, the Fund may (i) purchase certain money market instruments directly from an issuer, in which case no commissions or discounts are paid, (ii) purchase securities in the over-the-counter market from an underwriter or dealer serving as market maker for the securities, in which case the price includes a fixed amount of compensation to the underwriter or dealer, and (iii) purchase and sell listed securities on an exchange, which are effected through brokers who charge a commission for their services.

Payments of commissions to brokers who are affiliated persons of the Fund (or affiliated persons of such persons) will be made in accordance with Rule 17e-1 under the 1940 Act.

Commissions paid on such transactions would be commensurate with the rate of commissions paid on similar transactions to brokers that are not so affiliated.

During the fiscal year ended December 31, 2021, December 31, 2020 and December 31, 2019, the Fund paid \$50, \$0 and \$0, respectively, in brokerage commissions. During the same period, the Fund did not pay any brokerage commissions to any broker that is an affiliated person of the Fund, is an affiliated person of an affiliated person of the Fund, or has an affiliated person that is an affiliated person of the Fund or the Adviser. During the same period, the Fund did not acquire securities of its regular brokers or dealers (as defined in Rule 10b-1 under the 1940 Act) or their parent companies.

The Adviser is responsible for placing portfolio transactions and will do so in a manner deemed fair and reasonable to the Fund and not according to any formula. The primary consideration in all portfolio transactions is prompt execution of orders in an effective manner at the most favorable price. In selecting broker-dealers and in negotiating prices and any brokerage commissions on such transactions, the Adviser considers the firm's reliability, integrity and financial condition and the firm's execution capability, the size and breadth of the market for the security, the size of and difficulty in executing the order, and the best net price. There may be instances when, in the judgment of the Adviser, more than one firm can offer comparable execution services.

A commission paid to such brokers may be higher than that which another qualified broker would have charged for effecting the same transaction, provided that the Adviser determine in good faith that such commission is reasonable in terms either of the transaction or the overall responsibility of the Adviser to the Fund and its other clients and that the total commissions paid by the Fund will be reasonable in relation to the

benefits to the Fund over the long-term. The advisory fees that the Fund pays to the Adviser will not be reduced as a consequence of the Adviser's receipt of brokerage and research services. To the extent that portfolio transactions are used to obtain such services, the brokerage commissions paid by the Fund will exceed those that might otherwise be paid by an amount that cannot be presently determined. Such services generally would be useful and of value to the Adviser in serving one or more of their other clients and, conversely, such services obtained by the placement of brokerage business of other clients generally would be useful to the Adviser in carrying out their obligations to the Fund. While such services are not expected to reduce the expenses of the Adviser, the Adviser would, through use of the services, avoid the additional expenses that would be incurred if they should attempt to develop comparable information through their own staffs. Commission rates for brokerage transactions on foreign stock exchanges are generally fixed.

One or more of the other accounts that the Adviser manages may own from time to time some of the same investments as the Fund. Investment decisions for the Fund are made independently from those of such other investment companies or accounts; however, from time to time, the same investment decision may be made for more than one company or account. When two or more companies or accounts seek to purchase or sell the same securities, the securities actually purchased or sold will be allocated among the companies and accounts on a good faith equitable basis, usually on a pro rata basis, by the Adviser in its discretion in accordance with the accounts' various investment objectives. Such allocations are based upon the written procedures of the Adviser, which have been reviewed and approved by the Board. In some cases, this system may adversely affect the price or size of the position obtainable for the Fund. In other cases, however, the ability of the Fund to participate in volume transactions may produce better execution for the Fund. It is the opinion of the Board that this advantage, when combined with the other benefits available due to the Adviser's organization, outweighs any disadvantages that may be said to exist from exposure to simultaneous transactions.

While the Fund's annual portfolio turnover rate is not expected to exceed 100% under normal circumstances, it has exceeded that amount in the past and may again in the future. Portfolio turnover rate is not considered a limiting factor in the execution of investment decisions for the Fund. Because it is difficult to predict accurately portfolio turnover rates, actual turnover may be higher or lower than expected. Higher portfolio turnover results in increased Fund costs, including brokerage commissions, dealer mark-ups and other transaction costs on the sale of securities and on the reinvestment in other securities.

DESCRIPTION OF SHARES

Common Shares

The Fund holds annual meetings of shareholders and intends to do so for as long as the Common Shares are listed on a national securities exchange and such meetings are required as a condition to such listing. All Common Shares are equal as to dividends, assets and voting privileges and have no conversion, preemptive or other subscription rights. The Fund sends annual and semi-annual reports, including financial statements, to all holders of its Shares. The Prospectus contains a detailed discussion of the Common Shares.

Preferred Shares

The Fund's Amended and Restated Agreement and Declaration of Trust (the "Declaration of Trust") provides that the Board may authorize and issue Preferred Shares with rights as determined by the Board, by action of the Board without the approval of the common shareholders. Common shareholders have no preemptive right to purchase any Preferred Shares that might be issued. Whenever Preferred Shares are outstanding, common shareholders will not be entitled to receive any distributions from the Fund unless all accrued dividends on Preferred Shares have been paid, unless asset coverage (as defined in the 1940 Act) with respect to Preferred Shares would be at least 200% after giving effect to the distributions and unless certain other requirements imposed by any rating agencies rating the Preferred Shares have been met.

Other Shares

The Board (subject to applicable law and the terms of the Declaration of Trust) may authorize an offering, without the approval of the holders of either Common Shares or Preferred Shares, of other classes of shares, or other classes or series of shares, as they determine to be necessary, desirable or appropriate, having such terms, rights, preferences, privileges, limitations and restrictions as the Board see fit. The Fund currently does not expect to issue any other classes of shares, or series of shares, except for the Shares.

REPURCHASE OF COMMON SHARES

The Fund is a closed-end management investment company and as such its shareholders will not have the right to cause the Fund to redeem their shares. Instead, the Fund's Common Shares will trade in the open market at a price that will be a function of several factors, including dividend levels (which are in turn affected by expenses), NAV, dividend stability, relative demand for and supply of such shares in the market, general market and economic conditions and other factors. Because shares of a closed-end investment company may frequently trade at prices lower than NAV, the Board may consider action that might be taken to reduce or eliminate any material discount from NAV in respect of Common Shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares, or the conversion of the Fund to an open-end investment company. The Board may decide not to take any of these actions. In addition, there can be no assurance that share repurchases or tender offers, if undertaken, will reduce market discount.

Notwithstanding the foregoing, at any time when the Fund's Preferred Shares are outstanding, the Fund may not purchase, redeem or otherwise acquire any of its Common Shares unless (1) all accrued Preferred Shares dividends have been paid and (2) at the time of such purchase, redemption or acquisition, the NAV of the Fund's portfolio (determined after deducting the acquisition price of the Common Shares) is at least 200% of the liquidation value of the outstanding Preferred Shares (expected to equal the original purchase price per share plus any accrued and unpaid dividends thereon). Any service fees incurred in connection with any tender offer made by the Fund will be borne by the Fund and will not reduce the stated consideration to be paid to tendering shareholders.

Subject to its investment restrictions, the Fund may borrow to finance the repurchase of shares or to make a tender offer. Interest on any borrowings to finance share repurchase transactions or the accumulation of cash by the Fund in anticipation of share repurchases or tenders will reduce the Fund's net income. Any share repurchase, tender offer or borrowing that might be approved by the Board would have to comply with the Exchange Act, the 1940 Act and the rules and regulations thereunder.

Although the decision to take action in response to a discount from NAV will be made by the Board at the time it considers such issue, it is the Board's present policy, which may be changed by the Board, not to authorize repurchases of Common Shares or a tender offer for such shares if: (1) such transactions, if consummated, would (a) result in the delisting of the Common Shares from the New York Stock Exchange, or (b) impair the Fund's status as a regulated investment company under the Code (which would make the Fund a taxable entity, causing the Fund's income to be taxed at the corporate level in addition to the taxation of shareholders who receive dividends from the Fund), or as a registered closed-end investment company under the 1940 Act; (2) the Fund would not be able to liquidate portfolio securities in an orderly manner and consistent with the Fund's investment objectives and policies in order to repurchase shares; or (3) there is, in the board's judgment, any (a) material legal action or proceeding instituted or threatened challenging such transactions or otherwise materially adversely affecting the Fund, (b) general suspension of or limitation on prices for trading securities on the New York Stock Exchange, (c) declaration of a banking moratorium by Federal or state authorities or any suspension of payment by United States or New York banks, (d) material limitation affecting the Fund or the issuers of its portfolio securities by Federal or state authorities on the extension of credit by lending institutions or on the exchange of foreign currency, (e) commencement of war, armed hostilities or other international or national calamity directly or indirectly involving the United States, excluding the current hostilities in Iraq, Afghanistan and Pakistan, to the extent these hostilities do not materially escalate, or (f) other event or condition which would have a material adverse effect (including any adverse tax effect) on the Fund or its shareholders if shares were repurchased. The Board may in the future modify these conditions in light of experience.

The repurchase by the Fund of its shares at prices below NAV will result in an increase in the NAV of those shares that remain outstanding. However, there can be no assurance that share repurchases or tender offers at or below NAV will result in the Fund's shares trading at a price equal to their NAV. Nevertheless, the fact that the Fund's shares may be the subject of repurchase or tender offers from time to time, or that the Fund may be converted to an open-end investment company, may reduce any spread between market price and NAV that might otherwise exist.

In addition, a purchase by the Fund of its Common Shares will decrease the Fund's total assets which would likely have the effect of increasing the Fund's expense ratio. Any purchase by the Fund of its Common Shares at a time when Preferred Shares are outstanding will increase the leverage applicable to the outstanding Common Shares then remaining.

Before deciding whether to take any action if the Common Shares trade below NAV, the Board will consider all relevant factors, including the extent and duration of the discount, the liquidity of the Fund's portfolio, the impact of any action that might be taken on the Fund or its shareholders and market considerations. Based on these considerations, even if the Fund's shares should trade at a discount, the Board may determine that, in the interest of the Fund and its shareholders, no action should be taken.

TAX MATTERS

Set forth below is a discussion of the material U.S. federal income tax aspects concerning the Fund and the purchase, ownership and disposition of Common Shares. This discussion does not purport to be complete or to deal with all aspects of U.S. federal income taxation that may be relevant to common shareholders in light of their particular circumstances. Unless otherwise noted, this discussion applies only to U.S. shareholders that hold Common Shares as capital assets. A U.S. shareholder is an individual who is a citizen or resident of the United States, a U.S. corporation, a trust if it (a) is subject to the primary supervision of a court in the United States and one or more U.S. persons have the authority to control all substantial decisions of the trust or (b) has made a valid election to be treated as a U.S. person, or any estate the income of which is subject to U.S. federal income tax regardless of its source. This discussion is based upon present provisions of the Code, the regulations promulgated thereunder, and judicial and administrative ruling authorities, all of which are subject to change, or differing interpretations (possibly with retroactive effect). This discussion does not represent a detailed description of the U.S. federal income tax consequences relevant to special classes of taxpayers including, without limitation, financial institutions, insurance companies, investors in pass-through entities, U.S. shareholders whose “functional currency” is not the U.S. dollar, tax-exempt organizations, dealers in securities or currencies, traders in securities or commodities that elect mark to market treatment, or persons that will hold Common Shares as a position in a “straddle,” “hedge” or as part of a “constructive sale” for U.S. federal income tax purposes. In addition, this discussion does not address the application of the Medicare tax on net investment income or the U.S. federal alternative minimum tax. Prospective investors should consult their tax advisors with regard to the U.S. federal tax consequences of the purchase, ownership, or disposition of Common Shares, as well as the tax consequences arising under the laws of any state, foreign country or other taxing jurisdiction.

Taxation of the Fund

The Fund has elected to be treated, and intends to continue to qualify annually, as a regulated investment company (a “RIC”) under Subchapter M of the Code.

To qualify for the favorable U.S. federal income tax treatment generally accorded to RICs, the Fund must, among other things: (i) derive in each taxable year at least 90% of its gross income from (a) dividends, interest, payments with respect to securities loans and gains from the sale or other disposition of stock, securities or foreign currencies or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies; and (b) net income derived from interests in certain publicly traded partnerships that are treated as partnerships for U.S. federal income tax purposes and that derive less than 90% of their gross income from the items described in (a) above (each a “Qualified Publicly Traded Partnership”); and (ii) diversify its holdings so that, at the end of each quarter of the taxable year, (a) at least 50% of the value of the Fund’s assets is represented by cash and cash items (including receivables), U.S. government securities, the securities of other RICs and other securities, with such other securities limited, with respect to any one issuer, to an amount not greater than 5% of the value of the Fund’s total assets and not greater than 10% of the outstanding voting securities of such issuer, and (b) not more than 25% of the value of its total assets is represented by the securities (other than U.S. government securities or the securities of other RICs) of (I) any one issuer, (II) any two or more issuers that the Fund controls and that are engaged in the same, similar or related trades or businesses, or (III) any one or more Qualified Publicly Traded Partnerships.

As a RIC, the Fund generally will not be subject to U.S. federal income tax on its investment company taxable income (as that term is defined in the Code, but determined without regard to the deduction for dividends paid) and net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, that it distributes in each taxable year to its shareholders, provided that it distributes at least 90% of the sum of its investment company taxable income and its net tax-exempt income for such taxable year. The Fund distributes to its shareholders, at least annually, substantially all of its investment company taxable income and net capital gain.

Amounts not distributed on a timely basis in accordance with a calendar year distribution requirement are subject to a nondeductible 4% U.S. federal excise tax. To prevent imposition of the excise tax, the Fund must distribute during each calendar year an amount at least equal to the sum of (i) 98% of its ordinary income (not taking into account any capital gains or losses) for the calendar year, (ii) 98.2% of its capital gains in excess of its capital losses (adjusted for certain ordinary losses) for the one-year period ending October 31 of the calendar year, and (iii) any ordinary income and capital gains for previous years that were not distributed during those years. For these purposes, the Fund will be deemed to have distributed any income or gains on which it paid U.S. federal income tax.

A distribution will be treated as paid on December 31 of any calendar year if it is declared by the Fund in October, November or December with a record date in such a month and paid by the Fund during January of the following calendar year. Such distributions will be taxable to common shareholders in the calendar year in which the distributions are declared, rather than the calendar year in which the distributions are received.

If the Fund failed to qualify as a RIC or failed to satisfy the 90% distribution requirement in any taxable year, the Fund would be subject to U.S. federal income tax at regular corporate rates on its taxable income (including its net capital gain), even if such income were distributed to common shareholders, and all distributions out of earnings and profits would be taxed to common shareholders as ordinary dividend income. Such distributions generally would be eligible (i) to be treated as “qualified dividend income” in the case of individual and other noncorporate common shareholders and (ii) for the dividends received deduction in the case of corporate common shareholders. In addition, the Fund could be required to recognize unrealized gains, pay taxes and make distributions (which could be subject to interest charges) before requalifying for taxation as a RIC.

Distributions

Distributions to common shareholders of ordinary income (including “market discount” realized by the Fund on the sale of debt securities), and of net short-term capital gains, if any, realized by the Fund will generally be taxable to common shareholders as ordinary income to the extent that such distributions are paid out of the Fund’s current or accumulated earnings and profits. Distributions, if any, of net capital gains properly reported as “capital gain dividends” will be taxable as long-term capital gains, regardless of the length of time the common shareholder has owned Common Shares. A distribution of an amount in excess of the Fund’s current and accumulated earnings and profits (as determined for U.S. federal income tax purposes) will be treated by a common shareholder as a return of capital which will be applied against and reduce the common shareholder’s basis in his or her Common Shares. To the extent that the amount of any such distribution exceeds the common shareholder’s basis in his or her Common Shares, the excess will be treated by the common shareholder as gain from a sale or exchange of the Common Shares. Distributions paid by the Fund generally will not be eligible for the dividends received deduction allowed to corporations or for the reduced rates applicable to certain qualified dividend income received by non-corporate common shareholders.

Distributions will be treated in the manner described above regardless of whether such distributions are paid in cash or invested in additional Common Shares pursuant to the DRIP. Common shareholders receiving distributions in the form of additional Common Shares will be treated as receiving a distribution in the amount of cash that they would have received if they had elected to receive the distribution in cash, unless the Fund issues additional Common Shares with a fair market value equal to or greater than NAV, in which case, common shareholders will be treated as receiving a distribution in the amount of the fair market value of the distributed Common Shares. The additional Common Shares received by a common shareholder pursuant to the DRIP will have a new holding period commencing on the day following the day on which the Common Shares were credited to the common shareholder’s account.

The Fund may elect to retain its net capital gain or a portion thereof for investment and be taxed at corporate rates on the amount retained. In such case, it may designate the retained amount as undistributed capital gains in

a notice to common shareholders, who will be treated as if each received a distribution of his pro rata share of such gain, with the result that each common shareholder will (i) be required to report its pro rata share of such gain on its tax return as long-term capital gain, (ii) receive a refundable tax credit for its pro rata share of tax paid by the Fund on the gain and (iii) increase the tax basis for its Common Shares by an amount equal to the deemed distribution less the tax credit.

The Internal Revenue Service currently requires that a RIC that has two or more classes of stock allocate to each such class proportionate amounts of each type of its income (such as ordinary income and capital gains) based upon the percentage of total dividends paid to each class for the tax year. Accordingly the Fund allocates capital gain dividends, if any, between its Common Shares and Preferred Shares in proportion to the total dividends paid to each class with respect to such tax year. Common shareholders will be notified annually as to the U.S. federal tax status of distributions.

Sale or Exchange of Common Shares

Upon the sale or other disposition of Common Shares, a common shareholder will generally realize a capital gain or loss in an amount equal to the difference between the amount realized and the common shareholder's adjusted tax basis in the Common Shares sold. Such gain or loss will be long-term or short-term, depending upon the common shareholder's holding period for the Common Shares. Generally, a common shareholder's gain or loss will be a long-term gain or loss if the Common Shares have been held for more than one year. For non-corporate taxpayers, long-term capital gains are currently eligible for reduced rates of taxation.

No loss will be allowed on the sale or other disposition of Common Shares if the owner acquires (including pursuant to the DRIP) or enters into a contract or option to acquire securities that are substantially identical to such Common Shares within 30 days before or after the disposition. In such a case, the basis of the securities acquired will be adjusted to reflect the disallowed loss. Losses realized by a common shareholder on the sale or exchange of Common Shares held for six months or less are treated as long-term capital losses to the extent of any distribution of long-term capital gain received (or amounts designated as undistributed capital gains) with respect to such Common Shares.

Under U.S. Treasury regulations, if a common shareholder recognizes a loss with respect to Common Shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the Internal Revenue Service a disclosure statement on Internal Revenue Service Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Common shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

Nature of Fund's Investments

Certain of the Fund's hedging and derivatives transactions are subject to special and complex U.S. federal income tax provisions that may, among other things, (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions, (ii) convert lower-taxed long-term capital gain into higher-taxed short-term capital gain or ordinary income, (iii) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited), (iv) cause the Fund to recognize income or gain without a corresponding receipt of cash, (v) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur, (vi) adversely alter the intended characterization of certain complex financial transactions and (vii) produce income that will not be treated as qualifying income for purposes of the 90% gross income test described above.

These rules could therefore affect the character, amount and timing of distributions to common shareholders and the Fund's status as a RIC. The Fund will monitor its transactions and may make certain tax elections in order to mitigate the effect of these provisions.

Impact of Short Sales

As part of its strategy, the Fund may engage in short sales. Short sales by the Fund may affect the Fund's holding period in the Fund's investments that are related to the short sales. By affecting the holding period, the short sales may reduce the amounts of long-term capital gains realized by the Fund. This may result in a higher overall tax rate applicable to common shareholders with respect to their income from the Fund. The short sales may, in certain circumstances, also result in deemed sales by the Fund, causing the Fund to have income without cash flow. The recognition of income without cash flow may require the Fund to sell securities to generate cash to distribute to its shareholders in order to continue to qualify for the favorable tax treatment available to a RIC.

Below Investment Grade Instruments

The Fund expects to invest a substantial portion of its Managed Assets in below investment grade (high yield) instruments, commonly known as "high yield" or "junk" instruments. Investments in these types of instruments may present special tax issues for the Fund. U.S. federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless instruments, how payments received on obligations in default should be allocated between principal and income and whether exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other issues will be addressed by the Fund, to the extent necessary, to preserve its status as a RIC and to distribute sufficient income to not become subject to U.S. federal income tax.

Original Issue Discount

Investments by the Fund in debt obligations that are treated under applicable tax rules as having original issue discount (such as zero coupon securities, debt instruments with PIK interest, step-up bonds or other discount securities) will result in income to the Fund equal to the accrued original issue discount each year during which the Fund holds the securities, even if the Fund receives no corresponding cash interest payments. If the Fund purchases debt instruments as part of a package of investments where the Fund also invests in common stock, other equity securities or warrants, the Fund might be required to accrue original issue discount in an amount equal to the value of such common stock, other equity securities or warrants (even if the face amount of such debt instruments does not exceed the Fund's purchase price for such package of investments). Original issue discount is included in determining the amount of income which the Fund must distribute to maintain its qualification for the favorable U.S. federal income tax treatment generally accorded to RICs and to avoid the payment of U.S. federal income tax and the nondeductible 4% U.S. federal excise tax. Because such income may not be matched by a corresponding cash distribution to the Fund, the Fund may be required to borrow money or dispose of other securities to be able to make distributions to common shareholders.

Market Discount Securities

In general, the Fund will be treated as having acquired a security with market discount if its stated redemption price at maturity (or, in the case of a security issued with original issue discount, its revised issue price) exceeds the Fund's initial tax basis in the security by more than a statutory de minimis amount. The Fund will be required to treat any principal payments on, or any gain derived from the disposition of, any securities acquired with market discount as ordinary income to the extent of the accrued market discount, unless the Fund makes an election to accrue market discount on a current basis. If this election is not made, all or a portion of any deduction for interest expense incurred to purchase or carry a market discount security may be deferred until the Fund sells or otherwise disposes of such security.

Currency Fluctuations

Under Section 988 of the Code, gains or losses attributable to fluctuations in exchange rates between the time the Fund accrues income or receivables or expenses or other liabilities denominated in a foreign currency

and the time the Fund actually collects such income or receivables or pays such liabilities are generally treated as ordinary income or loss. Similarly, gains or losses on foreign currency, foreign currency forward contracts, certain foreign currency options or futures contracts and the disposition of debt securities denominated in foreign currency, to the extent attributable to fluctuations in exchange rates between the acquisition and disposition dates, are also treated as ordinary income or loss.

Foreign Taxes

The Fund's investment in Non-U.S. Securities may be subject to non-U.S. withholding taxes. In that case, the Fund's yield on those securities would be decreased. Common shareholders will generally not be entitled to claim a credit or deduction with respect to foreign taxes paid by the Fund.

Preferred Shares or Borrowings

If the Fund utilizes leverage through the issuance of Preferred Shares or Borrowings, it may be restricted by certain covenants with respect to the declaration of, and payment of, dividends on Common Shares in certain circumstances. Limits on the Fund's payments of dividends on Common Shares may prevent the Fund from meeting the distribution requirements described above, and may, therefore, jeopardize the Fund's qualification for taxation as a RIC and possibly subject the Fund to the 4% excise tax. The Fund will endeavor to avoid restrictions on its ability to make dividend payments.

Backup Withholding

The Fund may be required to withhold from all distributions and redemption proceeds payable to U.S. shareholders who fail to provide the Fund with their correct taxpayer identification numbers or to make required certifications, or who have been notified by the Internal Revenue Service that they are subject to backup withholding. Certain shareholders specified in the Code generally are exempt from such backup withholding. This backup withholding is not an additional tax. Any amounts withheld may be refunded or credited against the common shareholder's U.S. federal income tax liability, provided the required information is timely furnished to the Internal Revenue Service.

Foreign Shareholders

U.S. taxation of a shareholder who is a nonresident alien individual, a foreign trust or estate or a foreign corporation, as defined for U.S. federal income tax purposes (a "foreign shareholder"), depends on whether the income from the Fund is "effectively connected" with a U.S. trade or business carried on by the shareholder.

If the income from the Fund is not "effectively connected" with a U.S. trade or business carried on by the foreign shareholder, distributions of investment company taxable income will be subject to a U.S. tax of 30% (or lower treaty rate), which tax is generally withheld from such distributions. However, dividends paid by the Fund that are "interest-related dividends" or "short-term capital gain dividends" will generally be exempt from such withholding, in each case to the extent the Fund properly reports such dividends to shareholders. For these purposes, interest-related dividends and short-term capital gain dividends generally represent distributions of interest or short-term capital gains that would not have been subject to U.S. federal withholding tax at the source if received directly by a foreign shareholder, and that satisfy certain other requirements. A foreign shareholder whose income from the Fund is not "effectively connected" with a U.S. trade or business would generally be exempt from U.S. federal income tax on capital gain dividends, any amounts retained by the Fund that are designated as undistributed capital gains and any gains realized upon the sale or exchange of Common Shares.

However, a foreign shareholder who is a nonresident alien individual and is physically present in the United States for more than 182 days during the taxable year and meets certain other requirements will nevertheless be subject to a U.S. tax of 30% on such capital gain dividends, undistributed capital gains and sale or exchange gains.

If the income from the Fund is “effectively connected” with a U.S. trade or business carried on by a foreign shareholder, then distributions of investment company taxable income, any capital gain dividends, any amounts retained by the Fund that are designated as undistributed capital gains and any gains realized upon the sale or exchange of Common Shares will be subject to U.S. federal income tax at the graduated rates applicable to U.S. citizens, residents or domestic corporations. Foreign corporate shareholders may also be subject to the branch profits tax imposed by the Code.

The Fund may be required to withhold from distributions that are otherwise exempt from U.S. federal withholding tax (or taxable at a reduced treaty rate) unless the foreign shareholder certifies his or her foreign status under penalties of perjury or otherwise establishes an exemption.

The tax consequences to a foreign shareholder entitled to claim the benefits of an applicable tax treaty may differ from those described herein. Foreign shareholders are advised to consult their own tax advisors with respect to the particular tax consequences to them of an investment in the Fund.

Additional Withholding Requirements

Under Sections 1471 through 1474 of the Code (such Sections commonly referred to as “FATCA”), a 30% U.S. federal withholding tax may apply to any ordinary dividends and other distributions that the Fund pays to (i) a “foreign financial institution” (as specifically defined in the Code), whether such foreign financial institution is the beneficial owner or an intermediary, unless such foreign financial institution agrees to verify, report and disclose its United States “account” holders (as specifically defined in the Code) and meets certain other specified requirements or (ii) a non-financial foreign entity, whether such non-financial foreign entity is the beneficial owner or an intermediary, unless such entity provides a certification that the beneficial owner of the payment does not have any substantial United States owners or provides the name, address and taxpayer identification number of each such substantial United States owner and certain other specified requirements are met. In certain cases, the relevant foreign financial institution or non-financial foreign entity may qualify for an exemption from, or be deemed to be in compliance with, these rules. In addition, foreign financial institutions located in jurisdictions that have an intergovernmental agreement with the United States governing FATCA may be subject to different rules. You should consult your own tax advisor regarding FATCA and whether it may be relevant to your ownership and disposition of Common Shares.

Other Taxation

Common shareholders may be subject to state, local and foreign taxes on their Fund distributions. Common shareholders are advised to consult their own tax advisors with respect to the particular tax consequences to them of an investment in the Fund.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

A control person is any person who owns beneficially more than 25% of the voting securities of the Fund or who is otherwise deemed to “control” the Fund. Such person may be able to determine or significantly influence the outcome of matters submitted to a vote of the common shareholders. As of December 31, 2021, the Fund did not know of any person or entity who “controlled” the Fund.

A principal shareholder is any person who owns of record or is known by the Fund to own of record or beneficially 5% or more of any class of the Fund’s outstanding equity securities. As of December 31, 2021, the following persons owned beneficially more than 5% of a class of the Fund’s outstanding equity securities:

<u>Class⁽¹⁾</u>	<u>Name and Address</u>	<u>Percentage Ownership of class</u>	<u>Type of Ownership</u>
Common Shares	First Trust Portfolios L.P. 120 East Liberty Drive, Suite 400 Wheaton, Illinois 60187	11.23% ^(a)	
	First Trust Portfolios L.P. 120 East Liberty Drive, Suite 400 Wheaton, Illinois 60187		
	The Charger Corporation 120 East Liberty Drive, Suite 400 Wheaton, Illinois 60187		
Common Shares	Morgan Stanley Morgan Stanley Smith Barney LLC 1585 Broadway New York, New York 10036	10.60% ^(b)	

(a) First Trust Portfolios L.P., First Trust Advisors L.P. and The Charger Corporation filed their schedule 13G jointly and did not differentiate holdings as to each entity.

(b) Morgan Stanley and Morgan Stanley Smith Barney LLC filed their schedule 13G jointly and did not differentiate holdings as to each entity.

(1) The table above shows 5% or greater shareholders’ ownership of Shares as of December 31, 2021. The information contained in this table is based on Schedule 13G filings made on or before January 18, 2022.

As of December 31, 2021, the Trustees and officers of the Fund as a group owned less than 1% of each class of the Fund’s equity securities.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The financial statements and financial highlights dated December 31, 2020 incorporated by reference in this Statement of Additional Information have been audited by Deloitte & Touche LLP (“Deloitte”), 1601 Wewatta Street, Suite 400, Denver, CO 80202, an independent registered public accounting firm, as stated in their report appearing therein. Such financial statements are incorporated by reference in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

CUSTODIAN AND TRANSFER AGENT

The custodian of the assets of the Fund is The Bank of New York Mellon located at 240 Greenwich Street, New York, New York 10286. Computershare Inc., located at 150 Royall Street, Canton, Massachusetts 02021, serves as the Fund's transfer agent and dividend paying agent with respect to the Common Shares.

INCORPORATION BY REFERENCE

As noted above, this statement of additional information is part of a registration statement filed with the SEC. Pursuant to the final rule and form amendments adopted by the SEC on April 8, 2020, the Fund is permitted to "incorporate by reference" certain information filed with the SEC, which means that the Fund can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus, and later information that the Fund files with the SEC will automatically update and supersede this information.

The documents listed below, and any reports and other documents subsequently filed with the SEC pursuant to Rule 30(b)(2) under the 1940 Act and Sections 13(a), 13(c), 14 or 15(d) of the Exchange Act, prior to the termination of the offering will be incorporated by reference into this Prospectus and deemed to be part of this Prospectus from the date of the filing of such reports and documents:

- the Fund's Prospectus, dated January 26, 2022, filed with this statement of additional information;
- the Fund's Semi-Annual Report on Form N-CSR, filed on September 7, 2021;
- the Fund's Annual Report on Form N-CSR, filed on March 5, 2021;
- the Fund's Proxy Statement on Form DEF 14, filed on March 5, 2021; and
- the Fund's description of Common Shares on Form N-8A, filed on March 5, 2010.

You may obtain copies of any information incorporated by reference into this prospectus, at no charge, by calling toll-free (888) 777-0102 or by writing to the Fund at 620 Eighth Avenue, 47th Floor, New York, NY 10018. The Fund's periodic reports filed pursuant to Section 30(b)(2) of the 1940 Act and Sections 13 and 15(d) of the Exchange Act, as well as this Prospectus and the Statement of Additional Information, are available on the Fund's website <http://www.blackstone.com/bsl/>. In addition, the SEC maintains a website at www.sec.gov, free of charge, that contains these reports, the Fund's proxy and information statements, and other information relating to the Fund.

ADDITIONAL INFORMATION

A Registration Statement on Form N-2, including amendments thereto, relating to the Common Shares offered hereby, has been filed by the Fund with the SEC, Washington, D.C. The Prospectus and this Statement of Additional Information do not contain all of the information set forth in the Registration Statement, such as the exhibits and schedules thereto. For further information with respect to the Fund and the Common Shares offered hereby, reference is made to the Registration Statement. Statements contained in the Prospectus and this Statement of Additional Information as to the contents of any contract or other document referred to are not necessarily complete and in each instance reference is made to the copy of such contract or other document filed as an exhibit to the Registration Statement, each such statement being qualified in all respects by such reference. A copy of the Registration Statement may be inspected without charge at the SEC's principal office in Washington, D.C., and copies of all or any part thereof may be obtained from the SEC upon the payment of certain fees prescribed by the SEC.

FINANCIAL STATEMENTS

The audited financial statements and related report of Deloitte, independent registered public accounting firm, are herein incorporated by reference from the Fund's (the "Annual Report"). The Annual Report is available upon request, without charge, by calling the Fund toll-free at (844) 702-1299.

DESCRIPTION OF S&P, MOODY'S AND FITCH RATINGS*

S&P Global Ratings—A brief description of the applicable S&P Global Ratings and its affiliates (collectively, “S&P”) rating symbols and their meanings (as published by S&P) follows:

ISSUE CREDIT RATINGS

An S&P Global Ratings issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Ratings' view of the obligor's capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Issue credit ratings can be either long-term or short-term. Short-term issue credit ratings are generally assigned to those obligations considered short-term in the relevant market, typically with an original maturity of no more than 365 days. Short-term issue credit ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. S&P Global Ratings would typically assign a long-term issue credit rating to an obligation with an original maturity of greater than 365 days. However, the ratings S&P Global Ratings assigns to certain instruments may diverge from these guidelines based on market practices. Medium-term notes are assigned long-term ratings.

Long-Term Issue Credit Ratings*

Issue credit ratings are based, in varying degrees, on S&P Global Ratings' analysis of the following considerations:

- The likelihood of payment—the capacity and willingness of the obligor to meet its financial commitments on an obligation in accordance with the terms of the obligation;
- The nature and provisions of the financial obligation, and the promise we impute; and
- The protection afforded by, and relative position of, the financial obligation in the event of a bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

An issue ratings is an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both

* The ratings indicated herein are believed to be the most recent ratings available at the date of this Statement of Additional Information for the securities listed. Ratings are generally given to securities at the time of issuance. While the rating agencies may from time to time revise such ratings, they undertake no obligation to do so, and the ratings indicated do not necessarily represent ratings which would be given to these securities on the date of the Fund's fiscal year end.

senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

- “AAA” An obligation rated “AAA” has the highest rating assigned by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is extremely strong.
- “AA” An obligation rated “AA” differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitments on the obligation is very strong.
- “A” An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitments on the obligation is still strong.
- “BBB” An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor’s capacity to meet its financial commitments on the obligation.
- “BB,” “B,” “CCC,” “CC,” and “C” Obligations rated “BB,” “B,” “CCC,” “CC,” and “C” are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.
- “BB” An obligation rated “BB” is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor’s inadequate capacity to meet its financial commitments on the obligation.
- “B” An obligation rated “B” is more vulnerable to nonpayment than obligations rated “BB”, but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitments on the obligation.
- “CCC” An obligation rated “CCC” is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.
- “CC” An obligation rated “CC” is currently highly vulnerable to nonpayment. The “CC” rating is used when a default has not yet occurred, but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.
- “C” An obligation rated “C” is currently highly vulnerable to nonpayment and the obligation is expected to have lower relative seniority or

lower ultimate recovery compared with obligations that are rated higher.

“D” An obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring.

*PLUS (+) OR MINUS (-) Ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

Short-Term Issue Credit Ratings

“A-1” A short-term obligation rated “A-1” is rated in the highest category by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitments on these obligations is extremely strong.

“A-2” A short-term obligation rated “A-2” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitments on the obligation is satisfactory.

“A-3” A short-term obligation rated “A-3” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor’s capacity to meet its financial commitments on the obligation.

“B” A short-term obligation rated “B” is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor’s inadequate capacity to meet its financial commitments.

“C” A short-term obligation rated “C” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

“D” A short-term obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating

category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring.

Active Qualifiers (Currently applied and/or outstanding)

S&P Global Ratings uses the following qualifiers that limit the scope of a rating. The structure of the transaction can require the use of a qualifier such as a “p” qualifier, which indicates the rating addresses the principal portion of the obligation only. A qualifier appears as a suffix and is part of the rating.

Federal deposit insurance limit:

“L” qualifier Ratings qualified with “L” apply only to amounts invested up to federal deposit insurance limits.

Principal: “p” qualifier This suffix is used for issues in which the credit factors, the terms, or both, that determine the likelihood of receipt of payment of principal are different from the credit factors, terms or both that determine the likelihood of receipt of interest on the obligation. The “p” suffix indicates that the rating addresses the principal portion of the obligation only and that the interest is not rated.

Preliminary Ratings:

“prelim” qualifier Preliminary ratings, with the “prelim” suffix, may be assigned to obligors or obligations, including financial programs, in the circumstances described below. Assignment of a final rating is conditional on the receipt by S&P Global Ratings of appropriate documentation. S&P Global Ratings reserves the right not to issue a final rating. Moreover, if a final rating is issued, it may differ from the preliminary rating.

- Preliminary ratings may be assigned to obligations, most commonly structured and project finance issues, pending receipt of final documentation and legal opinions.
- Preliminary ratings may be assigned to obligations that will likely be issued upon the obligor’s emergence from bankruptcy or similar reorganization, based on late-stage reorganization plans, documentation and discussions with the obligor. Preliminary ratings may also be assigned to the obligors. These ratings consider the anticipated general credit quality of the reorganized or post-bankruptcy issuer as well as attributes of the anticipated obligation(s).
- Preliminary ratings may be assigned to entities that are being formed or that are in the process of being independently established when, in S&P Global Ratings’ opinion, documentation is close to final. Preliminary ratings may also be assigned to the obligations of these entities.

- Preliminary ratings may be assigned when a previously unrated entity is undergoing a well-formulated restructuring, recapitalization, significant financing or other transformative event, generally at the point that investor or lender commitments are invited. The preliminary rating may be assigned to the entity and to its proposed obligation(s). These preliminary ratings consider the anticipated general credit quality of the obligor, as well as attributes of the anticipated obligation(s), assuming successful completion of the transformative event. Should the transformative event not occur, S&P Global Rating would likely withdraw these preliminary ratings.
- A preliminary recovery rating may be assigned to an obligation that has a preliminary issue credit rating.

Termination Structures: “t” qualifier . . . This symbol indicates termination structures that are designed to honor their contracts to full maturity or, should certain events occur, to terminate and cash settle all their contracts before their final maturity date.

Counterparty Instrument Rating:
 “cir” qualifier This symbol indicates a Counterparty Instrument Rating (CIR), which is a forward-looking opinion about the creditworthiness of an issuer in a securitization structure with respect to a specific financial obligation to a counterparty (including interest rate swaps, currency swaps, and liquidity facilities). The CIR is determined on an ultimate payment basis; these opinions do not take into account timeliness of payment.

Inactive Qualifiers (No longer applied or outstanding)

Contingent upon final documentation:
 “*” inactive qualifier This symbol indicated that the rating was contingent upon S&P Global Ratings’ receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flows. Discontinued use in August 1998.

Termination of obligation to tender:
 “c” inactive qualifier This qualifier was used to provide additional information to investors that the bank may terminate its obligation to purchase tendered bonds if the long-term credit rating of the issuer was lowered to below an investment-grade level and/or the issuer’s bonds were deemed taxable. Discontinued use in January 2001.

U.S. direct government securities:
 “G” inactive qualifier The letter “G” followed the rating symbol when a fund’s portfolio consisted primarily of direct U.S. government securities.

Public Information Ratings:
 “pi” qualifier This qualifier was used to indicate ratings that were based on an analysis of an issuer’s published financial information, as well as additional information in the public domain. Such ratings did not, however, reflect in-depth meetings with an issuer’s management and

therefore could have been based on less comprehensive information than ratings without a “pi” suffix. Discontinued use as of December 2014 and as of August 2015 for Lloyd’s Syndicate Assessments.

Provisional Ratings:

“pr” inactive qualifier The letters “pr” indicate that the rating was provisional. A provisional rating assumed the successful completion of a project financed by the debt being rated and indicates that payment of debt service requirements was largely or entirely dependent upon the successful, timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, made no comment on the likelihood of or the risk of default upon failure of such completion.

Quantitative analysis of public information:

“q” inactive qualifier A “q” subscript indicates that the rating is based solely on quantitative analysis of publicly available information. Discontinued use in April 2001.

Extraordinary risks:

“r” inactive qualifier The “r” modifier was assigned to securities containing extraordinary risks, particularly market risks, that are not covered in the credit rating. The absence of an “r” modifier should not be taken as an indication that an obligation would not exhibit extraordinary non-credit related risks. S&P Global Ratings discontinued the use of the “r” modifier for most obligations in June 2000 and for the balance of obligations (mainly structured finance transactions) in November 2002.

Moody’s Investors Service, Inc.—A brief description of the applicable Moody’s Investors Service, Inc. (“Moody’s”) rating symbols and their meanings (as published by Moody’s) follows:

LONG-TERM OBLIGATIONS RATINGS

Ratings assigned on Moody’s global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.¹²

Moody’s differentiates structured finance ratings from fundamental ratings (*i.e.*, ratings on nonfinancial corporate, financial institution, and public sector entities) on the global long-term scale by adding (sf) to all

¹ For certain preferred stock and hybrid securities in which payment default events are either not defined or do not match investors’ expectations for timely payment, long-term and short-term ratings reflect the likelihood of impairment and financial loss in the event of impairment.

² Debts held on the balance sheets of official sector institutions – which include supranational institutions, central banks and certain government-owned or controlled banks – may not always be treated the same as debts held by private investors and lenders. When it is known that an obligation is held by official sector institutions as well as other investors, a rating (short-term or long-term) assigned to that obligation reflects only the credit risks faced by non-official sector investors.

structured finance ratings.³ The addition of (sf) to structured finance ratings should eliminate any presumption that such ratings and fundamental ratings at the same letter grade level will behave the same. The (sf) indicator for structured finance security ratings indicates that otherwise similarly rated structured finance and fundamental securities may have different risk characteristics. Through its current methodologies, however, Moody's aspires to achieve broad expected equivalence in structured finance and fundamental rating performance when measured over a long period of time.

Global Long-Term Rating Scale:

“Aaa”	Obligations rated “Aaa” are judged to be of the highest quality, subject to the lowest level of credit risk.
“Aa”	Obligations rated “Aa” are judged to be of high quality and are subject to very low credit risk.
“A”	Obligations rated “A” are judged to be upper-medium grade and are subject to low credit risk.
“Baa”	Obligations rated “Baa” are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.
“Ba”	Obligations rated “Ba” are judged to be speculative and are subject to substantial credit risk.
“B”	Obligations rated “B” are considered speculative and are subject to high credit risk.
“Caa”	Obligations rated “Caa” are judged to be speculative of poor standing and are subject to very high credit risk.
“Ca”	Obligations rated “Ca” are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.
“C”	Obligations rated “C” are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Additionally, a “(hyb)” indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms.*

³ Like other global scale ratings, (sf) ratings reflect both the likelihood of a default and the expected loss suffered in the event of default. Ratings are assigned based on a rating committee's assessment of a security's expected loss rate (default probability multiplied by expected loss severity), and may be subject to the constraint that the final expected loss rating assigned would not be more than a certain number of notches, typically three to five notches, above the rating that would be assigned based on an assessment of default probability alone. The magnitude of this constraint may vary with the level of the rating, the seasoning of the transaction, and the uncertainty around the assessments of expected loss and probability of default.

* By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

MEDIUM-TERM NOTE PROGRAM RATINGS

Moody's assigns provisional ratings to medium-term note (MTN) programs and definitive ratings to the individual debt securities issued from them (referred to as drawdowns or notes).

MTN program ratings are intended to reflect the ratings likely to be assigned to drawdowns issued from the program with the specified priority of claim (*e.g.* senior or subordinated). To capture the contingent nature of a program rating, Moody's assigns provisional ratings to MTN programs. A provisional rating is denoted by a (P) in front of the rating.

The rating assigned to a drawdown from a rated MTN or bank/deposit note program is definitive in nature, and may differ from the program rating if the drawdown is exposed to additional credit risks besides the issuer's default, such as links to the defaults of other issuers, or has other structural features that warrant a different rating. In some circumstances, no rating may be assigned to a drawdown.

Moody's encourages market participants to contact Moody's Ratings Desks or visit moodys.com directly if they have questions regarding ratings for specific notes issued under a medium-term note program. Unrated notes issued under an MTN program may be assigned an NR (not rated) symbol.

Short-Term Rating Definitions:

Short-term ratings are assigned for obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.⁴⁵

Moody's employs the following designations to indicate the relative repayment ability of rated issuers:

"P-1"	Ratings of Prime-1 reflect a superior ability to repay short-term obligations.
"P-2"	Ratings of Prime-2 reflect a strong ability to repay short-term obligations.
"P-3"	Ratings of Prime-3 reflect an acceptable ability to repay short-term obligations.
"NP"	Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

⁴ For certain preferred stock and hybrid securities in which payment default events are either not defined or do not match investors' expectations for timely payment, long-term and short-term ratings reflect the likelihood of impairment and financial loss in the event of impairment.

⁵ Debts held on the balance sheets of official sector institutions – which include supranational institutions, central banks and certain government-owned or controlled banks – may not always be treated the same as debts held by private investors and lenders. When it is known that an obligation is held by official sector institutions as well as other investors, a rating (short-term or long-term) assigned to that obligation reflects only the credit risks faced by non-official sector investors.

Fitch Ratings, Inc.—A brief description of the applicable Fitch Ratings, Inc. (“Fitch”) ratings symbols and meanings (as published by Fitch) follows:

INTERNATIONAL ISSUER AND CREDIT RATING SCALES

The Credit Rating Scales (those featuring the symbols “AAA”-“D” and “F1”-“D”) are used for debt and financial strength ratings. The below section describes their use for issuers and obligations in corporate, public, structured and infrastructure and project finance debt markets.

Long-Term Ratings Scales—Issuer Credit Ratings Scales

Rated entities in a number of sectors, including financial and non-financial corporations, sovereigns, insurance companies and certain sectors within public finance, are generally assigned Issuer Default Ratings (IDRs). IDRs are also assigned to certain entities or enterprises in global infrastructure, project finance and public finance. IDRs opine on an entity’s relative vulnerability to default (including by way of a distressed debt exchange) on financial obligations. The threshold default risk addressed by the IDR is generally that of the financial obligations whose non-payment would best reflect the uncured failure of that entity. As such, IDRs also address relative vulnerability to bankruptcy, administrative receivership or similar concepts.

In aggregate, IDRs provide an ordinal ranking of issuers based on the agency’s view of their relative vulnerability to default, rather than a prediction of a specific percentage likelihood of default.

- “AAA” **Highest credit quality.** “AAA” ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.
- “AA” **Very high credit quality.** “AA” ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
- “A” **High credit quality.** “A” ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.
- “BBB” **Good credit quality.** “BBB” ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.
- “BB” **Speculative.** “BB” ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial flexibility exists that supports the servicing of financial commitments.
- “B” **Highly speculative.** “B” ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

- “CCC” **Substantial credit risk.** Default is a real possibility.
- “CC” **Very high levels of credit risk.** Default of some kind appears probable.
- “C” **Near default.** A default or default-like process has begun, or the issuer is in standstill, or for a closed funding vehicle, payment capacity is irrevocably impaired. Conditions that are indicative of a “C” category rating for an issuer include: a. the issuer has entered into a grace or cure period following non-payment of a material financial obligation; b. the issuer has entered into a temporary negotiated waiver or standstill agreement following a payment default on a material financial obligation; c. the formal announcement by the issuer or their agent of a distressed debt exchange; d. a closed financing vehicle where payment capacity is irrevocably impaired such that it is not expected to pay interest and/or principal in full during the life of the transaction, but where no payment default is imminent.
- “RD” **Restricted default.** “RD” ratings indicate an issuer that in Fitch Ratings’ opinion has experienced: a. an uncured payment default or distressed debt exchange on a bond, loan or other material financial obligation, but b. has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, and c. has not otherwise ceased operating. This would include: i. the selective payment default on a specific class or currency of debt; ii. the uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation; iii. the extension of multiple waivers or forbearance periods upon a payment default on one or more material financial obligations, either in series or in parallel; ordinary execution of a distressed debt exchange on one or more material financial obligations.
- “D” **Default.** “D” ratings indicate an issuer that in Fitch’s opinion has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure or that has otherwise ceased business.

Default ratings are not assigned prospectively to entities or their obligations; within this context, non-payment on an instrument that contains a deferral feature or grace period will generally not be considered a default until after the expiration of the deferral or grace period, unless a default is otherwise driven by bankruptcy or other similar circumstance, or by a distressed debt exchange.

In all cases, the assignment of a default rating reflects the agency’s opinion as to the most appropriate rating category consistent with the rest of its universe of ratings, and may differ from the definition of default under the terms of an issuer’s financial obligations or local commercial practice.

Note: The modifiers “+” or “-” may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to ‘AAA’ ratings and ratings below the ‘CCC’ category.

Limitations of the Issuer Credit Rating Scale:

Specific limitations relevant to the issuer credit rating scale include:

- The ratings do not predict a specific percentage of default likelihood or failure likelihood over any given time period.
- The ratings do not opine on the market value of an issuer’s securities or stock, or the likelihood that this value may change.
- The ratings do not opine on the liquidity of an issuer’s securities or stock.
- The ratings do not opine on the possible loss severity on an obligation should an issuer (or an obligation with respect to structured finance transactions) default, except in the following cases:
- Ratings assigned to individual obligations of issuers in corporate finance, banks, non-bank financial institutions, insurance and covered bonds.
- In limited circumstances for U.S. public finance obligations where Chapter 9 of the Bankruptcy Code provides reliably superior prospects for ultimate recovery to local government obligations that benefit from a statutory lien on revenues or during the pendency of a bankruptcy proceeding under the Code if there is sufficient visibility on potential recovery prospects.
- The ratings do not opine on the suitability of an issuer as a counterparty to trade credit.
- The ratings do not opine on any quality related to an issuer’s business, operational or financial profile other than the agency’s opinion on its relative vulnerability to default.

Ratings assigned by Fitch Ratings articulate an opinion on discrete and specific areas of risk. The above list is not exhaustive, and is provided for the reader’s convenience.

Short-Term Ratings—Short-Term Ratings Assigned to Issuers and Obligations

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as “short term” based on market convention. Typically, this means up to 13 months for corporate, sovereign, and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

- “F1” **Highest short-term credit quality.** Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.
- “F2” **Good short-term credit quality.** Good intrinsic capacity for timely payment of financial commitments.
- “F3” **Fair short-term credit quality.** The intrinsic capacity for timely payment of financial commitments is adequate.
- “B” **Speculative short-term credit quality.** Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

- “C” **High short-term default risk.** Default is a real possibility.
- “RD” **Restricted default.** Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.
- “D” **Default.** Indicates a broad-based default event for an entity, or the default of a short-term obligation.

Limitations of the Short-Term Ratings Scale:

Specific limitations relevant to the Short-Term Ratings scale include:

- The ratings do not predict a specific percentage of default likelihood or failure likelihood over any given time period.
- The ratings do not opine on the market value of an issuer’s securities or stock, or the likelihood that this value may change.
- The ratings do not opine on the liquidity of an issuer’s securities or stock.
- The ratings do not opine on the possible loss severity on an obligation should an issuer (or an obligation with respect to structured finance transactions) default, except in the following cases:
- Ratings assigned to individual obligations of issuers in corporate finance, banks, non-bank financial institutions, insurance and covered bonds.
- In limited circumstances for U.S. public finance obligations where Chapter 9 of the Bankruptcy Code provides reliably superior prospects for ultimate recovery to local government obligations that benefit from a statutory lien on revenues or during the pendency of a bankruptcy proceeding under the Code if there is sufficient visibility on potential recovery prospects.
- The ratings do not opine on any quality related to an issuer’s business, operational or financial profile other than the agency’s opinion on its relative vulnerability to default.

Ratings assigned by Fitch articulate an opinion on discrete and specific areas of risk. The above list is not exhaustive, and is provided for the reader’s convenience.

PROXY VOTING POLICIES AND PROCEDURES OF THE ADVISER

The Fund has delegated the voting of proxies for Fund securities to the Adviser pursuant to the Adviser's proxy voting guidelines. Under these guidelines, the Adviser will vote proxies related to Fund securities in the best interests of the Fund and common shareholders. Set forth below is a copy of the Adviser's proxy voting policy.

Information on how the Fund voted proxies (if any) relating to portfolio securities during the most recent 12-month period ended June 30 will be reported on Form N-PX.

Adviser Proxy Voting Policies and Procedures

By virtue of Blackstone Credit's relationship as general partner or investment manager of funds, collateralized loan obligation vehicles, separately managed accounts, and registered funds ("**Clients**"), the Firm has proxy voting authority with respect to Client securities. When voting proxies on behalf of Clients, Blackstone Credit's overall objective is to vote proxies in the best interest of the Clients and, in so doing, to maximize the value of the investments made by the Clients taking into consideration the Clients' investment horizons and other relevant factors.

This document sets forth Blackstone Credit's policies and procedures that are designed to meet these overall objectives. As described below, the Firm's policies and procedures address the following areas:

- The personnel responsible for monitoring corporate actions, deciding how to vote proxies and confirming that proxies are submitted in a timely manner;
- The basis on which decisions are made regarding whether and how to vote proxies depending on the nature of the matter at issue;
- The approach to addressing material conflicts of interest that may arise between Blackstone Credit and the Clients when voting proxies and how the Firm resolves those conflicts in the best interest of the Clients;
- The means by which the Clients and their investors may obtain information about proxy voting; and
- The books and records that Blackstone Credit retains in connection with proxy voting.

While Blackstone Credit endeavors to follow these policies and procedures in all situations, special circumstances may arise from time to time that warrant a deviation. In addition, Blackstone Credit will apply its proxy voting policies and procedures to votes cast with respect to publicly traded companies and, to the extent applicable, to analogous actions taken with respect to investments made in private companies.

General Procedures

Monitoring Corporate Actions

The Clients that Blackstone Credit manages generally make a limited number of investments in equity securities. When the Firm receives proxy voting materials (or similar voting/solicitation notices), they are initially transmitted by the company's corporate secretary or transfer agent to the Employee who is designated to receive notices in the definitive documentation governing the relevant Client's investment, if any (the "**Proxy Recipient**"). The Proxy Recipient must inform the Head of Middle Office and Operations ("**Head of MOOG**") of such receipt and review the materials, determine which Client(s) hold the securities and confirm the number of securities with the Head Trader and the Head of MOOG. The Proxy Recipient will also consult the relevant Portfolio Manager(s) of each Client that holds the securities that are the subject of the proxy vote. The Proxy Recipient will monitor the voting deadline to confirm that the deadline for the response is met.

Determination of Voting Decisions

Decisions on how to vote a proxy generally are made by the relevant Portfolio Manager. The Portfolio Manager and the members of the investment team covering the applicable security often have the most intimate knowledge of both a company's operations and the potential impact of a proxy vote's outcome. Where appropriate, the Portfolio Manager or a member of the investment team may consult with the Chief Compliance Officer or Chief Legal Officer and the members of the applicable Investment Committee regarding decisions and completion of the proxy material. Decisions are based on a number of factors that may vary depending on a proxy's subject matter, but are guided by the general policies described in this document. In addition, Blackstone Credit may determine not to vote a proxy after consideration of the vote's expected benefit to Clients and the cost of voting the proxy.¹

Communication of Decision

After making a decision to vote a proxy and determining how to vote the proxy, the Portfolio Manager or a member of the investment team covering the security will then submit the vote. The Portfolio Manager or such investment team member will send completed copies of the proxy materials to the Proxy Recipient and the Head of MOOG. The procedures for voting proxies may vary, and can include electronic voting, forwarding voting instructions to the custodian or voting proxies forwarded by the custodian.

Providing Proxy Voting Information to Clients

Blackstone Credit acknowledges that its investors have a right to information about how the Firm votes Client proxies, and Blackstone Credit will make information available on request. The Firm also will make a copy of these policies and procedures available on request. When an investor makes a request about a particular vote, Blackstone Credit usually will provide the following information: (1) the date of the vote; (2) a brief description of the matter voted on; (3) how (or whether) Blackstone Credit cast the vote on the matter; and (4) any other reasonable information a limited partner might request. Proxy voting information and the procedure for obtaining such information is included in Blackstone Credit's Form ADV, which is available to each investor.

Books and Records

Blackstone Credit must maintain the following additional records relating to proxy voting, which must be maintained by MOOG, or other applicable individual or group, as indicated, in an easily accessible place for five years from the end of the fiscal year during which the last entry was made on such record, the first two years of which in Blackstone Credit's offices.

- A copy of these proxy voting policies and procedures (maintained by the Blackstone Credit Legal Compliance Department);
- A copy of each proxy statement received by Blackstone Credit regarding Client securities;
- A record of each vote cast by Blackstone Credit on behalf of a Client;
- A copy of all memoranda or similar documents created by Blackstone Credit that were material to making a decision on the voting of Client securities or that memorialize the basis for that decision (maintained by relevant deal team members); and
- A copy of each written request by an investor for information on how Blackstone Credit voted proxies on behalf of a Client, and a copy of any written response by Blackstone Credit to any request (written or oral) by an investor for information on how Blackstone Credit voted proxies on behalf of the Client (maintained by the Investor Relations & Business Development group, "IRBD").

¹ In determining whether the cost of voting a proxy outweighs its expected benefit to Clients, the relevant Portfolio Manager may consider factors such as (1) the subject matter of the vote; (2) the additional length of time that Blackstone Credit anticipates holding the investment; and (3) logistical issues associated with voting proxies for foreign companies.

Blackstone Credit may satisfy the requirement to maintain copies of proxy statements received and a record of votes cast on behalf of the Clients by relying on third parties to make and retain, on behalf of Blackstone Credit, a copy of such proxy statements and voting records, provided that Blackstone Credit has obtained an undertaking from the third party to provide a copy of the proxy statements and voting records promptly upon request. Blackstone Credit also may satisfy the requirement to maintain copies of proxy statements by relying on its ability to obtain a copy of a proxy statement from the SEC's EDGAR system (to the extent that such proxy statements are available through the EDGAR system).

Proxy Voting Records

You may obtain information, without charge, regarding how we voted proxies with respect to our portfolio securities by making a written request for proxy voting information to: Chief Compliance Officer, Blackstone Liquid Credit Strategies LLC, 345 Park Avenue, 31st Floor, New York, NY 10154.
